EDITORIAL PREFACE

The writers of this series of volumes on the variants forms of religious life in India are governed in their work by two impelling motives.

They endeavour to work in the sincere and sympathetic spirit of science. They desire to understand the perplexingly involved developments of thought and life in India and dispassionately to estimate their value. They recognize the futility of any such attempt to understand and evaluate, unless it is grounded in a thorough historical study of the phenomena investigated. lu recognizing this fact they do no more than share what is common ground among all medern students of religion of any repute flut thay also believe that it is necessary to sot the practical side of each system in living relation to the beliefs and the literature, and that, in this regard, the close and direct contact which they have each had with Indian religious life ought to prove a source of valuable light. For, until a clear understanding has been gained of the practical influence exerted by the habits of worship, by the practice of the ascetic, devotional, or occult discipline, by the social organization and by the family system, the real impact of the faith upon the life of the individual and the community cannot be estimated; and, without the advantage of extended personnl intercourse, a trustworthy account of the religious experience of a community can scarcely be achieved by even the most careful student.

H. They seek to set each form of Indian religion by the side of Christianity In such n way that the relationship may stand out clear. Assus Christ has become to them the light of all their seeing, and they believe Him destined to be the light of the world. They are-persuaded that sooner or later the age-long quest of the Indian spirit for religious truth and power will find in Him at once its goal and a new starting point, and they will be content if the preparation of this sories contributes in the smallest degree to hasten this consummation. If there be readers to whom this motive is unwelcome, they may be reminded that no man approaches the study of a roligion without religious convictions, either positive or negative: for both reader and writer, therefore, it is better that these should be explicitly stated at the outset. Moreover, even a complete lack of sympathy with the motive here acknowledged need not diminish a reader's interest in following an honest and eareful attempt to bring the religious of India into comparison with the religion which to-day is their only possible rival, and to which they largely owe their present noticeable and significant revival.

It is possible that to some minds there may seem to be a measure of incompatibility between these two motives. The writers, however, feel otherwise. For them the second motive reinforces the first: for they have found that he who would lead others into a new faith must first of all undorstand the faith that is theirs already—understand it, moreover, sympathetically, with a mind quick to note not its weaknesses alone but that in it which has enabled it to survive and has given it its power over the hearts of those who profess it.

The duty of the Editors of the series is limited to seeing that the volumes are in general harmony with the principles here described. Each writer is alone responsible for the opinions expressed in his volume, whether in regard to Indian religious or to Christianity. THE RELIGIOUS QUEST OF

FOREWORD

Two things have attracted the author to the study of the Rigreda; first, the living interest which has lured him on over since he began the study of Vedie in 1889 with Prof. Weber of Berlin, after previously reading Sanskrit with Prof. MacDonell of Oxford; and secondly; the fact that he has had the advantage of living nearly thirty years in the Punjab, the very habitat of the Vedie Indians.

The religion of the Rigveda in the form in which it was professed and practised is, of course, dead, and yet, in a sense, it still lives. As the Old Testament has fulfilled itself in three monotheisms, Judaism, Christianity and Islam, so the Rigveda has fulfilled itself in the popular polytheism, the philosophic pantheism and the occasional monotheism of India. If it is impossible to understand present day Hinduism without a knowledge of the Rigveda, the reverse is also true that it is impossible to understand the Rigveda without a knowledge of modern Hinduism; for very many of the dectrines and rites of Hinduism point back to the Rigveda as their fountain-head and as such are survivals of that ancient time.

While it is true that the Rigredie gods have passed into the twilight, yot the Rigreda itself abides as a permanent source of material for the reconstruction of the ancient religion. As the New Testament reveals the nature of early Christianity, and the Quran that of early Islam, so does the Rigreda that of early Vodism. Two things are necessary as an adequate equipment

for the reconstruction of Vedic religion - a knowledge of the Rigvedic text and a knowledge of the Rigvedic land. The writer can claim only a moderate acquaintance with the text of the Rigveda, in this respect falling short of the linguistic equipment possessed by the great Vedic scholars of the world. On the other hand, the fact of residence in the Punjab for nearly thirty years ought to yield some fruit. For as Palestine is sometimes called 'the fifth Gospel', so the Punjab might well be called 'the fifth Veda'. Its fauna and flora must be essentially the same to-day as they were 1000 n.c. So with the general look of the land - great rivers threadlng their way through great plains, and to the north the snow-capped Himalayas. During the lapse of 3000 years the climatic and moteoric conditions which rule to-day can hardly have changed very much, such as the great heat of the pre-monsoon season, the dust storms, the monsoon rains, and the feverish time immediately following the close of the monsoon.

Then as regards the blood of Aryan and Dasyu, the ancient inhabitants of the land, it is found commingled in the present-day population of the Punjab. The Käshmtri and Punjabi Brähmans represent probably the purest Aryan blood; but the whole population, like every other race on the face of the earth, is to be regarded as more or less a mixture. Thus the Vedic antithesis between Aryan and Dasyu has been resolved into a higher synthesis consisting of the blending of the two races. To dwell in living contact, then, with a people whose forebears were Aryans or Dasyus or both is to occupy a certain vantage ground for the study of the earliest literature produced by their ancestors.

Again, the present-day Punjabi, the dialect of the Punjab, is undoubtedly a direct descendant of the earliest

Vedic dialect spoken in these parts. The Punjabi vocabulary is large, and it is highly probable that a critical examination of it on the part of a competent scholar would throw light on some of the obscure words of the Rigveda. The Rigvedie age, then, has projected down to the present time (of course in blended and modified forms) its language, blood and religious conceptions. To be for years in living contact with these survivals of the past is an advantage which the writer has enjoyed for the study of the Rigveda. Whether he has made good use of his opportunities or not is for the expert reader to judge.

It was in 1909 that the present writer promised to prepare this book for *The Religious Quest of India Series.* He has often been tempted to drop the task as he came to realize more fully its magnitude and difficulty. It has been due to the steady encouragement of Dr. J. N. FARQUHAR, his colleague on the editorial staff, that this work has ever seen the light. An unusually long furlough in the U. S. A. (1919-1929) made possible continuous work at Ithaca, New York, where the writer enjoyed the uso of the Cornell University Library. His thanks are due to the Librarian and staff for the many courtesics received. His thanks are also due to A. C. WOOLNER, ESq., M.A., Principal of the Oriental College, Lahoro, for looking over several

THE RELIGION OF THE RIGVEDA

PART A. INTRODUCTION

CHAPTER I.

THE ANTECEDENTS OF THE RIGVEDIC AGE

1. INDO-EUROPEAN PERIOD

a) The Rigvedo reflects tha lifa of certain Aryan tribes living in the Punjab. We may think of them as occupying the fertile territory of the northern Punjab extending from the Kubul volley to the Jumna, and also os following the banks of the great rivers some distance southward toward the sec. The most striking features of their home were the mountains on the north and the five (or soven) rivers which rising in the mountains flowed dewnward through the lond. The oboriginal inhabitonts were called Dssyus, ond the Rigveda is dominated throughout by the antithesis botween Aryon end Dosyu. The Dasyus of the Punjob wore connected othnologically with other aborigines of India. But who were the Aryans? Unlike the Hebrows, who ofter their settlement in Palestino retained lively traditions of their escape from Egypt and their journey through the wilderness, tha Aryan tribes of the Punjab, although aware of the existence of oncient priests and poets, yet betray no slightest consciousness that they had not always lived in the Punjab. So far as their testimony is concerned, we might think of them as outochthonous, But there are reasons for holding that the Aryan tribes came into India as strangers from the north-west. For we see them pushing their way steadily eastward, and the Ganges river, mentioned only once or twice in the RIK, is still before them on their horizon. Then, too, their names for year undergo a significant shift, which can be explained only through change of habitat. When they lived in a

languages:-

colder climate ten years were called 'ten winters' (hima); in the Punjab, where the cold season was like their former autumn (iarad), ten years would be 'ten autumns'; and later on in the 'middle land', where the characteristic season is the rains (rarāāṇ), ten years would be called 'ten rainy seasons'. But there is a still more decisive proof.

b) The preatest linguistic discovery of the nineteenth

century and perhaps of all time was the discovery of the Indo-European family of languages. This is hardly less

important in the sphere of philology than the discovery of America in the sphere of geography. According to Brugmann's classification there are included within the Indo-European family the following eight major groups: Arvan (including Iranian and Indian), Armenian, Greek, Albanian, Italic, Keltic, Teutonic and Balto-Slavic, These groups cover practically all the languages of Europo except such negligible quantities as Basque, Lapp, Finnish, Hungarian, Turkish, etc. They cover also at least three out of the many language groups of Asia, namely, Armenian, Iranian, and the Aryan languages of India. hesides the lately discovered Tocharian, and apparently an element in Hittite,1 Thus we see that the Vedic Arvans are connected linguistically and possibly racially with Persians, Greeks, Romans, Russians, Germans and English. No longer do they stand battling in the Punjah against the Basyns, as they are represented in the pages of the Ry. while themselves unconnected with the rest of mankind. They represent the vanguard of the Aryan dispersion Indiaward. e) In order to indicate the nature of the linewistic evidence on which the unity of the Indo-European (IE.) family is based, there is here subjoined a short table of cognate words in some of the more important related

d) This table of eognate words will show at a glance how closely related the different branches of the E. family are. These languages must be regarded as only dialectical variations of one original IE. speech. To explain the cause of some of the variations, mention may be made of the consonantal shift which separates the Teutonic tongues from all the other members of the IE. family. The following series of consonants are affected by this shift.

. —	Labials	bh	b	p	(f)
	Dentals	dh	d	t	(th)
	Velara	gh	g	k	(h)
	Palatala	al.	ď	1-7	(6)

The law known as 'Grimm's Law!' means that wherever bh or its equivalent is found in any other IE, tongue, b will appear in the Teutonic, c. g. Skt. bhrátar=Eng. brother. As bh shifts to b, so b shifts to p, and p to l. The same rule holds good throughout the other series. In other words, there is a shifting forward in the Teutonic, bh to b, dh to d, gh to g, etc. This shift, by which the Teutonic tongues are placed on a different consonantal level from that of the other cognate tongues, may be compared with n geological fault. Palatalisation takes place in Tocharian by which the dental t becomes ch (c), as Skt. matar, Toch. misenr. It will be seen that 'Armenian, Tocharian and old Irish have suffered greater phonetic

etymological equivalents of the series after which they stand

d) This table of cognate words will show at a glance how closely related the different branches of the IE, family are. These languages must be regarded as only dialectical variations of one original IE, speech. To explain the cause of some of the variations, mention may be made of the consonantal shift which separates the Teutenie tongues from all the other members of the IE, family. The following series of consonants are affected by this shift:—

 Labials	bh	Ъ	p	(f)
Dentals	dh	d	t	(th)
Velars	gh	g	k	(h)
Polotals	gh'	e.	k'	കാ

The law known as "Crimm's Law." means that whereover bli or its equivalent is found in any other III. tongue,
b will appear in the Teutonie, e.g. Skt. bhråtar=Eng.
brother. As bh shifts to h, so b shifts to p, and p to f.
The same rule helds good throughout the other series. In
other words, there is a shifting forward in the Teutonie,
bli to b, dh to d, gh to g, etc. This shift, by which the
Teutonic tongues are placed on a different consonantal
level from that of the other cognate tengues, may be
compared with a geological fault. Palatalisation takes
place in Techarian by which the dental t becomes ch (c),
as Skt. mitar, Tool. micar. It will be seen that Armenian,
Techarian and old Irish bave suffered greater phonetic

A short list of Tocharian, Armenian and Old Irish equivalents of Sanskrit worls is now presented for the sake of completeness of statement:—

Sanskrit	Tocharian	Armenian	Old Irish	Meaning

² Jacob Grimm, 1785-1863.

decay than Sanskrit, Avestan, Greek, Latin and Lithuanian. The term Indo-European (IE.) indicates that the languages of this great family are found in both Europe and Asia. A more scientific distinction between eastern and western IE, is found in the difference which holds between the Centumgroup and the Satam-group, which difference apparently indicates the existence of dialectical variations within the primitive IE. In the Centum the IE. palatals gh', g', k', h' appear as stops, while in the Satam they appear as spirates, Thus the spirate & (sh) in Skt, Satam' 'hundred' appears as the stop k in the Greek exarcy and the Latin centum, The languages of the Centum-division are Hellenic, Italic, Celtic, Teutonic, the Asiatic Tocharian' recently discovered in Eastern Turkestan, and possibly an IE, element in the ancient Hittita of Asia Minor. The Satam-division consists of Balto-Siavic, Albanian, Thracian, Phrygian, Armenian and Indo-Iranian. Some of these languages are not only neighbours geographically, but are also closely allied linguistically. Thus the Indian and the Iranian constitute ona group, the Indo-Iranian. In like manner, although to a less extent, Greek is allied to Latin. Latin to Celtic. and Teutonic to Balto-Slavic.

A glance at the table of IE, cognate words' will show that they all occur in at least two and many of them in

³ Pr. 3 4.

six or seven different IE. tongues. Since there is no evidence that these are lean words, we are shut up to the conclusion that, in most cases, they go back to one prehistoric speech, that is to say, the speech of the IE. clans before their separation. Words for eaw, brether, foot, heart, etc. are found in the most widely separated branches of the IE. family. Through the study of such words, then, we are able to penetrate to the prehistoric stage of IE. life and culture. Help is also furnished by prehistoric archaeology and the study of comparative IE. institutions as seen in the eldest historical sources.

e) In this way, then, wo get the fellowing picture 1 of the stage of culture reached by the IE, clans before their senaration. The pastoral and agricultural stage had been reached. Animals that had been demesticated were the cew, sheep, dog, herse, and, less certainly, gent and swine (23-30), also the goese (31). Cattle-rearing was the great occupation, and herds of cattle constituted the wealth (35-36). There were draught animals such as exen (24), as preved by names for cart and yeke (37). Bears and wolves (32-33) are mentioned among wild animals, but not camels, liens or tigers. Clothing consisted of the skins of wild and domestic animals, and of weel (50), which was weven. As regards articles of food, yava (41), 'barley', er perhans in general 'corn', was grewn. Evidently the flesh of demestic and wild animals was caten, since the names of the inner ergans of the body, such as the heart (59), would seem to imply the knowledge gained from slaughtered animals. There is no common vecabulary of fishing. Hence we may infer that fish were net used originally as an article of feed. The same thing holds true of milk, which apparently, as in China to-day, was not a primitive article of IE, diet. Better, too, (44) was apparently used

I am much indebted for the following aketch to O. Schruder, Die Indo-Germanen, 1911; Sigmund Felst, Kultur, Ausbreitung und Herkunst der Indo-Germanen, 1913, and II. Hirt, Die Indo-Germanen, Vols. I-II, 1905-1907.

¹ Reference by number will be made to the table of IL words on pp. 3-4.

more as a salve or ointment than for food. In the matter of agricultural terminology there, is n cleft hetween castern and western IE, which would seem to indicate that the western Aryans put more stress on agriculture and the eastern Aryans on the pastoral life. Quite likely physical and climatic conditions were at the hasis of this difference. It may be that the non-axistence of a primitive word for salt (42) in the Indo-Iranian branch, and its oxistence in all the rest, fits in with this difference, since salt is more needed for a vegetable than for an animal diet. The general name for fruit trees, indicating that tree culture was not yet practised. The primitive IE, intoxicant was a honey product (45).

Houses (19, 20) were used, which had doors (39), posts and roofs, but were doubtless little better than buts. These houses were probably partially underground, to ward off the cold of winter. There is no mention of any furniture. such as beds, chairs, tables. Mats and skins may have been used to sit on. Because of the joint family system, a house would naturally expand into a clan-village (19), There were also forts (38), or places of refuge in times of danger. Many such prchistoric forts have been discovered, There is a primitive name for field (54), but no ovidence of any private property in land. As means of travel, earts and also houts (40) were used. The linguistic evidence, then, indicates that the undivided IE, clans were in a condition of unstable equilibrium between the nomedic and the sattled life. There is evidence of some_trade in IE. times. The numbers 1-10 and 100 (55-56, 60) are primitive. The cow was the oldest measure of value (23, 36). Judging from later evidence, there were probably customs of hospitality. such as the interchange of gifts between host and guest, which made it possible for the wandering trader to journey in safety. The winter was the northern winter, because of

^{&#}x27; Skt. anas. 'cart'; cf. Lat. ones. 'burden'.

the common words for snow and ice (62). Probably, there were names for only two seasons, winter and summer, the name winter also designating the year. There was the common idea of the menth as the measurer of time.

The outlines of the present femily system were already in existence (1-11), the fether being the head (16-17) and the son's wife being adopted into the clan of her husband. It . was the joint family system, the primitive names (1-11) indicating that the family consisted of a man and his wife and children, his brothers and their families, his sons and their families, hesides the old people, grandfather end grandmother. From e comparative study of the customs and institutions of the different IE. branches in connection with the linguistic evidence, it is clear that the authority of the head of the femily (16-17) was unlimited. He had the power of life end deeth. Sons were greetly desired as warriors, avengers of blood, performers of funeral rites, and es meens for the continuation of the clen. There was, owing to the ohronic warfere of the time, usually a dearth of men and e superfluity of women. Hence girl infants as not egeded were often exposed. Old people, too, were frequently put out of the way especially in time of need. The joint family coffer wes controlled by the head of the family. Primitive IE. marriage was by purchase or capture. The lot of the if, marriage was she was more or less a beast of burden. wito was not easy.

Her mother-in-low ruled her with an iron hand. Separate dining of the two soxes was, occording to the evidence. a primitive custom. There ore traces also among the a primitive custom. Slavs, Germans and Indo-Aryans of Scythians, Inracian, a wife voluntarily accompanying her 'sati', the custom of olso of o distinct prejudice against the husband in death, widows (22). The brother was the second marriago of the honour of his sister, and after the death guardian of the homerried sister came under the death of the father an unmarried by the identify. of the father an animoted by the idea of the accessity of

Schrader, Indogermanen, 97.

marriage. So indispensable was it considered that, according to the evidence, the unmarried dead were sometimes even married ritually to the living, that they might be thus provided for in the life to come! The future comfort of the dead husband was the primitive idea of 'sati'.

The natriarchal family may have been preceded by the so-called 'matriarchate', according to which descent was reckoned from the mother'. While the change to the patriarchal system would diminish the independence of women, it would greatly increase the dignity and purity of family life. Whether there was a totemistic stage is disputed. If totemism, as F. B. Jevons thinks, "led to the domestication of plants and animals", and so was "the prima motor of all material progress", then it must be placed considerably anterior to the prehistoric IE. period, which we are studying; for already the pastoral and agricultural stages had been reached. Monogamy was tha rule, polygamy the exception. As between different alans, probably exogamy was the custom. There is evidence to indicate joint land possession on the part of the members of a clan. The wife as purchased was the property of her lord and master (14). Hence marriaga was later called the lordship (patitva) of the husband over the wife. The ingle family would usually develop into the large family' and the clan (19, 21). The 'joint family' goes naturally with agriculture, where much help is needed, There is no evidence of slavery in IE, times. A clan was united together by the honds of birth, speech and custom. there is no evidence of any formal political union among the various IE. tribes, although they would usually act together in time of war. The earliest federation (namely of the Indo-Iranian tribes) may be inferred from the

Schrader, Tolenhockzeit. 1801.

² The so-called 'mutterrecht' was clearly found among the pre-Aryan Etruscans, Picts, and Iberians.

³ Introduction to the History of Religion, 1896, p. 113.

. 11

common name "Āryn". Different class may have often been different in blood, although the same in language and custom. There were clan-lords or kings (16, 18). The clan-lord was chosen by the clan, the brotherhood acting together in the choice of a head. The term 'Indo-European' is not racial, but purely linguistic.

7) It has been truly said that the study of the religion of a people is not to be separated from that of its history and culture'. Accordingly IE. religion must now be linked up with IE, culture as described above. There were two lines of development, according to the evidence, the worship of ancestors and the worship of the 'Heavenly Ones' (63)'. The worship of ancestors is closely connected with the sense of the solidarity of the family. For primitive man death involved not annihilation but a state of weakness, a kind of shadowy existence. He knew that faintness on the part of the living is removed by food. By parity of reasoning faintness and weakness on the part of the departed must be removed in the same way. Hence the custom of feeding the dead. This must be regarded as at first of the nature of a pious service, not as worship. It is the expression of a family's affection for a departed member, not unmingled also with the fear of a possibly troublesome ghost. That such customs were followed by the IE, clans before their separation is rendered in the highest degree probable by the evidence of prehistoric graves as well as of the funeral rites of the Greeks, Romans. Indians and Lithuanians, 1 The ceremonies included lamentation for the dead, burning (or burial) of the corpse, purification after the funeral, the death-feast, and the feeding of the dead. There were also gifts to the dead,

¹ The class which spoke primitive Indo-European probably belonged in part at least to the so-called 'Nordo' race. The term "Wiros" might be taken as a convenient name for the speakers of primitive Indo-European. Cr. CHI. I. 66 tt.

*Ifarmack moted by Schrader, EER. II, 13.

Schrader, Argan Religion in ERE. II. 11-57, and Illet, Indogermanen, II. 485,522

which were buried or burned with the corpse, gifts of such things as, according to the analogy of this life, would be useful in the life to come, c. g. food, weapons, furniture, clothes, domestie animals, and in some cases servants and even wife. After the funeral there was a rigidly appointed service of the dead, food and drink being offered on stated occasions up to six weeks after the death, during which time the spirit of the departed was supposed to hover about, The food and drink were displayed, and the dead was formally invited to the feast and then as formally dismissed, In this way the living were hound to the dead by a long chain of death ecremonies. The inevitable tendency resulting from such pious service was the apotheosis of the dead, they being called by the Greeks "divine uncles" (6rd marphos), by the Romans "divine parents" (Di parentes), by the Indians "divine fathers" (divah pitarah), and by the White Russians "sacred grandfathers" (svjaty dzjady). The very names which they bear indicate their close relationship with the living. Such ancestors, who, while living, had governed the family and cared for its welfare, would after death naturally become tutelary house deities, like the Roman Di parentes. The service and worship of ancestors was one of the foundations of primitive social organization. Relatives were united in ancester-worship. in the right of inheritance, and in the duty of blood-revenge. A son was necessary to perform the funeral rites of his father. The patriarchal head of n family or clan, while alive, was the human father, but on his death became n divine father. Ho was the guardian genius of the clancharged especially with the duty of promoting its fertility. Rites connected with ancestral worship involved expert guidance, in other words, priestly functions. In all primitive societies the head of the family, as the one standing, because of age and experience, in closest communication with the ancestors, is usually priest, shamnn or medicine man. Old women as priestesses doubtless shared in similar functions. There were no priosts in the technical sense, but there may have been families in which propitiatory and magic rites were handed down from father to sen!

In addition to the awe and reverence felt toward dead ancestors there was a keen sense of the petency and mystery? of natural phenomena. Here again we have the working of analogy. Children and peoples in the childhood stage find it natural to ascribe to inanimate objects the same powers of will and effort which they themselves are conscious of possessing. Accordingly, from a very primitive period, the whole of nature was regarded as an aggregate of animated entities. Each object or phenomenon of nature, such as heaven, earth, sun, wind, lightning, otc., could be named. isolated from the rest, and made into a special object of awo and wonder. Thus to name things was to fixate attention upon them, make them objects of reflection and imagination, and so proceed in the direction of full personification. In this way there was the possibility of as many different special objects of awe as there are different phenemena in the world. an endless number. Usener in his Götternamen has assumed a stage anterior to that of porsonal gods, which he calls the stage of Sondergötter, 'special gods', 'departmental gods', holding that 'personal gods' were developed out of these, As proof of his thesis Usener cites the testimony of the Reman Indigitamenta, according to which every single fact and process of agriculture was under the direction of a special god. Ceros presiding over growth, Flora over blessoming, Insitor over sowing, etc., and the testimeny of the old Prusso-Lithuanian religion, which had a special god for every aspect of cattle-raising. But the evidence thus elted is chronologically late, long after the conception of personal gods had been formed. What can be assumed, however, with practical certainty to be prehistoric is, in the words of Schrader, "the mere capacity and the tendency to form into a divinity overy conception in nature or in culture which was of significance for primitive man ".

¹ Schruler, Indogermanea, 146.

² Secretum illud, Tacitas, Germania, Chap. IX.

^{*} ERE, H 32,

The two IE. linguistic equations in religion which have successfully run the gauntlet of criticism are the following: -Skt. Dyaus Pitar = Gr. Zeb Harep = Lat. Ju-piter : and

= Lith. deva-s = Lat. deus.

Skt. devá-s

The reconstruction of the primitive IE. worship of the 'heavenly ones' finds a sure starting point in this material. The deivos' (div 'to shine' and div 'sky') were the bright heavenly ones, such as sun, moon, morning star, lightning, wind, dawn, etc. Dyaus-Zeus-Jupiter, the sky, was regarded as Father Sky, and his children were the Devas. who appear in the sky. Thus Father Sky and his children the Devas constituted 'the real kernel of the primitive Aryan religion". Such an interpretation of the sky represents the beginning at once of IE, myth-making and IE, science. The sky, both day and night, remains the same in form. Within its capacious limits come and go the 'heavenly ones', sun, wind, rain, lightning, dawn, otc., playing each his respective part in the ordered life of the clan of the devas. As clan-lord (vispati) of the 'heavenly ones', Zeus-Duaus-Diespiter is supreme. He bends down over the earth and fertilizes it with the rain which is his seed. From this point of view also he is called 'father'.

If the differentia of a 'personal god' is the exerting of influence outside of his own proper sphere, then It Is doubtful if the stage of personal gods had then been reached. In fire, dawn, lightning, etc. the primitive IE. peoples adored the mysterious powers, the divine anima. which manifested themselves in the phenomena of the sky. but possibly not as yet any god who was regarded as a person. The IE. period was, accordingly, the period of 'special' or 'departmental' gods, whatever else it may have been. Whether there had already been formed a motley crowd of special gods, out of which the deiros had been separated because of their significance for the life at that time, or whether the dciros alone had thus been isolated.

Assumed ruchistoric form

^{*} ERE. II. 33.

15

is a question that we cannot answer. Actually there may have been but few special god's recognized, while multitudes may have been acknewledged as petentially to be discevered. We may compare the 33,000,000 (Hindu gods, very few of whem are actually named. If, on the other hand, every nomen is a numen, and everything nemed becomes thereby a 'special god', then we have already in the IE. period multitudes of special gods, potentially, if not ectually, millions. To illustrate: janus as the name of an object means 'door', but as the name of the mysterious potency manifested in the door it means 'he of the door'. So gesta means 'hearth' agni 'lire' and 'she of the flearth'; agni 'lire' and 'she of the door', but of the door', but of the door', but of the flearth'; agni 'lire' and 'she of the door', but of the door', but of the fire'; uses 'dawn' and 'she of the dawn', etc.

The Heavenly ones were wershipped by offerings of food. There was a close resemblance between the feeding of the dead (the divino fathers) and the feeding of the gods. Most probably the feeding of the gods arose from the faciling of the dead. As the dead needed to be strengthened by food, so last old id the gods, for example, Agni 'fire' through oblations of ghee. The fireless offering was the more primitive mathed, according to which feed was laid out on a sacrificial litter, to which the gods were invited. The fire-offering came later. Magic, of course, is of immemerial entiquity. It is more or less interwoven with prayer and sacrifice.

g) What is the significance and value of the religious ideas atteined by the IE. clans before their dispersion? The primitive tendency to regard all nature as animote was the first step towards a spiritual interpretation of the universe. This reading of the world in terms of human life was the beginning of anthropemerphism, every external object as well es men being regarded as possessing an anima. It was only a question of time for the human figure to be added to the human anima present in each phenomenon.

¹ This tendency toward anthropomorphism is infinitely suggestive, pointing, as it does, toward the conception of God manifesting Himself as man and of man attaining to the image of God

The custom of feeding dead ancestors was a recognition of life beyond the grave and the worshipping of them as 'divine fathers' was a confession of faith that the departed ones had in some sense or other become "partakers of the divine naturo". Thus through pious memorial gifts the living were closely bound up with the blessed dead, and the memory of the good deeds of the departed was an incentivo to practise the same virtues, 'Father Heaven' and his children the 'Heavenly' Ones' were conceived after the analogy of an earthly clan-father and his clan . The head of an earthly clan was at once father and lord. By analogy the head of the heavenly clan of the deives must be the same. Thus several religious ideas of fundamental importance are at least dimly adumbrated through the concention of Father' Sky and his children the Heavenly Ones. namely: God as heavenly, as light, as father and as lord. and the conception of the world as ordered. Surely on that far-off 'hank and shoal of time' the Eternal God had not left Himself without witness. Through their own nature as men gathered into families and clans, through the external world which ever confronted them as an object of curiosity and awe, and through their experiences of fatherhood and lordship, life and death, God spoke to them, as they were able to hear. It all comes home to us very personally. since the people to whom we refer were among the ancestors not only of the Indian and Persian Aryans, but also of most of the peoples of modern Europe and America.

h) The original home of the IE. peoples is unknown. The data bearing upon the problem are linguistic (as found on pp. 3-6), ethnological, that is, the distribution of IE, peoples over the earth, and archeological, the evidence of their migrations and settlements. Besides this there is tho more or less indefinite weight to be ascribed to historical

^{1 3} Peter, I 4.

^{*} This gives, at least-implicitly, the concept of order.

It is noteworthy that 'father', an epithet belonging to ancestor worship, is carried over and applied to the sky.

precedent, such as the migrations that have taken place from Contral Asia in historical times, and the settlement by Alexander of Greek colonies in Bactria. The linewistic evidence points clearly to a temperate, if not a cold climate. The earliest conjecture was Central Asia 1, east of the Caspian. A more westerly situation in Southern Russic on the border between Europe and Asia was a later conjecture of scholars'. The recent discovery of Tocharian in Eastern Turkestan has tended somewhat to roylyc the carlier view. The extremely archaic character of Lithuanian speech suggests that the original IE, home may have been not far from Lithuania', The latest hypothesis is that of Professor Glies', who thinks that the original habitat or 'aree of characterization' of the IE, clans was in Austria-Hungary, the region enclosed by the Corpathians, Erzgebirge, Böhmer Wold, Austrien Alas and Balkons. The fact that Central Asie has been historically o voritable officina gentium, or 'hive of the notions', whonce have gone forth Scythians, Huns and Turks, renders possible the view that the IE, clans come from the some region, Tochorian, a Centum tongue, is far removed from the other Centum tongues, which ore oll found in Western Europe. It is possible, then, to hold that Tocharian is a stoy-at-home, and that the speakers of the other Centum tongues have all . migrated westward. If there was an early connection between the Indo-European and the Ural-Altale families of languages, as Sweet asserts, then this would suggest some area in Russia os the primitive habitat. The archaic character of Lithuanian does not holp much in settling the question; for by parity of reasoning the Punjab might be taken as the original IE, home, because the primitive consonants ore

^{1 &}quot;Somewhere in Asia." - Max Muller,

best preserved in Sanskrit1. The fact that Alexander brought Greeks with him all the way from Maccdonia and settled a colony of them in Bactria, while he himself and several of his Greec-Bactrian successors invaded India from Bactria as a base, and the further fact that IE, peoples - Phrygians, Mysians, Bithynians, Hittites (?), Armenians, Persians stretched in almost a continuous line from the Dardanelles to Bactria, suggest the possibility that the Aryan advance to India may have been through Asia Minor and North · Persia'. Winckler's notable discovery in 1906 at Boghaz-köi, the old Hittite capital in Asia Minor, of a cunciform inscription (1400 B.c.) containing the names Indra, Mitra, Varuna and Nasatva, may possibly be interpreted as a landmark of the IE, advance castward'; and, at any rate, it fits in well with Hrozny's' interpretation of Hittite as an IE. tongue'.

It might also be assumed that the IE, clans, being largely in the pastoral stage, roamed over the great 'grassy plain's of Central Europe and Asia, extending perhaps from the Danube and the plains of North Germany through Southern Russia on into Central Asia! This would cover practically all the territory embraced by the previous hypotheses. The pressure of enemies round about would doubtless he even more effective than a circle of mountains to hold a primitive tribe together and give it a unified development. Thus something may be said for each of the above-mentioned hypotheses as to the original home of the IE, people. The whole question must be left as a

I Icelandic, though the farthest removed from the centre of the Teutonic world. is nevertheless the most archaic of the Teutonic group

"stimulating and fruitful uncertainty"! That the problem is 'stimulating' is shown by the number of scholars, especially German, who during the last three decades have addressed themselves to its solution.

The date of the dispersion of the IE, tribes is also The only material bearing directly on the problem consists of the dates of IE, migrations, settlements and inscriptions: c. g. the appearance of Aryan-speaking bands in connection with the Cassite invasion of Babylonia B. C. 1760 and at the same time the earliest reference to the Hittites in history"; the Dorian invasions of Greece. B. C. 1500-1100; the Boghaz-köi Inscription, B. C. 1400; the date of Zereaster, p. c. 1000'; the founding of Rome, p. c. 753; and the Celtic invasions of Gaul, Spain and Britain, B. C. 800-300. From these figures a later date than B. C. 2000 can hardly be assumed. The period B. C. 3000-2000, with a conventional average of 2500 B. C. may be presented as a reasonable conjecture'. The discovery of fire had already taken place; the domestication of animals and plants and the transition from the stone to the metal age were in process.

j) On the basis, then, of evidence drawn from the words common te the IE, tongues, the study of prehistoric graves, the witness of the earliest IE, literature, such as the Rigweda, the Homeric poems, Herodotus, Tacius, etc., as well as from the study of the institutions, customs and folklore of the peoples concerned, there is a very high degree of probability, amounting in most cases to practical certainty, that

Feist, KAHI, postulates B. C. 2300-2000 for the oreaxing up to the inunity. But Hirt, Indogermanen, assumes a still later date B. C. 1800-1600. "Need not be placed later than 3000 B C."—Keith, Indo-Ivanians, In

among the undivided IE, clans the following customs were prevalent: the joint family system organized on a patriarchal basis, the authority of the head of the family being absolute over life and death, polygamy to some extent, especially among leading men, early marriage of girls, prejudice against widow remarriage, exposure of female infants, the frequent going of a wife with her husband in death, or in other words sati, feeding of the dead, human sacrifice, especially of captives, worship of ancestral spirits, and the worship of the personified phenomena of nature such as sky, sun, moon, wind, fire, water, lightning, etc. Such were some of the customs which our IE, ancestors practised. Europe, through the clashing of different types of culture, and especially through the impact of Christianity, these primitive customs have been either greatly modified or done away with altogether. In India, because of her isolation1 through the ages, most of these customs persist intact oreven in an exaggerated form. Thus India is a land of archaic survivals.

2. Indo-Iranian Period.

a) The scarces of information, as might be expected, are much more abundant than for the IE, period. Rigreda and Avesta may both be used as indirect witnesses to what existed before Indian and Iranian separated. For there are a large number of technical religious words in each literature which are only dialectical variants, e.g. yajha and Jaura, 'Lord', 'sacrifice', 'rita and asha, 'order', Asura and Ahura, 'Lord', 'tec, etc. It goes without saying that the existence, for example, of the word yajha in the Rik and of yasna in the Avesta is proof enough that the thing signified originally by both words alike existed in the period before the Indian group hroke away from the Iranian.' As a matter of fact, 'Veda and Avesta are so closely related that each is a good commentary on the other. In order to make this clear,

G. Indo-Aryan Thought and Calture by Prabhaker S Shilotri, New York, 1913.

there is here subjoined a short list of cognate Vedic and Avestan words of a technically religious character:—

l 						
7 Vedio	Avestan	Menning	Vedic	Avestar	Meaning	
Asura	Ahura	Spirit, Lord	ahuti	urviti	offering	
Aryam in	Airyaman	Aryamın	amrita	amesha	immortal -	
Arimati	Ārmalti	piet y	Arya	Airya	Aryan	
Apām n (pat	Apām napāt	water-child	Indra	Indra (Andra) Indra		
aptya	áthwya	watery	กลุโด	ushah	ilawn

mintra	manthra	વાનો	soktá	hukhta	good word	
manga	เทอร์กรา	wrath	Perfit t	haoma	ROHER	
más	n 3h	moon	จรร์ท	hvar	sun	
Mitrl	Mithra	Milra	botae	zantur	invoking priest	

It requires only a glance at these parallel columns of words to become convinced of the close connection of Vedic and Avestan religion as well as of language. These soparate lines of development point back to one undivided Indo-Iranian people, language, culture and religion. Spiegel's Die Arische Periode (1887), although it is somewhat out of late, novertheless shows what can be done through the use of such material in reconstructing the cultural and religious conditions of the undivided Indo-Iranians.

b) The undivided trines bore one common name which appears in both the Old Persian Ariya and the Vedic Arya. This common name points to a union of tribes, the earliest fedoration of IE. clans of which there is any evidence. Assuming u. c. 3000-2000 as the period within which the

dispersion of the IE. clans took place, we may postulate provisionally B. C. 2509-1500 as the period when the Indo-Iranian tribes lived together as one people. Whether they lived all that time in Bactria and the neighbouring regions is unknown. It may be that their line of advance lay through Asia Minor and that the various IE. tribes which settled in that region, Phrygians, Armenians and others were either left hehind in their course or followed later in their wake. Be that as it may, one thing is certain that the Indo-Iranian tribes were together for a considerable time and then separated, the Indian branch moving by one or more migrations into the Punjab, and the Iranian branch remaining in Bactria and Persia. As a result, the two linguistic groups, Indian and Iranian, "lie closer together than any other distinct languages in the IE. family". Before the dispersion of the Indo-Iranian tribes, their habitat in Bactria and still more their line of march castward from Asia Minor, if they came that way, would have brought them into fairly close contact, by trade and otherwise, with the great centres of Babylonian culture in the Euphrates Tieris plain. It is possible that the mystical and sacred number seven, which is such a favourite in both Veda and Avesta, as well as in the Hebrew Old Testament, was borrowed from Babylon', especially if its origin was due to the observation of astronomical facts such as the seven planets (sun, moon and five planets) or the seven stars of the Great Bear. It is possible, too, as Oldenberg thinks, that there may have been some Babylonian influence upon the development of Indo-Iranian religious and etbical ideas.

c) The two lines of religious development which were found in the IE. period, namely, the worship of ancestors and the worship of the 'heavenly ones', continued throughout the Indo-Iranian period; for they appear in both the

¹ Moulton, Art, Iraniana in FRE . Vol. VII.

² So v. Schruder, Arische Religion, 1, 427-129

Rv. and the Avesta, especially in the Younger Avesta. The service and worship of the Pitris in the Rv. is paralleled by the similar service and worship of the Fravashis in the Avesta 1. The worship of the 'heavenly ones' also continued through the Indo-Iranian period, for wo see it in full bloom in the Rv. There was indeed among the Iranians the religious reformation connected with the name of Zoroaster, through which Ahura Mazda, 'the Wise Lord', was made the supreme and sole object of worship, the daevas of the old religion being degraded to the position of demons, or at least to that of angols; but this reformation was followed, as is so often the case, by a counter-reformation, which restored the daevas to their old position, or at least to the status of angels. If the Boghaz-köi gods, Varuņa, Mitra, Indra and the Nusatya (p. c. 1400) were early Iranian deities, as Oldenberg thinks, then they must have preceded the Zoroastrian reformation, since at a later period Varuna drops out altogether, or rather is roplaced by the name Ahura Mazda, and the three gods Indra and the two Heavenly Twins are turned into demons. If they were Vedie deities, then their appearance on the Boghaz-köi inscription proves a backward connection at that early ago between the Punjab and Asia Minor, and suggests strongly that that was the route which the Inde-Iranian clans followed in reaching their eastern home. If Indo-Iranian or early Iranian deities, then we have Varuna as the Heaven God (Ouranos?) and four 'heavenly ones' as his associates, namely, Mitra, Indra and the two Asvins. The next important outside evidence concerning early Iranian religion is found in the famous passage of Herodotus (I. 131), which reads as follows: "Their custom is to ascend to the highest peaks of the mountains, and to offer sacrifices to Zous, calling the whole vault of the sky Zeus; and they sacrifice also to sun, moon, earth, fire, water, and winds"; Here we have clearly the old IE, pantheon consisting of

¹ See especially Forwardin lasht.

² Moulton, EZ. 391-392.

the sky god Dyāus and his children, 'the heavenly ones'. The Yashts prove sufficiently that the Younger Avesta admits of such worship'.

- d) Certain new developments in religion were introduced during the Indo-Iranian period:—
- (1) The conception of 'order's. This was present at least implicitly in the IE, period, being involved in the eosmic order represented by the rule of Heaven' over 'the beavenly ones', and in the social and moral order created by the rule of the clan-fathor over the clan. It first became explicit, however, during the period represented by the Tel-el-Amarna correspondence (R. C. 1400) in which there occur certain names containing arta-, as Artashuvara and Artatama, which remind one of the later Persian names Artaxerxes, Artaphernes, etc. The element aria in these names stands for the Avestan asha and the Vedic rita. That carries back the origin of this important conception to at least 1400 n. c. And, as we have seen, its roots run back still further into the IE, period. In both Veda and Avesta rita-asha is fundamentally important. In the Rik" it covers the threefold order, cosmic, ritualistic and moral. In the Avesta it runs out into the meanings, right, truth, righteousness, holiness,-all ethical in connotation. Veda and Avesta, then, are witnesses that the conception existed
 - before the breaking up of the Indo-Iranian unity.

 (2) The Ethical conception of God. A conception like rita-asha would naturally have its effect upon the idea of God. Scholars practically agree that Varuus equals Abrra

⁹ From the combined testimony of the Hoghar Loi invertibles, the Rik and the Younger Aresta, it is clear that among the Indo-Iranian gods were included Yarusa, Mira, Serna, Aryaman, Indra, the Assins, Virassant and Yama. Cr. Farqubar, Oliki. 2.

Vedie rita, Avestan anha.

^{3 &}quot;A people whose worship included the Sky, lofuest of all nature-delines, and those ancestor-goals who are ever the most potent to stir up the feeling of a cise bond between religion and conduct, had native material on which to work." Moniton, E2, 245.

Mazda, that is to say, the ethical god of the Rik is regarded as the same in erigin as the ethical and supreme god of the Avesta. This means that u movement in the direction of ethical monotheism preceded the Indo-Tranian dispersion. This movement was not originated by the reformation connected with the name of Zoroaster, since that took place after the Indo-Tranian separation, probably os early as 1000 n.c. What the Zoroastrian reformation really did was to take up the earlier reform movement and carry it forward to its logical issue in an ethical monotheism. The Vedic period had nothing corresponding to the Zoroastrian reformation. Hence the Vedic Verupa did not rise far above the level of the pre-Zoroastrian Alura Mazda' ethically very great, but not the supreme God.

(3) Something corresponding to the Iranian Amesha Spenias and the Indian Adityas. These two groups of gods have, es we shell see, so meny points of contact that a common preparation during the undivided Indo-Iranien period for both lines of development seems to be demanded. Father Dyaus was clearly the chief deity of the Indo-Iranian es he hed been of the undivided IE, clans. We may think of him as heving other names which emphasized verious espects of his nature, such as Asura 'Lord', Varuna (or Varene) 'Encompasser', Mitra 'Friend', Aryaman 'True', Bhaga 'Distributor', etc. The mystical number 'seven' may have served as a framework to unite this special group and to Isolate it from all the rest. The list of names furnished a plurality associated with Dyaus as his supreme council, but also a plurality in unity, since the various names were all names of Dvaus and served merely to

¹ That Ahura Marsh, was pre-Zorosstann in oxigin has been apparently proved by documentary evidence through Prof. Hommer's discovery of the name Asson Machin in an Assyrian Inverigition of the exign of Assur-banipal (n. c. 608 626). The archaic form of the name Assara lastead of Ahura (G. Nisatya, in place of Nonshithtyn in the Boghaz Koi incertigino) curriers to back before the Iranian consonnatal shift from x to h, doubtlees to a period not far removed from that of the Dephar kel insertyion See FEBAA, 1889, 132, and Moulton, 15. 31 ft.

propagated in priestly families 1. There are many references in the Rv, to ancient priestly families, Bhrigus, Atharvans, Mixed up though they be with mythical and legendary material, there are nevertheless quite likely in many of them historical reminiscences of priestly families reaching back into the dim past, possibly to the time before the separation of the Inde-Iranian clans. Such specialization of function led to great results in India. Priestly technique demanded considerable knowledge-knowledge that could be gained only through division of labour-for its proper exercise, In this way the tradition was naturally set of a learned priestly class made up of different orders of priests. As a result the religious literature of India, so far as it has been aryanized, is the work of the priesthood, and its fundamental conceptions represent largely the thinking of the same dominant community.

In the Khorlad and Aban Yashis (IV 10 and V 86) there is mention of Afracans and their popils, clearly a reference to priestly achoods. For example, in the Khordael Yashi, 10, we are told that "a spell may be divulged by an Afracan to his papel".

CHAPTER II.

THE RIGVEDIC AGE

 Sources. —The primary source for the Rigyedic age is, of course, the Rigveda. It contains a multitude of allusions to persons and things, mostly however incidental and fugitive. To illustrate from the hymns translated the kind of information thus given, we may note the following allusions: skin of slain beast, V. 85, 1; barley, yava, V. 85, 3; dice-playing, II, 12, 4-5; V. 85, 8; VII, 86, 6; X. 34; strong drink, sura, VII, 86, 6; eattle-thief, VII, 86, 5; wild beasts, I. 154, 2; II. 33, 11; cattle at pasture, VI. 54, 5-6; charlots, VI. 54. 3: VII. 71. 2; sacrificial posts, IV. 51, 2; descrí lands, I. 35, 8; water-skin, V. 83, 7; medicines, IL 33, 2, 4, 7, 12; winter, II, 33, 2; river-crossing, II. 33, 3; III. 33; necklace, II. 33, 10; gold, I. 85, 9; II. 33, 9; bow and arrows, IL 12, 10; II. 33, 10; Wolyes, X. 127, 6; debt, X. 34, 4, 10; 127, 7; villagers, X. 127, 5; spears, I. 85, 4; wells, I. 85, 10; snakes, II. 12, 3; battle, II. 12, 8; mountains, II. 12, 13; rivers, II. 12, 12; sples, I. 25, 13, etc., etc. By piecing together all such references and allusions a fairly complete picture of Vedic life' may be secured. Two indirect sources of information may be singled out for special mention, the similes and metaphers' of the Rik., and the anthropomorphised picture of the Rigyedic gods.

There will be no attempt to give an exhaustive picture of Vedic life. For the purpose in hand it will be sufficient to sketch briefly the geographical, climatic, ethnological and cultural background, which conditioned the religious thinking and practice of the Vedic Aryans. They clearly brought

As found in Macdonell and Keith's Vedic Index of Numes and Subjects, Vols I II, London, 1912, and in Timmer's Allindisches Leben, Berlin, 1876.

² Circhniese and Metaphern im Rigueda by A. Hirrel, Loppin, 1890; and article in the Journal of the Panjah Historical Society, Vol. I. 56 if. on Vette Societ Life according to the Semiten in the Agmi Rymne of the Rigueda by H. D. Griswold.

with them a large inheritance from the past in addition to what they achieved in their new habitat in India. For, as we have seen, the received Vedic life and thought run back into the Inde-Iranian period and even beyond that into the Inde-European period.

2. GEOGRAPHY-Four points of the compass may be mentioned as enclosing the area occupied by the Vedic Indians, viz. the river Rasa on the west, and the Ganges on the east, to the north the snowy mountains, and to the south the sea. Since the Avestan form of Rasa is Ranha. and the Rasa is mentioned soveral times as a river in the oxtreme north-west of the Vodic territory', it is probable that it refers to a real stream, perhaps originally the Araxes or Jaxaries'. If this is a correct interpretation, then the name betrays an idstorical reminiscence of an earlier home to the north of the Hindu Kush. In other passages, however, it is the name of a nivthic stream encompassing the atmosphere and the ends of the earth and once called 'Mother Rasa'. With the passage of time and the fading out of the memory of the original Rask as a real carthly stream, it was quite natural for it to be charged finally with mythical elements. The Ganges (Gariga) is directly mentioned only once in the Rv. . and indirectly once through the epithet (Gangya) being on the Ganges''. It was on the castern horizon of the Vedic Indians. On the north were the 'snewy' mountains ", clearly

a reference to the snow-covered Himilayas.' To the south was the Samudra, literally the 'gathering of waters', which denotes at least the river Indus when it receives the Punjab tributaries, and becomes n sea-like expanse of waters. While there is no definite proof that the Vedic settlements extended to the mouth of the Indus, wo may yet regard it as highly probable that the Vedic people had some knowledge of the ocean. The Indian Aryans were a daring and adventurous people. In the winning of the wild West of America Irom savage beasts and savage aborigines, there were ever intrepid hunters and Indian fighters, like Daniel Boone, who were wont to push into the wilderness far in advance of the regular settlements. So was it doubtless in Vedic days. It is most unlikely, then, that the Indian Aryans were without at least a dim knowledge of the Indian ocean?

The region comprehended within these four points, Rass and Ganga, snowy mountains and sea, is approximately the territory drained by the Indus and its tributaries, extending as far south as to the junction of the main river with its branches, that is, a region corresponding roughly to the present Punjab, North-Western Province and Kahulvalley.

of the Aryan habitat as thus defined the most prominent features were the rivers. The 'seven rivers' (sapta, sindhavab) of the Aryan country are often mentioned in ther Rv.', either a conventional number like 'the seven churches that are in Asja', or a reference to the five' well-known rivers of the Punjab together with the two houndary streams, Sarasyatt and Indus. In at least one passage' sapta sindhavab.

¹ On days when the atmosphere is clear (confessedly a rare experience) the snowy Himilayas are plainly visible to one travelling by train on the N. W. Railway line all the way from Saharanpur to Amritsor, or the present writer knows from experience.

is the designation of the land. We may assume that the Vedic settlements occupied the submontane region, where the water is near the surface, all the way from Kabul to Ambala, and also followed the banks of the rivers some distance toward the sea. The phenomena of mountain, river and sea furnished the Vedic singer with plenty of imagery for describing the drama of the storm. He saw in the sky an aerial ocean. There were cloud mountains which Indra pierced with his bolt, and in which he hollowed out deep beds for the aerial rivers. The special geographical features of the Punjab were not without influence upon the development of the folklore concerning the gods, which comes under the head of mythology.

The rivers of the Panjab furnished natural political boundaries and natural lines of defence. The famous victory of Sudus over the ten kings was wen on the banks of the Parusat' (Ravi). We are reminded that Porus' contested Alexander's passage of the Jhelum and that the boundary between Ranilt Singh's territory and British torritory was the Sutlei. The Sikh army definitely began hostillties, when it crossed the Sutloj into British territory, In the Vedic ago the boundary rivers must have been also the scene of frequent erossings and recrossings in connection with plundering raids. One can imagine, too, that individual Vedic adventurers, of the spirit of Daniel Boone, would frequently cross over a river into the territory of the Dasyns or of a hostile Aryan tribe, and attempt exploits, either winning booty or having to get back to

¹ Cf Vend, I, 18; Hapta Hands.

⁴ Rv. VII. 18, 8-0. The mention of the Yanuna in v. 19 of the same hymn may possibly be interpreted with Macdonell and Keith (Vedus Index I. 500) as a reference to another victory of Sod's, on the theory that the hymn is a condensed account of more than one sistory.

[&]quot; mupos t e the Paurava prince.

^{*} Such an one as is described in Visvamitra's hymn to the rivers Vipas and Sundri (III, 33), in which there is mentioned a village or 'horde' of the Bharatas crossing the rivers in quest of body (coms).

their own side of the river as speedily as possible by swimming or by boat. Such experiences seem to be presupposed in the following verses:—

And may we dise with thee across
All emnities and hostile powers,
As swimmers over water-streams. II. 7, 3; and
Put us across hostillites
As with A bant, thou radiant god,
Expelling evil with thy light.
For welfare carry us across,
As in a boat o'er Sindhu's wave,
Expelling evil with thy light. I. 97, 7-8.

Such similes are very numerous in the Rv. In fact, the Vedie experience of being helped across a river to a place of safety, together with later experiences of the same sort, has left almost as deep a mark upon Hindu religious symbolism as the crossing of the Jordan has upon Christian symbolism¹. The boats used in crossing the Panjab rivers must have been very simple in structure, probably dugouts or rafts. The paddle was apparently used for steering as well as for propulsion.

3. CLIMATE.—The climatic changes experienced by the Vedic Aryans in passing from Baetria into the Punjab were numerous and striking. From a temperate climate 'they passed into one almost torrid'. Winter was a thing of the past. The Punjab cold season was like their former autumn. As earlier they had reschoned the years as so many winters, so now in the Punjab they began to reckon them as so many autumns', although the older terminology was still in use'. In the distribution of the rainfall there

One may compare the lone of the Christian Shojan; have have most part. 'Who will put me seroes?' In the same huma for haratya is a divine title.

⁸ Unusually cold in winter but pretty hot in summer. G', de Bode's Bothaira, 5.6. Poring July and August 1922, according to the weather reports in the Piencer, the hottest places in India were Proheway. Dera Ismai khan, Javohubol, Lahore, Lyaffur, Multan, Fort Sundeman, Sudkoi and Examilpoid, all in the Panjah or the neighbouring reports of the N. W. Pruntier and Hall-highest.

⁴ Rv. If. 27, 10; Ht. 36, 10 , etc

Br. I. 61, 14; II. 33, 2; V. 51, 15, VI, 48, 8.

were striking differences. In Bactria, as in most temperate climates, rain falls more or less throughout the vear'. alternating with snow in winter; but in the Punjab, with the exception of one or more winter rains (usually in January). ne rain ordinarily falls during the rest of the year except in connection with the monsoon, between June and October. The mensoon in the Punjab is often very deficient, although quantities of rain usually fall in the lower Himalayas and flood the Punjab rivers. The 'luh', or mensoon wind, which is such a characteristic feature of the United Provinces, is hardly felt in the Punjab; but for several months preceding the breaking of the monsoon the Punjab is afflicted with violent dust sterms, accompanied by streng wind and net infrequently eausing darkness even at midday. The menseen is followed in Septomber and October by a very feverish and unhealthy season lasting for several weeks, Before the coming of the menseon rains, the heat is extreme, oftan as high as 117° in the shada and 170° in tha sun. Thus in the Punjab habitat of the Vedic Aryans the drama of the alements had its own special setting, which must linva medified to some extent the mythology which the Aryans brought with them from their trans-Himalayan home. Tha bipartite division of the year into winter and summer's six menths each, which dates from the IE, period, was broken up in the Vedic age into three seasons, spring (vasanta), summer (grisma) and autumn (sarad)'. The Rik knows also the winter (hima) as a reminiscence from the past; . and in the Frog-song the rainy season is mentioned twice.

^{1 &}quot;Thunder storms are not infrequent, especially in spring." De Izale's Bahhāra, 47; and "Out of 186 days . . . 68 were overclouded or ramy"—
or 64. 52.

^{*}Practi. The rainy season is mentioned by name only here in the Re., In harmony with the fact that the monsoon in the Paulion tends to be light. When the Aryan their rendeed the United Provinces, the three seasons became five, and 'the rains' (tar-ph), as the most elumenteristic season, fornished the name for the person of the person of the person of the Paulion of the Paulion of the Paulion as regards the average amount of rainfall, yet the contrast drawn by Bellin

4. ARYANS.-The Rigveds is dominated throughout by the antithesis between Aryan and Dasyu, the foreign invader and the aboriginal inhabitant of the land. The antecedents and ethnic connections of the Aryan invaders have already been considered. The year 1500 B. C. has been accepted as a provisional date (a mere conventional average) for the entrance of the Arvans into the Punials. They came either as a single invading host after the manner of Alexander's invasion, or more probably in successive bands covering perhaps several conturies, There are plenty of historical analogies for both types of invasion, but no direct evidence. Hence we are shut up to an imaginative reconstruction of the probable (or possible) course of events, guided by analogy. It is quite probable that there was some trade between Bactria and the Puniab' prior to the Aryan invasion, as the date of the invasion in any case was comparatively recent. Aryan traders or adventurars may well have visited the Punjab before that time and carried back a 'report of the land's. As already stated, the eighteenth century B. C. was characterised in Western Asia by tribal migrations and conquests. It was , marked by the Hittite invasion of Akkad (circa 1760 B. C.). the Hyksos invasion and conquest of Egypt (about 1700 p. c.) and the Kassite overthrow of the First Babylonian Dynasty. in connection with which was the first appearance of the Aryan in history'. About this time the Mitani, whose rulers may have been speakers of Indo-European, settled in northern Mesopotamia and prepared the way for the Bogbaz-köi inscription and the Iranian proper names in the Tel-el-Amarna correspondence.

While certain IE. tribes were thus settling in Persia

⁽CIII. I. 79) between the "thunder and lightning" of the Ambila region and the 'gentle' showers of the rest of the Punjab, werns to the author much overdrawn.

Tor the modern trade route between Bokhâra and Kabul, see de Bode's Bokhâra.

² Compare the fur traders who did so much for the exploration of North America in the early days ³p 19. ⁴ Meyer, GA, 1², 577-579.

and Mesopotamia, it is altogether probable that other tribes of the same people were beginning to cross the Hindu Kush into the Punjab. The method of invasion was probably a combination of peaceful penetration and armed force. The analogy of early racial expansions' makes prebable a series of Aryan invasions and settlements in the Punjab rather than one single invasion and conquest of the land. So we may assume tentatively that the Aryan tribes entered the Puniah by incursion after incursion extending over possibly several centuries, it may be from 1700 to 1300 n. c.) Probably each invasion was a tribal affair not done rapidly, but after the manner of migratery "pastoral peoples"; Grierson's distinction between the Arvan languages of the 'Midland' and those of the 'Outland' seems to demand more than one migration to account for it. This is quite apart from the cogency of his theory of the latest Aryan invasion by way of Gilgit and Kashmir. The relative position to one another of the Aryan tribes in India suggests also the same explanation of earlier and later immigrations -

There is plenty of evidence in the Rv. that the Aryan tribes not only fought against the Dasyus, but also were

¹ Compare the numerous waves of Semith au-asson and Calculus, the conquest of Urbain by Jute, Angle, Saxon, Dane and Norman, extending over many centures, and the gradual victumg of the wild West of America through the forward pressure of the Footb-Linkh 'hackwordsmen', who were equally good at houring, fighting and tilling the soil See Roovectis, WW Vol. 1.

³ "We may be certain that the invasions were no mere incursions of armies, but gradual progressive movements of whole tribes "— Rapson, CHL 1 43

³ IGI. I., 1907, Chap. on Languages

^{*}So Macdonell and Keith, Index I, 168-169. "The geographical position of the Kenn-Uncollar readers It probable that they were later immigrants into India, than the Kosta-b Victors or the Klais, who must fave been passed into their more castonal tentileries by a new wave of Aryan settlers from the west". So Othenberg (Buddha 9) who speaks of "the first Inmigrants" and of "a secold wave of the great tide of Immigrants". So also James Kremedy, JRAS, October 1919, p. 510; "The Immigrants from Bestria had come at intervals through a long series of vers".

frequently at war among themselves, in which case Dasyu allies would probably at times be found on the one side or the other. For example:—

Looking to you and to your friendship, heroes twain,

Forward have gone the broad-ribbed warriors keen for spoil; Both Dasa foes and Arva foes smite and destroy.

Both Dasa foes and Arya foes smite and destroy, With succour help Sudas, O Indra-Varuna. VII. 83, 1; and

Thou hast our foemen, Indra, of both races,

O hero, both the Arya and the Dasa,

Struck down like forest trees with well-aimed axes; In fights thou rentest them, most manly warrior. VI 33, 3*.

On the hypothesis that the Aryan tribes entered the Punjab at different times, it is easy to see how warfare between tribe and tribe would have been especially easy. The earliest invaders may also have made common cause with the Dasyus against the later Aryan invaders, very much as Anglo-Saxons and Celts combined forces against the Danes. Under these circumstances some clans of Aryan origin doubtless shared with the Dasyus in the degradation which must have befallen them both alike.

This, on the whole, seems to be the most reasonable hypothesis of the way in which the Aryans entered India, and it is supported by the weight of expect opinion. Novertheless, in the light of the numerous armed invasions of the Punjab made by Persians, Macedonians, Scythians, White Huns, Moghuls, etc., it must be left an open question. It is barely conceivable that the Aryan invaders entered practically as a single warrior band, got a foothold in the Punjab, sent off settlements in various directions, which

Or 'with browl sabres armed'-Macdonell, H. B. 31.

^{&#}x27;2 CT also I 102, 5; HI. 32, 14; VI, 22, 10, etc

⁶ Compare Vote Inter 203: "It is also probable that the bodies cans to include men of Ayan race, and hat the Volte probal are the department of Ayans to a lower social status. This scene, at any rate, to have been the case with the Ratchatera." In this comments in its worth while mentioning that the classes in the Frongh which Eisley (The Frongte of Index, Jul. Ld., which by Cocke, Colours, 1915, pp. 37. A) 37.55-379, on the body of shall-measurements, that as the jurned spectament of Ayan Flood, include contention state by the displaced Contents.

formed the basis of the different Aryan tribes, and developed dialectic variations in speech.

5. Dasyus.-The Dasyus' were clearly the aboriginal inhabitants of the Punjab, in the opinion of Baines! ethnologically connected with the Kols. Since, however, the ccrebral letters are characteristic of the Dravidian languages, but not of the Inde-European, and are found in the Rik but not in the Avests, we may conclude that speakers of Dravidian tongues were found in the Punjab at the time of the Aryan invasions'. They differed from the Aryans, in appearance, speech and religion. As con-. trasted with the white Aryan colour, the Dasyus were darkskinned. So in the following passage:

In fights bath Indra helped the Aryan worshipper, Giving a hundred aids in every battle-drive.

In battle-drives that win the light;

Plaguing the lawless gave he un

To Manu's folk the dusky skin : Burning, as 'twere, he every greedy for consumes.

Yea quite consumes the venturesome. I. 120. 8.

Clearly referring to the 'black skin' of the Dasyus is the Dasa colour as mentioned in the following stanza:

Who hath made all things in this world unstable, Humbled the Dasa colour' or destroyed it;

Dusyn and Dasa are words of uncertain origin. I mayn corresponds with the Iranian danhu, dangu meaning 'province'. In the Belishin inscription Darius calls himself Khadyathiya dahyundar 'ruler of provinces,' which is the phonetic equivalent of the Vedic Kratrino Dasgunam 'rules of Desyns' (or enemies) The original meaning, as Zimmer thinks (AL 110) may have been 'enemy', the development in Ironian giving danks the meaning 'province' as the country of conquered enemies. It would be quite natural for the invading Aryans to call their foes in the Paniab by their old name for 'enemy'. The same word in later Persian appears in the form did (pl. didnit) village". There is also a Vedic root due 'to waste', which may fornish the derivation. See Vedic Index under Dasun and Disa. It is possible that the words had a more contempinous connotation than merely 'enemy', something like 'heathen', 'wretch', 'liend', 'rustie' (gant ar)

¹ Ethnography (in Grandeles), 1912, p 3.

² Rapson, CHI 1, 41-42, 49.

Kettani true black skin'. So probably X. 41, 1

Dusa rorna.

.Who takes the foe's possessions, as a gambler Stakes of his rival, -he, O men, is Indra. II. 12. 4

As might be expected, the Aryan colour is also mentioned:

He won the sun, he won the heavenly horses,

Indra obtained the cow that feedeth many; Won, too, the golden treasure for enjoyment,

The Dasyus smote and helped the Aryan colour'. III. 31, 1. The 'white-hued' friends who are mentioned as helping Indra in the conquest of the land are doubtless to be taken

as Aryans.

Furthermore, the Dasyus are called in one passage anasah* 'noseless,' according to the most probable interprotation, or possibly 'misfeatured,' It is quite likely a reference to the broader and flatter non-Aryan nose of the aborigines. In the same passage occurs another epithet' 'of stammering speech', or more probably 'of hostile speech', since it is used of Aryan' as well as of Dasyn enemies. The passage may be rendered as follows:

Didst crush the noscless Dasyus with thy weapon,

And in their home didst overthrow the fiend-voiced . V. 29.10.

The great difference, however, between Aryan and Dasyu was religious. The Dasyus were given such negative epithets us 'ritoless'? 'lawless', 'without devotion's, 'not sacrificing'se, "Indifferent to the gods", etc., as in the following:

¹ irya sarea

^{*} Statept, 1, 100, 18, to Mard well and helth, Juder I. 556, 6

[&]quot;Either au-mach "without fare" or a minet 'without nose", V. 29, 10 (ir possibly and and should be interpreted as "without mouth", that is 'speceldess', unable to use the speech of the Aryana. This well libratintes the difficulty of Vedic interpretation. At any rate as applied to the Domas it is a term of represent and contempt. 4 Medhia-raceh 1, 29, 10, lit 'whose volve is hostile' This may possibly

refer to the watery of the enemy, which may have been as terrible for the invaling Asyan as the war whoop of the American Indian was for the Irontier Of the Aryan Para in VII 18, 13, wither.

Middreine dewen Rede mangelhalt, barbarrel redend' - Geldner, Glosser. 1 a-toman, X 22 10 a trate, 1 31, 8, * a-brokman, IV. 16, 9.

[&]quot; a-vajoas, VIII 70, 11 11 a-decoys, VIII. 70, 11.

Who is no-man, who loves nor god Nor sacrifice nor Aryan law',

Him let his friend the mountain hurl to speedy death, The mountain hurl the Dasyn down VIII. 70, 11.

Onco moro:

Against us is the riteless senseless Dasyu, Inhuman, keeping alien laws;

Do thou, O slayer of the foe,

This Dasyu's weapon circumvent. X. 22, 8.

Thus Arya in the thought of the invaders came to be a synonym for 'godly', 'devout', and Dasyu for 'godless' as in I, 51, 8:

Distinguish Aryans from the Dasyus; chastening

The lawless make them subject to the plous man'.

The only positive information concerning the religious practices of the Dasyus is to be found in two references to what were in all probability phallus-worshippers':

'No phallus-worshipper come near our offering,' VII. 21, 5; and in X. 99, 3 we are told that Indra slow the sisna devah, when he by craft got the tressure of the hundred gated fort'.

The clashing of Aryan and Dasyu on the plains of the Punjab was of distinct significance for the social and religious history of India. The outstanding points of difference, as we have seen, wore race, colour and religion. These lines of difference were sharply drawn. The very term 'Dasyu', as opposed to Arya, meaning as it did 'fiend', came to be applied to the demons, so that there is a very

¹ Note the collection of epithets, anyarrata, amanusa, ayojvan, aderayu.

² Here the monatain as opposed to the plain, as called the 'friend' of the Diasyu, presumably because it was his refege, as Ludwig thinks (fiv. III. 1). So the Hebreso occupied the bill country of Pulstine (foolges i. 10) and the Britose took refuge in the monatains bt Wales and the highlands of Scotland squinst the victorious Anglo Satons.

³ Barkismat, lit, he who has strewn the litter for the gods

Sisna devah, 'whose god is a phalles' VII. 21, 5; X. 99, 3.

^{*}See Macdonell, VM. 155. Doubtless there is here ascribed to Indra, the war-god of the Vedic Arrans, the exploits which the people accomplished under his haspiration

frequent ambiguity in the reference of the word, whether to human or to demonic enemies. There was a sharp distinction drawn between the Arva colour and the Dasa colour, the Aryans coming from a cold climate being white, and the Dasyus having lived for centuries or millenniums in the hot elimate of India being black*. This difference in colour was one of the causes that lay at the foundation of caste, for the very name of casto is rarna 'colour's. the interpretation of sisnaderah as 'phallus-worshippers' is correct, as is most likely, then the contrast between Aryan and Dasyn in the matter of religion was equally great; and so the religious difference was drawn as sharply as the other differences. For the Aryan the conception of the divine fatherhood was embodied in the idea of Father Sky, the bright heavenly one; for the Dasyu the same conception was expressed in the form of linga-worship, Situadeva is n term of reproach and contempt in the By. But the time came in India, when this same worship became widespread even among the Brahmans. The despised Dasyus had thus their rovengo.

[&]quot;It was only in India that the white Aryana encountered a wally disk race in ancient times. The clash was multi-by what was perhaps the first appearance in helory of the "colour line", Of course the Greek, Lains and Colle Aryans encountered the circulation of the colour line", as to found to severate afficient for an analysis of the colour line as between with and Nyrob has been most difficult in America and Senth Affire, In both regions aids it has been the contrast of white Aryana (indo-Dursquam) and those of dust with.

^{1 &}quot;The altimate case of the extreme rigidity of the caste system, as compared with the testive of any other Asyan society, now probably be sopial to the sharp diffraction drawn from the heybridge between the Asya and the fount. The contrast which the Vote institute a file as extreme the extreme and the compared population, and which probably served originally on the difference of colors between the upper and the lower classes, tembel to accentiate the natural distinctions of high, occupation, and looking, which aromally existed among the Asyan Indians, but which among the Asian project never developed into a caste streem the that of India, notice that it there has been no recars, caste might never have arises. Vote, before it, long, 200, 200, 100 to Recket, Buttery of Caste to Jeden, there, 1000, and America Smith, Order Buttery of India, 1909, pp. 3-45.

6. Conquest of the Land.—The early struggle between Aryan and Dasyu must have been as ruthless and bloody as that between invading Jute, Angle and Saxon and the indigenous Celt for the possession of Britain, or between Hebrew and Cananite for the possession of Palestine, or between backwoodsman and American Indian for the possession of the great plains of the West. The bow was the main weapon of the Veda', as is clear from the great battle-hymn VI. 75, in which the bow is the only offensive weapon mentioned. This is a kind of Vedic 'song of the Bow'. It is a fairly late hymn, standing at the very end of the individual of the sixth book, and composed apparently of fragments. The following is Grifffill's translation, with some changes:—

Weapons of War, VI, 76.

- Like that of threatening storm-cloud is his visage, When armour-clad he seeks the lap of battle.
 Be thou victorious with unwounded body;
 So may the thickness of thine armour shield thee.
- With Bow let us win kine, with Row the battle, With Bow be victors in the sharp encounters.
 The Bow does to the foeman what be loves not, Bow-weaponed may we subjugate all quarters.
- Close to his car, as fain to speak, she presseth, Holding her well-loved friend in her embraces; Strained on the Bow she whispers like a woman,— This Bow-string that preserves us in the combat.
- These meeting, like a woman and her lover, Bear, mother-like, their child upon their bosom. May the two Bow-ends, starting swift asunder, Scatter, in mison, the foes that hate us,
- 5. With many a son, the sire of many daughters, He makes a clatter, going down to battle; Bound on the back, the Quiver, launched in action, In overy fray and struggle is victorious.

³ Vedic Index, I. 207. So important was the bow as the supreme weapon of war that later in the Mahabharata Ilhanarteda 'the science of the bow' meant the science of war in general.

- Her tooth a deer-horn, dressed in eagles' feathers, Bound with cow-hide, launched forth, she flieth onward; Where warriors rush apart or rush together, There may the Arrows turnish us protection.
- 12. O glowing Arrow, pass us by ', And let our bodies be as stone; May Soma intercede for us, And Aditi protect us well.
- 14. It compasses the arm with servent windings, Defending from the impact of the bow-string; Knowing well all the ways of the hand-smiter. May it guard manfully the man on every side.
- Now to the Arrow poison-smeared, Horn-headed shaft or metal-tipped, Divine, born of Parjanya's seed, fle this high adoration given.
 - 16. Loosed from the bowstring fly away, Thou Arrow, sharpened by our prayer*; Go forth and fall upon our foes, And leave not one of them alive.
- 17. Where flights of hurtling Arrows show Like locks disherelled of young boys; Even there may Brahmanaspati And Aditi protect us well, Protect us well through all our days.
 - 18. Thy vital parts with coat of mail I cover, With immortality King Some clothe thee; Varuna give enlargement more than ample, And in thy triumph may the gods be joyful.
- 19. Whose would kill us, whether he Be alien fee or one of us, May all the gods discomfit him. Prayer is my dearest coat of mail.

This hymn is addressed to the deified weapons of war. Since the bow occupied the most important position in the Vedic armoury, all its parts are named, bow4, bowstring4,

900

abbient at think marke made or horse, not

⁴ dhaman.

b jun.

bow-ends', quiver', arrows' and (by implication) handguard'. Arrow-heads were tipped either with horn or with metal and were sometimes at least smeared with poison. The bowman wore some kind of protecting armour and fought most effectively from the war-chariot. By means of the bow the Vedic Indian won battles and was successful in cattle raids. War-chariots were the artillery of antiquity. Much depended upon the swiftness of the horses and the skill of the charioteer. Hence chariot racing as a sport was only a practice for the serious business of war . In this hymn there are two references to prayer (brahman). but prayer here is used undoubtedly in the sense of magic incantation or spell". In fact, some if not ell of the stanzas of this hymn are probably spells?, and doubtless they owe their preservation to their apparently successful use in this capecity to. Weepons of war and especially the chariot play a large part in the equipment and furnishing of the Vedic · gods. Indra the supreme war-god of the Vedio Indians is armed with a club", and the gods in general ere mounted on cheriots. It is probable that the Vedic Arvans offered secrifice before bettle end called on Indra for help 12.

Gradually but surely the Aryans overcame the Dasyus and got possession of the cholcest parts of the Punjab. The Dasyus were either killed or reduced to slavery ", or driven

⁴ hashitra (understood) or perhaps hastaghun 1 arman 2 Zimmer AL 203

See Hillebrandt (ERE. act. Brahman) for the meaning 'magic spell'

Notably vv. 12, 16, 17, 19 If the Prog-ong, VII 103, is a rain charm, it

is quite reasonable to regard VI 75 as a battle-charm. As other examples of battle-charms may be mentioned VIII 70, 10 and X, 23, 8. 16 We may cite Balak's biring of Balann to curse Israel (Numbers XXII, 2-6)

as an Old Testament instance of the use in war of hostile spells 11 rotes

¹³ Zimmer, Als. 201 With this compare the similar custom among the Hebrews, 1 Sam, VII 9-10, NIII, 9-13

¹³ Rv VII 86, 7; VIII, 56, 3; X, 62, 10 The mercing disa 'slave' is due to the fact that the Disa class were recounted from the Disa people,

to take refuge in the mountains' and desert places. They probably found the war-chariot difficult to contend with, and so found their natural refuge in the mountains, very much as the Hebrews were able to hold only the hill country of Palestine and not the plains, because of the iron chariots of their enemies?. Sambara, the mountain dwelling' son of Kulitara has the appearance of being a Dasa chieftain, in some passages at least. The famous Divodasa's was the great antagonist of Sambara", whom he often defeated. Names of Arvan chieftains, such as Trasadasyu? 'before whom the Dasyus tremble', and Dasyave triba" 'the wolf for the Dasyus', are reminiscent of the successful struggle.

There is frequent mention of 'forts' or 'strongholds'. generally as belonging to the Disas, for the Aryans undoubtedly took the offensive and the Dasyus defended themselves in forts as best they could. Probably each Dusa (as well as Arvan'o) settlement had its fortified enclosure consisting of earthworks with wooden palisades and a ditch 11. in which the people could find refuge in time of danger, taking with them also their cattle 12. There seems to be a

¹⁰ The par 'fort' was inde-Puropeun, we p. 4, No. 38.

¹³ See Vedic Index, I, 528-540 (under pur)

¹⁴ A parallel situation is to be found in the early days when the American backwoodsmen won the region west of the Alleghany mountains from the red imbans, "When a group of families moved out into the wilderness, they built themselves a station or stockade fort, a square palmade of upright logs The families only lived in the fort when there was war with the Indiana, and even then not in winter". - Roosevelt, WW. I. 141.

reference to the capture of Dasa forts in the following as translated by Grilfith:

In the wild joy of Soma I demolished Sambara's forts, ninety and nine, together; And, utterly, the hundredth habitation, When helping Divodisa Atithicya. IV. 26, 3.

In some passages there is undoubtedly reference to the cloud-forts of the demon-Dasyus, and in others pur is used metaphorically as, c. g. when Agni is besought to guard his worshipper with 'strongholds of iron'!

7. ORGANIZATION OF SOCIETY.

a) Vedic Tribes, —There is frequent reference in the Rv. to the 'five peoples', a term of somowhat uncertain application. It is found in each book of the Rv.' and is prebably to be taken as a conventional number far the Aryan tribes in the Punjab, just as the number of rivers was conventionally savan.' In I. 108, 8 the five names of Vadus, Turvaesa, Druhyng, Anne and Parus are mentioned together. Both Indra and Agni are described as pañecjanya, 'balanging to the five peoples'; and there is a reference to them in the hymn ta Sarasvati (VI. 61, 12), as if they were settled on or near that river in the eastern Punjab. Fram all the ovidence it looks as if, in their steady progress anstward', the Aryan tribes were stopped for a time in the region of the Sarasvati and Kurukatra, unable to force their way through the masses of aborlgines' holding the great

[&]quot;It would be difficult to exaggerate the Importance to India of the existence of the great desert of Rapparana. The eccan to the south east and south west of the reginalia was at most times an ample protection against present invasionuntil the Europeans rounded the Cape of Good Hope. The sast length of the Himulays, backed by the desert plateau of Tabet, was an equal defence on the porth side. Only to the north west does India lie relatively oven to the incursious of the war like peoples of Western and Central Asia. It is precisely in that direction that the Indian desert presents a waterless word extending north-eastward from the Rann of Cutch, for some 400 miles, with a breadth of 150 miles. In rear of the desert a miner bulwark is constituted by the Artralli range. Only between the north-eastern extremity of the desert and the loot of the Himalayas below Simla is there an easy gateway into India Delhi stands on the west bank of the Jamus at the northern extremity of the Aravallis, and may truly be called the historical focus of all India; for, as we have ecco, it commands the grieway which leads from the Punjab plana to Hindustan, the plain of the Jumna and the Ganges Here the fate of invasions from India from the northwest has been decided. Some have either never reached this gateway or have failed to force their way through it * The conquest of Darlus in the latter part of the sixth century B C. and of Alexander the Great in the years 327-5 B, C., were not carried beyond the Panjah plain. Such direct influence as they exercised in modifying the character of Indian civilization must therefore have been confined to this region. On the other hand, the invasions which have succeeded in presing the galeway and in effecting a permanent settlement in Hundustan have determined the history of the whole subcontinent. These belong to two groups, the Aryan and the Musalman, distinguished by religion, language, and type of civiliration and separated from each other by an interval of probably some two thousand 2.12 I He robailed "creey

basin drained by the Jumna and the Ganges, it was differences of casto that received the emphasis. In the land of the "seven rivers" the population was divided into Aryan, and Dasyu, ancient and hereditary fees of each other. In the region of Madhyadesa it was no longer Aryan and Dasyu, but priest, king, stulject and sort', the Dasyus' forming the fourth and servile element in the total population, while the first three orders consisted of "twice-born' Aryans. This fourfold division of the population which forms the basis of caste undoubtedly had its real beginning in the Rigyedic age, reaching its full culmination in the period of the Yajuryeda'.

b) King and Ksatriyas. The Ksatriyas were the ruling class among the Aryan tribes in the Punjab, and normally each tribe had its chieftain or king. Thus the king was the Katriya par excellence. In some cases at least Vedle monarchy was hereditary, for descent can be traced. Undoubtedly the necessities of the war with the Dasyus halped to strengthen the monarchical element, and perhaps even to create it, where it dld not exist before'. The ruling class and the military class coincided, as they do in every age. The Vedle nobility provided the rulers in times of peace and the military leaders in times of war. Sudas: Divodāsa and Trasadasyu are names of prominent kings. The highest level was reached by the Vedic nobility in the matter of strength, beauty, wealth and happiness. They were the favoured class. Hence most of the Vedic gods were patterned after the pobility. They were in fact

Brahmago, Rajanya, Vating and Sadra, Rv. X. 90, 12, a late hymn.
 With the Dason tribes that were degraded to the status of Sadras or virtually

serfs, may be compared the similar degradation which overtook the remnants of the early population of Palestine, Hittites, Amorites, Perizites, Hirites and Jehnsiles, in the days of Solomon, about 975 n. c. (2 Chron. VIII 7-8)

⁵ So the wars with the Phillstines helped to create the monarchy in Israel. 1 Sam VIII, 5, 19 20.

glorified Katriyas. The Katriya god par excellence wes Indra.

c) Priesthood. — As we have seen! the priesthood was

well developed before the Indian and Iranian clans seperated. Hence the Arvan chiefs were accompanied into Indie by priests, who had already a fairly complicated ritual connected with the Soma offering and the fire sacrifice. It is possible that some of the priestly families mentioned in the Rik as authors of the 'family books' began their career as priests hefore entering India. The continuity of the Soma-sacrifice both in Persia and India would seem to demand such an unbroken tradition, and the very term brahmana, 'son of a brahman', indicates the hereditary character of the priesthood. As is usual even in primitive societies, priestly functions were largely in the hands of a special priestly class. Already in the Rigyedic age the distinction between ruler and priest? was clearly drawn. There were several functions' such as recitation of hymns, manual acts of sacrifice, and singing of songs, which required several closses of priests for their proper performance. The oldest list mentions seven different kinds of priests. The chief of the seven priests was the hotar or recitling priest. He sang the hymns, and in early times during the creative period of the Ry, he composed them also. Apart from the seven priests stood the purchita, the domestic chaplain of king or noble. According to the later ritual every king must have a purchila who alone could properly officiate for the king. He was the spiritual adviser of the king, and in the nature of things

tended to become also his adviser in temporal matters'. Examples of purokitas in the Rv. are Visvamitra' and Vasistha' in relation to king Sudfas, and Dovinji' the purohita of Santanu. The semi-political' as well as religious functions of the purohita' undoubtedly contributed to the growing influence of the priesthood.

The nobility and priesthood were closely connected by ties of mutual dependence. The noble was dependent upon the priest for the proper performance of the sacrifice and the priest was dependent upon the noble for his honorarium. The dakyina or sacrificial 'fee' was greatly appreciated by the priests, and many a 'gift-laud'; celebrates the generosity, anticipated or realized, of wealthy Kṣatriya patrons. For example, I. 126, 1-2 is a Danastuti:

- Thoughtfully I present these lively praises
 To lihāvya dweller by the Sindhu river,
 Who measured out for me a thousand pressings',
 The King unconnectable, desiring glory.
- In one day I received a hundred niskas,
 A hundred gift-steeds from the urgent monarch,
 Of the lord's cows a thousand, I Kakgivant.
 His fame undying hath he spread to heaven.
- Dark coloured horses Svanaya's gift, and chariots, Ten of them, came to me, filled full of women 1.

The Brihman purodifa of the Vedu. Ling pointed is an institution in the distriction of the Brihman mantin or prime manifes of later times, e.g. Kalbana Pandi, fin Schmir, and the Peshwas of the Marshha kines.

50

There followed after sixty thousand cattle. Kaksivant gained them at the day's conclusion.

According to the above-translated 'gift-laud' the prince Syanaya Bhavya, who dwelt by the Indus, had apparently been in trouble probably from some Gandhara tribe (v. 7), and had implored help (v. 2). This the priest Kakstvant rendered through his sacrifices, prayers and spells'. Hence the magnificent gifts of the king, which the priestly recipient celebrates probably with suitable exaggeration. The gifts include horses, cows, gold ernaments and female slaves (?), but not land'. It indicates that there were Aryan tribes still dwelling on the Indus.

Most or all of the material of the By, is due to the mutual relationship and co-operation of wealthy Katriya patrons and indigent Brahman priests. . In the early creative days of Rigyedic literature the hotar priests did not merely recite the hymns, but also composed the hymns they recited. We may assume with a bigh degree of probability that very few hymns in the Rik collection were composed except by priests under contract to wealthy patrons to provide · the hymns necessary for the solemnizing of the sacrifice. And as the supreme ritual of the Rv. was the Soma ritual, which gathered up in itself the worship of all the gods, it follows that most of the hymns were composed for the Soma sacrifice. This means that the Rigyeda is a literary monument of the religious views and practices of the Vedic aristocracy and priesthood alone, the usages of the Vaisyas and Sudras being inadequately represented. Along with the 'hieratic' religion of the Rv. there were current undoubtedly lower forms of belief, which were later collected in the Atharvaveda, practices such as charms and spells which receive comparatively slight recognition in the Rv.

¹ Compare Exodus XVII. 8-13, 1 Sam. VII. 5 11.

³ See Vedit Index under Riteif, and Oldenberg, EV. 3-0.

While the, on the whole, is true, it must be admitted that recent research has tended to diminish somewhat this difference between Bigueda und Athorrereda.

MICROFILM THE RIGVE

There were priestly gods as well as warrior gods. If Indra was conceived after the likeness of the Ksatriva. Agni and Brihaspati are represented as divino priests.

d) Vaisyas .- Apart from the nobility and the priesthood the rest of the population of Aryan descent was included under the name of Vaisyas', that is, 'commons', 'subjects'. They constituted the agricultural and industrial class. According to the later literature their distinctive sign was the goad of the ploughman, and their subordinate position in relation to the nobility was Indicated by their characterization as 'tributary to another', 'to be oppressed at will', etc The Vaisyas formed the backbone of the state'. Superior to, but resting upon them, were the Brahman and Ksatriya communities. Brahman, Ksatriya and Vaisya as Arvan in descent were sharply distinguished from Sudra. As a class the Valsyas seem to have had little to do with the political. roligious and intellectual life of the Vedic ago. whole, like the Sadras, they were an inarticulate element in the population, with some tendency to fall rather than rise in social standing'. Probably their religious practices were largely of an Atharvanic character, consisting of domestle and agricultural charms'. The bucolie Pasan armed with a goad seems to have been a Vaisya delty.

e) Sudras. - The Sudras' as in general people of non-Aryan blood, colour and religion were at the bottom of the social scale in Vedic India. If according to the Aitareya Brahmana' the Vaisya could be 'oppressed at will', the Sadra could be 'slain at will'. The term Sudra occurs only once in the Rv. s as the substitute and equivalent for the

t Rv. X. 96, 12 (only here), but compare VIII, 35, 16-18, where brahma. trateam and sizah are mentioned together.

Probably the term Sadra (cf. Ptolemy's Ybester, Vt. 20) was originally the name of a tribe which opposed the Aryan invasion. See Vedic Index under Sudra 7 X. 90, 12

VII. 29, 4.

carlier Dasyu (Dāso). It covers the aboriginal population so far as reduced to a state of subjection to the Aryan. While the Sūdra was separated from the Yaisya by difference of blood, he was industrially akin to the Vaisya. The presence of a dark servile class in Yedic society was undoubtedly responsible for the growth of the feeling that manual labour was undignified. This feeling tended to depress the status of Vaisyas. We know little or nothing about the religious beliefs and practices of the Sūdras except what is suggested by the expression sisnadera. It is safe to assume that they were Atharvanic in character, consisting of demonworship, charms and spells. The later religious history of India was conditioned by the interaction of Arya and Sūdra. It Sūdra religiou was sufaraired.

S. CONCLUSION.—When the Aryan tribes passed the lindu Kush, they erossed, as it were, their Rubicon. In large measure skut out from the fellowship of their brother Aryans of the West, they were shut in with the aborigines of India in an age-long isolation, never effectively brokon until the coming of the later Aryans, namely, the Portuguese, Danish, Dutch, French and English. Classes that ordinarily remain fluid, such as nobility, priestheod and commons, became in India crystalized into castes, because of the addition of the fourthor Sadra class. Probably it was colour more than anything clse, which was responsible for caste. In the clashing of Aryan and Dasyu there must have been much interningling of blood. There was an ancient as well as a modern Eurasian population. * The later philosophical

Ormpare the similar condition of things during the slave-holding days in the Compare that of America, when white labourers were often regarded as 'poor white trash', industrially and even socially akin to the Negroes.

⁵There is no reproach furolved in this statement. The artistic Greek people are the product of the fortion of northern Aryan tribes with the Vediterranean rice. The English people represent a fusion of largiting Testomo tribes with the Orthe inhabitants of British Anglo-Orbit they should be called.

CHAPTER III.

THE RIGVEDIC BOOK

1. INTRODUCTORY.—The Rigorda is the Vedic book par credlence. Chronologically, it is the oldest book in Hindu diterature. Theoretically, it is the most sacred, as it heads' the list of books which come under sizudi or 'revelation'. The word Veda means knowledge or wisdom', and Rig (Rib) is the name for laudatory verse or stanza. Hence the compound word Rig-Veda may be translated as 'Verse-Wisdom'. It is the carliest and most sacred wisdom of the Indian Aryans set forth in the form of stanzas which are grouped in hymns. The unit of revelation, as in the Quran, seems to be the verse.

The Riggeda is a great collection (samhitā) of a thousand or more hymns. It is, however, only one out of feur collections. For besides the Rv., there is the Saman or chant-Veda, the Yaius or Veda of sacrificial formula, and the Atharvan or Veda of 'popular religion', The four Vedas are net unconnected with one another. Thus all the stanzas of the Samaveda except seventy-five are found in the Ry. The Yajurveda and the Atharvaveda also have a considerable amount of material in common with the Ry. What we really have, then, in the four Vedas is the distribution of the original Vedic material into four samhitus or 'collections's. The four Vedas are a fourfold presentation of the primitive Veda, in some such way as the four Gospels are a fourfold presentation of the primitive Gospel. By 'primitive Yeda' of course is meant the poetic material of the Vedic age before it was collected. Such material

¹ In the Purusa Sukia (Rv. X. 90, 9) the stanzas (pical) of the lith are mentioned before the verses (eimant) of the Samon, and the Yajus

² Cognates of Veda are Gr. 5-52, Lat vid 35, Por roll

¹ Horkins, 10N, 23

⁴ Hopkins, 10N, 21.

existing In the various Vedle class and priestly families consisted, as the four listeric collections show, of 'a heterogeneous combination of old hymns, charms, philosophical poems, and popular songs, most but not all of which are of religious content'. This primitive Vide material was in part 'hieratic' or priestly, having to do with the worship of the great gods, such as Agai, Indra, Soma; and in part, popular, consisting of house ceremonies, charms and magic spells'. The liggeds, while containing some popular nuterial, especially in the tenth, first and seventh books', is pre-eminently a text book of priestly religion; whereas the Atharvavela, though containing some priestly material, is very largely a text book of popular religion.

The process of the formation of the ligyeds as a collection of hymns must have been complete by about 800 m.c. and the true date may be still carlier. The complete lifk is presupposed in the existing Brāhmayas, which, according to the roost moderate possible estimate, cannot be dated liter than 800 to 600 u.c. The other three Vedas were collected rather later than the lifk, but we need not discuss the dates of the r-formation here. It is, besides, quite produble that long before the fourfold collection was formally mide, the Vedic material bigan to break up into four groups on the basis of religious use. Thus the reference in the Pursus-Sakla' may be only to an Incipient classification of the Vedic material into laudatory verses (fieth) used by the Hoter or invoking priest.

[&]quot;Hatte toy 21

Howevield, VV 47.

¹ Ke X 103

chants (sāmāni) used by the *Udgātri* or singing priest, and sacrificial formulas (yajus) used by the Adhvaryu or officiating priest. The final reduction of the four collections may very well have been only a de jure recognition of what had for some time been a de facto state of things.

The motive which determined the fourfold collection of the Vedic material was, then, primarily practical—to serve the interests of the ritual. Of course, there was in operation at the same time a more theoretical motive, namely, the preservation from change and destruction of the ancient heritage of sacred song.

But though the Rigreda as a collection is not to be dated later than 800 m.c., the final settlament of the exact spelling of the text as we have it to-day, did not take placa until after the completion of the older Brāhmanns, about 600 m.c., when the Samhltá text', i.e. tha text settled in accordance with the rules of samhltá, which control Classical Sanskrit, was formed. Since that date tha text of tha Rigreda has been preserved with almost faultless accuracy.

The Rigreda deserves to be called 'the most Important' of the Vedas, because it is the oldest and largest collection of Vedic hymns and the source of much of the material found in the Saman, Vojus and Atharran. Of the 20,000 metrical stanzas in Vedic literature (omitting variants) about 10,000, or fully one-half occur in the Rik'. Of the 1549 stanzas of the Samaveda 1474 are derived from the Rik, and also one-fourth of the matter of the Yajurveda. Besides a considerable portion in prose, the Atharvaeda contains about 6000 poetic stanzas, one-litth of which, namely 1200 stanzas, occur also in the Rv. The Rigreda,

³ Bloomfield refers to his own "spidly growing conviction that the Rv, as we have it, in common with the other Veilas, is a htmrgic collection". Relative Oxymnology, JAO2., 1901, p. 45.

then, is a great documentary source for the other three Vedas, very much as the Gospel of Mark is an important source for the Gospels of Matthew and Luke.

Vedic literature covers three classes of literary productions in the Vedic age, viz. (1) Mantras or Vedic stanzas produced largely in the creative period and afterwards collected in the form of the four Vedas; (2) Brahmanas, exposition and further elaboration of the ritualistic element in the Vedas, and also of the philosophical element'; and (3) Sutras, mnemonic compendia dealing with Vedic ritual and customary law. Thus by Veda we mean, in a narrow sense, the Rigveda; in a wider sense, any or all of the Four Vedas; and, in the widest sense of all, the whole eyele of Vedle literature according to the threefold division of Mantra, Brahmana, and Satra. The extent of the existing Vedic literature may be estimated from the fact that about one hundred and twenty texts have contributed to the Vedic Concordance of Prof. Bleomfield'. The Riggeda is about equal in bulk to the Hiad and Odyssey combined. Being 'the most ancient literary monument of India', it is the foundation not only of Vedic literature, but of Indian literature in general. Thus for Indian history, religion, philosophy and civilization the Rigveda is a book of origins. As prophetic of the lines of future development it may also be called a collection of first fruits.

2. THE TEXT OF THE RIOVEDA.—The Rigycda contains 1017 hymns, or 1028, if we add the supplementary Valukhiliga hymns. But the number can be easily increased by breaking up some of the larger wholes into separate hymns, as we seem forced to do on critical grounds? Thus out of the total collection of 1028 hymns E. V. Arnold tinds about 220 which are composite and consist of 780 parts,

^{*}The elaboration of the philosophical element to the Vedas is, of course, the work of the Upanisads, philosophical appendices to the Brahmans

*Bloomfield, RV, 18.

² Hillebrundt, Alt-Indien, 33

metro¹. We see, then, that there are three principles which lie at the basis of the groups within the several books, riz. Identity of the deity addressed, as in the family books, Identity of authorship, as in the first, eighth and tenth books, and identity of metre, as in the ninth book. The first and tenth books have each the same number of hymns (191), and together they contain the great mass of all the Atharvanie or 'popular' stanzas in the Bigyeda.

On the basis of these uniformities of arrangement by which various sections of the Ity, are linked together, it is plausible to assume more or less independent redaction for several of the larger wholes of which the Ity, consists, Professor Hopkins' thinks that a threefold process of grouping lies at the basis of the present arrangement; books II-VII, the 'family books', furnishing the nucleus, books I and VIII adding a framework, and books IX and X completing the collection. This, or something like it, must have taken place. If Hopkins' view is correct, then we have a first of threefold canon in the Ity.

The canonical form of the fiv., as we have seen, is known as the Samkita text, that is, the text in which the words are united according to the rules of combination current in Sanskrit, and is not earlier than 600 n. c. Several schools existed, each with its own text, distinguished by unimportant differences: but the text has come down to us only in the recension of the Sakala school.

As soon as the It, 'collection' was made, an extraordinary set of devices was invented, in order to guard the purity of the text. Soon after the formation of the Sainhila or synthetic text, the Pada or analytic text was constructed. In the pada or 'word' text each word of the Sainhila was reproduced in its separatic, unmodified and (generally) older

¹ See for this whole section Macclonell, Squatett I Bernbure, Chap. III.

^{*} ION, 26-27.

³ This single recension of the fiv. reminds us of the similar testinal history of the Qurán, the single recension of Othman being responsible for all later copies of the Bible of Islam.

form. It is easier to read metrically from the pada than from the sainhita text. Further devices for safeguarding the text were the Krama-patha 'step-text', the jata-patha 'woven text', and the qhang-patha, a still more complicated text. Representing the words of a Vedic stanza by the letters of the alphabet, we may illustrate the three safeguarding texts by the three following formulas: (1) ab-bc-cd-de, etc., (2) ab-ba-ab; be-ch-bc, etc. (3) ab-ba-abe-eba-abe; be-eb-bed, etc. By these complicated processes of dislocation and repetition forwards and backwards, the aim was to make impossible the slightest change in the sacred text. Besides the five forms of the text mentioned above, there were two more safeguards in the shape of the Pratisakhyas, which explain all the changes necessary for converting the pada into the samhita text, and the Anukramanis or 'Indices', which define the contents of each hyma from various points of view, and also furnish a statistical account of the Ry, as a whole'. The result was that from the time that these safeguarding devices bogan to be applied, the Sakala recension of the Ry, like that of Othman's recension of the Quran, was preserved in a unique state of purity. Before that time, however, some textual corruption had taken place'.

It should be mentioned also that for a long time the Vedic texts were in all probability orally transmitted. If writing was introduced into India in the 8th century B. C., as Bühler' thinks, its use for long centuries was confined largely or entirely to commercial transactions and the like. Doubtless the Brahmanical community had an interest in keeping the sacred texts as a kind of priestly monopoly. Such a monopoly could be maintained only if the texts were taught orally and not reduced to writing.

¹⁰²⁸ hymns, 10,402 verses, 153,826 words and 432,000 syllables. Max Müller, Physical Religion, 66

Indian Paleography in IA. vol. XXXIII, Appendix 15-16

The extraordinary machinery for safeguarding the text of the Rv., the like of which is not found elsewhere in the world, indicates the existence of a well-grounded fear that the textual history of the Vedic hymns in the past would reneat itself in the future; in other words, that "the text would continue to be corrupted, modified, modernized, as without such precautions it had been changed in the past"1. The textual history of the hymns of the Rv. before the 'collection' was stereotyped in the form of the canonical text, was undoubtedly a history of linguistic levelling. On this point the testimony of experts may be cited. Macdonell' admits that "there are undeniable corruptions in detail belonging to the older period." Hopkins' holds that the hymns of the Rv. collection-hymns of very different periods originally - had been already reduced pretty much to one linguistic level, at the time the canonical text was formed. Grierson and Barnett' also remark that the songs of Lalla, or Lal Ded, the Kashmiri female ascetic. furnish a valuable example of the manner in which the language of the Vedie hymns must have changed from generation to generation, before their text was finally established. The effect of such linguistic levelling was to obscure more or less the data for the existence of different dialects in the Rv. and the evidence for different periods of composition. The samhita text stereotyped the form of the Ry, very much as the grammar of Panini fixed the form of Sanskrit.

What has the extant text of the Rv. to say regarding the material out of which it is composed? As an answer to this question Bloemfield, the editor of the great Vedic Concordance, remarks: "Of the 40,000 lines of the Rigyeda

about 5000 are repeated lines Not far from 2000 verse-lines occur two, three, or more times This collection as a whole is the last precipitate, with a long and tangled past behind it, of a literary activity of great and indefinite length Every part seems to be conscious of and assimilated to every other part." And in another place the same scholar' writes that "the earliest books of the Rv. are not exempt from the same processes of secondary grouping and adaptation of their mantras, though they are less frequent and less obvious than is the case in the Atharyayeda". In harmony with this Hopkins' declares that "the Rigyeda Collection itself is a composite consisting largely of the same material disposed in various ways". And he draws the conclusion that "the hymns are founded on older material, the wreck of which has been utilized in constructing new poetic buildings, just as many of the temples of India are to a great extent built of the material of older demolished temples". This is certainly true to some extent. But may not many of the phenomena of repetition in the Rv., even as in the O. T. Psalms and in the Quran, be due to a stereotyped religious vocabulary, in which the same phrases would naturally tend to recur?

3. THE LANGUAGE OF THE RIOVEDA.—The centre of gravity of the Indo-Aryan world at the time that the Rv. collection was made (circa 600 n.c.) was most probably in Brahmaridcia* (the country of the Holy Sages) in the region between the upper Junna and Ganges. It is clear that the carlier hymns were produced in the western Punjab, while the later hymns were composed further East and probably largely in the vicinity of the sacred river Sarasyatt. Now an outstanding fact in the linguistic

history of Aryan India is the distinction emphasized in Sanskrit literature between the 'Midland' (Madhyadesa) and the 'Outland'1. The Midland extending approximately from the Himalayas to the Vindhya Hills and from Sirhind to Allahabad was regarded as the true home of the Aryan people, language, religion and culture. The Outland, namely, Punjab, Sind, Gujarat, Rajputana, Oudh and Bihar, was also peopled by Aryan tribes, each with its own dialect. Now in the opinion of Grierson, the Superintendent of the Linguistic Survey of India, "a comparison of the modern vernaculars' shows that these outer dialects were more closely related to each other than any of them was to the language of the Midland". To account for this linguistic condition of things, he assumes that the latest invadors "entered the Punjab like a wedge into the heart of the country already occupied by the first immigrants, forcing the latter outwards in three directions, to the East, to the South and to the West". The result of course would be the creation of a kind of linguistic cleavage between the language of the Midland, on the one hand, and the various dialects of the Outland, on the other, such a cleavage as Is suggested by the linguistic facts imbedded in the modern Indo-Aryan vernaculars. If this is a correct interpretation of the facts, then the Aryans of the Midland as distinguished

See chapter on Lunquages by Grievon in IGL I 349 ff.

² Grierson's classification of the Indo-Ary in Vernaculars of India is as follows: -

e) Eastern Group: Bihari, Origa, Bengali. Arramere

⁵ Orierson IGI, 1, 358 (following Harnle).

from the Arvans of the Outland, were the last to arrive, but the first to achieve great things.

This interpretation of the linguistic facts lies at the foundation of the assumption of two widely separated gates by which the Arvans entered India, the Khyber Pass and the route through Chitral and Gilgit. This view is not supported by the general consensus of opinion. If certain scholars, such as Hornle, Grierson and Risley' favour it, other couplly great scholars like Macdonell, Keith and Ranson', who occupy the Sanskrit chairs at Oxford, Edinburgh, and Cambridge, oppose it. Rapson suggests an alternative theory to account for the linguistic facts.

The language of the Rigyeda was naturally the dialect of the region where the hymns were composed, namely, the northern and eastern part of the Punjab, with its centre probably at the sacred river Sarasyati. It was, without doubt, the literary forms of a living vernacular, and Grierson' sees in it "the earliest Prakrit, of which we have any cognizance". The language of the Rv. doubtless represents a more archaic dialect than was commonly snoken. The later hymns, we have reason to believe, were largely imitative and presuppose a fixed tradition of the kind of speech proper for a sacred song. If, as Hopkins holds, the earlier Rigveda hymns have suffered from 'linguistic levelling', it is probably equally true that the later bymns have suffered from the opposite process of linguistic heightening, so to speak, through the conscious archaizing of their authors'.

The speech of the Rv. may be called Vedic to distinguish

⁷ This may be illustrated from the religious hymna or bhojane of North ladia. Eren to-day Hindi hymns are usually written in the archaic dialect of the Ramagana of Tulei Das.

it from the elaborate and artificial form given to the language by the grammetical canons of Pāpini (circa 350 n.c.). The main difference, then, between Vedic and Sanskrit is the difference between an earlier and relatively unpruned popular speech and a later pruned and polished speech. In fact, Vedic as the vernacular of a limited region in and near the upper Gangetic Doab is referred to by Grierson as the only known specimen of "the Primary Prakrits of India"1. The language of the By., then, was in its time as truly o vernacular speech as the Hebrow of the Old Testament or the so-coiled 'Biblical' Greek of the New Testoment: at the same time, os the hieratic speech, it was "the first literary dialect of India". There are of course other differences between Vedie and Sanskrit, Vedie is much richer in conjugational forms, having numerous subjunctive, infinitive, and corist forms, which do not occur in Sanskrit. Phonetically, there is little difference between the two. Of course, many Vedic words were obsolete by the time of Panial and the beginnings of classical Sonskrit. Gn the whole, Vedle and Sanskrit differ from each other very much as Homeric differs from Classical Greek or os the language of Choneer differs from that of Milton.

The processes of levelling down and levelling up, to which reference has already been made' - the old being assimilated to the new and the new to the old - have naturally more or less obscured any traces of dialectical differences which might otherwise have existed in the Vedic text. The distinction between 'hieratic' and 'popular'.

³ Grievan distinguisher between prinary secondary and terlitry Praktis. The language of the Rs. Inflaraties the first, the Pall of the Buddistic writings, the second; and the modern findo-Aryan verancetars, such as Blindt and Dunylbi, the third. It is noticeable that these various verancetars, Vedic, Phil, Hindi and Pounshi, have translated the therary vehicles for such religious books as the Rigardo, the Tripitate of Buddhiem, the Radmaynum of Tuke D s and the Grants Suits of the Sikhs.

¹ pp 61, 61

66

language in the Rv. is a real distinction, if priestly and popular bymns belong to the same age; if not, it may mark simply chronological sequence. Such a distinction, however, between two varieties of Vedic speech, one more learned and technical, and the other more popular, would be very natural according to all analogy. We would expect that the priests as the learned class of the Vedic age would bave a 'elass' speech, technical and professional. There are also some linguistic phenomena in the Rv., which suggest as their causes the existence of different Indo-Arvan dialects, notably the multitudiaous present, aorist and infinitive forms'.

The language of the Ry, is closely akin to that of the Avesta, the Bible of the Zeronstrian religion. In fact, as already shown? Vedic and Avestan are simply dialects of tha same Indo-Iranian speech. Entire passages of Avestan can be rendered into Vedic and vice rersa merely by making the necessary phonetic changes. And a knowledge of Vedic is the best preparation for the study of Avestan.

But Vedic, as we have seen, is related not only to Avestan, but also to Greek, Latin, Celtic, Teutonic and Slavenic. It is, in other words, a member of the great Indo-European family of languages, the only rival of which in historic importance is the Semitic family. If Assyro-Babylonian, Hebrew and Arabic were important vehicles of ancient culture, none the less were Vedic, Avestan, Greek and Latin. But in modern times the languages of the Indo-European family bave far outstripped in importance the languages of the Semitic family (except perhaps Arabie). As modern representatives of the Indo-European family there may be mentioned nearly all the languages of Europe, including such tongues as English, French, German, Russian

^{1 &}quot;The wealth of inflectional forms in the Vedic age may be partly explained as the result of a mixture of dialecta". Rapson, JRAS. 1904, p 440.

¹p. 26

and Italian, and in Asia Persian', Hindi, Bengāli, Punjābi, Marāhi, etc. Thus Vedie belongs to that potent and widely conquering family of languages which more than any other (except possibly the Semitie) has furnished literary vehicles for the best thought of the ages past, and is apparently bound up, to a large extent, with the future linguistic destiny of mankind. Vedie, as the Indian branch of the Indo-European family, has shared with the other branches in the common tendency to spread and conquer. What was first simply the dialect of a district became the language of a easte and a religion, and afterwards (in the form of Sanskrit) the language of roligion, politics and culture throughout India'.

4. THE CHRONOLOGY OF THE RIGVEDA.—Brief references have already been made to the migrations and settlements of the Western Indo-Europeans, as bearing upon the problem of the date of the Rigveda. It seems desirable to consider this question from the point of view also of Indian history and archwology. There is as yet no unanimity among scholars concerning the age of the Rigveda. Brühmanical orthodoxy holds that the Vedas are eternal. Modern critical scholars have hitherto been divided into three

¹ If the superstructure of Persian is Samitic (Arable), its foundation is Indo-Furopean

⁴ Rapson, op. ett 450.

⁴ Mans I, 21:23, MII 94:100 The view embodied in Manusnyill (cleas 100 a.p.) is that in the beginning Braham's fanhiour from the works of the Veda the secret lanner, functions and conditions of all creatures, and that in order to the performance of sacrifice by direct Earth from April, Vajus and Siryus the triple extrail Veda. According to scholastic Brishnanism, then, the Veda Is at once a creative and a scarificial program. Kullikas-Thiatta (15th Cent. A. D.) who builds on itoridatelysis (15th Cent. A. p.) just be published. The versat manchane era; Kaipa) Braham's deew both the Vedas from Agal, Vijus and Sürya. The Arya Kamip, which has broken with Brishnanial tradition at so many points, holds four nevertheless to the Breinhanded theory of the antiquity of the Vedas and caches that the Four Vedas were revealed to four sages, Agal, Vajus, Sürya and Angirsa at the beginning of the present mundane sage over one knodred billion (1) years appear.

camps, according as they have favoured an early, a late, or an intermediate date. Professor Hopkins1 of Yale, a great authority on the Epic literature of India, and Professor Jackson of Columbia, well known as a Zoroastrian scholar, both agree in urging a late date, 1000-600 B.C. Briefly stated their grounds are as follows: (1) The date of Zoroaster is now generally fixed at B. c. 660-583 by c. g. Geldner', West' and Jackson'; and since there is only a dialectic difference between the language of the Rv. and that of the Avesta, there can be no great interval in time between the two works, the date of Zoreaster, of course, determining the date of the oldest part of the Avesta. (2) The change in language between the Rigyeda and the Upanisads is not greater than that between Chaucer and Milton, and hence it is fair to suppose that about 200 years would suffice in the one case as well as in the other. The two hundred years within which Hopkins and Jackson place the bulk of the Rigveda bymns are B. C. 800-600. (3) The Rishis who composed the hymns may very well have been in large measure contemporary with one another. and cortain differences in vocabulary and style may be accounted for simply by variety of authorship. According to this view, then, the Rigreda is roughly contemporaneous with the bulk of early Hebrow literature.

At the opposite pole from Hopkins and Jackson stand Tilak and Jacobi , who on the basis of astronomical calculations would carry the period of the composition of the Rigveda back beyond 2500 s. c., as far at least as 3500, and according to Tilak farther still. Jacobi places the

Vedic age within the period 4500-2500 B. c. but refers the composition of the Rigveds to the second half of this period. Tilak dates the oldest period of Aryan civilization between 6000 and 4000 B. C. when he thinks certain 'sacrificial formulæ' were 'prebably in use'. He places the composition of the Rigyeda hymns, as we have them, within the period 4000-2500 p. c. The Tilak-Jacobi thesis has met with severe criticism from Weber, Whitney, Oldenberg'. Thibaut', Hopkins, Macdenell, and Keith'. Apart from the assumed astronomical data, however, Jacobi arges that the norm of European progress cannot be applied to India on account of its isolated position and the consequently independent character of its development. And he emphasises the fact that the dates assumed by himself for the Vedic period are not greater than are accepted by scholars for the civilization of the Euphrates and the Nile". The late Professor Bühler" was of the opinion that the conquest and brahmanization of India requires a much earlier date than 1200-1000 n. c. Following him, Winternitz' declares that from the standpoint of Indian history there is nothing ngainst the view that Vedic literature goes back to the third millennium and the beginnings of Indian culture to the fourth millennium n.c. Prof. Bloomlield . teo. declares himself "now much more inclined to listen to an early date, say 2000 B. c., for the beginnings of Vedic literary production, and to a much earlier date for the beginnings of the institutions and religious concepts" thereof.

The third group of scholars stands between these extremes. Their convictions are based largely upon considcrations of the time necessary for the linguistic, literary and historical development in India. It was Max Müller who suggested the chronological system we refer to, in his brilliant pioneer volume, A History of Ancient Sanskrit Literature, published in 1859. Here are the essential features:—

1200-1000 n.c. the Chhandas period, when the earlier hymns of the Rigreda were composed.

1000-800 , the Mantra period, when the later hymns were composed and the Samareda and the Initureda were compiled.

Most British scholars and many belonging to other lands have followed him; and it now seems as if his ideas were likely to have a far wider range. The first volume of The Cambridge History of India, published in April 1922, is a magnificent piece of collaborative scholarship. The book consists of chapters written by fourteen great scholars eleven Dritish, two American, one Swedish, - Sir Halford Mackinder, Prof. Rapson, Peter Giles, Master of Emmanuel College Cambridge, Prof. A. Berriedale Keith, Prof. Jarl. Charpentier of Upsala, Prof. T. W. Rhys Davids, Mrs. Rhys Davids, Prof. Hopkins of Yale, Prof. Jackson of Columbia. Dr. George Macdonald, Mr. E. R. Bevan, Dr. F. W. Thomas, Dr. Darnett and Sir John Marshall -; and the whole group accept for the early Vedic period the chronological scheme proposed sixty-three years ago by Max Müller. It is noticeable that the two brilliant men, who are mentioned above as favouring later dates, are included in this group. Their views have doubtless been modified during the intervening years.

But, although this scheme seems to be steadily gathering the suffrages of a larger number of scholars, the grave differences which separate them from those thinkers who favour far earlier dates make it quite clear that positive an unworked field 1", at least so far as pre-Buddhistic sites are concerned. One needs but to visit the Punjab and see the numerous ancient mounds seattered over its surface, in order to be convinced that material bearing upon the Vedic period will almost certainly be forthcoming, when these mounds have been adequately explored.

A glance at the map of Asia is also instructive. Leaving out China, there are three river basins which are among the earliest culture-centres of mankind, viz. the Nile, the Euphrates-Tigris, and the Indus Ganges. The Euphrates-Tigris basin lies between the Indus on the east and the Nile on the west. It is well known that there were close relations, political, diplomatic and commercial, between Babylonia and Egypt at a remote period. While there were probably no political relations equally ancient between the Euphrates and the Indus, it is certain that there was an aarly trade'. Bühler's' conclusions concerning the origin of the earliest Indian script presuppose such trade relations at least as early as the 8th century B.C. Kennedy also on the basis of all the evidence available concludes that "in the ninth century B.C. some trade existed between the Puniab and Assyria", and that "maritime commerca between India and Babylonia flourished in the seventh and sixth century B.C.". The sea-route between Babylonia and the mouth of the Indus was relatively not a long one, the distance from the base of the Persian Gulf to the Indus being less than from the same point on the Persian Gulf to Babylon. Hitherto archæological research in the Puniab.

⁴ op cil 264, 279.

as already stated, has done practically nothing toward the discovery and excavation of the earliest sites of Vedic culture. We may well cherish the hope that there may yet be found some dateable objects, such as inscribed seals or tablets or other articles from Rabylonia or Egypt, which by establishing a lucky synchronism, may solve the chronology of the Vedic age. But as yet Winternitz's formula. x to 500 p.c., expresses the facts of our knowledge or lack of knowledge concerning the chronology of the Vedic period. Theoretically x may mean any date between 1000 and 6000 p. c. as determined by future investigation. This is but giving to the Indus valley a chance to prove for its culture a like antiquity with that of the Euphrates and Nile. In the light of the extraordinary discoveries of recent years (e.g. the discovery of the relies of Buddha nt Peshawar) Max Müller' seems to bo too pessimistia when he says that "the date assigned to the poetry of the Veda is and will always remain hypothetical". As yet it is hypothetical. That it will always be so, remains to be seen.

While, then, the lack of evidence precludes the fixing of the Vedic age with anything like certainty, yet a tentative and provisional chronology may be adopted, subject to modification or even rejection in the light of future discovery. The present writer would accordingly present the following system of chronology found in the Cambridge

Illstory of India as the best available to-day: -

B. C. 2500

Probable date of the beginning of the Indo-European migrations.

1800 onward. Period during which, in Northern Asia Minor and eastward through Northern Mesopotamia to Media, Indo-European peoples can be traced. Probable date of the first Arvan invasion of India.

1500 0011

The Boghaz-köi tablets, containing Indo-Aryan deities in Vedic form. These clearly come from

¹ Physical Religion (1891) p 22.

Aryans who have not made "the Iranian shift". Possibly we should think of them as Aryan tribes, who had stopped on the way, while their brethren bad already passed on and settled in Iran and in India. At a later date we find Aryan gods at Babylon, whose names are still of the old forms.

B. C. 1200-1000

Early hymns of the Rigreda composed probably for the most part in the western Punjab. notably the hymns to Usas and to Varuna.

1000-800

This scheme has the merit of not being extremist either upwards or downwards. It fits into the latest and most trustworthy ethnological opinion as to the chronology of the dispersion of the Indo-European peoples, and harmonizes well with the conclusions of students of prehistoric IE, archwology, such as Schrader, Hirt, Feist and Glies', and students of ancient history such as Eduard Meyer. It makes possible a reasonable interpretation of all the evidence recently found in Asia Minor, Mesopotamia and elsewhere. The Indian dates were originally based on the literary and cultural evidence of Indian literature; and the majority of our greatest scholars still agree that, from this point of view, these dates are the most natural. Finally it makes possible a common obronology for India and Persia. If we place Zoronster eirca 1000 B. C., as Oldenberg, Moulton and others suggest, then the linguistic phenomena of the early Avesta and of the early Vedic hymns become clearly

¹ CHL Vol. L. 1922, pp. 76, 112-113, 697

² Schrader, RIA. and Indogermanen; Hirt, Indogermanen 1 and 11; Peist, KAHI.; GUes, CHI. 1 65 H.

comprehensible; while we are able to understand at once the Zoroastrian reformation in Persia, and in India the rise of Varupa and the composition of the great Varupa hymns. This becomes all the more natural and credible, if we accept the suggestion that there was intercourse in those days between the early Zoroastrians in Bactria and a special group of their brethren in the Punjal. It is altogether within the limits of possibility that the personal influence of Zoroaster reached the Punjah, whether by the actual sending of precedence or in the ordinary intercourse of trade. It is certainly not too much to believe that some reverberation from that mighty voice—for as a personality he is surely comparable with the Budaha himself — would be heard in the Punjab.

5. THE INTERPRETATION OF THE RIGVEDA' .- The Rigveda is not only 'the most ancient literary monument of India', but also 'the most ancient literary document of the Indo-European pooples's. Covoring, as It does, several centuries nt least, it may be characterized as nothing less than 's library and a literaturo". As already pointed out, it forms a connecting link between Iudia and the West. For while, on the one hand, it fulfils itself in the later history and literature of India, on the other, its roots run deep into the Indo-Iranian and even Indo-European period. Its discovery laid the foundation of the sciences of Comparative Philology and Comparative Mythology. In view of its intrinsic importance in so many fields of thought, linguistie'. mythological, religious, literary, and historical, it is not at all strange that an unusually large proportion of Sanskrit scholars have been attracted to its study.

The Rigreda is not an easy book. Its dialect is archaic, and there are a very large number of words which occur

Oldenberg, Vedaforeching; Gray, Interpretation (Vedis), UBF, VII; Macdonell, VBS, XXIX-XXXI, and Principles (Rhandarkar, CV. 3 ft).

⁴ San-krit lies at the foundation of Indo-Puropeut Comparative Grammar.

only once. The vocabulary is priestly, full of mystic allusions to the technique of the sacrifice. Hence, while a considerable part of the Rv. is fairly clear, there are many single stanzas and even whole hymns which still remain obscure. Moreover, there is hardly a single hymn in the Ry., in which there is not some obscure word or difficult phrase. A comparison together of the various translations is the best proof of the difficulty of the Rigveda text.

The traditional text of the Rigveds and its traditional interpretation constitute, as it were, the given element, the data to be critically examined. The traditional text was fixed (circa 600 n. c.) in the form of the Samhita text. This is open to a limited amount of conjectural emendation'. in correction of errors which preceded the final editing of the Rv. When Yaska wrote his Nirukta (Etymology) about 500 B.C. the meaning of many Vedic words had already become unintelligible; for he quotes one of his predecessors as saving that the Vedic bymas are 'obscure, unmeaning and mutually contradictory'. This was only one of seventeen predecessors of Yaska, whose opinions often disagreed. Accordingly Yaska has a way of assuming alternative roots and meanings for the same word, from which we conclude that there was no unbroken tradition. Yaska's weakness is his too great dependence on etymology.

About eighteen centuries after Yuska, Sayana (14th Cent. A. D.) wrote his great commentary on the Rv. It is extremely valuable' as setting forth the Indian tradition.

The late Prof. Oldenberg, while at Lahore in 1913, expensed in the hearing of the author his regret at having earried the conjectural emendation of the fly. text too far, an example of the boundity of the true scholar. Compute Macdonell, Principles (Bhandarkar, CV. 18). "Advancing study has proved many emendations made by earlier wholars owing to imperfect knowledge, to be unnecessary, Conjectural corrections of the text should, therefore, be re-orted to only in extreme cases".

At the basis of all modern study of the Rr. is Prof. Max Muller's magnety opus, his critical edition of the Regreda-Sambita together with the Commentary of Siyanseirya, vols I VI, 1849 1874, a library in itself

in Sāyana's time, of the meaning of the Bigveda. Sāyana leaned heavily upon Yūska, and like him put too much dependence upon otymology. He fails to deduce the meanings of words by a comparison of parallel passages. Wo may note in passing that the Vedic Interpretation of Swämt Dayānanda Sarasvatt (1824-1863), the founder of the Ārya Samāļ, outstrips Yūska and Sāyana in its over-emphasis on etymology, neglect of the consideration of parallel passages, and appeal to later and non-Vedic usage.

The history of the modern interpretation of the Rigyeda is the story of various attempts to penetrate its secret. different schools of investigators emphasizing different points of view. The traditional interpretation as represented by Sayana was regarded by H. H. Wilson' as adequate and trustworthy; and so he reproduced it in his English translation of the Rv. Roth, the founder of the 'eritical' school. was impressed with the primitive and natural poetry in the Rv. For him it was 'the oldest religious lyric'. His principle wes that we must gather the meaning from the texts themselves with the help of comparative philology. Ho overlooked, however, the importance of the Indian commentators and of a knowledge of the ritual literature. His merits and defocts are both reflected in his levicographical work'. Bergaigne' employed an allegorical method and emphasized the single meanings of words, but interproted the Rv. from too narrow a standpoint. Dayanand Sarasyati built upon the theistic element in the Ry, especially on such passages as I. 164, 46 and X. 114, 5, which seemed to him to indicate that the multitudinous divine names in the Ry, refer to a single exalted divine being: and on the basis of this interpretation helped out by his

[&]quot; Regredadibbanyabbamik : Ajmer (Banskrit with explanation in Hand).

gift for etymologizing, he laid the foundation of an indigenous theistic society in North India. Pischel and Geldner represent a reaction against the school of Roth in favour of a more indigenous method of interpretation. Their principle is that the Rigveda is a purely Indian book, and that accordingly the later Indian literature is the key to its interpretation. It was a vigorous attempt, in the words of Oldenberg', to rehabilitate the indigenous Vedic exegesis which had fallen into disrepute. In the opinion of Pischel and Geldner the Rv. hymns do not reflect a primitive state of society, but rather an advanced culture with all its evils, such as greed for gold and a highly developed demimonde. The weakness of Yuska and Suyaya are reproduced along with their method, namely endless etymologizing and the assumption of multitudinous meanings for words. The one solid contribution of Pischel and Geldner is their emphasis upon the necessity of making the fullest use of the resources of indigenous scholarship in the elucidation of the Vedic text. Brunnhofer', the Ishmael among Sanskritists, lays hold of the fact that the roots of the Rv. run deep into the Indo-Iranian period. It is for him almost as much an Indo-Iranian as an Indian book. Hillebrandt and Oldenberg stress the importance of the later Vedic ritual for the understanding of the Ry. Macdonell and Kelth cherish well-halanced views on Vedic topics and avoid eccentric opinions.

Such are some of the different points of view from which the Rigveda has been studied,—the adequacy of the traditional interpretation, the allegorical method, the Indian or the pre-Indian character of the Rv., and the presence in it of a primitive lyrical, a theistic, and a ritualistic element. Devotion to a particular point of view has inevltably meant exaggeration, but has at the same time accomplished the end of bringing out whatever truth

Vedische Studien, 1-111.

² Vedaforschung, 21.

E Urgenehichle der Arier, I-BI, 1889-1893, and Artiche Erzeit, 1910.

is contained therein. The exaggerations of opposing schools of Veile research tend to correct one another, very much as in the case of Old Testament research. The truth lies in the middle!

The tendency of the best Vedic scholarship at the present. time is to emphasize the largeness of the centext in which the Rigycda is to be set and studied. In the first place, the Rv., as Roth held, is its ewn best commentary. Moving out from this in ever enlarging circles we should use as aids to Vedic interpretation the indigenous exegesis as found in Yuska and Suyann, the Avesta, the younger Vedic texts containing the 'ritual' literature, the later literature of India, present day religious custem and felklore as found, c. q. in the writings of Creeke' and Mrs. Stevenson', the great Western IE, literary works, Illad, Odyssey, Enold, Eddas and Niebelungenlied, and the mythology and anthropology of all the nations. To illustrate the new emphasis on the importance of studies in the modern religion and felklere of India in their bearing on the elucidation of the Rigyeda, attention may be drawn to the bibliography at the end of Hopkins' chapter on The Vedic Religion of India' in which Creeke's Popular Religion and Folklere of Northern India occupies the first place, standing even ahead of Macdenell's Vedic Muthology. In like manner as illustrating the contribution, which general mythology and folklore may make to Vedic study, Caland b points out the striking similarity which exists between the sacred formulas of the Cherokecs' and these of the Kausika Suira.

PART B.

RELIGIOUS CONTENTS OF THE RIGVEDA

CHAPTER IV.

THE VEDIC WORLD OF GODS AND DEMONS

1. INTRODUCTORY. -- It is a commonplace of psychology. that thinking is conducted under the pressure of practicalneeds'. Primitive man found himself in an environment partly helpful and partly untoward and perilous. There were all about him friendly objects and forces such as sunshine, ram, fire, dawn, rivers, etc. The very epithet 'friendly' applied above to 'objects' and 'forces' indicates incipient personification and shows the naturalness of the process. Then there were other forces which were hostile and perilous, such as drought, darkness and the mysterious causes of the blighting of crops, of disease, and of death, The friendly forces became gods and the hostile forces demons. All nature thus divided into friendly and hostile forces was regarded as an aggregate of animated entities'. This attitude of mind toward its environment began undoubtedly with the very first manifestation of the religious consciousness in the dim pre-historic past, and extended down far beyond the Vedic age. It is the well-known doctrine of animisms, which has had such a wide sway in the early stages of mankind, and forms in a sense the background of all our religious thinking. To ascribe life. will and agency to inanimate nature was just as natural for man in his childhood stage as it is for children to personify their play-things. Animism presented itself at the beginning as probably only a haunting sense of the

¹ Cf. James, Psychology 1900, p 358 "Reaconing is always for a subjective interest".

² Mardonell, NM 1,

Oldenberg, UV. 3n

mystery and potency of the world and its forces. This primitive attitude based on the experience of both harmful and helpful powers was made gradually more articulate through the interpretation of the powers of nature as animals (theriomorphism) or as men (anthropomorphism).

2. PROCESS OF PERSONIFICATION. - The book which deals most fundamentally with this topic has already been mentioned !. Usener's main thesis is that the stage of 'personal gods' was preceded by that of 'special gods'. In the case of a 'special god's the name of the thing is the name of the god, e.g. dyans 'sky', agni 'fire', surya 'sun', ugas 'dawn', vala 'wind', etc. Furthermore, the province of a special god is limited to the sphere of netlvity indicated by his name, that is to say, Agni had to do originally only with fire, Vata with wind, otc. The special god enjoyed only an incipient degree of personification. But "all the special gods had the capacity of annexing the sphere of activity of others". The more a special god annexed the territory of his neighbours, and the more fully emancipated he became from his own 'primitive nature significance', the more completely personalized he was. Accordingly in the case, c. q. of Dyaus 'lleaven' and Prithivi 'Earth' the personlfication is very rudimentary, whereas l'aruna and Indra are the most completely personalized gods of the Vedic pantheon. One renson was that the names Dvans and Prithivt remained 'transparent', meaning quite simply 'heaven' and 'earth'. Hence the personifying imagination was checked by their constant presence and obvious physical nature. It was not so with Varuna, Indra and the Asvins, whose original physical basis had been almost or quite forgotten. In general, we may say, then, that the survival of the 'transparent' name of a god such as Agni 'god fire', Sūrya 'god sun', Uşas 'goddoss dawn', Vāta 'god wind', etc. prevents to a greater or less degree the full personification

¹ Usener, Gutternamen. See above, p. 13

Called by Usener 'Sondergott', or- eff. 75 Schrader, Arvan Religion, EEE U

of the god. Even here, however, other influences work, so that the personification of Agni 'the priestly god' par excellence is in some respects much more complete than that of Surya 'god sun'.

Usener's first stage is that of the 'special god'. The name of anything in nature or in culture which impressed primitive man as mysterious, haunting, potent for good or for ill, might be the starting point of a process of personification. This tendency to ascribe specialization of function to the gods, a tendency which Usener finds amply illustrated in the Litu-Prussian and ancient Roman religions is regarded by Schrader' as a primitive Indo-European characteristic. It is a fruitful cause of the tendency to create what Hillehrandt aptly calls 'mythological synonyms's, a tendency which is well represented in the Rigyeda. Just as verbal synonyms are words which have much the same significance, while each possesses its own special shade of meaning; so 'mythological synonyms' are gods which in general are in charge of the same department of nature or life, while each one has his own special physical basis, distinguishing characteristic and theophanic moment, Thus, according to the Rigveda, we have as gods of the sky. Dvaus and Varuna (?); as gods of the sun, Surva, Mitra (?), Savitar, Pusan, Visnu, etc.; as gods of the light -ning and the storm, Indra, Trita Aptya, Apam Napat, Matarisvan, Ahi Budhnya, Aja Ekapad, Rudra and the Maruts; as priestly, and sacrificial gods, Agni and Brihaspati. Usener' points out the minute 'division of labour' which existed in the same department (e. g. agriculture) among

Gutternamen, 75 192.

the Roman and the Lithuanian gods, and by the same analogy was later extended to the Lithuanian Church saints. According to Varro's necount 1 every separate fact and process of agriculture, a.g. first, second and third ploughing, dragging, sowing, growth, blossoming, etc. was under the care of a special deity. So also with the Lithuanians, c. q. in the matter of cattle raising. Even after the Lithnanians were christianized the same primitive tendency asserted itself in the form of a minute specialization of the functions of their numerous patron saints; c. q. in the department of healing Apollonia curing toothache, Augustinus warts, Ita headache, Delcolus cramps and Eutropius dropsy, A similar tendency may be invoked to help explain the 'mythological synonyms' of the Rigyeda". "The sky is the home of light by day (Dyaus) and by day and night is allencompassing (Varuna). The sun has many distinguishable aspects and functions. It is a bright orh (Sarya), a lightgiving friendly power of nature (Mitra), a great stimulator of life and activity (Savitar), a nourisher and protector of cattle, shopherding them and finding them when lost (Pasan), wide-striding from earth through mid-air to zonith, 'he of the three steps' (Visnu), and the one who at dawn shines in every direction (Virasvant). The functions of the gods of the lightning and the storm are similarly differentiated. Thus the lightning fighting to release the cows of the sky manifests itself as an impetuous warrior (Indra); it is the third or aerial form of fire dwelling in the clouds (Trita Aptya); it is born of the heavenly waters (Apam Napat); it grews in the mother cloud and brings fire down from heaven to earth (Matarisvan); it looks like a serpent in the lower atmosphere (Ahi Budhnya); it leaps down from the cloud-mountains in a single streak of fire like a 'one-footed goat' (Aja Ekapad); it strikes the

¹ Based largely on the Roman Indeparamenta. See Art. by Wissown in ERE, VII, 217-218.

[&]quot; Hillebrandt, VM. II. 14.

earth, shatters trees and kills animals and men (Rudra); accompanied by thunder, wind and rain, it manifests itself in numerous lightning Hashes (Maruts).

The formation of such 'special gods', each originally with delimited province and function, was not confined to the Indo-European or even the Indo-Iranian period. There were plenty of such creations in the Rigveda, as, e. g. (1) the abstract agent gods, Savilar 'stimulator', Dhalar 'creator', Vidhatar 'disposer', Dharfar 'supporter', Tratar 'protector', Netar 'leader', Trastar 'artificer', and Visrakarman 'all-creating'; (2) compounds in pati: 'lord', as Prajapati 'lord of creatures', Brikaspati 'lord of prayer', Vastospati (VII, 54) 'lord of the house', Kectrasya pati 'lord of the field (IV. 57, 1), and perhaps some others of the same formation3; (3) the abstract goddesses Śraddha 'faith', Anumati 'favour', Aramati. 'devotion', Sunrita 'bounty', Asuniti 'spirit-life' and Nirriti 'decease' or the goddess of death; probably also Aditi and Diti: (4) the wives of the great gods as Indrant, Agnaul, Varunant and A.vint; (5) deified objects connected with the ritual, as Gravan 'press-stone for crushing the soma-plant', Apas 'sacrificial waters mixed with Soma, Ghrita 'sacrificial oil' (IV. 58), Barhis 'the sacrificial litter' upon which the

Macdonell, Wi., Keith, Indian Mythology

² Cf. Hillebrandt, VM. 11, 19

These names in part might, so far as the found is concerned, belong to the indo-European period. Compare the Greek Signature; and off the house and the Librachian verse-parts (Filippin) both of the clear; also the Labrachian devian sames Densityable Food of the house and home! (cf. Vedic Domparts European Signature) and off the Ferral European Signature (cf. Pecian zoniva), and the Libra-Travium Web-parts. Houd of the wind! Kenner, Gildermanner, Su. 100, 100. There are many either somes in part in the Kyr, such as sendanapart, appearant, supplier, amongate, company, readmargent; publicable, the one-public all reads as epithets of the great gold. It is conceivable, however, that parts the time we epithets some of them may have been true 'Sondarputter' Schraker (Fill) 11, 35 note) regards the Librachian divise names cooling in pairs very of

gods sit (I. 13, 5), Yupa (Vanaspati) 'the sacrificial post', to which the victim was bound (I. 13, 11), and Dakgina 'largess', the deified fee of the priest (I. 18, 5), etc., otc.; (6) the deified implements and abjects of agriculture! such as Langala 'plough' Sunāsīra 'plough-share', Urvara 'nlough-land', Sita 'furrow', etc.; and (7) the deified weapons of war, Bow, Arrows, Quiver, Car, etc. (VI. 75).

It is obvious that such gods whose designations are merely appellative, the name of the god being the name of the thing or concept, would in general be inconspicuous and shortlived, never attaining to the dignity of the 'great gods', unless they represented some dominant aspect of nature, as Agni 'fire', or were fundamentally important in the ritual of worship, as Agni and Soma, or were caught on the tide of n new and growing conception, as Prajapati. We have already quoted Schrader's statement that 'nll the special gods had the capacity of annexing the sphere of activity of others' (ERE, IL 35). When thus annexed, many 'special gods' undoubtedly became merely epithets of one or other of the groat gods, their eatire being having been absorbed 2. Such annexation was doubtless furthered by the principle of congruity. Is general, harmonious elements would attach themselves, e.g. to Varuna the 'holy' god, that is, attributes corresponding to his nature; and in like manner Rudra in his development would attract to himself such semi-demonic qualities as were akin to his himsen such conditions as probably the destructive aspect of original consumption of the destructive aspecting lightning, such qualities for example as are celebrated in the the Satarudriya litany, and such as bave made him in the Yajurveda period the god of diseases, as well as of healing

¹ IV. 57, 4-5, 7-8,

One is impressed with the wealth of epithets which adorn such Velice per the list magnitude as Indra, Vanus Anni. of the first magnitude as Indra, Names Agai and Soma.

^{*} According to Oldenberg (Ry 218 221) Rudadon, Keith (in 1105 h

Doubtless other factors also co-operated in the making of the gods. The Aryan tribes brought with them from their earlier home beyond the Hinda Kush a fairly elaborate mythology and cult, as may be seen at a glanco by referring to the table of Vedic-Avestan equivalents'. Probably, too, the Aryan tribes came in at different times covering a period possibly of centuries. At any rate, we know there were different tribes and different priestly families, each tribe and priestly family probably having its own special beliefs and rites in addition to the things held in common. These conditions would naturally produce a multiplicity of gods and rites of worship, which would tend to become common property. As Hillebrandt' well puts it, Vedic mythology is not a system, but a conglomerate, a kind of mythological 'confusion of tongues', which arose through the coming together and fusion of the traditions of different clans

With the changes geographical, climatic and ethnological there would naturally be changes in the gods themselves, reflecting as they did the changing environment and experiences of the Aryan tribes. Accordingly, like earthly rulers, one god would increase his domain at the expense of another, or himself be despoiled of some or all of his attributes. Thus Varuoa, the majestic god of the higy eda, became later a night-god and finally only a god of lakes and pools, so completely did he lose his sublime attributes of holiness and sovereignty. After having been one of the most completely personalized gods of the Rv., be is gradually depersonalized and de-ethicised, until his final estate is like his first, that of a 'special god' in charge of a limited

mountains of the North. Hillebrandt (VM, II. 179 203) thinks that Rudra was a god of the tercers of the topical climate, connected very specially with the learning time muncilately following the mountaines. Such opinious doubless hold good for the later Velic period, but not no cretainly for the Brevela.

¹ p 21. ¹ VM III. p All

province of nature. This illustration brings out the fact that, like the sun, the Vedic gods have their times of rising and setting. They appear above the herizen, go on waxing until they reach the zenith of their influence, then begin to wane in importance, and finally reaching 'the twilight of the gods' pass away for ever. The gods of the Rigyeda are all to be found somewhere within these various stages. Indra, Agni and Soma are at the zenith. Varnna has just passed the zenith. Vivasvant and Trita are distinctly waning gods. Prajāpati, the chief god of the Brāhmanas, is just appearing above the horizon. Visnu and Ruder (Śiva), destined to such a distinguished career extending even to modern times, have not yet reached the zenith of their influence.

The Vedlo gods, then, have varying degrees of porsonification, extending all the way from that, for example of
Frautha' 'faith', which at least in the Rv. is little more
than a poetic symbol or nt most a candidate for the honours
of full apothessis, on to that of Varuna and Indra, the most
completely personalized of all the gods of the Rigveda.
If, as already stated, the more a god enlarged the sphere
of his netivity and emancipated himself from the limitations
of his original nature as a 'special god', the more completely personalised he became, then it follows logically
that complete personification would be attained only in
a condition of monotheism, when one God had taken to
himself the attributes and functions of all gods?

The various stages of porsonilication existed side by side. If some gods were waxing, others were waning. If some were pussing below the horizon, others were rising above the horizon. The 'special god' was capable of

CX, 151.

³ This is regarded by Usener (tötternamen 347-319) as the logical goal of all polytheirms, but he admits that in the case of Greece and Rome the vested laterests of the priesthood were too strong and that the consolicitie movement had to come from Palestine through the Christian Church

creation at any time. It was through the birth of new special gods that the loss through the passing of the old gods was made good.

3. Gods and Denons. - The Vedic gods, as we have seen, are in general personifications of natural phenomena. This is equally true of the Vedic demons. The contrast between god and demon is not so much one of power, for the demons also are strong, as of henevolence. The gods are kindly and benevolent; the demons, as a rule, malevo-lent and injurious. The psychology of this distinction is not difficult to discern. The activities of nature are partly helpful and partly noxious. A beneficial force or activity like fire or water or wind, when personified, becomes a god. Injurious activities or experiences such as drought. blasting of crops, darkness, illness, etc. are personified as demons. It was seen that the thunderstorm by producing a vast downpour of rain destroys the drought. What more natural than to think of a struggle between Indra the storm-god and Vrltra the withholder of the rain. In the fight Indra pierces with his bolt Vala, the 'cave' where the cows of the sky are confined, and slave Vritra the 'obstructor', thus releasing the waters. The whole imagery is reminiscent of eattle-lifting. As thieves carried off cattle and hid them in the eaverns of the mountains, so Vritra 'obstruction', then more concretely conceived as 'obstructor' carried off the cloud-cows and hid them in a cave. The 'cave' itself, Vala, becomes in time personified as a cavedemon. In a time of drought, when the heavens were as brass and no clouds were visible, the conclusion was that the cloud-cows had been stolen. This is but one example of bow cosmie phenomena were interpreted after the analogy of, and in terms of, human experience.

^{*} Keith (Indian Wyth slops, 97), referring to the new exections of the Reihmann period, remarks that "they serve to show how fall of sembilities figures was the column; like of the people, who saw a delty in each possible Lower of schoon". This is quite after the manner of the Roman Integralomenta as interpreted by Varro

Such is the most probable origin of gods and demons. at least in the Indo-European world. The concept 'gods' was distilled, as it were, from the contemplation of the gracious and kindly powers of naturo'; and in the same way the concept 'demons', from the experience of nature's grim and hostile forces. The psychology of the whole process is found in the working of the principle of analogy. Man naturally gave an anthropomorphic interpretation to the physical powers and phenomena in the midst of which he was placed, by finding in his own nature as man the key to their interpretation. As there was a human race (manusajana) so over against and above it there was a heavenly or divino race (dainyajana), which was suggested by the human race. And as the human race for the Vedic Indians was divided into Aryans and Dasyus mutually hostile to each other, so the superhuman powers incarnate in sun, lightning, storm, darkness, drought, disease, death, etc., were divided by analogy into gods and demons. The correspondence between Dasyu and Demon was so close that the same term 'Dasyu' covered both human enemies and superhuman enemies, producing frequently considerable uncertainty in interpretation.

It has already heen pointed out that there was a considerable development of demonology? in the Indo-Iranian period, together with corresponding magic practices. Words for 'ghost', 'demon' and 'evil spirit'' were in use before the breaking up of the Indo-Iranian unity. Hence the Aryans brought with them into India a belief in demons as well as in gods. The Nigyeda as devoted to the worship of the higher gods gives relatively little attention to the demons, that is, the Rv. as contrasted with the Atharvaveda and the Brahmanas. The great atmospheric demon is

Compare Rom. I. 20: "The invisible things of Him since the creation of the world are clearly seen, being perceived through the things that are made, even His everlasting power and divinity".

^{*} P. 26.

¹ buitt, galn, dinf m Vedle bhuta, gatu, drub. Bee p 21.

Vritra', from whom comes Indra's cult name Vritrahan 'slayer of Vritra'. There are other atmospherie demons such as Susna' 'scorcher' or 'hisser', Sambara, Pipru, Varcin, etc., although some of these may have been aboriginal chiefs or aboriginal gods. In the Rigveda Indra as the powerful atmospheric god purges his own domain of the demons of the air. What is often described is the single combat between Indra and Vritra after the fashion of a Homeric struggle between two champions. The Raksasas, as earth demons, are driven off by Agni the fire-god of earth, whose cult name accordingly is Raksohan 'slayer of Rakins'. Thus Indra and Agni, gods respectively of lightning and fire, are the great antagouists of the demons of darkness Of the three domains, heaven, mid-air and earth, the demons are confined to the last two. They do not intrude upon the heavenly abode of the gods and the glorified 'fathers'. The demons are referred to by a variety of group names, as Dasque, Panis 'niggards', Raksasas ' 'injurious' or 'to be guarded against', Druhas 'deceivers', Aratis 'illiberalities'. Yatus 'demons', Yatudhanas 'sorcerers', and Asuras, the standing designation for the demons in the later Vedic Ilterature. According to the Rv, the numerous demons are smitten either singly or collectively by some one or other of the great gods, who is always victorious. This way of stating the case seems to be a reflection of the successful and optimistic character of the Rigveda period. Later on it is no longer a conflict between single god and demon or demons, but between the collective Devas on one side and the collective Asuras on the other, the Devas being often worsted in the fight. Does this reflect the more difficult climatic conditions and consequently more pes-imistic outlook of life further east in the Ganges valley?

¹ Of whom l'ai4 is a mere doublet.

[?] Also called Auyara 'who causes had harvests'. The Mussoorie halls at this time (May 1921) look as if they were under the power of Sunus, the demon of drought. The spring crops have largely failed for lack of rain

4. Specialen or Venic Devonctory.—While, as already stated, the Rigwoda is chiefly concerned with the mythology and worship of the great gods, it nevertheless incidentally through many a vivid phrase as well as through two entire hymns throws light, all the stronger because undesigned, upon the demonology of the Vedic age. In order to bring forward the matter concretely, the hymn VII. 104 is presented in a metrical version with now and then a phrase adopted from Griffith!

To Indra-Soma VII, 101 (~ AV, VIII, 4).

- O Indra Soma, hurn, destroy the Rakvaras,
 Thrust down, ye strong ones, those that flourish in the dark;
 Annihilate the fools, consume them utterly,
 Smite, thrust and overthrow the greedy Atrinas.
- O Indra-Soma, 'gainst the sinner and his sin Let heat boil up like kettle glowing with the flame; Against prayer hating, raw flesh-eating, dreadful-eyed Khuidin, keep hostility, nuccasingly.
- 3 O Indra-Soma, plunge the evil-doers down
 Into the pit, the gloom profound and bottomless,
 So that not one of them may ever thence emerge,
 Such wrathful strength and might be yours to conquer them.
- O Indra-Soma, hint your weapon from the sky And cartli, your weapon crushing the malignant one, From the cloud-mountains forge a whitzing thunderbolt, Wherewith ye may consume the waxing Rakeas for.
- 5. O Indra-Sama, shoot ye torth from out the sky, With your fire-heated sling-stones, heavenly thunderholts; With glowing darts unfailing hurt the Atrivas * Down the abyss, and let them into silence sink.
- 6. On all sides, Indra-Soma, may this song of ours lesset you both, as girth surrounds two mighty steeds,— Which song as offering I with wisdom send to you, These prayers, O lords of men, do ye inspire and speed.
- Remind yourselves in your effective manner, Smite the Druhas and Raksasas, the tricky ones;

¹ Indebtedness is also acknowledged to Hillebrandt's translation, I.R. 112-111.

No bliss be to the wicked, Indra-Soma, Whose at any time against us plots with guile.

- Whoso accuses me of walking falsely, With lying words, although my heart is guilcless, May such a liar come to naught, O Indra, Like water which in shut hand seized escapeth
- Those who the good man's speech delight to slander, And those whose habit is to harm the righteous, May Soma hand them over to the serpent, Or to the lap of Nirriti consign them.
- 10. Whatever one, O Agnl, tries to injure The substance of our food, steeds, kine or persons, May such thief, robber, trickster go to ruin, Suk to destruction both himself and children
- 11. May he be taken off himself and children, Under all three earths let him lie imprisoned; May his fair glory, gods, dry up and wither, He who by day or night desires to harm us.
- 12. Good wit is his who has discrimination, Truth and untruth, both words oppose each other; Of these twain what is true and what is upright That indeed Soma helps, untruth he smiteth.
- 13. Never aids Soma him whose ways are crooked, Nor him who falsely claims the Keatriya title; He smites the Rakeas, sinites the falschood—speaker, Both the entangled in the snare of Indra
- 14. Is it that I to faise gods was devoted, Or held the gods as a delusion, Agni? Why art thou angry with us, Jätavedas? Deceivers shall experience thy destruction.
- 15. Let me at once die, if t practice witcheraft, Or have oppressed the tife of any mortal; Likewise may be be severed from ten kinsmen, The one who faisely calls me witcheraft-monger.
- 16. Who calls me witch, me innocent of witchcraft, Who claims he's pure, although himself a Raksas; May Indra smite him with his mighty weapon, May he fall down the lowest of all beings.
- What owl-like creature cometh forth at night-time,
 With trickery and guile herself concealing,

- May she plunge into hottomless abysses;
 May press-stones with their clatter smite the demons.
- 18. Spread out and search among the claus, O Marut host, Seize ye the Rakyasas and crush them utterly, Who fly about at night-time in the form of birds, Or at the worship of the gods display their tricks,
- Indra, hurl forth from heaven thy stony weapon, Maghavan, sharpen it, made sharp by Soma; In front, behind, and from above and under, Smite thou the Ilakyasas with rocky unissile.
- 20. These fly about in form of demon-dogs and seek, Harm-lovers they, Indra to harm, whom none can hurt. Sakra makes sharp his weapon for the standerers; Now at the witcheratt-mongers may be butl his stone.
- 21. Indra is the destroyer of the Y\u00e4u-fiends, Disturbers of the sacrifice with aim malign; Now verily 'gainst the Raksans doth \u00e5akra go As axo against a wood, like vessels splitting them.
- Smite the owl-fiend and owlet-fiend, O Indra, Dog-fiend, or him who comes in guise of enckoo, The fiend in form of eagle or of vulture, — As with a mill-stone crush thou every kak-as.
- 23. Let not the demon of the sorcerers near us come, With light may (Agni) drive Kimidins off in pairs, Let earth protect us well from every earthly woe, Mid-air deliver us from such as comes from heaven.
- 24 O Indra, buffet the male Yātudhāna, The female also boasting of her magic. Neck-broken may the Mūradevas perish, And see no more the sun as he arises
- Look straight ahead, look on each side, Indra and Soma, watch ye both;
 Your weapon hurl against the fiends, Against the sorcerers your stone.

This hymn is addressed principally to Indra and Soma, to Indra as the great demon-slaying god of the atmosphere, and to Soma as the deified sacrificial drink by which Indra was strongthened and exhilarated for his tasks. It is probably a late hymn, standing as it does at the end of book VII;

the sorcerer as a familiar spirit, and the sorcerer used the demon for his purposes. Hence in some passages there is little or no distinction between the demon who dwells in the sorcerer and the sorcerer who is induct by the demon. The sorcerers were the 'sensitives' or 'mediums' of the Vedic age.

c) The demons are described as 'devourers', eating raw flesh', the flesh of men's as well as of eattle and horses. They flourish in the dark (v. 1). They delight to injure the sacrifice'. Demons and sercerers are alike in ethical quality. They are fools', haters of prayer (v. 2), evildeers (vv. 3, 7), tricky (v. 7; X. 87, 22), falso accusers and standerers' (vv. 8, 9, 20), thieves and robbers (v. 10), llars (vv. 8, 13, 14-16), and malicious'. Ethically this is a notable statement of the close relationship existing between evil spirits and evil men. The sin of lying is specially emphasized.

Oldenberg IIV. Jod. n. i and 20%. Compare the expressions : alreavel 'yoker of the rakes', rokas.... Yatumaratum 'risky of the norcern', etc. See Oldenberg IIV. 272, as translated.' Every moment of life, every activity and every duelling is threatened by troops of narimale thends, the allies of human cristones.'

⁸ Aracqua VII. 104, 2; X. 47, 2 18 Aravyad et applied to the corpsedevouring Agul in X 10, 9-10. Agul is called an later Sanskrit the all-vater and at the same time the all-variety

⁴ X. 87, 16. This looks like a cannibal trait borrowed from the barbarous babits of the aborigines.

^{*} VII. 104, 18, 20, 21. * Acttab. v. I.

[?] Thus the Vedic like the Hebrew demon was conceived as a 'calmuniator' (διάβολος) and an 'adversary' (μου Ι. Sam. XXIX. 4-)

d) The demons are lovers of darkness and accordingly often appear in the form of night-birds such as owls, or in the form of dog, cuckoo, vulture, eagle, etc. creatures with strange uncanny cries; or even in the form of the roots' of plants used for purposes of sorcery': They are both male and female, female demons being much more prominent in the domon world than are the goddesses in the aristocratic world of the great gods2. They are dreadfuleyed (v. 2) and cloven-hoofed'. The Kimidins go about in pairs', but in the two great hymns under consideration' the names for 'demon' and 'sorcerer' are usually in the nlural.

e) Agni, the sacrificial fire of earth and Indra the lightning fire of the mid-air, are the natural enemies of the demons of darkness. Henco with an ample use of synonyms they are besought to smite, crush, pierce, burn. destroy, annihilate, etc. their domon foes. Doubtless there is a reference to the cosmic conflict between light and darkness, but already in the two great 'demon' hymns of the Rv. there is mingled with the literal meaning of darkness the motaphorical meaning of ovil and sin. The demons who roam about at night and seek to spoil the sacrifico and injure good people are lovers of darkness both literally and figuratively. As is their nature, so is their doom Their place is the bottomless pit of darkness, an abvest.

So Oldenberg, EV. 266 n 3, and Geldner Glossar. This epithet, like disnades a 'whose god is the phalius', doubtless reflects the religious beliefs and practices of the aborigines. We may compare sahamila III, 30, 17 and sahamira X, 87, 19, also X. 87, 10 'the Yatndhans's root' (mula),

² Oldenberg, RV. 265

³ Sapharuja either 'cloven boofed' (Hallebrandt, 1.R. 115), 'hoof breaking' (Whitney-Lanman, AV. VIII, 3, 21), or 'hoof-armed' (Griffith). If 'cloven hoofed' is correct, then there is a point of contact with the medizval representation of acten.

VIL 104, 23; X. 87, 24

a covert or hole having no end. Into this they are hurled by the fiery bolts of Indra. The imagery is Miltonic and reminds one of Paradise Lest. The demons go to their own place. By implication all who are akin to the demons in character go to the same place. There is here an implicit dectrine of kell.

f) In both VII, 104 and X, 87 there is a distinctly ethical element. Good men take the side of Agni and Indra, the gods in whom is 'no darkness at all', against the demons of darkness and the evil men who are their confedorates. The othical antithesis botween light and darkness, truth and untruth' is firmly drawn. And yet both hymns were used as spells or charms, certainly as ' incorporated in the Atharvnveda and pessibly as originally very late hymns of the Rv. It shows the clese connection that existed in Vedic India between the prayer that persuaded the gods and the magic that compelled them. Tho difference in the point of view of prayer and magle ls somewhat uncertain and subjective. What for one was brahman 'prayer' might be for another brahman 'spell'. This ambiguity in the meaning of brahman 'sacred formula'. illustrates the subtle intermingling of both points of view in the hymns and ritual of the Vedic age. What is certain is that the magical conception of brahman was on the increase, culminating finally in the magical theory of sacrifice as held in the Brahmaga period, when the sacrifice in its potency was everything and the gods were little or nothing.

7

^{&#}x27; Varra (cri''to cover') 'hole', 'hell', with the epithet anania 'endless' (VII. 104, 17, cf. v. 3)

^{*} VII. 104, 4, 5.

¹ Sat and asat VIL, 104, 12.

⁴ The fixed religious formula tends to have a magical character. Not to mention the formula in the Roman Mass which causes 'transnobtantiation', reference may be made to the repeated use of the Lord's prayer in some forms of worship and to the closing formula of prayer 'for Jesus Christ's aske'. Whether a magical character is attributed to these formulas depends upon the attitude of the worshipser.

5. FATHER DYAUS AND HIS CHILDREN THE DEVAS.—
The conception of a heavenly clan with Dyaus' as head began, as we have seen', in the Indo-European period, extended through the Indo-Iranian period', and appears in a faded and vanishing form in the Yedic age. Dyaus 'Heaven' is celebrated in six hymns in'conjunction with Prithin' Earth', the two appearing in the dual compound Dyavaprithin' 'Heaven and Earth'. Dyais apart from Prithin' has not a single hymn in his honour, in this respect falling behind the lady Earth, who is celebrated alone in one hymn. As specimens of Yedic thought concerning these oldest of the gods there are here presented metrical translations of Rv. VII. 53 and I. 160.

To Duaus-Prithivi, VII. 53.

- With sacrifice devotedly I worship The Heaven and Earth, adorable and mighty; For ancient sages praising them have given Pre-eminence to them, whose sons are Devos.
- Bring these two parents ancient-born for worship, With newest praise-songs, to the sent of Rita.
 Come, Heaven and Earth, with all the heavenly people Hither to us, for great is your protection.
- Full many are your treasures to be granted, O Heaven and Earth, to every liberal giver.
 To us may what you grant be not deficient; Ye gods, with welfare evermore preserve us.

To Dyaus-Prithivi, I. 160.

 These two, indeed, the order-observing Heaven and Earth, To all beneficent, support the mid-air's sage; Between the fair-creating hemispheres divine Goes the resplendent sun according to fixed law.

¹ Primitive IE, form postulated by scholars,

² P. 1

³ It was, of course, interrupted and modified during the Iranian period by the Zoroastrian reformation.

⁴ Or 4 to King Sudks1.

- The twain, far-reaching, mighty, inexhaustible, Father and mother-like, all creatures guard and keep. Like two most proud Isir women are the Heaven and Earth, Because the Father has in beauty them arrayed.
- Conductor, purifier, son of two parents, he,
 The sage, by occult power all creatures purifies;
 From out the speckled earth-cow and the heavenly bull,
 The rich in seed, he always milks the shining fluid.
- 4. Of all the active gods most active is that one Who made the heaven and earth, the all-beneficent; He who with insight measured out the spaces twain, With props unaging, — he receives the general praise.
- Thus lauded, O Great ones, great fame may ye bestow, On us, O Heaven and Earth, and lofty governance;
 Such strength as worthy is of all praise bring to us, Whereby o'er all the peoples we may ever spread.

[Heaven and Earth bear exclusively the characteristic opithet devaputes, 'they whose sons are gods'', and they are bosought to come to 'the seat of rita' or sacrifice along with their children, who constitute the heavenly clan'. They are parents' of Agni in his sun or lightning form'. In their majesty and beauty they are like two proud fair women. As parents they protect all creatures end bestow treasures, fame and dominion.

The conception of the parenthood of Heaven and Earth is very ancient and widespreed, being found in the mythology of many peoples. In the Rv. the picture which the hymns conjure up before us is that of Father Dyaus bending down in love over Mother Earth and bestowing his seed in the form of rain, by which the earth is fertilized and made fruitful. In VI. 70, 1-5 rain is probably referred to under the figures of ghee, honey and milk.)

VII, 53, 1; L 185, 4; IV. 56, 2

² Dateya Jana VII. 53, 2.

² Pitarā, lit. 'two fathers' (VII. 53, 2; I 180, 3) or motarā 'two mothers' (I. 159, 3) explained in I. 160, 2 as 'father and mother'.

⁴ f. 160, 1, 3.

³ Tylor, Primitive Culture, London, 1871, I. 290 ft.

Reference has already been made to the equation . Duauspitar 1 = Zeb marep = Jupiter, as proving the existence of the conception of Father Heaven in the IE, period'. Zeus and Jupiter were the beads respectively of the Greek and Roman pantheon. They were ne mero 'departmental' deities, but were enriched and thoroughly personalized through the annexation of departments of activity which did not originally belong to them, especially that of the thunderstorm. They were no lenger gods merely of tho hright shining sky. Dvaus, as he is pictured to us in the Ry, is very inadequately personalized. For one thing his name Dylus 'sky' and 'day' was very transparent, perhaps somewhat more transparent than Zeus and Jupiter, and as regards gender Dyaus was hoth masculine and feminine. Then, too, the most exalted meral attributes, as we shall see, had heen appropriated by Varupa, while Indra and certain ether gods almost monepolized the thundersterm, Hoace Dyaus and Prithivs are in the Rv. little more than conventional figures, mythological fossils, as it were, which possibly bear witness to a time when the ceaception of Father sky was taken more seriously than it was in the Vedic age. The fact that the Vedic Dyaus is a waning god does not necessarily preve that he had never heen in the ascendant*.

 $^{^4}$ Rev. VI. 51, 5. Note that Dydusputar is in the vocative, as are its equivalents in Greek and Latin.

F. 14

³ Schmier (EEE II, Aryan Reigion) thinks that the IE. Dynas had a position of honour as compared with the other heavardy now V. Bardist (Dynas and 110) in hie munner holds that IE. polythelms had a decidedly monarchial character with Patter Harvan so the participath had of helicity (EV, 3) is 11, while admitting that presumably Father Harvan coccupied a position of honour among the golt, holds that his fatherhood was not taken very seriously, and that the IE. golt were been fined and stating to permit us to thick of them as an entered panthone (take the Greek) roled over by a supreme god. With this Hadound (VM, 22) spress, entrologing v. Bracket's view that Dynas was the supreme god of the fined-Durspeen age, while at the same time admitting that he number when the present some die delicted of a chooled polythenia. Merey must have been "the greatest mong the delicted of a chooled polythenia".

101

We have already noticed that the chief anthropomorphic trait of Dynus is fatherhood. But even this characteristic of Dyaus is not taken very seriously in the Rv. In I, 160, 4, Heaven and Earth, the universal parents, are spoken of as themselves begotten or created, and the suggestion is thrown out that the one who begot them must have been the most active and skilful of all the active gods; and in v. 2 mention is made of the Father of heaven and earth who arrayed them in beauty. Hence, in the Rv. at least, fatherhood was little more than a 'fluid and shifting' conception which (within certain limits, of course) could be ascribed rather miscellaneously according to the fancy of the individual poet. Anything within the sphere of heaven and earth might be called their child. There were ether relationships also which suggested fatherhood, such as antocedent in relation to consequent, head of a group in relation to the members of a group, etc.1

The IE, conception of Father Sky and his children the 'shining enes', after all necessary abatements have been made, remains still a very significant one. It means, as we have seen', that the heavenly powers and phenomona, such as sun, moon, dawn, lightning, rain, etc., wera already conceived anthropomorphically after the analogy of an earthly family. Heaven and earth, which are always with us, and within whose sphere the various phenomena come and go, were very naturally conceived as father and mother. They are the primoral parents, the 'ancient-born', since their existence, as we would say, is the presupposition of overything else. The phenomena which come and go within

⁽⁰¹A. 1³, 775 ft.) refers to the dominating position of the Heaven god in IE. religion, and holds that Dykes In India was threat into the background through the growth of a multitorn agentiesm, thereby Josing much of bis original greatness. The present writer accepts Meyer's view as probable. Varuna in post-Veilic times was decauded and depensonalized. The pre-Veilic Dykus may have been treated in the same way.

¹ Macdonell, VM. 12.

Pp. 14-16.

² Parvaje, VII. 53, 2.

the sphere of heaven and earth are, with equal naturalness for the primitive mind, called children of heaven and earth. The significant thing in all this is the analogy which holds hetween earthly clan and heavenly clan. Bergaigne's1 constructive principle in his study of Vedic religion is the analogy which he thinks holds hetween heavenly phenomena and the Vedic sacrifice, the latter being interpreted by him as an imitation of the former. Whether this principle he true or not, it is certain that the conception of Father Sky and his children the Devas is the reflection of human society. The devas are often referred to in the Rv. as a heavenly clan, generation, tribe, nation, race , standing over against the human race'. The parallel is very complete. In most cases the singular or dual is used, but sometimes the plural is used of the gods as well as of men, thereby indicating perhaps that the gods as well as men are split up into groups.

The gods may he grouped according to several principles of division. As in Hehrew thought heaven and earth embrace the universe, so in Vedic thought they are the two world-halves' that comprehend everything. Within this scheme there are three levels, heaven, mid-alr, and earth for which there are thirty three gods, eleven apparently for each different level. This is the oldest classification, being found in the Rv. itself. The human race is bisected into males and females. By analogy the

hitane, rodan.

Compare the tripartite Hebrew division into 'heaven above', 'earth beneath ' and 'water under the earth' (Ex. XX. 4) The Vodic Indians had knowledge of rivers and of river-confidences (Samudra), but only slightly of the ocean. The Hebrew lived on the borders of the great sen Oloditerraneous. Hence the difference.

⁷ Cf Fasna I. 10 'thirty and three lords'.

divine race will have the same division, and so there are goddesses as well as gods. The goddesses may be subdivided into three groups: (a) those having a natural basis, as Uşas 'Dawn', Sarasvati the deified 'Sarasvati' river, Prithivi 'Earth', Ratri 'Night', Prisni the 'mottled' stormcloud and Vac 'Speech'1; (b) abstract feminine nouns personified as goddesses, e. g. Puraindhi 'Plenty', Ilā Nourishment', Dhisana 'nbundance', etc.; (c) goddesses as wives of the great gods, as Indrant, Varunant and Agnayt. The great gods are furnished with wives in order to make the parallel between the human race and the divine race complete. Ne public functions are ascribed to them. They are 'house-wife' doities, Mistress Indra, Mistress Varuna, Mistross Agni. This detail may be taken as reflecting the } attitude of the Rigyedic age as regards the proper sphere and functions of married women.

Again, the human race is broken up into small groups, By analogy the divine race will have similar groups, e. g. Adityas, Vasus, Rudras, the semi-divine Angirasas, and among the lower deitles the Ribhus, Apsarasas and Gandharvas, and finally Visvedevah 'all-gods', a term designed to cover thom all. As a tribal chleftain is represented as the head of his tribe, so Agniis the head of the agnis 'fires', Soma of the somas 'somn drops'. Rudra of the rudras 'lightning flashes' (?) and Usas of the usasas 'dawn gleams'.

The gods may be divided according to function. As in Vedic society there were priests, warriors and commons, so among the gods Agni and Brihaspati were priests, Indra and the Maruts warriors, Tvastar and the Ribhus artizans. The agricultural community, whether Vaisyas or Sudras, had special agricultural deities such as Ksetrapati' 'lord of the field', Urvarā 'she of the ploughland', Sītā 'she of the furrow', and perhaps Puṣan, the 'thrift'-god, guardian of flocks and herds.

^{&#}x27;Probably originally the voice of thunder. Cf. 1117 on Ps. XXIX. Fremiuls one of the Hind Bhamiya 'land lord'.

We may also classify the gods according to certain great functions in which, as groups, they share. There is the work of rein giving, in which, to a greater or less degree, Parjanya, Varuna, Indra, Dyaus, Rudra and the Maruts all participate. As gods of the lightning there are Indra, Trita Aptya, and so forth; as physician gods Rudra and the Maruts, Varuna, Soma, Asvins, Vata and the Waters; as demon-slayers Agni and Indra and in general the gods of light; and as gods of song Brihaspati, the Maruts and the Angirasas.

The so-called 'dual divinities' constitute the smallest groups of Vedic gods. The union of man and wife is the human analogy followed in the primeval conception of the marriage of Heaven and Earth. So compelling was this analogy that in hermony therewith the great Vedic gods had to be joined in wedlock, e. g. Indre with Indrant, Agni with Agnayt, Varuna with Varunani. There must also have heen 'David and Jonathan' friendships among men in the Vedic age. At any rate, after the analogy of Dyavaprithivi 'heaven end earth', a considerable number of male deities were joined together so as to form dual gods, e. g. Mitrā-Varuna 'sunlight and sky', or possibly as Oldenberg and llillehrendt think 'sun and moon', Indra-Agni 'lightningflash and altar-fire', Indra-Varuna 'lightning flash and sky'. Indra-Vayu 'lightning-flash and storm-wind', Indra-Soma the drinking god and the drunken liquor', Surya-Masa 'sun and moon', Indra-Visnu 'lightning and sun', etc.; also one group of two female gods Nakta-Usasa night and dawn'. In the case of each dual divinity there is distinct contrast in the constitutive elements as well as close association of the same in sphera and function. The Asvina 'two horsemen' may also ha mentioned here, since they are essentially dual gods, meaning probably either 'morning star and evening star' or 'the twin-lights before dawn, half dark and half light'1. In either case they are almost 'mythological synonyms' of 'night and dawn'.

Macdonell, VM, 53.

Thus the whole 'clan of the devas' is conceived anthropomorphically after the analogy of human society. They wear ornaments of gold, ride in cars drawn by horses, and have houses. They fight against the demons, as Aryons fight against the Dosyus. They are glorified Kentriyas. Some gods are male, others are femole. Indro, ged of the lightning-flash and thunder-rell, is suitably represented as a man: Usas, the mony-coloured dawn, as a foir ond richlydressed wemon. The gods are related together anthropomorphically. Examples of wedded gods have already been given. Some geds are represented as parents, c. a. Duānā-Prithivi, and others as children. Some are related as brethers and sisters. Usas' is the daughter of Dyaus, the sister of Bhaga, the kinswomen of Varune, and the wife (or mistress) of Sarva. Night and Dawn are sisters. Agni' is the son of Dyaus and the brother of Indra. 'The principlo of 'division of lobeur' exists among the gods. Each deity is in charge of semo special aspect of nature or of life. While there is considerable overlapping of function, as explained in another place, yet on the whole the Vedic gods are 'departmental deities', although in seme eases new and extensive functions have been added in the course of time to their original tasks. As the members of a human clan act together and mutually support one another, so is it with the clan of the Devas. There is much mutual helpfulness and interchongo of services among the gods, as is natural in a clan consisting of members related as husbands and wives, porents and children, brothers ond sisters, etc., in general kinsmen, children of Hoaven and Earth. Thus Varuno prepares a poth for Surya (I. 24, 8), and in turn Suryo reports to Mitra and Varuna concorning the sinfulness of men (VII. 62, 2). Agai sorves Indro, since Indro drinks Soma with the tengue of Agni (III, 35, 9-10) and

^{1 1, 121, 3; 123, 5, 10.}

^{*} III. 3, 11; VI. 59, 2.

³ P. 82.

Indra serves all the gods (including Agni) by gaining the victory over Vritra and so giving freedom to the gods (III. 34, 7). Agai, too, serves all the gods by acting as their messenger. The Maruts, who constitute the host of Indra, serve him as his soldiers (III. 35, 9). Tvastar fashioned the holt of Indra and sharpened the metal axe of Brihaspati (V. 31, 4; X. 53, 9). Soma stimulates Indra to perform great cosmic deeds Visnu helps Indra in the fight with Vritra, etc., etc. The gods in general are thus conceived as living together in a state of harmony and mutual helpfulness. The only exception of importance is in the case of Indra, the violent and changeable weather god, the shifty nature of whose tasks helps perhaps to excuse the note of discord which he sometimes introduces nmong the gods.

6. COMMON CHARACTERISTICS OF THE VEDIC GODS .--'As we have seen, the Vedic gods are a colestial folk, the clan of the shining ones. The members of the heavenly clan, as is natural, have a family resemblance one with another. Certain common features characterize them as a group. In the first place, they are all Devas 'bright heavenly ones', whose proper habitat is the sky 1 and proper nature light'. While the term .tsura 'mysterious lord' is not explicitly applied to all the gods, yet in general it is one of their epithets, emphasizing their 'mysterious' nature, which expresses itself through maya 'occult power'. In sharp contrast to mortal men the gods are described as 'immortal'. As might be expected, brilliance is a common characteristic of the race of gods whose very nature is light. Since the Vedic gods in general preside over cosmical functions, power is an attribute of them all. So with

In the case of such terrestrial deities as Agni and Soma, their heavenly origin and subsequent 'descent' to earth is expressly stated. The delited 'Waters' and 'Rivers' manifestly descend from the sky in the form of rain Delfiel terrestrial "Mountains" may be regarded as having their prototype in the cloud mountains of the sky.

Of 'Who coverest thyself with light as with a garment', Ps. CIV. 2.

knowledge. Each god being in charge of a special department must have knowledge and power adequate to his task. Beauty is commonly ascribed to the gods. As distinguished from the malevolent demons, the gods as a class are benevolent, and, on the whole, are uphoiders of moral order. The attributes of power, wisdom, beauty, benovolence and righteousness though possessed by all, are not possessed by all in the same degree. Thus Usas, the lady 'Dawn', has more beauty than knowledge and strength; Indra, the warrior god, more strength than knowledge and righteousness. Of all the Vedic gods Varuna possesses the best combination of physical and moral attibutes. Agni, as a priestly god, is well endowed with knowledge, Jatavedas 'knowing all generations' being his axelusive epithet.

The mutual relationships and mutual interchange of services that held among the Vedic gods have already been traced out with some detail. Every department of nature and of life is brought under the control of some delty. All the delties together function as a unity. The unity of the divine activity is not the unity of an individual will as in monotheism, but the unity formed by the collective will' of a clan, the clan of the devas. The multiplicity' of the Vedio gods reflects the multitudinous aspects of nature and of life; and the unity which, on the whole, porvades the diverse activities of the gods reflects, in like manner, the unity of nature, the fact that the universe is a cosmos, an ordered whole. One of the great conceptions of the Rigveda is that of Rita 'order', a conception which goes back to the Indo-Iranian period and the roots thereof to the IE. period. As the Greek and Roman gods are linked up with Fato (Moira, Fatum), so the Vedic gods are connected with Rila, 'Eternal Order'. The relation which the gods sustain to rita is variously

¹ Cf. X. 33, 9, 'Beyond the will (crata) of the gods lives not even the hundred-lived.'

I Like the multiplicity of Greek, Roman and Lithuanian gods.

stated. Heaven and Earth are called the ancient parents (mātara) of rita (VI. 17, 7), and in the same passage they bear the epithet devaputes 'whose sons are gods'. Heaven and Earth, then, are parents of the gods and parents of rita. In other words, the devas, each in his own proper sphere, are rita, express rita, are the guardians and cherishers of rita. For example, Usas is not independent of Eternal Order. She was born in rita (ritejā I. 113, 12), and so her task is to cherish and protect it. She does not infringo the heavenly ordinances', the law of rifa', but rather follows its rein (I. 123, 13), for day by day she returns to the place appointed. In the thought of rita being expressed by the daily reenrence of dawn we have the idea of the uniformity of nature. Of all the gods the two chief Adityas, Varuna and Mitra, are most intimately connected with rita, so that what seems in some passages to be the work of rita, in others is referred to as the work of Varuna.

All the gods, then, are alike in either determining, or appearance of the standard as with easpect or other of tile, which may be translated as 'the course of things', 'nature', or 'cosaie order', 'Through the great conception of Rita the multiplicity of nature is reduced to a unity and the multiplicity of the gods (corresponding to the multiplicity of nature) is seen to reflect a single will, because all are 'alabourers together' in maintaining n single all-comprehensive cosmic order. Thus the tendency of Rigyedic religion was toward some form of unity, whether monotheistic-or pantheistic.

7. We may finally note the bearing of all this upon two recent theories of the Rigyeda:-

a) Max Müller's theory of 'Henotheism', namely 'tho belief in individual gods alternately regarded as the

¹ Dairyant craffini 1, 92, 12.

¹ Rutarya dhūma 1, 123, 9.

As in the case of Varuna.

⁴ Oldenberg, RV. 101, note; and Macdonell, VM. 16.

highest'. We have seen that the gods form a heavenly 'caste'. All participate in doity. All possess in superabundant measure the qualities of power, sovereignty, wisdom, beneficence and beauty. Where there are so many gods, there must necessarily be considerable indefinitoness of outline; and, as we have seen, there is a (tendency to the recognition of an underlying unity, and so to fusion. Hence the loftiest attributes might properly be ascribed to any and every deva, simply because he was a member of the 'clan of the devas', and because all alike participated in divinity. This did not imply in the least that a ged thus addressed was regarded as the 'highest' in contradistinction to all the rest, but simply that he had hls full share of divinity. Of course, exaggerations and inconsistencies are found in the Vedic hymns, but so are they in other religious literature'. Where there is more than one delty or divine person, it is difficult always to keep the right halance, especially when the one worshipped is an ista devatā.

Swimi Dayanand Sarasvati's theory of 'Monotheism' in the Rigyeda. Taking his eue frem the late passages Rv. I. 164, 46° and X. 114, 5°, the founder of the Arya Samaj held that all the gods mentioned in the Rv, are simply variant names for one god. This process of reduction from multiplicity te unity would have been easier, if there had been no dual gods or group gods mentioned in the Rv. It has already been remarked that the tendency of Rigyedic polytheism was toward unity of some sort, either monotholstic or pantheistic. Swimi

¹ Parnell (Greece and Babylon, 1911, p. 84) refers to the "tendency very marked in the Babylonian literaries, to exalt the praticular divinity to whom worship is at that moment being paid above all others", with the result that "the cestatic poet is always contradicting himself".

¹ The one Being priests speak of in many ways: they call it Agul, Yama, Matarisean.*

^{2 &#}x27;Price's and poets with words make into many the bird (= the Sun) that is but one.'

Dayanand was not a pantheist. In reading into the Rigveda a monotheistic doctrine as opposed to pantheism, he virtually declares that instead of issuing in pantheism or at most in an unstable monotheism, Vedism ought to have issued in a clear-ent and definite monotheism. The monotheistic interpretation of the Rigveda involved on the part of Swämi Dayanand much wild and unscientific exegesis. For this, however, we may be thankful that as between theism and pantheism Swämi Dayanand took the side of theism.

CHAPTER V.

VARUNA THE ETHICAL GOD

1. Introductory .-- Varuna is the most impressive deity among all the Vedic gods. As a prehistoric god he is more or less opaque, his naturo substratum (if he ever had one) being a matter of dispute. He certainly dates from the Indo-Iranian period, being the Indian analogue of Ahura Mazda; and by some he is carried back to the Indo-European_period_and connected with the Greek Ouranos. The two greatest German authorities on Vedie mythology both agree in finding in the moon Varuna's original physical basis. Varuna stands in the midst of the group of Adityas as one of them, possibly seven in number. which the inte Professor Oldenberg thought represented originally sun, moon and five planets, in his opinion loan gods from the Semitic world. The Vedic Adityas as a group remind one distinctly of the Avestan Amesha Spentas, Varuna is as closely connected with Mitra in the Rv. as Ahura Mazda is with Mithra in the Avesta; and both names Mitra and Varuna occur in the Boghaz-köi tablets (1400 n.C.). The name Varuna' has vanished entirely from Iranian unless it be represented by the word Varena; but the nature of Varuna is clearly manifest in the impressive character of Ahura Mazda . For as the 'wise' Ahura gathered up in himself the attributes and functions of the daevas whom he supplanted, so it is equally true, in the words of Barth, that "if we combine into one all the

Oldenberg and Hillebrandt.

² If 15 certain that Yaning and Abora Manda originally were either identical, as Oldenberg thinks (IV. 05, "Varuna, der Abura des Avesta"), or were parallel forms of the same conception. See Keith CHI. I. 103: "Varuna bears the epithet Asura, which serves to show his parallelism with Abura Manda, the highest of Irmaia posits", Cr. also v. Schwerer, AB. I. 39:

attributes of sovereign power and majesty which we find in the other gods, we will have the god Varuna'. As Ahura Mazda represented the actuality of ethical monotheism in ancient Iran, so Varuna represented its possibility in ancient India. If the one may be rightly called 'the Iranian Yahweh', the other with almost equal justice may be called 'the Indian Yahweh'.

2. DISTRIBUTION OF THE RIGVEDIC MATERIAL.—Since the group of the Adityas must be considered in connection with Yaruna, we have the following statistics. There are addressed to Varuna hymns II. 23, V. 85, VII. 86-89, VIII. 41-42 and I. 24-25, ten in all; to Mitra-Varuna 23, of which eleven are in Book V and six in Book VII; to Indra-Varuna 3, of which 4 are in Book VII; to Mitra only one, III. 59; and to the Adityas 6, of which 3 are in Book VII. Although none of these hymns is found in Bk, X, yet there are isolated references to Varuna in no less than 35 hymns belonging to that book. (From the prominence of Bk, VII in connection with Varuna, one might infer that the priestly family of the Vasisibas was very specially the guardian of this worship during the pre-Vedic or the Vodic age.)

3. THE PARILISTORIC VARUNA.—II connected ctymologically with Openet, Varuna goes back to the period of IE, unity. There is, indeed, a slight phonetic difficulty, but nothing so serious as to prevent its acceptance by competent scholars! In Greek mythology Ouranos is represented as an aucestor of Zeus, a consciousness of his great antiquity being perhaps thereby roveled. In IE, times Zeus (Dyaus) and Ouranos (Varunas) may both have

¹ RL 16.

[&]quot;There has been some planetic corplician about the equation Varuna — oppower, which thus has not leading. Greek oppower, is Inde-European grayman; Stankit Varunas in Inde-European grayman; Stankit Varunas in Inde-European graymon. The two forms differ no more than, for Instance, Vedeo militanes and surious 'recent', or force of corp. of the opposition of the Carlo Carlo

been descriptive appellations of the one physical fact of the sky, Zeus 'the bright' and Ouranes 'the encircling'. twe names for the same thing, or one perhaps an epithet of the other. Before the IE. clans had separated, these werds had already parted company. In Greek and Vedic hoth words survive; in Avestan both are lost 1, a fact prehably due to the Zoroastrian reformation. In Greek mythology Zeus is the great personality, net Ouranos; the opposite is true in the Ry. There is very much, then, to be said in favour of regarding Varuna as originally the same as Ouranos, both words being derived from wi 'to encompass', therefore 'encompassing' as an epithet of Zeus (Dydus). This seems to the present writer to be, on the whole, the most satisfactory conclusion'. In the nature of the case there is no absolute proof. But whether Varuna is connected with Ouranos or not', nearly all scholars regard the word as derived from vri 'te encompass', magning the same as if it were connected with Ouranes. namely 'encompassing sky'. It is possible too that folk etymology has been at work, the word Varuna naturally suggesting to the popular mind some connection with vari

^{&#}x27;This statement must be qualified to this extent that in the textually uncertain Yasth III. 13 dyaof, abl. of dyar 'akr', occurs (only here in Avesta). 'If calliong down from heaven fell he'.—Moulton's trans. As regards Varuos there is the possibility of a connection with varena and narrange.

^{2 &}quot;In so far as Zous has a parallel, it is in Varuna not in Dykus". Keith, IM, 21.

² The latest and best statement of this position is found in Schreder, AE. I. 322 ff. Other scholars who connect Various with Oursinos are Muir, OST. V. 76; Barth, J.H. 16; Crastmans, Worldbuds; Both, PV. Bohzenetger, ACV. 22; Datmesteter, OA. 53, 78; Bloomfield, RV. 136-137 Such authorities on Comparative Philology as Briganam, Grundries 2, 154, and Prellwitz EWGS, have not referted this connection.

^{4 &}quot;Joh Schmidt writes to the effect that till the relation of the Λολο δρανός and δίρανος to οὐρανός has been determined, it is impossible to say whether Varuan is connected with οὐρανός or not."—Macdonell, VM. 1897, Addenda and Corrigenda

⁴ So Macdonell, VM. 27-28, and Keith IM, 25; as well as the acholars mentioned under note 3 above.

'water', and var-sa 'rain'; just as donard; might suggest a connection with object 'to make water'.

4. MITRA AND VARUNA .- The divine names Mitra and Varuna', discovered by Winckler on the Boghaz-köi tablets (1400 B.C.) indicate the existence of the two gods at that early date. The question whether these divine names are Indo-Iranian, Iranian or Indian has already been raised . They clearly belong to a people and language in which s had not been changed to h', and in which Indra and Nasatva (u) were gods and not demons. Hence the period before the Zoroastrian reformation and before the Iranian consonantal shift. The inscriptions represent, then, either the undivided Indo-Iranian, the pre-Zoroastrian Iranian, or the Vedic Indian; or possibly they are the work of Indo-European speaking tribes, who had stopped in Upper Mesopotamia on their way eastward, or of Aryan people, who had migrated westward from Bactria. At any rate, whatever the facts are, the Divine names are mentioned along with Mitunian kings, whose names seem to be renuinely Arvant.

The appearance of Varuna in the midst of an environment of Iranian royal names at such an early date is a reason for reviving the older view that the late Avestan

[&]quot; "Varues is the covering sky united with the sun, or he whose covering is rain and dese". Horkins RI. 71.

Pischel (VS 1, 88) regards it as not impossible to bring Varuna into connection with outsity. Assistant in a fragment calls the rain the seed of αγγος Ούρανός, and in the Rv. rain is virtually called dres retain.

Ministra-ai-steel u-ru-su-ma-ni-sitel variant s-ru-na-ai-sitel. Aidil is clearly a combining sattix, hence the divine pair Mitra and Varuna Meyer, GA. 1º 802.

⁴ See p 23.

Index and Navatya occur on the same tablets as gods along with Mitra and Varuna; and Navatya is the form which appears, and not the later Arcstan Naonhossings, in which the Irahien consonantal shift from s to a has faken place

The latter of Dashratta, the King of Mithin, in the Tel-el-Amarua correspondence contains the Iranian names Artashamara and Artaliand. Keith, Indo-Iranians in Bhandarkar, CV, 84 ff; Giles, CHI 1, 76; Bloomfield, RV, 12.

varena', name of an earthly district, is connected with Varuna. Zoroaster clearly made a clean sweep of the eld gods, oven the noblest of them such as Varuna and Mitra. They were doubtless too clesely connected with the physical aspects of nature to suit his reform. So he cast them out of heaven": and Varuna who undoubtedly was the highest fell the lowest, for he was apparently transformed into a demon of lust'. With the counter-referration of the later Avesta Mitra roturned, but not Varuna. The reason clearly was that the noble aspects of the Iranian Varuna had been conserved and retained under the name of Ahura Mazda. while the ignoble side of Varupa to which his name still apparently clung had nething that even the later Avesta wished to revive. The earlier fellowship of Mitra and Varuna as seen in the Boghaz-Köi inscription and revealed in se many passages of the liv, was restored in the later

¹ So Darmesteter, OA. 69-70; Hillebrandt in his early book Faruna und Mifra. 1877: and recently Prollwitz, EWGS, and 1. v Schroeder, drieche fieligion I. 332. A conversation at Ithaca with Prof. Jackson left the impression that he was prepared to leave the question open From carena is formed carenya dazi an (Vend. X 14), by hypothesis oupdivect theof, and also the phrase varenya drauto (Yasht X 68, 97). The degradation of meaning may have been from derga in heaven to demons in heaven and finally to demons in the Varens land. demone of lust and doubt. In the Pahlavi texts there is a l'aieno, a demon of lust See Jackson in Iranian Grandries I 655,660 It must be mentioned. however, that Spiegel who earlier (AP 131) accepted the equation Varung and Varena, in a later article (ZDMG 32, [1878], 716-723) considers the identification questionable, while not rejecting it out and out. In favour of the identification is the fact that in nouns formed from roots in r, a succeeding a is changed to u: e.g. dhri, pri and tri give dharuna, Paruna and turuna instead of dharana, verang and tarana. Against the identification is the fact that the Iranian forms karena, parena and sarena seem to have as their equivalents in Sanskrit Larna 'car', parna 'feather' and turns 'covering'. Then, too, Ekt varuns would seem to require as its Imnian equivalent sauruna, since Skt. foruna = Iran, tauruna and Skt aruna em Iran auruna. But at any rate varena is clearly derived from eri is some one of its numerous meanings, and that is the main point.

² Neither Mithra nor Varuna is mentioned in the Gathan,

Dinkard VIII 9, 3; IX 32, 3; Didistan 1 Dink XXXVII 44, XCIV. 2.

Avesta in the comradeship of Mithra and Ahnra! In this way we are able with a considerable degree of confidence to reconstruct portions of Iranian religious history which do not lie on the surface; for, as Prof. Oldenberg says? "We must try to read the Avesta like a palimpsest; under the writing of the Zarathustrians we discover the clear traces of a more ancient text which very closely resembles the Veda".

The existence of the copulative compounds, Mithra-Ahura and Mitra-l'aruna, in both the later Avesta and tho Rigyeda presupposes a similar conjunction of these names before the breaking up of the Inde-Iranian unity. This is also supported by the Boghaz-köi inscription, in which Mitra and Varuna are linked together by the combining suffix assil. See p. 114 n. 5. Hitbra in the Avesta means 'compact', and in the Rv. friendship (neut.) and friend (mase.). It looks as if Mitra were originally a 'Sondergott', 'he of the compact', just like Janus 'ho of the door'. Mitra. then, would be the god wbo watches over truth-speaking and sincerity between man and man is the matter of contracts, promises, treaties. Now there has ever been recognized an inner affinity between truth and light'. Truth is as inner light; and light is a kind of external truth. We do not know which idea emerged first in connection with Mitra, but probably Meillet is right in giving the priority

[&]quot;Ahura Masda spake unto Spitama Zaraibushira, saying: 'Verily when I created him as worthy of sacrifice, as worthy of payer as impel, hums Masda",—'Yabit X. JRAS, 1909, pp. 1097-98.

^{4 &#}x27;Vertrag, Abmichung, Kontrakt'—Bartholome AW. 1133 Brugmann (Grundriss, 2nd ed. 1906 II. I. p. 346) explains the word as oricinally meaning 'austanchen, vertchered, indianing expectally friendly indrovens (das froundlind-Vertchere)); mei 'to exchange', m#paie 'the exchanges', Lat. communis. Gr. Olderberg RV, 186, u. 1.

[&]quot;He that doch the truth cometh to the light" - John III. 21. God is "true" (I John V. 20) and God is "light" (I. John V. 20) and God is "light" (I. John I 5).

to the ethical idea 1. It really makes little difference. The original Mitra stands for truth and compact keeping'. His business was to help men 'to walk in the light' of covenantkeeping faithfulness as between man and man and tribe and tribe, and to punish them, if they did otherwise. It may not be without significance that among all the IE. tribes the first to form a confederacy were the Aryans. We may perhaps see in this the influence of Mitra, the god presiding over the great social principle of faithfulness to compacts. Such was Mitra's ethical sphere, and his physical sphere seener or later was the light. Some scholars, as Meulten puts it, have been too prone te antedate the ultimate identification of Mithra with the sun'. The passage from sunlight to sun was, of course, natural and inevitable, and the transition was effected in Persia by the time of the later Avesta. The physical meaning, then, of the two divine names, Mitra and Varuna, was most probably 'sunlight and encircling sky'. These two separate entities, light and sky, naturally fuse together into one cenceptien.

Why did the Zoroastrian reform find no place for Mithra? For one thing he is represented in the Mihr Yashi as a fighter, a god of battles. This was another side of his character—the militant side—which probably appealed with special force to the robber hordes who had little use for a god of good faith. For this or other reasons Zoroaster transferred to Asha "Truth", 'Ethical Order', the care of covenant faithfulness and loyalty—a charge which Mitra had apparently forfeited. But, as we have seen, Mithra came back in the later Avesta as a yazata or 'angel'. Later on as the Soi Invictus of Mithraism the

³ Moulton, EZ. 151; Schreder, AR 367-383.

Moulton, EZ 151; Schreder, AR 387.

Schruder, AR. 382, denfer that the Indian Mitra ever was a sun god-

A natural development from the conception of Mitra as a god of light, since the early mythologies are full of the conflict between light and darkness

worship of Mithra penetrated the Roman Empire! As a warrior god and the patron of the blunt honesty and straightforwardness which soldiers love, he was very specially the god of soldiers. The golden period of Mithraism in the West was between 100 and 300 a. b. For a time it was uncertain whether Christianity or Mithraism would win the day.

Only one hymn of the Rv. is addressed to Mitra, III. 59.

1. Mitra mankind uniteth, to them speaking;

- Mitra mankind uniteth, to them speaking; Mitra the cardi upholdeth, and the heaven; Mitra with eye unwinking sees the tillers; To Mitra offer the oblation oily.
 - Pre-eminent be that man who brings oblation, Who serves thee duly, Mitra the Aditya; Never is slain or vanquished whom thou helpest, From neither far nor near dolt trouble reach him.
 - Free from disease, in sacred food delighting, Standing firm-kneed upon broad earth's expanses, Abiding by the will of the Aditya.
 May we continue in the grace of Mitra.
 - Adorable and gracious is this Mirra
 A king with fair dominion, born disposer;
 May we abide in his auspicious favour,
 The loving-kindness of the holy Mirra.
 - 5 We must approach with awe the great Aditya, Mankind-uniter, to the singer gracious; To him most highly to be praised, to Mitra Into the fire pour this oblation pleasant.

⁴ At Iolis exported Boddhim extrant, no Perda axported Mithraum wedward, boundhing of Mithritor entered India also, for in the first creatory A. D. and later (see Fasquhar, OLLI, 1925) there was continuous Irashia influence in North Iolis (7 the Irashia symbols on the Kamakha evicus), and Ilindia from wordshy was careful on almost enterely in accordance with Irashia rules. Margian Priests was careful on almost enterely in accordance with Irashia rules. Margian Priests retreed Iosha in large numbers and not only became Priests in temples of the sun, that were also receptived as Richman. Tarquita e., et al. 125, 205.

В

- Mitra the god upholds the folk, His favour bringeth ample gain, Ilis wealth conspicuous renown.
- The fair-famed Mitra is the one Who by his might excels the sky, And by his lofty fame the earth.
- To Mitra, mighty one to help,
 The peoples five submit themselves,
 Tis he supporteth all the cods.
- 'Mongst gods and mortals, for the man Who spreads the straw, hath Mitra made Provision by his will and law.

This hymn (really two hymns) contains, as we shall see further on, almost nothing which could not have been said with equal truth and appropriateness of Varuna, Mitra is described as upholding heaven and earth (1), the folk (6) and even the gods (8); as greater than heaven and earth (7); as beholding man with unwinking eye (1); as a king whose 'ordinance' (erata) is to be observed (3. 9); and ns a god of grace (3, 4) who helps and delivers, and grants health, wealth and prosperity (2, 3, 6, 8). The only attribute mentioned in this hymn which seems specially to belong to Mitra is yatayajjana', 'uniting men' (vv. 1, 5). Unfortunately the particular meaning of the verbal root yat is not very definita'. Nevertheless the various interpretations given in the foot-note are not so very far apart. There is a social reference. Mitra stirs up men and sets them at their respective tasks in friendly

¹ Occurs in only three other passages in the Rik. N. 72, 2 of Mitra-Varina; I 136, 3 of Mitra, Varina and Agraman, and VIII. 91, 12 of Agni who "Mitra like unites men."

⁹ For example pairapit (r. 1) has received the following interpretations sets more at their respective tasks (Styana); indicates to men their place (Illichtmal), LR 73); indicate to emulation, that is to any, set a good example (Ordiner, YS-111 15); sets in motion (Ladwig on pessace); sites more (Marchardt, YRS- 70); Impects (Hernaghen EV, HII 165); unites (Rubh PW, Oldenberg RV, 287 note 1) Grassmann, University 1 102, V. Schreder, AR. 569); and makes men keep their consequencia (Mullet, JA, X (1907), 2, 148).

emulation and co-operation. As Geldner finely interprets it, 'he who calls himself Mitrs (friend) incites to emulation of himself'. He the divine 'friend' as he is called in the Ry., and the guardian of compacts according to the Avesta, incites men by his own example to friendly and co-operative. that is, to social activities, in the performance of which there must necessarily be mutual faithfulness and loyalty to engagements. Other evidence in the Rv. for an interpretation of Mitra similar to that of the Avesta is found in X. 89. 9. 'Men of evil ways who injure Mitra, injure Aryaman, injure agreements (sangirah), injure Varuna'. The word 'agreements' set in the midst of the three Adityas suggests that to de violence to 'agreements' is the same thing as to do violence to the three gods. Ry. IV. 55. 5. "May the Lord (Varuna) protect us from distress caused by strangers; Mitra, from distress 'caused by friends'" may also be cited, if this translation is correct'.

As the Avestan Mitra had a Inminous character, so had the Vedic Mitra. Both ultimately were identified with the sun, Mithra in the later Avesta and Mitra in the younger Veda. The first texts clearly indicating the identification of the Vedic Mitra with the sun are AV. XIII, 3, 13 and IX, 3. 18, according to which Mitra at sunrise is contrasted with Varuna in the evening, and Mitra is asked to uncover in the morning what has been covered up by Varuna. Certain Rigvedic passages slso may be cited which point more or less clearly in the direction of this ultimate identification, e.g. X. 8, 4, Agni at the head of the dawns generates Mitra for himself; III. 5, 4 and V. 3, 1, Agni when kindled becomes Mitra; V. 81, 4, Savitar becomes Mitra because of his laws; Val. 4, 3, Visuu took his three steps by the laws of Mitra?

On the whole, then, while an indefinite luminous character cannot be denied to the Rigvedic Mitra, such as

^{&#}x27; It is supported by Grassmann, and by Whitney-Lanman on Av. 11, 28, 1 2 Macdonell, VM. 27-30

belonged to the Adityos as a class and indeed to the Devas in general, yet on the basis of the earliest evidence, Vedic and Avestan, the originol Indo-Iranian Mitra must be assumed to have been the apotheesis of the friendly compact, the 'gentleman's agreement'.'

- VARUNA AND ETHICAL ORDER.—I.v. VII. 86 is almost entirely penitential in choracter, and as such vividly reminds one of the Hobrow and Babylonian penitential psalms:
 - Wise are the generations through the greatness Of him who propped the two wide worlds asunder; Pushed forth the great and lofty vanit of heaven, The day-star, too; and spread the earth out broadly.
 - With mine own self I meditate this question:
 "When shall I have with Varuna communion?
 What gift of mine will be enjoy unangered?
 When shall I happy-hearted see his mercy?
 - 3 Wishing to know my sin I make inquiry, I go about to all the wise and ask them; One and the self-same thing even sages tell me; 'Yaruna hath with thee hot indignation."
 - 4. O Varuna, what was my chief transgression, That thou wouldst slay a friend who sings thy praises f Tell me, god undeceived and sovereign, guittless Would I appease thee then with adoration.
 - Set us free from the misdeeds of our fathers, From those that we ourselves have perpetrated; Like eattle-thief, O king, like call rope fastened, So set thou free Vasistha from the fetter.
 - 6. 'Twas not mine own will, Varuna, 'twas delusion, Drink, anger, dice, or lack of thought, that caused it; An older man has led astray a younger, Not even sleep protects a man from evil.
 - O let me like a slave, when once made sinless, Serve him the merciful, erewhile the angry. The noble god has made the thoughtless thoughtful; He speeds the wise to riches, he a wiser.

^{&#}x27;So Oldenberg, EV. 186 note 1, "dle Verkörperung des Vertraga"; Schroder, AR. 372; and Mcillet, JA. X (1907), 2, p 145: "Mitra est la person-nification du contrat".

emulation and co-operation. As Geldner finely interprets it, 'he who calls himself Mitra (friend) incites to emulation of himself'. He the divine 'friend' as he is called in the Rv., and the guardian of compacts according to the Avesta, incites men by his own example to friendly and co-operative, that is, to social activities, in the performance of which there must necessarily be mutual faithfulness and loyalty to engagements. Other evidence in the Rv. for an interpretation of Mitra similar to that of the Avesta is found in X. 89, 9, 'Men of evil ways whe injure Mitra, injure Arvaman, injure agreements (sangirah), injure Varuna'. The word 'agreements' set in the midst of the three Adityas suggests that to do violence to 'agreements' is the same thing as to do violence to the three gods, Ry. IV. 55, 5, "May the Lord (Varupa) protect us from distress caused by strangers; Mitra, from distress 'caused by friends'" may also be cited, if this translation is correct',

As the Avestan Mitra had a luminous character, as had the Vedic Mitra. Both ultimately were identified with the sun, Mithra in the later Avesta and Mitra in the younger Veda. The first texts clearly indicating the identification of the Vedic Mitra with the aun are AV, XIIL 3, 13 and IX, 3. 18. according to which Mitra at sunrise is centrasted with Varuna in the evening, and Mitra is asked to uncover in the morning what has been covered up by Varuna, Certain Rigycdic passages also may be cited which point more or less clearly in the direction of this ultimate identification, e.g. X. 8, 4, Agni at the head of the dawns generates Mitra for himself; III. 5, 4 and V. 3, 1, Agnl when kindled becomes Mitra; V. 81, 4, Savitar becomes Mitra hecause of his laws; Val. 4, 3, Vişuu took his three steps by the laws of Mitra.

On the whole, then, while an indefinite luminous character cannot be denied to the Rigyedic Mitra, such as

¹ It is supported by Grassmann, and by Whitney Lanman on AV. II. 28, 1. 2 Mardonell, VM 20 30

belonged to the Adityns as a class and indeed to the Dovas in general, yet on the basis of the earliest ovidence, Vedic and Avestan, the original Indo-Iranian Mitra must be assumed to have been the apotheosis of the friendly compact, the 'gentleman's agreement'.

- VARUNA AND ETHICAL ORDER.—Rv. VII. 86 is almost entirely penitential in character, and as such vividity reminds one of the Hebrow and Babylonian penitential psalms:
 - Wise are the generations through the greatness
 Of him who propped the two wide worlds asunder;
 Pushed forth the great and lofty vault of heaven,
 The day-star, too; and spread the earth out breadly.
 - With mine own self I meditate this question: "When shall I have with Varuna communion? What gift of mine will be enjoy unangered? When shall I happy-hearted see his mercy?
 - 3 Wishing to know my sin I make inquiry, I go about to all the wise and ask them; One and the self-same thing even sages tell me; 'Varuna hath with thee hot indignation."
 - 4. O Varuna, what was my chief transgression, That thou weuldst slay a friend who sings thy praises? Tell me, god undeceived and sovereign, guittless Weuld I appease thee then with adoration.
 - Set us free from the misdeeds of our fathers, From those that we ourselves have perpetrated; Like eattle-thief, O king, like call rope-fastened, So set thou free Yasystia from the fetter.
 - 6. 'Twas not mine own will, Varuna, 'twas delusion, Drink, anger, dice, or fack of thought, that caused it; An older man has led astray a younger, Not even sleep protects a man from evil.
 - 7. O let me like a slave, when once made sinless, Serve him the mereful, erewhile the angry. The noble god has made the thoughtless thoughtful; He speeds the wise to riches, he a wiser.

³ So Oldenberg, RV. 186 note 1, "die Verkürperung des Vertrags"; Schreder, AB. 372; and Meillet, JA. X (1907), 2, p 145: "Mitra est la personnification du contrat".

9. May this my praise-song, Varuna, sovereign ruler, Brach unto thee and make thy heart complaisant; May it be well with us in rest and labour, Do ye protect us evermore with blessings.

Rita, as has been pointed out, means 'order' cosmic, ethical and ritualistic. The kind of rita celebrated in this hymn is predominantly ethical, the first and last verses alone having to do with cosmic and ritual order respectively. The following comments may be made:—

a) Varuna inflicts disease as a reminder and punishment of rin. - Some member of the priestly family of the Nasisthas was fettered with disease (v. 5) and so was in peril of death (v. 4) Like Job he did not know the exact nature of his transgression (v. 3-4). The wise assured him that he must be a sinner, because his illness was proof that Varuus who hates sin was angry with him (v. 3). Ho

"There are many infraredom to the fetters of Varinga" if 24, 15, 25, 211, 211 at 11 at 12 at 12

Q . The surds of third were round about me

The searce of death came upon me". Ps XVIII, 5

Also His own longuistes shall take the worked,
And he shall be hollen with the cords of his siz!". Prov. V. 22.

The parties expect of Yanna's character has perhaps been brought false larmery with the messing of the same Yannas through the working of popular expression. The root ret menus to colorient, to been, I as with as two comments, as seen in the same Yanna the elementer. Various them; which thouse the worker has recollairents, becoming the satisfaction, the compt (messing in neither of all cridders. They haven in a bind of eithed Vittes for all also dockey his laws. The Valie follows recognited many demonst of disease, they was not a dome. His challements were those of a bole put with an Messing in depole, leading as they often do to repression and amendment

³ The same point of view is found in the Robeltonian positionial hymnaconcerating with Fred Morris Jastone (RRA Chap. XVIII) write: "The two parts with presented thermatics with exerposerator force to the positions were the anner of the delty and the ne easily of approxing that approx..... The man ultitude." accepts this opinion as correct, asserts that he did not mean to err, mentions as possible causes of his sin, strong drink, anger, dice, thoughtlessness, bad example, and evil dreams (v. 6), and prays that he may be released from all misdeeds, whether committed by himself or by his ancestors' (v. 5). Through the infliction of suffering Varuna rendered thoughtful the thoughtless one who had sinned through thoughtlessness'. Like the prodigal son in the parable' he came to himself' through the insight which comes from suffering. The same general situation is brought before us in VII. 89, in which there is an apparent reference to dropsy as the peculiar infliction of Varuna:

- I do not wish, King Varuna
 To go down to the home of clay,
 Be gracious, mighty lord, and spare.
- Since like one tottering 1 move,
 O slinger, like inflated skin,
 Be gracious, mighty lord, and spare.
- Somehow through weakness of my will I went astray, O shining one; Be gracious, mighty lord, and spare.
- Thirst found thy singer even when He in the midst of waters stood; By gracious, mighty lord, and spare.
- Whatever wrong we men commit against the race
 Of hervenly ones, O Varuna, whatever law
 Of thine we here have broken through thoughtlessness,
 For that transgression do not punish us, O god.

Here too disease is regarded both as a penalty for sin causing suffering and death and as a reminder of sin.

was a sinner, and the corollary to this position was that misfortunes come in consequence of sin. . . . Within this circle of ideas the positential prairies of Rabylonia more. An ethical spirits was developed that surprises us by its lottiness and comparative parity."

Note the conception of the solidarity in sin as between the fathers and their children, an idea belonging to a primitive tribal state of society, where the unit of responsibility is the family or tribe rather than the individual.

acitti 'thoughtlermess' acit 'thoughtlera', acetayat 'made thoughtful'.

^{*} Loke XV. 17.

b) Fellowship with Varuna is broken by sin.—This is brought out in VII. 86, 2 and more fully in VII. 88, 4-5:

4. Varuna took on board with him Vasietha, Made him a Rishi by his mighty working; The Sage on gladsome days made him a singer, As long as days, as fong as dawns continue.

5. But now what has become of this our friendship, When lovingly we walked together erstwhile: When, sovereign Varuna, to thy lofty palace, Thy thousand-gated house I had admittance?

We have here two pictures of the intimacy which Vasitha enjoyed with Varuna; first, when he was in a boat at sea alone with Varuna, and again when as the guest of Varuna he had free access to his thousand-gated house. But alsa! this intimacy was broken through sin. The violation of Varuna's ordinances involves loss of communion with him as well as penalty in the form of disease and death. Varuna as a holy god has righteous indignation against the sinner.

c) Varuna is besought to loose the sinner from sin and its penalty.—As specimens of Vedic prayer for release from sins, we have the following:—

Set us free from the misdeeds of our fathers, From those that we ourselves have perpetrated; Like cattle-thief, O king, like calf rope-fastened, So set thout free Vasietha from thy fetter. VII, 86, 5. As from a bond release me from transgression.

Remove far hence the debts by me contracted, let me not suffer, king, for guilt of others. II, 23, 50, 90 b. Against a friend, companion, or a brother, A feltow-tribesman, or against a stranger, Whatever treespass we have perpetrated, Do thou, O Varupa, from that release us. If we, like those that play at dice, have cheated, Have really sinned, or done amiss unwitting, Cast all these sins away, as from us loosened;

So may we, Varuna, be thine own beloved. V. 85, 7-8.

¹ VII 86, 2, 3, 7; I. 24, 11, 14; I. 25, 2, etc.

A hundred are thy remedies, a thousand, Wide be thy grace and deep, 0 sovereign ruler; Far, far away from us drive off Destruction, And make us free from every sin committed. O Yaruga, we deprecate thine anger By bowings down, obtained, sacrifices; Sage Asura, thou sovereign widely ruling, Belease from us the sins we have committed. I. 21, 9, 14.

A god who is thus appealed to is conceived as a merelful and gracious god. There are many references to the grace' of Varuna, which is clearly the basis of the hope of the worshipper who is conscious that he has violated Varuna's laws and so is the object of his wrath. Varuna is the lord of life and death. If he has 'weapons' with which to consume the ovil-deer (II. 28, 7), he has also a hundred, a thousand 'temedies' (I. 24, 9) with which, as the divine physician, to heal and restore the penitent. The forgiveness of sin is conceived as a removing of sin, that is, of its penalty, and as a release, separation and losing therefrom. The conception of sin as a defilement and of fergiveness as a cleansing from such defilement is not found explicitly stated in the Rv. Sin itself is viewed as transgression and indebteness.

sumati, mritika VII No. 2, 7, N7, 7, 88, 1, 49, 1, 1, 24, 9, 25, 2, 5, 19, etc.

^{*} Such verbs are used a araserij, śrath, storathaya, pardosa, etcas, pramue We may cite the following paratlels from the Ibble

[&]quot;As far as the east is from the west, Fo let hath be removed our transgressions from us" (Pa. Cill. 12), "Rehold the Lamb of God, that taketh array the also of the world." (John. 1. 29); "Usub him that loveth us, and toosed as from our stars by his blood." (Rev I 5), "Jehovah also hath put array thy sia," (2 Sam. XII 13).

With this compare the following: "The inward deflicence of sin, i.e. its power to deflice the conscience of the abases, is well represented to the Did Testament pentiential pastin, but is hardly referred to, at least not explicitly, in the Veids pentiential bymas." Giewold, Repentance as illustrated from the Old Testament Pastins and from the Taiwas planns of the Repress, Malies, 1919, p. 10.

[&]quot;Transgression, enas, drugdie und dgas; debt pina. Cf. "Forgive us our debts"
Matt, VI. 12. Also anrifa, 'falsehood' und cripma 'crookelness'.

we have seen, two consequences of sin, the loss of the fellowship of the holy Varana, and the physical penalty of disease or death. Prayer to Varuna for the remission of sin seems to cover both needs alike. There is certainly prayer for deliverance from diseasa and death . There is also (by implication) prayer for the restoration of Varuna's friendship2; and the feeling is expressed that Varuna's grace deserves 'slave-like' devotion (VII. 86, 7); for through the grace bestowed those who have been the objects of Varuna's wrath become his beloved (V. 85, 8), and stand before him and his law quiltless' and so happy-hearted (VII. 86, 2).

d) Sin is 'the transgression of the law' of Varuna',-This is the burden of VII. 86, and it is implied wherever there is an appeal to Varuna for the remission of sin, For example:--

Whatever ordinance (crafa) of thine,

God Varuua, we violate. As human beings day by day; Yet to the stroke subject us not, Death-dealing of the angry one, The wrath of the incensed one. 1, 25, 1.2, Whatever wrong against the heavenly race we do. Being but men, O Varuna, whatever law

Of thine we may have broken through thoughtlessness, For that transgression do not injure us. O god. VII. 89. 5.

According to one passage the moral ordinances and laws, are an expression of Varuua's character and will. being built as it were, upon him:

¹ See VII, 80, 4; 1 24, 9, 12 15; H. 28, 7.

^{*} VII 88, 4-5; 86, 2.

^{*} Andona VII 86, 7, L 24, 15

⁴ Other gods have to do in a lesser degree with the punishment or remission of sin, as will be pointed out in the proper place.

The terms employed are trada 'ordinance' I, 25, 1; IL 28, 8, etc.; dharmon 'ntatute' VII 89, 5, didman 'deerce' IV. 5, 4; VI. 67, 9, cto.; hratu 'will' IV. 42, 1-2, dates 'will' to puladales 'whose will is pure' VII. 65, I, etc. Cr also VII. 86, 6. The terms used of the will of Varuna are the same whether amplied in the sphere of nature or of morals Cf. Robnenberger, AGY, 50.

For on thee, undeceivable one, are founded, As on a mountain, ordinances unshaken. II. 28, 8.

No wonder, then, that the gods follow the will and ordinances of Varupa! The laws of Varupa, like the laws of the Medes and Persians, change not. His is the characteristic opithet dhritaurata 'whoso ordinances are fixed'.

As regards special sins, we meet with such implicit prohibitions on the part of Varuna as not to kill (I. 41, 8), not to curse (I. 41, 8), not to deceive (II. 27, 16, VII. 65, 3), VIII. 49, 3), not to gamble (II. 29, 5), or at least not to cheat at gaming (V. 85, 8) and not to indulge immoderately in wine, anger and dice (VII. 86, 6). Vedic ethics was, on the whole, tribal, as might be expected at that early age, moral obligation being largely limited to the clen. But there is in V. 85, 7 a reference to the possibility of sinning ageinst a stranger, and in the next verse the distinction is drawn between deliberate sinning and such sin as is committed unintentionally.

As regerds the ceuses of ein the Vedic Indians elearly believed that "to err is human" (I. 25, I, VII. 89, 5). They plead es oxcuses for sin thoughtlessness, weakness of will, wine, enger, dice, bad example end ovil dreams. Besides being responsible for one's own sins, there is also the suggestion in VII. 86, 5 and II. 28, 9 that one may be responsible for the sins of one's ancestors, who are bound up with one in the same bundle of life.

c) As omnipresent and omniscient, Varuna is a witness of the deeds of men. — For this aspect of Varuna's character I. 25 is important:

^{&#}x27;IV 42, 1-2; V. 69, 4; VIII. 41, 7

¹ I. 25, 8, 10, etc. There is the suggestion that moral law is as fixed as physical law. Rita covers both ideas.

³ Cf. Bohnenberger, AGV, 52 ⁴ VII, 86, 6; 89, 3, 5,

^{*} Cf. Fx. XX, 5, Ps LI, 5, Rom. VII 20

- 7 He knows the path of hirds that through The atmosphere de wing their flight, And ocean-dwelling knows the ships.
- He knows, as one whose law is firm,
 The twelve months with their progeny,
 Knows too the month of later birth.
- He knows the pathway of the wind, The wide, the high, the mighty wind, And those that sit enthroned above.
- Enthroned within his palace sits God Varupa whose law is firm. All-wise for universal sway.
- 11. From there the observant god beholds
 All strange and secret happenings,
 Things that are done or to be done
 - Let him the all-wise Aditya
 Make all our days fair-pathed for us;
 May he prolong our earthly lives.
- Wearing a golden mantle, clothed In shining garh, is Varuna;
 His spies are seated round about.
- 14. He whom deceivers do not dure
 Try to deceive, nor injurers
 To berm, nor th' bostile to dete.

To harm, nor th' hostile to defy.

Quite in the same spirit is I. 24. 6:

Thy realm, O Varuna, thy might, and anger, Even these winged hirds have not attained to, Nor yet the waters that go on for ever, Nor (mountains) that obstruct the wind's wild fury.

Hero Varuna's separateness and cthical transcendence are emphasized. His realin is 'beyond the flight of birds', beyond the utmost surge of the waters and beyond the farthest reach of the wind-breaking mountains. Within the highest heaven he sits enthroned in his thousand gated palace, wielding universal away, surrounded by his spies',

¹The spec (cyclet) of Varan night be interpreted as the rays of the sun, more and sizes, which, of its extra search out and reveal the doings of sme. It is possible, however, to see here the state of the contract of the possible, however, to see here the state of the state of the possible however, to see here the state of the

the all-wise observer of the deeds of men. The "heaven and the heaven of heavens eannot contain" him; but on the contrary, the three heavens and the three earths are deposited in him (VII. 87, 5), and he is all-embracing f (VIII. 41, 8, 7); His omnipresence is such that a man cannot escape from Varuna by fleeing far beyond the sky1 (AV. IV. 16, 4). He knows the flight of birds in the sky, the path of ships in the sea and the course of the wind; and he beholds all the secret things that have been or shall be done. Thus past, present and future, far and near, are all alike to him. As such he cannot be deceived? Whatever thing two sitting down together talk nbeut, Varuna as a third knows (AV. IV. 16, 2). He surveys the truth and falsehood of men (VII. 49, 3). Ne creature can even wink without him' (II. 28, 6), and the winkings of men's eyes are all numbered by Varuna (AV. IV. 16, 2), Varuna's omniscience is distinctive and typical, Agni being compared to him in this respect (X. 11, 1)3.

n) Means of gaining the mercy of Varuna.—Among the means expressed or implied may be mentioned moral seriousness in trying to discover one's 'hidden faults' (VII. 86, 8-4), confession of sin (VII. 86, 6; 88, 6; 88, 3), lenging to be justified in the slight of Varuna (VII. 87, 7; 1.24, 15), prayer for the remission of ponalty (often), purpose after new obedience (VII. 86, 7), oblations and sacrifices (I. 24, 14), and hymns of praise. As examples of praise are the following:—

May this my praise song, Varupa, sovereign ruler, Reach unto thee and make thy heart complaisant. VII 86, 84-b

May we thy heart by means of song For grace, O Varuna, release, As charioteer a tethered steed.

¹ Cf. Ps CXXXIX.

⁴ dujabha, VII 86, 1; I. 25, 14; II 28, 8.

^{*} Macdonell, VM. 26.

^{*}YII. 86, 5; 88, 6; 89, 1, 5; I. 21, 9, 11-15; 25, 1-2; V. 85, 7-8, II 28, 5-7, 9-

Away indeed in search of good My (bymns) propitiatory fly, Ev'n as the birds unto their nests. I. 25, 3-4.

In the prayers for the pardon of sin there is undoubtedly too great an emphasis on the removal of the temporal consequences of sin; and some of the Varupa hymns are rather conventional and possibly late! Such literary monuments, however, as we have of the worship of Varupa represent the fullest consciousness of sin that is found anywhere in the hymns of the Rik; and most of them were probably produced within some special Aryan tribe or prolestly family, such as the Vasisthus?

The Vasistha hymns to Varuna, Mitra-Varuna, Indra-Varuna and the Adityas in Bk. VII (17 in all out of 104 hymns, i.e. one-sixth of Book VII) are the most notable in the Rieveda.

The hymns addressed to Varuna, e. g. VII. 86, are most probably to be regarded themselves as in some sense scarifices; and, as such, means for propitating Varuna. As soon as Vasistha learns the nature of his sin against Varuna, he purposes to appease him by means of adoration. In the later Vedic literature are described many ritualistic devices for accomplishing the same end? But in the Varuna hymns of the Rv. the sacrifices which receive the emphasis are the outpourings in confession and prayer of what seems

¹ Hopkins, P.1 64 65.

¹ We must remember that Bachia is only three or four hundred multer from the Pumph. It is possible that the family of the Vasiybha remained in butch with Bactera, and advanced in spiritual worship part persus with the worship of Varusa or his equivalent in Irlan. Kenth (Index-Irvations in Blanche and Control of the Irvations of the Irvations of the Irvation and In Read cause complete severance." This is probable. If then the suggestion of continued intercourse between the Pumph and Bactera is accepted, we can take the Varusa bymas and the Zerosstrian reformation as parallel chronologically, and place both about 1000 in C, or a luttle settler.

Oldenberg, UN. 218.

^{*} ara-i VII. 56, 4, ef 1. 24, 14.

^{*}Oldenberg, RV. 319-326

almost 'a broken and a contrite heart'. It is because of a change of attitude on the part of the sinner toward his sin that Varuna can show himself just while justifying the sinful'. Because Varuna is gracious and merciful, he dolights to respond to the cry of the penitent. By way of the ritually appointed oblations and sacrifices (I. 24, 14; VII. 86, 2) the sincere penitent doubtless offered the Vedie equivalent of 'a broken spirit'.

It is just because Varuna is ethically so exalted and because there is hardly a hymn of his which does not contain some reference to sin and its remission, that there is such danger of committing the 'psychologist's fallacy', that is, the fallacy of importing modern and especially Christian feelings and conceptions into the hymns,

g) Varuna grants protection and happiness to his worshippers.—Happy are they who experience the mercy of Varuna (VII. 86, 2) and continue in his ordinance (II. 28, 2); for Varuna represented by the sun has a thoushand boons to give (VII. 86, 1). He guards the thoughts of men (VIII. 41, 1), grants protection (II. 28, 3, VII. 88, 6, VIII. 42, 2), removes fear (II. 28, 6, 10), delivers from thief, welf and inauspicious dreams (II. 28, 10) and furnishes the singer with a wealthy patron (II. 28, 11).

/, h) Varuna as Lord of the Ethical Order is a hely God .-

¹ Cr. Rom. III 26.

² The word rarilla 'protection' is derived from rid in the meaning to 'encircle', 'protect' Popular thought may have found a connection between the name Various and the protective supered Various's activity. We are reminded of the Biblical phrase:"

As the mountains are round about Jerusalem.

So Jehovah is round about his people". Ps. CXXV. 2.

³The dimental character of the mention of a "wealthy patron" need not distort us even in a Varona hymn, when we recall that Zarathushtra it one of the genoise Guths reminded Ahara Mada that he had been promised as a reward. "ten mares with a stallion and a exact!", besides "the future gift of wellars and immortality" (Yanna X.I.V. 18). It was felt by these gardent secre that godlines is profitable not only for "the life that is to evome", but also for "the life that now is". Then, too, starts It in II. 28 may be an exiterial addition.

This is his distinctive province. Other gods share with him in his cosmic activities, such as the creation and direction of the world, sending of rain, etc., but outside of his own circle of the Adityas none have to do so fully as Varuna with the moral life and destiny of mankind. In passages, the context of which is ethical, Varuna is referred to as 'the support' of rila', as possessing 'the fountain of rita' (II, 28, 5) and as the one on whom as on a mountain everlasting ordinances are based (IL 28, 8). The concention of ethical order was covered and explicated by the statutes (dharman), decrees (dhaman), and ordinances (vrata) of Varuna. The term wrata, which is so often used in connection with Varuna is to be derived from vri to 'choose', 'will', therefore 'ordinance', 'will'. The word suggests that the laws of morality are to he referred immediately to the holy will' of Varuns. The best Vedic equivalent of the New Testament expression 'the will of God' would accordingly be Varunasya vratam, 'the will of Varuna,' 'The great conception of Rita 'Order' stands in the elosest connection with Varnya, whether in its cosmic or its ethical application. Thus:

> The Aditya distributed the waters. The rivers follow Varuna's holy order: [cosmic] Unwearied do they flow and never tarry, Like birds that speed them quickly on their courses.

¹ dharnasi I 105, 6.

² Meillet (JA. X. (1907) 2, p. 157) proposes to connect Varuna with trata 'ordinance', Avestan ure eta, urvaiti 'contract', ure ata 'order', 'law'. Accordingly Varuos would be originally a personalization of the idea of order, a Sonderpott 'he of order', like Milra 'he of the compact'. But is it not also possible that this derivative conta, from the fertile root erf, may have been through popular ctymologizing brought into connection with Yaruna so 21 to form a kind of etymological support for the thought of the will, ordinances, statutes, decrees of Varuat'. The Arrans of India love to etymologice, and Sanskut lends itself pecubarly well to such treatment

^{*} Θέλημα του Θεού I Them. IV, 3, etc.

As from a bond release me from transgression,
May we swell, Varuna, thy spring of order! (ethical)
May no thread break as I weave my devotion,
Nor mass of work before the time be shattered. II. 28, 4-5.

The prayer 'May we swell, Varuna, thy spring of order' seems to imply co-operation with Varuna through the practice of righteousness and reverent devotion. Varuna's 'ordinances' are fixed and changeless, nevertheless man is free either to obey them or to disobey them. To obey them is life and health; to disoboy them is death.

Rita, then, in its ethical connection meant the moral law. It was an impersonal conception. With the passing of Varnua in the post-Vedic period, the content of rita was taken up into that of dharman 'law' and karman' tretibution'. The conception of rita in the Indo-Iranian and Vedic periods is a striking witness to the belief that the world-order is essentially righteous, and that morality belongs to the inmost nature of things. Being embedded in the will of Varuua Rita was made concrete and personal, As the guardian and cherlsher of moral order Varuua was called ritavan 'holy' and pātadakṣā 'whose will is pure'. Thus on that 'far-off bank and sheal' of time the Vedic Indians were not without the conception of a law of righteousness viewed as the will of a holy God.

6. Vanuna and Cosmic Order.

a) Creator and Sovereign —Varuna's creative activity is expressed in such passages as the following:

Wise are the generations through the greatness Of him who propped the two wide worlds asunder; Pushed back the great and lotty wallt of heaven, The day-stat, too: and spread the earth out broadly. VII. 86, 1. Yarung cutteth for the sun his pathways,

Causeth the river floods to hasten seaward;

³ The expression Kh³ ritasys 'spring of 1112' (H. 28, 5), as Bloomfield points out (BV, 120), is 'sound for sound the same' as the Avestan asahe khāo, Yasna X. 4.

^{21, 24, 9, 11, 15; 25, 1-2, 21; 1}L 28, 5, 7, 9. ef. "The wages of sin is death". from, VI 23.

Digs for the shining days their mighty channels, Guiding them as a racer guides his horses.

Thy breath, the wind, resoundeth through the mid-air, Like a wild beast that smites its prey in pasture; Between these two world-halves, the great, the lofty, Are, Varuya, all thy loved habitations. VII. 87, 1-2.

In baseless space king Varupa, the holy, Sustains erect the summit of a great tree; Its rays, whose root is high above, stream downward; Among us be deposited these gleamings.

King Varuna hath made a spacious pathway, Wherein the sun may travel on his journey; Feet for the footless made wherewith to stay him, And by his ban removes heart-piercing trouble,

The stars that show themselves by night in heaven Placed high above,—where are they gone by daylight? Inviolable are Varuna's regulations,

And through the night the moon wide-gleaming wanders.
I. 24, 7-8, 10.

Rita, as already pointed out, embraces both cosmic and chical order. Varuna's creative power is manifested especially in the great vault of heaven, through which he has made a path for the sun to travel by day, and for the moon and stars by night. As compared with the moon and stars, the sun in the Rv. receives the emphasis, being called the 'day-star' (nakṣatra, VII, 86, 1), the 'tree of the sky' (L. 24, 7), the 'mighty beast' (VII. 87, 6), 'the heavenly measuring line' (V. 85, 5), 'the lofty bull' (VII, 88, 1), 'the golden swing' (VII. 87, 5), 'the eye of Mitra and Varuna' (VI. 51, 1), and 'the bright beautiful face of rita' (VI. 51, 1). The wind is Varuna's breath' and his habitat or domain is the great space between heaven and earth (VII. 87, 2).

¹ Does the description of Varuan as having the wind for his breath, the sun for his pers, and the space between heaven and earth for his home, hear upon his original physical substrate? All that can be said is that it fits in well enough with the assumed derivation from 174 '10 encompans', namely 'encompansing sky'. As a matter of fact Varuan has become no entirely spikitulated in the Rw that nothing can be proved with certainly a regredul his original nature.

Varupa is a divine pathmaker, having dug out channels for the rivers and the days as well as for the sun. The appearance and disappearance of sun, moon and stars and their courses are all subject to the regulations (tratani, I. 21, 10) of Varupa. There seems to be the suggestion in all this that the order which rules in the physical world should also rule in the moral world. Through his creative might the makes men wise.

Like Ahura Mazda, Varuna is represented as the creator of the best things:

The Air hath Varuna placed among the tree-tops, Milk in the cows and strength in the saift horses, Wisdom in hearts and fire within the waters, In heaven the sun and some on the mountain V. 85, 2.

As creator Varua is anternly ruler. The attribute of sovereignty (kṣatra) is very specially his. He is 'the king of all that is' (VII. 87, 6), 'the king of the whole world' (V. 85, 3). The title samrāi' 'nniversal monarch' is so often applied to him that it may be regarded as peculiarly his. Scaraj' 'self-dependent,' i. c. independent ruler (II. 28, 1), is also given to him as a title. Varua's sovereignty ombraces both the physical and the moral spheres. Varua sits enthroned within his heavenly palace, fully equipped for universal sway (camraya I. 25, 10).

The sun as the eye (cakrus) of Varuna and the face, (anika) of rila (VI. 51, 1) may be regarded as a visible symbol' of Varuna. We may compare the following:—

¹ Cr. Ps. XIX, and Job XXXVIII-XIJ.

^{*} V. 85. 1.

⁹ Only a symbol, be it noted. The metaphors of the sun and light are used in connection with Yarus, jost as the same metaphors are used of God in the Bible. For example, God is 'as un and a shield,' and 'the sun of righteousnes,' Ta. 84, 11; Mal. IV. 2. If we had to choose between the sun and the moon as the original physical backs of Yaruss, we should, on the basis of Pigredio evidence, have to choose the sun.

Now that at last I have come near and seen him, The face of Varuna looks like that of Agni; To see his beauty may the master lead me Into the sun in heaven or to the darkness. VII. 88, 2.

Here, too, the sun as the heavenly form of Agni resembles the face of Varuna. But the beauty of Varuna may be seen either by looking at the sun in heaven by day or by night looking at moon or star. The theophany of Varuna is given at both times to the spiritaally illumined.

Again:

Like Dyaus, god Varuna sank into the Sindhu, Like a white drop, or mighty beast, descended; Ruling in depths and measurer of the mid-air, King of this world, whose empire is fair-bounded. VII.87.6.

This verse presupposes some place on the Indus where sky and water meet, and where the light-bearers (sun, moon and stars) as revelations of Varuna seem to sink into the scalike bosom of the great river. Varuna as represented by the sun is compared, when he sinks into the see, with a white drop or hall or with a mighty beast.

- b) Varuna and the Waters. We may cite the following stanzas from V, 85, 3-6:
 - Varupa caused the cloud-cask opening downwards
 To stream forth over heaven and earth and mid-air:
 Therewith the king of all the world doth moisten
 The ground, just as the rain the fields of barley.
 - 4. What time Varuna longeth for the cloud-milk, He moisteneth the ground, yea earth and heaven, The mountains clothe themselves then in the rain-cloud, Their firm foundations the strong heroes loosen.
 - Let me declare this mighty deed of magic Of Varupa the glorious and the godilke, Who standing in the air's mid region meted The earth out with the sun as with a measure.
 - 6. This, too, is the all-wise god's deed of magic, A mighty deed, which none fauth ever challenged, That all the streams that pour themselves out quickly Do never fill the one sea with their waters. V. 85, 36.

He knows the path of birds that wing Through air their flight, knows too the nath A boat takes, ocean-dweller he. I. 25, 8.

The Aditya distributed the waters: The rivers follow Varuna's holy order: Unwearied do they flow and never tarry,

Like birds that speed them quickly on their courses. II. 28, 4.

Varuna, as lord of comnic order, has centrel of the waters. The connection of Varuna with this department of nature is so emphasized as to require special explanation. The great encircling vault of the sky is semetimes 'clethed with light as with a garment', majestic in its repese and calm, the very picture of severeignty and erder. Again it is covered with dark rain cleuds. By day it is traversed by the sun; at night, by moen and stars, and Usas displays her beauty in the morning. It is the same mighty vault by hypothesis the same Varuna as originally cenceived -that undergoes these magic transfermations. It is suggestive that the word mana 'occult power' is specially used, in connection with such changes. In the ten hymns addressed to Varuna mānā occurs only four times (V. 85. 5. 6 and VIII, 41, 3, 8) and then in hymns, which especially emphasize Varuna's connection with water. Through his 'occult power' he measures the earth by the sun as with a measuring line (V. 85, 5), brings it about that the censtantly flowing streams nover fill the ene sea (V. 85, 6), and establishes the dawns (VIII. 41, 3). With his shining foot he scatters magic wiles (māyāh VIII, 41, 8), deubtless the cvil magic of the demens of darkness,

Varuna bears the title samudriya 'eccanic' (I. 25, 8) and is called a 'hidden ocean' (samudrah apicyah VII. 41. 5), both references being primarily to his atmospheric character. The fact that the rain falls frem the sky preves that there is in the sky an invisible ecean, as the source of supply, 'the waters above the firmament'. Varuna 'he ef the all-covering sky' is thus naturally conceived as 'ho of the all-covering rain', the twe appearing

at times as one and the same. A similar development of meaning is seen in Dyāns, Zeus and Jupiter, each originally meaning 'the bright, shining sky', and each coming to have in addition a 'rainy' character', just as in the case of Varupa. Furthermore Varupa by a natural development', very much as in the parallel case of Indra, comes to be the lord of the earthly as well as of the heavenly waters'.

7. VARUNA AND THE ADITYAS.

The Adityas are a group of gods with Varuna the Aditya par excellence at their head. They may be characterized in general as the gods of celestial light's. The group, however, is somewhat indefinite both as to the number of gods it includes and as to their names. In II, 27, 1 six or mentioned, namely Mitro, Aryaman, Bhaga, Varuna, Dakya and Amsa. In IX. 114, 3 the number is given as soven', in X. 72, 8 as eight. In the later Vedic literature twelve is the usual number of the Adityas, to correspond apparently with the number of the Milyas, to correspond

apparently with the humber of the months.

In addition to the names given above there are sometimes mentioned Dhātar, Indra, Vivasant, Mārtāṇḍa, Sūrya and Viṣṇu. There seem to be certain points of contact between the seven Amesha Spentas of Zoronstrianism and the Vedio Ādityas (likewise assumed to be seven). In order, however, to make up the list of seven Ādityas, It is necessary to add one to the umber given in II. 27, 1, Sūrya as Nacdonell thinks, or possibly Parjanya.

1 Cf. Jupiter Pluctus und Zebe Set (Zona raine)

1 "Der Gott, der über den Regen gebittet, wird sieh leicht zu einem Gott alles Wassers und so denn auch des Meeres entwachein "—Oldenberg, ZDMG, L. 59.

³The cocception of Varuas as regent of the waters would find a support in openlar tymology, if Varuas were connected with v₁ the owner. In the sense of the whose covering is rain and der, or with each would as virit 'water' and a rai' 'tirer'. See Hepkins III. 60 n 1, 71. Puchel (VS. II. 124-125) holds that the water character of Varuas is ourgand and fundamental.

^{4 7} M. 44.

¹ Schreder, Alt. I, 408 423.

a) Varuna and Mitra, the Aditya Chiefs .- Of the approximately seven Adityas the most distinct and individualised are Varuna and Mitra. Mitra has not a single quality which is not found in Varuna! What is said of Varuna alone is said equally of Mitra-Varuna. Thus Mitra and Varuna are related to rita (V. 62, 1) and are even identified with rita (V. 68, 1), have the sun for their eye (VII, 63, 1), are kings and imperial rulers (V. 62, 3; 63, 2), wield dominion (kşatra V. 66, 2, 6), are Asuras and possess asura-hood (VII 65, 1, 2), are the guardians of rita (VII. 64, 2) and of the word (V. 62, 9), manifest creative activity by establishing heaven and earth (V. 62, 3) and setting the sun in heaven (V. 63, 7), possess steadfast and inviolable ordinances (V. 69, 1, 4), have spies and watch with unwinking eye the deeds of men (VII, 61, 3), take account of sin ' (VII. 60, 1, 5, 9; 65, 3), manifest anger (VII, 62, 4), are the chastisers of anrita (VII, 60, 5; 61, 5), strengthen and cherish rita (V. 65, 2; 67, 4), are observers of rita, i.c. 'order-loving' (ritavana VII. 62, 3), are purominded (pūladaksasa V. 66, 4), are gracious and merciful (V. 70, 1; VII, 60, 10), are wise (V, 63, 7) and givers of wisdom (VII. 60, 6, 7), are uniters of people (V. 65, 6; 72, 2) and upholders of mankind (V. 67, 2), wield occult power (maya V. 63, 3, 4) and through it effect magic transformations of the sky (V. 63, 4, 6), send forth the rain (V. 63, 1-3, VII. 65, 4), are lords of rivers (sindhupati VII, 64, 2), and together mount their ear in the highest heaven (V. 62, 5, 7-8; 63, 1).

Hymn V. 63 emphasizes the rainy aspect of Mitra-Varuna and its connection with $m\bar{a}y\bar{a}$ 'occult power',

With the exception possibly of patagraffana 'uniting men', which however is really implicit in Varuna, if not actually predicated of him in I. 136, 3.

Mitra-Varuna are bhirdpitär nayttasya arif, t. e. 'barriers, furmitted with many fetters, against falachonat'. See Mandonall, VM. 26. 11 in worthy of note that the group of Vasilita hymna to Mitra-Varuna (VII. 50 00) contains references to sin, whereas the corresponding Arti group (V. 62-72) in devoid of such reference, at least explicit.

containing also allusions to the Maruts or 'storm-winds' and Parjanya the deified 'rain-cloud'. It reminds one of V. 85, a hymn to Varuna already considered t and also of V. 83 a hymn addressed to Parjanya.

To Mitra-Varuna V. 63.

- In highest heaven ye twain united mount your car. Joint guardisns of order, ye whose law is true; What man here, Mitra-Varuna, is blessed of you, To him from out the sky the rain with aweetness streams.
- 2. As joint imperial rulers govern yo the world, O Mitra Varuna, sunlike at the sacrifice; The rain, your boon, we crave, and immortality. The thunderers traverse the heaven and the earth.
 - 3 Joint kings, strong bulls, and lords of heaven and earth are ve-O Mitra-Varupa, present and active everywhere: With gleaming storm-clouds girt yo twaln attend the roar. And through the Asura's * magic power cause heaven to rain.
 - 4. Your magic power, O Mitra-Varuna, in heaven resides; The sun, a gleaming weapon, as a light, doth roam; Him in the sky with cloud and rain ye do obscure; The honied drops, Parianya, then bestir themselves.
 - 5. Their easy-running car the Maruta yoke for pomp. Even as a hero, Mitra-Varuna, in battle strife; The thunderers traverse the gleaming atmosphere; Ye twain all ruling, sprinkle us with milk of beaven.
 - 6 A voice, in truth, refreshing, gleaming, shattering. Parjanya utters now, O Mitra-Varuna; The Maruts clothe themselves with clouds through magic Cause ye the sky to rain, the red, the spotless one.
 - 7. Through law and through the Asura's magic power ye guard The ordinances, Mitra-Varuna, wise gods : Through rita, hely order, rule ye all the world; The sun in heaven ye stationed as a gleaming car.

Professor Leopold von Schreder in a recently published work' seeks to find the seventh Aditya in Parjanya, which

P. 136.

The Amra mentioned here (vv J, 7) is either Dyans or Parjunya. See Macdonell, VM. 24. Griffith on the passage; v. Bradke, Dyins Asura 55, 60 * Arische Religion 1914, pp. 409 423.

he regards as originally an epithet of Dyāus, and a parallel form of Dyāus and Varuṇa in their capacity as heavenly rain-givers. Whether this view be correct or not, the great hymn to Parjanya (V. 83) is worthy of insertion, because of its correspondence with similar utterances addressed to Varuṇa and Mitra-Varuṇa.

V. 83. To Parjanya'

- Salute the mighty one with these thy praise-songs, Parjanya laud, with reverence seek to win him. The bull, the hellowing one, whose gifts enliven, Places his seed in vegetation, germ-like.
- The trees he shatters and he smites the Rakşasas, The whole world is afraid of the great-weaponed one. Even the guiltless man before the strong one flees, What time Parjanya thundering smites the evil-deers.
- Like charioteer with whip his horses urging hard, He maketh manifest his rainy messengers; From far away arise the lon's thunderings, What time Parlanya constitutes the rainy sky.
- The mighty winds break forth, the bightnings flash and fly,
 The growing plants shoot up, the heavens stream with rain;
 For the whole world of being refreshment is produced,
 What time Parjanya quekeneth the earth with seed.
- 5 Under whose law the broad earth bendeth lowly, Under whose law boofed creatures leap and gambol; Under whose law the plant-forms grow diversely, As such, Parjanya, grant us mighty shelter.
- G. Bestow on us, ye Marnts, rain from heaven; Pour forth the genial streams of the strong stallion. Come hither with this thunder, O Parjanya, Shedding the floods as Asura our father.

¹ See Rv. V. 85 and V. 63, pp. 136 and 140.

² If the word Parjanya, in spite of phonetic difficulties, proves finally to be identical with the name of the Lithmannan thunder god Perkinas, then it goes back to the IL. period. Possibly the phonetic difficulties may be removed by assuming with Grasmann and v. Schreeder a derivation from the root pure ¹ to fill, satisfy ¹ c. Parranya, this through the working of popular etymology bring been torsel into Parjanya, the rain-cloud which generates (jan) the plants. See v. Schreeder, AB, 422, n. 2.

- Bellow and thunder thou, the germ deposit: With wagon water-laden fly around us, Draw well thy water-skin unloosened downward, Let heights and valleys all alike be level.
- Draw up the mighty vessel, pour it downward;
 May the streams thus released flow forward rushing,
 Moisten and drench with ghee the earth and heaven;
 May there be found good drinking for the cattle.
- 9 When thou, Parjanys, hellowing, And thundring smitest evil-doers, This whole world, thereupon exults, Yea everything upon the earth.
- Yea everything upon the earth.

 1. Bain thou hast shed, pray grant us its cessation;
 Thou hast made passable the wildernesses,
 Plant-life thou hast begotten for man's sustenance,
 And from thy creatures hast received a praise-song

This hymn reminds us vividly of Psalms 29 and 65, the thunder and rain Psalms of the Old Testament. As there, so here, as well as in V. 85 and 63, we have the revelation of delty in storm and rain. The imagery is theriomorphic, Parjanya is the bellowing bull of the sky!. Through the rain represented as his seed he quickens the earth and generates the plants providing food and drink for man and beast. The 'will' (trata) of Parjanya governs all things within the sphere of his activity (v. 5). There is a distinct ethical element. With his weapon the lightning, Parjanya smites the demons and the evil-doers (vv. 2, 9), and causes the whole world to rejoice at the vindication of righteousness. So terrible is he that even the guiltless man flees before him. In v. 6 Parianya receives the remarkable enithets 'asura' and 'father' -- the Asura who is at the same time 'our father' - epithets which elsewhere are almost entirely confined to Dyaus and Varuna. As regards ethical quality there is nothing in this hymn which might not have been addressed to Varuun'.

Sa Dykes V. 58, 6

Father Asura in X. 124, 3 is probably Varona. Qt v. Schreeder AR 319, n 1 and 416; but see also Oldenberg. Bayesta Notes, 342,343.

^{*} Hopkins T.1 102 101

b) Common Characteristics of the Aditya-group .--Varuna stands out clear and distinct with sharply defined characteristics. Mitra his companion and double is in most matters simply the roplica of Varuna. What is true of Mitra is true of all the other Adityas in their relation to Varuna their head. They have little or no individuality or real personality. They indeed form a system with Varuna, revolving about him, as it were, like planets about a central sun. But in relation to Varuna they are little more than expressions of his divine nature, personified aspects of the same, -in short, little more than names of the great god. Thus Mitra and Arysman explicate the social naturo and laws of Varuna. Mitra, 'he of the compact', signifies that Varuna is a covenant-keeping god and demands that men should be like him in this respect. Aryaman 'the loval', 'the true' with special reference to the marriage contract means that Varuna desires truth and loyalty in the marriage relation. Bhaga, 'ho of bounty', and Amsa 'ho of the due share' emphasize the bountiful and gracious character of Varuna who 'gives to all men liberally', and to every man his due. Daksa 'he of strength, cleverness, insight, will' emphasizes the creative purpose, power and skill of Varuna. In a word, if the Adityas are 'in the aggregate sense gods of celestial light', they are also, 'in the aggregate sense', gods of truth and righteousness, the creators and directors of an eternal and inviclable world-order, both physical and moral. Being observers of order' ritavanah, i. c. 'holy' themselves, they are able to say with one voice: "Be ye holy, for I am holy". With some slight abatement' the saying of Macdonell is true that "there is no hymn to Varuna (and the Adityas) in which the prayer for forgiveness of guilt does not occur, as in the hymns to other deities the prover

Macdonell, VM. 44. of. I John I. 5.

³ I Peter, I. 16.

² See p. 139. n. 2. The Varuna bymn Rv. VIII. 41 has also no explicit ethical reference.

As an abstraction from the Adityas, Adlti is not only ethical, but also luminous. She is asked for light (IV, 25, 3). hor imperishable light is celebrated (VII, 82, 10), and Dawn is called 'the face of Adltl' (I. 113, 19). This is the aspect of Aditi which Hillebrandt makes central - Aditi as the light of day in its boundlessness and Imporishability " In X. 63, 2 occurs the expression dyaur aditi 'Aditl the sky' or 'boundless sky'. On the basis of this and similar expressions Max Müller' thought of Aditi as the unlimited expanse of space visible to the ove, and Roth' as the boundlessness of the sky as opposed to the finite earth. In L 72, 9 Aditi seems to be identified with the earth . This is the view of Pischel's following the Naighantuka. The earth for Pischel is 'the inexhaustibly creative and generous one'. In a late passage (I. 89, 10) Adlti stands for universal nature in a Pantheistic sonse. These various cosmological and mystical extensions of the meaning of Aditi are made possible by applying the idea of 'boundlessness', 'lack of llmitation' to different aspects of nature, such as heaven, earth and the totality of existence. Such speculations based upon the etymology of Adlti are culto after the mannor of Indian thought, and are a Rigyedic anticipation of the methods of the Brahmanas.

d) Adityas and Amerka Spentas. — Reference has already been mado? to the similarity which holds between these two groups of gods. The points of resemblance have been impressively drawn by Oldenberg. Altura Mazda.

^{*} RV. 29-30, and ZDMG 50 (1896), 43 68.

stands at the head of the (seven)1 Amesha Spentas, as Varuna at the bend of the (seven) Adityas. As Mazda is an Ahura, so Varuna is an Asura. Ahura Mazda is tho lord of right (asha) and Varuna of order (rita), both bearing the same epithet, ashavan ritavan 'righteous', 'holy'. In the Avesta Ahura and Mithra appear clearly conjoined', just as Mitra and Varana in the Rv. In the Avesta the sun is 'the oye of Ahura Mazda' (Yasna I. 11); in the Veda, 'the eye of Mitra and Varuna' (VI, 51, 1, etc.). As Ahura is related to Spenta Mainvu 'Holy Spirit' so Varuna is related to Aditi, the holy mother whose nature is freedom and guiltlessness. The Amesha Spentas "aro parts of the divine hypostasis, sharing with Mazds the name Ahura 'Lord' The Aharas are not really soparate from Mazda or subordinate to him; they seem to he essentially part of his own being, attributes of the Divine endowed with a vague measure of separato existence for the purpose of bringing out the truth for which they severally stand." The same view is to be taken of the Adityas in their relation to Varuna. "Alongside of Varuna the uniquely great Aditya, the other Adityas appear as little more than expressions of his divine nature, personified aspects of the same-yes, hardly more than names of the one great God"4. Thus the Adityas represent the 'holy of holies' of Vedic religion, even as the Amesha Spentas, 'Immortal Holy Ones', hold the same place in Avestan religion.

How are the similarities which hold between Adityas and Amesha Spentas to be explained? Two such similar

¹ Neither the Ādityas nor the Amesha Spentas appear as a definitely closed group. The number serves is in each case comparalized hate. What determined the selection of conditates for the place of theorem exist to Ahrar Marda and Varuas respectively was not the demands of a fixed number, but rather ethical and sperious onegarity.

v. Schroder, AR. 355.

lines of development almost certainly presuppose, as already stated', a common starting point in the undivided Indo-Iranian period. The Zoroastrian reform obscured many resemblances which must have existed by leaving not one name in common in the two lists. The seventh book of the Rv, is specially connected with the worship of Varuna, and it is possible that the priestly family of the Vasistlias, the authors of the seventh book, maintained some connection with the mother country Bactria' before and during the progress of the Zoroastrian reform. As the pure doctrino of Yahweh was mediated through a small group of Hebrew prophets, so may it bave been with the high dectrine of Varuna and the Adityas. The real ethical and spiritual carnestness connected with the worship of Varuna, the 'hely' god, was probably displayed only in a limited quarter and among a select few. It may be that these 'sclect few' continued in contact with their 'separated brethren' across the mountains, beth giving and receiving spiritual inspiration. It is even possible that some of the stimulus toward the Zoreastrian reform came from Indla, or vice versa. V e) Semitic Influence possibly to be recognized in the

Ve) Semitic Influence possibly to be recognized in the Adityas and Amesha Spentas. This bypethesis was brought formard by Oldenberg' to account for three things; (1) the sevenfold number of the Adityas and Amesha Spentas, (2) the implications involved in the close association of Mitra (assumed to be a sun-god) with Varuya (hence taken to be a moon-god) and with five other Adityas (hence taken to be the five planets), and (3) especially the appearance of such exalted ethical deities as Ahura Mazda and Varuna in the Aryan world. To account for these things Oldenberg assumed that there was a borrowing of seven planetary gods from the Semitic (or Accado-Sumerian) world, and that of these the moon-god

p. 25

^{*} From Peshawar to Balkh it is less than 400 miles as the crow files.

RV. 185-195; ZDMG. 50 (1896), 43-68

(Varuna) was the bearer of the noble ethical qualities of the later Ahura Marda and Varuna, since there was a serifier ethical dovelopment in the Semitic than in the Indo-European world. It may be admitted at once that the discovery of the names of Mitra and Varuna on the Boghaz-kö tablets counts to some extent in favour of Oldenberg's view. So also does the highly probable Semitic origin of the later Avestan goddess Ardvi Sūra Anahita'. Babylon too was prohably responsible for fixing the Anishaspands as seven—a secondary trait—in the time of the later Avesta; and Babylon, the teacher of astrondmy to the nations, knew of the seven heavenly bodies, sun, moon, and five planets, possibly the origin of the sacred number seven.

It is true also that the Babylonian moon-god Nannar-Sin is described in language which rominds us strongly of the Varuna hymns'. He is a 'merciful one'whose 'strong command produces right and proclaims justice to a 'king of kings', whose 'sovereignty is in mankind' heaven and on earth's. It must be admitted, too, that in the development of any god it is not the original physical substratum (whether moon or what not) that is of importance, but rather the degree in which the god represents the highest ethical ideals and brings under his outhority all departments of nature and of life. But all due admissions having been made, what is the rosult? The sevenfold number of the Adityas and Amesha Spentas is apparently not primary, as is required by Oldenberg's hypothesis, but secondary and late. So is the sun-nature of Mitra, which therefore cannot serve to prove that Varuna was originally the moon. The only question that remains is this: May there not have been an influence, if .

Jastrow, RBA 301 ST

not direct, at least indirect, subtle, and almost telepathic', over the religious thinking of the undivided Indo-Iranian people in Bactria on the part of the culturally and religiously more developed Babylonians? The Indo-Iranians themselves had something on which to build, the lofty conception of Dyāus as Father and Lord, which had come down to them from the time of the undivided IE. period, and the great ethical conception of Asharita 'order, rightecusness, truth'. It may be that these ideas were fructified' and helped to come more speedily and fully to fruition through the influence of Babylonia'. The hypothesis of Professor Oldenberg has rendered a service in emphasizing the unique significance of Varuna and the Adityas in the religion of the Rigveda.

¹ Compare Renan Vie de Jesus, Fng. trans by C. E. Wilbour, N. Y. 1868, p. 05: "The delicate and staticogant Virgil seems to respond, as by a secret echo, to the second Ladab".

² "The admirable conception of the 1sta is probably superior to all that is found in Babylosian religion and philosophy, and gaves proof of on exalided mentality emong the Indo-Iranians. This does not, however, prelified the featurable of August thought on this point by the contact with their neighbours of a ray sarly priod." Carmy (Vo. nn JAOS 36, p. 308.

³ The Influence postuated is of the while, telepaths not that make the period 000-400 n.c. so notable in the religions and ethical history of the world. For example, it was the period of Jeremush, Eveluel and Scoond Isakin 000-500, Confusior 551-478, Buthliha 560-477, Socrates 460-399 possibly too of Zoroaster 660-583 n.c.

Even direct intercourse between Bohylonia and Buetria during the period of the Indo-Iranian unity (n c. 2000 1100 care) must be admitted as possible. Buring all that period Bahylonia was m close touch with Egypt. If as the erew files, it is about 800 miles from the Emphrates to the Nice, it is only about 1200 Miles from the Emphrates to the Oras. This bewas upon the possibility of a Bohylonian origin for the sovred number severa in both Yella and Avesta. Kelib (Numbers, Argan, EEE; IX) on the brais of all the evidence declaves that 'three and nine are Aryan numbers', the implication being that seven is possibly Semilic, since it is prominent in Babylonian and Helewin. Among all the IE. branches, seven as a sacred number is opparently found, apart from Christian influence, only in Iranian and Indian, A.c. in the Avests and Veld. Buctia was near cought to Babylonia and the Indo-Irinian period was evily ecough for such a loan of the number seven to be made in councerion doubtlew with trade. This view become cover more plauville, if we hold that the route by which the Aryan class travelled external to Herstin and India's a sevens the more Emphrates and Tircis

CHAPTER VI.

١

AGNI THE PRIESTLY GOD.

1. Introductory. - The Rigveda recognises a threefold division of the universe into heaven, mid-air and earth, in connection with each of which a form of fire is found. The altar-fire on earth, the lightning in mid-air, and the sun in heaven, are the same in nature, but differ in location. function and attendant circumstances. This is the earliest Indian triad, the centre of much mystical speculation. Thus Agni is threefold (I. 95, 3; IV. 1, 7) for thus the devas made him to be (X, 88, 10), has three heads (I, 146, 1), three stations, tongues, bodies (III, 20, 2), three dwellings (VIII, 39, 8) and three kindlings (III, 2, 9)'. On the basis of the threefold elassification in I. 139, 11 of the 33 gods into eleven each for sky, earth and aerial waters, together with the three forms of Agni as mentioned above, there existed a very early view quoted by Yaska, according to which the three groups of cleven deities reduce respectively to Anni on earth, Vanu or Indra in alr and Surva in heaven. A possible proof-text for the identification of the intermediate form of Agni with lightning is found in I. 164, 1. according to which the heavenly Agni (= the sun) has twobrothers, of whom 'the middlemost is lightning' (asna) and

> Threefold are these, the highest, true, and lovely, The hirths of this god Agui. Close enveloped Within the infinite has be come hither,

The shining, gleaming and resplendent Aryan 1V. 1, 7.

An the three stations and dwellings of Agai are probably earth, and hit and sky, so his three brails, kindlings and songous probably represent his three forms, altar fire, leabiling and son. This trial of Vebu Again doublies have at the basis of the three later citualistic fires, purhapsing. Abstances and dataseages. But there of such texts at II 30, 4 '84' down in the three youls,' and V. 11, 2 'Men have kindled Agul in his threefold scat', fit is possible that the three vitualistic fires may be Riverside.

the other is 'butter-backed' (the altar-fire)! But in VIII. 18, 9 the three are represented as Agni, Surya.and Vata 'wind', the same being also implied in I. 164, 44. The ambiguity in the Rigvedic texts between the meanings 'lightning' and 'wind, explains the view referred to by Yaska that the regent of the air is 'Yayu or Indra'.

Agni is celebrated in about 200 hymns, being next to Indra the most prominent of the Vedic gods. The Agnihymns stand at the beginning of each of the 'family-beeks' (II-VII) and every one of the ten books of the Ry, except twe, begins with a hymn to Agni. The cult of fire has been maintained in India down to the present time - 3000 years at least. Since the name of the ged is also the name of the thing, Agni 'fire' is a thoroughly transparent Sondergott - 'he of the firo'. Henco in contrast with Varuna and Indra Agni's personification is very rudimentary, the process boing constantly arrested by the fact that his naturo an fire is so obvious. Thus Agni is called buttarbacked, butter-faced, butter-haired, etc., with reference to the oblations of ghee which he receives, and flame-haired, burning-jawed, thousand-oyed, thousand-herned, etc., with reference to his flames 2. For further illustrations of this compare the following:

- Scizing his own food for himself, th' unaging one, Agni stands greedy mid the brushwood, full of thirst; When ghee-besprinkled shines his back like racer swift, Like heaven's exalted ridge he thundering doth roar.
- Wind-driven, with the sickle, Agni ladle-fed Spreads lightly through the brushwood with his mighty roar; When, bull-like, thirstily thou rushest on the sticks, Black is thy course, unaging god with fiery waves.

³ So Ladwig and Macdonell. Hillebrandt (VM. 2. 128) and Geldner (Glosary take aims in the sense of 'enter' or 'hungty'. Since it is clear that Vayu 'wind' is one of the three in I. 164, 44, it is reasonable to book for Vayu or Vata in I. 164, 1. cf. X. 158, 1.

¹ I. 58, 5; 79, 12; III. 1, 18; V 4, 3; VIII. 49, 2. See Macdonell VM, 88-89.

then fire may also be regarded as the cause of food, wealth and prosperity, as it actually is regarded in the stanzas quoted above.

The two most primitive aspects of Agnl are undoubtedly his 'domestic' (damunas) character as 'house-lord' (grihapati), and his function as a dispeller of darkness, evil spirits and hostile magic. The Rv. offers abundant illustrations of both points:

a) Agni's domestic character as his first primitive trait:

Who o'er the Five Tribes bearing sway Hast set him down in every home,

Sage, youthful, master of the house. VII. 15, 2.

Doing his work he dwells in earthly houses, Though god he wins the fellowship of mortals. IV. 1, 9. As god domestic thou hast settled mortals. III, 1, 7,

Thus, as Macdonell says, Agni's "association with the dwellings of men is peculiarly intimate"1. It is from this point of view that Agni is called by such names as kinsman, friend, father, brother, son and mother. For example:

Agni be easy of necess: Stay with us for prosperity. I. 1. 9. Thee, Agni, men do make their father through the rites,

A brother through sacrifice, O thou of shining form; Thou dost become a son to him who worships thee,

As a kind friend thou dost protect from all attack. II, 1, 9,

These stanzas were written from the point of view of the developed sacrificial system, but they doubtless presuppose a more primitive condition. As Macdonell says, "such terms seem to point to an older order of things, when Agni was less sacrificial and, as the centre of domestic life, produced an intimate relation such as is not easily found in the worsbip of other gods". This characteristic of Agni naturally connects him more closely than any other god with the past. In him is perpetuated.

As is a father to a son.

¹ VM. 95

⁹ VM. 96; ef. Oldenberg, RV. 132.

as it were, the usage of the fathers. Thus there is mentioned an Agni of Bharata, Devavata, Trasadasyu, Divodasa and Vadhryasva. Agni is called an Angiras (L. 1, 6), and he is besought to respond to his worshippers as he did to Manus, Yayati and Angiras in the days of old (I. 31, 17).

(b) The second primitive trait of Agni is his character as a dispeller of darkness, night-fees, hostile magic, demons and illness.

First, then, Agni's function in dispelling darkness:

Over against the Dawns resplendent Agni. Has been awkened, priest and guide of sages; Of ample splendour, by the pious kindled, The carrier-god throws back the gates of darkness. III. 5, 1. Shepherd of clans is he; by his night-shining rays All the two-footed and four-footed creatures walk; The great bright splendour of the dawn art thou.

In thine own friendship, Agui, may we live unharmed. I, 94, 5.
O Agal god, whose wealth is light,
Beaming with radiance like the sun
Boldly thou dost the darkness stay
VIII. 43, 32.

Swallowed by darkness was the world and hidden;
At Agnl's birth the light became apparent. X. 88, 2.

Secondly, Agni repels enemies. The dispelling of darkness is closely connected with the discomfiture of enemies, for undoubtedly the Vedic Aryans experienced night-attacks from their foes. The opportune rising of the sun would often mean the flight of the enemy.

Through fear of thee the clans of dusky colour Have fled at random leaving their possessions; When thou, fierce glowing Agni, stronghold-plercing, Hast shone, Yaisvanara, on behalf of Püru. VII. 5, 3.

Thirdly, Agni wards off hostile magic. Anthropological researches have abundantly shown the large place that magic holds in the life of primitive man.

¹ Macdonell, VM. 96; Hillebrundt, VM. H 57.

^{*} Rr. H. 7, 1; HI. 23, 3; VIII. 19, 32; 92, 2; X. 60, 1.

156

Should any one bring on us sin, transgression ',
On him of evil spells inflict the evil;
Destroy, O knowing one, such imprecation,
O Agni, of the man that harms by falsthood.
V. 3, 7.

Ghec-offered and resplendent one,
Burn thou against the mischievous,
Yea, Agni, 'gainst the sorcerers. I. 12, 5.

Yea, Agni, 'gainst the sorecrers. 1. 12, a.

May our curse overcome the evil-minded ones.

With thy dread weapons beat away all those who curse,

Devourers, evil-minded, be they far or near. I. 94,85,9ab.

These passages indicate a strong belief in the potency

Areas passages indicate a strong better in the potential of the magic spell. A conflict between two hostile tribes was often a conflict between sorcerers using magic.' From the point of view of the Vodic hymns the magic of their enemies was the magic of 'evil-minded sorcerers', and so belonged to the works of darkness.

Fourthly, Agni destroys the demons or puts them to flight. The belief in demons and goblins of the night is an article of the primitive faith of mankind—a belief vastly antedating the composition of the Vedic hymns. The distinction between sorcerer and demon is not always clear.

> Agni expels the Ral₂sass, God of clear radiance, deathless one, Bright, cleansing, worthy to be praised. Agni protect us from distress, With hottest flames, unaging god, Burn thou against our enemics. VII. 15, 10, 13,

The raksas-slaying racer I besprinkle, Mitra approach for most capacious shelter; Kindled and sharpened by the potent offrings May Agni guard us day and night from mischief. Kindled, with flame attack the Yatudhanas.

O Jatavedas, armed with metal grinders;

⁴ Just as in the O T. Balak hired Balaam to curse the children of Isrsel, Numbers XXII-XXIV.

With fiery tongue assault the Muradevas, Rend, place within thy mouth the raw-flesh eaters.

Annihilate with heat the Yatudhanas, With fiery force annihilate the Raksas: Annihilate with flame the Maradevas, Burning against the life-destroying monsters 1, X.87, 1, 2, 14,

... The modern man has no difficulty in understanding the primitive man's tendency to associate demons and ghosts with darkness. With the breaking of the day how quickly the mind-created goblins of the night take them-

selves off

Fifthly, Agai banishes illness, or perhaps more strictly illness-demons, for this is the primitive point of vlew. As Macdonell' says, "ovils closely connected with human life, such as disease proceed from lesser demons". The hyglenic value of fire, warrath and light must have impressed primitive man.

To the sage Agni render praise, IIIm of true rules in sacrifice, God, banisher of illnesses I. 12, 7.

The last line might just as well be translated: 'God, banisher of illness-fiends'.

Thus far we have considered the aspects of fire which would naturally impress primitive man—the function of the lire on the hearth as the centre of domestic life, its function as a dispeller of darkness, demons and hostile magie, and its function as a cosmic force vitally connected with the growth of animal and vegetable life, and so the cause of food, wealth and prosperity. These aspects of fire are all most primitive, although they are often found side by side with more modern conceptions.

3. The Sagnificial Agai. - The discovery of fire as a means of preparing food was one of the most epoch-

According to Oldenberg (RV. 336 340) a dustinction must be drawn between the sacrificial fire and the magic fire. The fire which is beyought to expet or destroy demons belongs to the latter eategory.

^{*} VM. 18.

making experiences of mankind. It probably came about accidentally through forest-fires caused by lightning. We may assume that wild animals would be killed by the fire and roasted. Primitive man always hungry would thus get his first taste of roasted flesh, and at the same time it would be easy for him to snatch a fagot from the burning forest, and keep it alive. In some such way as this tho great discovery was made. Cooked food was seen to be more palatable than uncooked food. And so food prepared by fire would be set before a guest, in order to do him honour. After the same analogy the gods being conceived anthropomorphically as the divine guests of men would be entertained and fed with fire-prepared food. Such is undoubtedly the psychological origin of the chief sacrificial use of fire, stated very roughly.

A distinction must be drawn between fire-offerings and fireless offerings. Fire offerings are those which, whether prepared by fire or not, are consumed in fire and go up in flame and smoke to the gods. Fireless offerings, on the other hand, are those that, whether consisting of cooked or uncooked food, are not consumed in fire, but are laid out for the gods to eat. Of the two types of offerings the fireless variety would seem to be the more primitive. The well-known passage in Herodotus (I. 182) describes a Persian sacrifice of the fireless sort, according to which the dismembered parts of the animal victim, after being secthed, are laid out on a carpet of the tenderest herbago.'

This carpet of grass corresponds to the Yedic barbis, the

(cf. Lev VII 15), are consumed.

¹ See Charles Lamb's Desertation upon Rocal Pig in the "Essays of Elia" ² Olderberg (RY, 347) refers to two early uses of fire, which may stand in close connection with the sacrafical fire, namely the fire that scarrs away demons, and the fire in which the remnasts of the sacrifice at yookidy dangerous to men

Moniton, EZ., 394; Oldenberg, RV. 341.347; Schrader, FRE. II. 41-42.
 The tender grass mentioned by Herodotus reminds us of the description of

barkis as soft as wool, Brusanradik, Ry. V. 5, 4. cf. Avestan barezisk, 'mat', 'bolster'. Note that the Barkis is so closely connected with the gods at their

sacred 'strow' or 'litter' on which the gods are invited to sit and partake of the sacrificial food. Herodotus tells us that the old Persians had no fire-altar in connection with 'the carpet of horbage'. In the Rv., however, the juxtaposition of barkis 'litter' and redi 'altar', would seem to be an indication at once of the primitive method of fireless sacrifice and of the later innovation of the fire-altar'. Both the old and the new, as so often seen in Indian practice, are thus brought together, the barkis which requires the gods to come to earth for their feast, and the redi which carries in flame and smoke the sacrifice to heaven. As Illustrating the two pelats of view there may be quoted the two following stanzas of I. 1:—

Agni is worthy to be praised

By former Rishis and by new;

May be the devas hither bring. 1, 1, 2

That is, to sit on the barhis and partake of the feed (originally laid out on it). And for the second point of view:

Agni, the rite and sacrifice
Which thou enetrelest on att sides,
That to the devas truly goes. I. 1, 4.

That is, the sacrifice, when encircled by fire and so consumed, goes to the gods in heaven.

Under the head of Fire as a sacrificial element we may roughly classify the Vedic material as follows: -

a) Agni dwells in the redi or fire-plt, where he (or lt) is kindled at dawn (the morning sacrifice).

To th' altar-scated fair-established, brittlant (god), To Agni proffer drink-tike the encircling ghee. It 140, 1.

earthly feasts and with Agni in connection with the altar fire that it receives anotheneds and in the $\Delta r r$ hymns is adored as a form of $\Delta r ml$. According to Taitt. Samb., VI. 3, 8, 3, so holy is the barhis that the offering is not lost, i.e defiled by falling upon it.

Oldenberg, IIV. 313.

Over against the Dawns resplendent Agni Has been awakened, priest and guide of sages, Of ample splendour, by the pious kindled. III. 5, 1.

Agni arrayed in many-coloured garments
Is seated in the navel of the broad earth,
Born ruddy in the place of sacrifices. X. 1, 6

As such. O Agni, he to us the nearest,

For help the closest, while this dawn is breaking. IV. 1, 5.

Agni's abode being in the form of a round fire-pit is called 'the navel of the earth'. The round altar of earth corresponds to the round sun in the sky '.

Navel of earth and head of heaven is Agni. I. 59, 2.

b) Agai is strengthened with fuel, ghee and some for his various tasks.

The lefty one has by receiving fuel

Propped up the sky, the highest light becoming. III. 5, 10.

Men with oblations magnify thee ever,

Agni the agile one, to act as envoy. VIL 11, 2.

O Agni, magnified with ghee,

On lightest car bring near the gods;

Thou art a hotar Manus-made. I. 13, 4.

This is thy goodness that when kindled in thy house,

And some-fed, thou dost awake, most merciful.

Treasure and wealth thou givest to thy worshipper;

In thine own friendship, Agal, may we live unharmed. 1,94,14.

Thus by means of fuel, ghee, etc. Agni is made to blaze up fiercely, and so is enabled to do his work.

c) Agni as the sacrificial fire is the mediator and messenger between gods men.

Through thee who art their mouth the guileless deathless

All eat the offring which is sacrificed to them II. 1, 14. However constantly to all The gods we offer, yet in thee

Alone the sacrifice is made. I. 26, 6.

³ G. Rillebrandt, V3f R 135. The arrangement of the place of sacrifice is a copy of the heavenly world.

a gira 'agile' from of to drive (Lal. ago, Gr Žiju) a possible etymology of agni as the 'agile' or 'nimble' element

To kindle thee may we be able; speed our prayers; In thee the gods do eat the offered sacrifice. I. 91, 3. Agni, the other fires are thine own branches. In thee the immertals find exhibitation. I. 59, 1, Spiendour of sacrifice, great art thou; never Without thee are the gods exhilarated. With all the deathless ones come on thy chariot, Sit down here, Agni, as the first of hotars. VII, 11, 1. The strength-begotten deathless hotar downward smites! What time Vivasyant's messenger he has become: By straightest paths the atmosphere he has traversed, Invites the gods in heaven by sacrificial food. 1, 58, 1, To cat th' oblation, bring the devas, Agni: With Indra leading let them here be joyful. In heaven among the gods place this our off'ring: Yo gods, protect us evermore with blessings. VII. 11. 5. O Agni, mayest thou announce Among the gods this newest song Of ours, a potent auvatra. I. 27, 4. As god domestic thou hast settled mortals: As charloteer, the gods directly seekest. III. 1, 17. Delight the yearning gods and bring them, youngest, Knowing right times, O lord of times and seasons. X. 2, 1, Awaken thou fhe yearning ones, What time as envoy thou dost go: Sit with the devas on the straw. I. 12, 4. By Agni Agni kindled is,

The sage, house-master, youthful god, Oblation-hearing, spoon-mouthed one. I. 12, 6. Agni doth send the sacrifice to heaven. X. 80, 4.

Hotar is he; he knows the work Of messenger; goes to and fro

'Twixt heaven and earth, knows heaven's ascent. IV. 8, 4.

Bring forth a praise-song for the mighty Agni, For him, the manager of earth and heaven.

Navel of earth and head of heaven is Agni,

He has become the steward of the two worlds. I 59, 2. Thee, Agni god, the gods have ever set to work

Unanimously as their representative. IV. 1, 1.

VII. 5. 1

Or perhaps better 'nerec thres', after Oblenberg's conjectural emendation See SBE, XLVI, 46

Under this head an unusually large number of texts are cited, since the doctrine of Agni as sacrificial mediator is the central doctrine of the sacrificial fire. In and through Agni men offer sacrifice to the gods (I. 26, 6) and in and through Agni (IL 1, 14; L 94, 3) the gods eat the sacrifice and are exhifarated (VII. 11, 1, 5). Thus Agni is the mouth of the gods (II. 1, 14). Ghee as a drink of the gods is poured into the fire with a spoon and so Agni is called spoon-mouthed'. Then he mounts up toward heaven. hearing in flame and smoke the oblation to the gods (L 12, 6; VII, 11, 5; VIII, 80, 4); and the flames of Agni crackle and roar, calling out to the gods, as it were, to come to the sacrifice (I, 58, 1; VIL 11, 1, 5). Agni as the roaring fire awakens the gods (I. 12, 4), and perhaps from this point of view he is called a hotar (VII, 11, 1, etc.) or invoking' priest. Agai announces among the gods not only sacrifices, but also hymns (L 27, 4). Agni has a golden chariot' with which he traverses the mid-air by straightest paths (L 58, 1), seeks the gods directly (III, 1, 17), and hrings them on lightest car to the sacrifice (L 13, 4). The twofold direction of Agal's car, heavenward and earthward. may have been suggested by the upward movement of the altar-flame and the downward movement of the lightning, when it falls to the earth. Agni rising in flame from the altar heavenward and falling in the form of lightning from heaven earthward is the mediator between the two worlds. On carth Agni is the sacrificial fire on the altar, the 'navel' or centre of earth; in heaven he is the sun as well as lightning. Thus Agni as the sacrificial representative of the gods belongs to both worlds, and as messenger

Jubrāsya, J. 12, 6, 'whose mouth is a spoon', or more probably 'having a speem in his mouth'.

³ Hu 'to call', as well as he 'le sacrifice'.

² IV. 1, 8 doubtless referring to the raddy flame as it mounts heavenward.

⁴ Arati IV. 1, 1; VII. 5, 1.

moves fracly to and fro between them. His connection with the two worlds is thus emphasized'.

4. Agni's HEAVENLY ORIGIN.-According to the Rv. both Agni and Soma, the sacrificial fire end the sacrificial drink, eame down from heaven. Mātariśvan brought Agni from afar (III. 9, 5; VI. 8, 4). We have hara in general the Vedic equivalent of the Greek myth of Prometheus. There is soma difference of opinion as to whether Matarisvan in the Rv. means lightning or wind. Wind is the usual meaning from the Atharvayeda onward. If, howaver, we recall that lightning and wind usually go together in a thunder-storm, there will be no difficulty in making Matarisvan' to mean in the Rv. lightning accompanied by wind. The isolated texts in which Materisvan is mentioned indicata sufficiently his fiery quality, but do not overlook altogather his windy natura*. We may ragard Matarisvan. then, as the lightning form of Agni with a windy character. We know that lightning is attended by wind, is to some extent guidad by draughts of wind, and at any rata tha swiftness of lightning is like that of the wind. Tha lightning elament, which was primary at the beginning, finally dropped out leaving in the later Matarisvan only a windy character, just as in the parallel case of Varuna nothing was left finally but the headship of pools. For the Vedic Arvan the lightning and wind of the thunder-storm were an indissoluble unity. The lightoing was windy and the wind was bright and gleaming 1. The original meaning of

¹ Rv. II. 6, 7; III 1, 3; 3, 2, IV. 2, 3, etc.

Macdonell, VM 72.

³ Hillebrandt, VM. II 149 154

⁴ Lit.—'growing in his mother' the rain-cloud (Macdonell, VM, 72), hence probably a mythological synonym of Apān Napāt 'Son of the (heavenly) waters'.
⁵ Only 27 in all.

[&]quot;Thus when tashioned in his mother, he became 'the swift flight of wind', III. 29, 11; and Agoi as a raging serpent in the air (lightning) is compared with the rushing wind I 79, 1.

⁷ In V. 87, 6 the Maruis are compared with fires

the myth clearly is that fire was brought to earth by means of lightning (and wind). Agai, then, though as the deitied altar-fire a god of earth, yet in origin is a deva 'a bright beavenly one', brought 'from afar'. The bringing down of Agai and Soma from heaven are the earliest instances of 'descents' in the history of Indian religion'. Agai's title as 'guest' may refer to the same circle of ideas.

Agai as the operat High Priest. — Since the sacrificial fire was the centre of the Vedic ritual, it was natural to ascribe to Agai priestly functions.

a) Agai is the divino counterpart of the earthly priesthood.

Thine, Agni, is the Hotar's, thine the Potar's task, Thine, too, the Nestar's; thou art Agnidh for the good; Thine the Prasastar's office, thine Adhvaryu's too,

The Brahman-priest art thou, House-master in our house.

II. 1, 2

Agai I praise, domestic priest,

God, minister of sacrifice,
The Hotar, giver best of gifts. I. 1, 1.
Th' Adhvaryu art thou and the ancient Hotar priest,
Praisitar, Potar and by birth Parobita;
Knowing all priestly duties, thou dost give success.

In thine own friendship, Agni, may we live unharmed 1.94,6

There was division of labour among the Yedie priests, their tasks being distributed among seven or eight different persons, not to mention the Purchita or 'domestic priest'. Agai knows and performs, the functions of each priest. Thus Agai's priesthood is essential and architypal. Over against the many priesthoods of men there is the one divine priesthood of Fire, for through Agai alone men worship the gods. Thus Agai as the scarificial element of fire was the great high priest of the Yedie period. This fact may

[&]quot;This interpretation fits in well with the early view quoted by Viska that the god of the middle region is Viyu or Indra, i e. wind or lightning

They introduce the idea of 'descents', such as are found in the acaderus of Vison in the form of animals and men.

help to account for the position of the Agni hymns in the Rv. collection. They stand first in the 'family books' and in general occupy the most prominent position in the whole collection. At the time when the Rik text was finally fixed (circa 600 n. c.), the priestly easte had gained the supremacy over the warrior caste. This condition of things may be symbolized by the fact that the hymns dedicated to the price! Agni are given a more prominent position than those ascribed to the warrior Indra. At any rate as Macdonell says, Agni's priesthood is the most gallent feature of his character, he being the great priest as Lidez is the great

b) Agni is the king of sacrificial rives;

In the abode of mortals has th' in mortals

The king sat down, performing act of worthing. III. 1, 18, Lord of the mighty sacrifice is Again

Delight the yearmen, Source and Bright Local Joint 22th, Knowing right times, O lord of England Matters, X. 2, I. Thee let me greet adoringly,

The sovereign lord of sarrel for LZ, 1.

According to these specimen party with at random Agni is the king, superintendent and at random and of sacrificial and Marsian of rites Agni is the King, and of sacrificial (1997) and sacrifices and of sacrificial (1997) and his order (1997) waying. He is and sacrifices and the sadate from the guardian of rila and his sadate from fix inviolate.

y VM, 97.

The shifting flame is compared with a barries.

Agni as the sacrificial element par excellence and the architype of every human priesthood is the very embodiment of ritualistic order. He possesses the priestly function and wields the priestly authority.

c) Agni, as the wise priest, is able to correct mistakes in worship².

If ever we violate your regulations,
O ye safe gods, we who are poor in knowledge;
Wise Agni, then, corrects the matter wholly,
So as to give each god his proper season.
When, simple as they are, weak-minded mortals
Fall to bethink themselves of sacrificing,

Then may the hotar Agni, wise, discerning,
Worship the gods, best worshipper, in season. X. 2, 4.5.

Agni is the very embodiment of priestly wisdom. He knows all priestly duties (I. 94, 6) and is as wise as a sage. Especially as the ritualistic god is Agni interested in the

Especially as the ritualistic god is Agni interested in the production of prayers and hymns. He is the devisor of brilliant speech (II. 9, 4), the first devisor of prayer (VI. 1, 1). As the master of every thought he promotes the worshipper's meditation (IV. 6, 1)

6., AGNI AS INTERCESSOR AND JUDGE.

In relation to sin Agni plays a part only second to that of Varuna and the $\overline{\Lambda}$ dityas.

a) Agni is an ail-seeing god. He has eyes (II. 2, 4, X. 21, 7), 100 eyes (I. 128, 3), 1000 eyes (X. 79, 5), with which to behold the deeds of men. Like Varuna, he has spies which he sends forth (IV. 4, 3). He knows accordingly the 'hidden part' (apteya VIII. 39, 6) of men. He can

Of the three strands of meaning in 144 forder, namely cosmic, ethical and retualistic, the meaning rifusibility order is naturally prominent in connection with Agai

With Agai as the perfector of human worship compare Rom. VIII. 26.27, where the Holy Spirit is represented as helping our infirmity, himself making intercession for us, and so cushling us to offer acceptable worship

Marskratu I 1, 5.
Oldenberg, RV. 201.

distinguish the wisdom and folly of mortals like straight and crooked backs of horses (IV. 2, 11). Thus Agmi is the aye and guardian of mighty rita', and is to be identified with Yarupa when the latter strives after rita (X. 8, 5).

b) Agni takas account of sin and punishes it. Ho publishes the guilt of sinful man before Varuna and the Adityas, nay, before all the gods (IV. 3, 5-8). 'Ho brings ovil upon tha man who utters evil spells, imprecations and falschood (V. 3, 7) and consumes with his hottest flame those who violate the fundamental principles (dhama) of Varuna and Mitra;

May Agni rich in wealth with flame most seorching, Agni the sharp-toethed one, consume those people who break the laws by Varupa established,
The dear abiding rules of watchful Mitra.
Reaming about like girls that have no brethers,
Of avil ways like wives that trick their husbands,
Being unrighteous, lost to truth and goodness,
They for themselves have this deep place created 1 1v. 5, 45,

c) Agal intercades with Varuna for sinners and deprecates his wrath.

Therefore, O Agni, turn to brother Varuna,
The god who graciously accepts the sacrifice.
O Friend, to (Varuna) thy friend turn promptly thou,
Like a swift wheel, like two car-steeds in rapid course.

Knower of Varupa mayest thou, O Agni,
For us appease the god's fiere indignation.
Best agent of the gods, best sacrificer,
Flaming remove far from us every hatred.
As such, O Agni, be to us the nearest,
For help the closest, while this dawn is breaking;
Make Varupa go away by sacrificing;
As liberal one, have neree, heed our prayer.

IV. 2, 1a-b, 3a-b, d, 4, 5.

O Agni, mercy find for us with Varuna.

¹ Certainly ethical order here as well as ritualistic.

³ Is the common relation to rita on the part of both Varuna and Agail the basis of their identification in such passages as H. 1, 4; III. 5, 4; V. 3,1; VII. 12, 3?

The grammatical uncertainties are not such as to affect the general sense. See Oldenberg, RVN. I. 270-271.

A very notable passage. Varuna is angry. He must he appeased. The one who can find mercy with Varuna and remove his anger is Agni. This he can do, because Varuna is his friend and hrother. Agni the sacrificial god, shows his mercy toward the sinful by appealing to the mercy of Varuna on their behalf. Thus Agni the priestly god fulfils the role of an intercessor.

d) Agal is hesought to forgive whatever sin has heen committed (VII. 93, 7), to pardon the sin which has heen perpetrated through thoughtlessness by those who are only human (IV. 12, 4), to release from 'great guilt' and its penalty 'the prison of gods and mortals' (IV. 12, 5), to make men guiltless helore Aditi (IV. 12, 4), to grant Diti and keep off Aditi (IV. 2, 11), to protect from Varuna's dharti (harmful purpose I. 128, 7), and to put away the wrath of the rods (IV. 48, 10).

In relation then to sin and its punishment or remission Agni who dwells in the homes of men is the counterpart of the heaven-dwelling Varnua'.

7. Agai and Britaspati. - Britaspati' 'the lord of prayer' shares in the activities of both Agai and Indra, as the following hymn together with other passages indicates:

To Brikaspati IV. 50

- The one who propped with might earth's ends asunder,
 The charming tongued, three-scated, loudly roaring,
 Him god Brihaspati the ancient Rishis
 - And sages pondering made their priestly leader*:
- They who with noisy rush, exhilarated,
 For us, Brihaspati, stormed the extensive
 Dappled, conspicuous, uninjured caitle;
 Brihaspati, guard thou the kine recovered.

²The word 'mercy' (writika) is the same in verses 3 and 5, ² Bergalgne, RV, III, 169 174; Oldenberg, RV, 201, 293-293,

Alternative form Brakwaeaspott. lit. 'lord of Brakman'.

^{&#}x27;i e. made their purokita (purodha).

⁶ For this very difficult stanza see Mardonell, YES, 85-86; Oldenberg, A, 305-306; Hillebrandt, LR, 59

- 3. Brihaspati from farthest distance coming The Rifg-lovers have for thee been seated: For thee the springs dug out or milked with press-stones Of mead drip superabundance in all quarters.
- 4. Bribaspati, when first receiving being From the great light that is in highest heaven. With seven mouths, strong-born, with sevenfold radiance. Dispersed with his vast roar the glooms of darkness.
 - 5. He with his troop exultant, jubilating Burst open with his roar th' enclosing Vala;
 - f Bribaspati bellowing drove out the cattle.
- That, red and lowing, sweeten the oblation,
- 6. Thus the strong sire of all gods would we worship With sacrifices, homage and oblations; Bribaspatl, we would be lords of riches, Begirt with children fair and warrior offspring.
- 7. That king, indeed, with power and might herole Doth meet and overcome all hostile forces. Who tends and keeps Brihaspati well-nourished, Honours and lands him who receives first portion.
- 8. Truly he dwells well-set in his own mansion; To him the sacred food yields ever plenty; To him spontaneously bow down his subjects; The kine with whom the Brahman has precedence.
- 9. He irresistible obtains the riches Of both his enemies and his own people; The king who for the succour-needing Brahman Secures relief and help, the gods assist him.
- 10 Drink ve the soma, Indra and Brihaspati, Glad in this sacrifice, O ye of mighty wealth; The invicorating drops shall enter both of you, Bestow upon us riches linked with hero sons.
- 11. Bribaspati and Indra, make us prosper, Let that benevolence of yours be with us; Assist our prayers, stir plenteous bestowals, Weaken hostilities of foe and rivals.

The points of contact between Brihaspati and Agni are numerous. Both are three-seated and were born in the

trisadhasha, IV. 50, 1; V. 4, 8, referring either to heaven, mid-air and earth, or to the three sacrificial fires.

highest heaven (IV. 50, 4; VI. 8, 2); both are identified with Matarisvan (III. 26, 2; III. 29, 11), Narāšansas (I. 18, 9; III. 29, 11) and Angiras (II. 23, 18; I. 1, 6); both are associated with the Angirasas (X. 67, 2-3; IV. 3, 11), and are friends and allies of Indra (I. 18, 6; II. 23, 18; VI, 59, 2,); both are purohitas or 'family priests' (II. 49, 9; I. 1, 1), and brahmāṇas or 'praying priests' (II. 49, 9; II. 1, 1); both diepel adrahess (IV. 50, 4; VIII. 48, 22), drive away disease (I. 18, 2; I. 12, 7), protect from evil charms (I. 18, 3; I. 12, 5), and destroy rakṣasas (II. 23, 1; X. 87, 2); both bear the title', son of strength' (I. 40, 2; III. 1, 8) and both ere sages (II. 23, 1; I. 12, 6); each is like a father (VII. 97, 2; I. 1, 9), etc.

Not less closely related are Brihaspati and Indra. Like Indra, Brihaspati is associated with a band of singers' does exploits as soon as born, cleaving Vale, winning the kine, dispersing the darkness; is a warrior, drinks Soma, gives kine and horses; was generated by Traştar'; wields the thunderboth (eqira); roars like a lion, bellows like a bull and thunders; shakes things unshaken, rent the forte of Sambara; has a bow and arrow; is a patimaker, is called machacan, and should be worshipped with faith.

It is not strange, then, that the opinion of scholars is divided between the two types of affinity pointed out above, Max Müller? Macdonoil and Keith (Indian Mythology

¹ Angirasa belong to Bribaspata, Marsts to Indra. Hence both B, and I. bear the fille gonaputs 'lord of a bost' (H. 23, 1: X 112, 9). Note, however, that the companions of Blahayasti are once called 'bears' (rowshaw X, G, 7), a banne given classeher to Endra (since I. 114, 5), and to the Marsts (socce I. 88, 5), but not to the Angiraxa, valeus in X, G, 7. Bribaspati is, however, wmetimes mentioned along with the Marsts (4, 9), 20 so labra with the Angiraxa.

³ As Indea's cofra was generated, L 32, 2,

a Only was it Dibuspin it. 40, 8) and once of the Maruts, VIII 7, 32.

SBE, 32, 94

^{*} VM 101-101.

45) regarding Brihaspeti as a variety or 'parallel form' of Agnl, while Weber and Hopkins' consider him to be a priestly abstraction of Indra. But Brihaspati may be approached from enother angle. Recall the Indo-Iranian and Vedic constituents of worship, namely soma-drink, fire-offering and sacred utteranco? Corresponding to them are Soma, Agni and Brihaspati, the deified sacrificial 'drink', 'firo' and 'formula'. Soma and Agni (or Atar) aro Indo-Iranian, while Brihaspati looks like a purely Indian deity". If Some and fire are concrete, brahman as the sacred formula (only heard) is intengible and abstrect. Each received anotheosis, Soma and Agni as concreto deities end Brihaspeti as an abstreet god, 'the personificetion of the mighty power which lies at the heert of the brahman or 'holy word', and manifests itself in the wonderful effects of the sacred formulas'. This seems to be in general the view of Roth's, Oldenberg' end Streuss',

The nemo of Brahmanaspati expresses his nature. He is the supreme king and generator of prayors (brahma), assists hely thoughts (dhiyah) and promotes their preparation, prenounces the formula (mantra) in which the gods take pleasure, pleces in the mouth of the earthly priest an effective word (mac), and punishes those who hate prayor. Most of the Vedic gods shere in the function of helping the priests in the production of effective prayers, but Brihaspati as Strauss truly says, is a 'specialist'

in the department of inspiration.

⁹ nv. 23

clearly the song of the thunder and wind, as heard in a thunderstorm. The Angirasas like the Bhrigus and Atharvans were ancient priestly families, probably historical, most likely reaching back to the Indo-Iranian period'. They are, however, heavily clothed upon with mythical elements, as was natural, being associated with the gods Brihaspati and Indra in their exploits. Ouite likely we may detect the working of popular etymology in the mythical drapery that has overspread the original Angirasas. The fiery nature of the Angirasas, as indicated by the probable connection of the word with angara 'live coal', may have suggested to the myth-making imagination a 'fiery' career akin to, or even identical with, that of the Maruts. Brihaspati, the lord of brih or brahman, 'formula' 'incantation', was in origin a purely ritualistic deity, but unliko Soma and Agni had no physical nature except sound. It is antecedently probable, however, that Bribaspati as lord of the offective spell would be linked on to something analogous in nature. What would that be except the thunder', which might easily be regarded as the song or mantra of a heavenly priest, a most effective 'charm' to release the heavenly waters.

¹ The probable connection of these names with angura 'hre coal' and ἄγγελος 'messenger', bhrsj and Φλέγω 'to shine', athargu 'flaming' VII. 1, 1 and siar 'fire', helps to support the view that they were ascent tre-priests So Italiebrandt, VII. 1, 15-15 et Macdonal, JRAS. (1990), 393.

Oldenberg has made it probable (RV, 131-162) that the Dayn chieftains Suna, Pipro, Saminar, et al., were aborigines dressed up in the livery of the demon world. According to the tame analogy we may regard the Angirsas as an ancient Aryan priestly family arrayed in the habiliments of the world of the devas. In this sense they came to be 'a zace of higher beings intermediate between cods and men! (Okcolonell, VM, 143).

Oldenberg connects the word by it or brahmon with the Irish brieff 'magic', 'Magic formula' (LU, 46 m. 1). Brieff is related to the Icelandia bray' poetry' and so brahmon is the 'coremonially conceived' word as used in magic. Hillehrands, Art. Brahmon in IRE.

^{&#}x27;Cf. the thunder in Hebrew as the Thir, 'voice of Yuhuch', in Pasim XXIX; also John XII. 28-29.

The Angirasas as singing priests would naturally accompany Brihaspati, the great high priest of the sky, just as the Maruts as young warriors accompany Indra. There is more or less mutual assimilation between the Angirasas and the Maruts, the Angirasas becoming military and the Maruts priestly1. Perhaps the Angirasas and the Maruts are largely 'mythological synonyms', parallel forms of each other. Possibly by this very weak bridge might be secured an interpretation of the Maruts as 'personifications of the souls of the dead, the dead thus embodied in the stormwinds heing the ancient Angirasas. The love of music and song which has ever characterised India lends some weight to an interpretation which would emphasize the play of the Vedic imagination along musical lines. If the great musical composers bave drawn part of their inspiration from the music of the elements, the songs of the thunder's and wind, probably the Vedio singers had imagination enough to find in the same music the beavenly analogue of the 'song' or 'incantation' of the earthly priest,

As regards his relation to rita, Brihaspati is ritaprajata 'rita-born'; that is to say, he represents an aspect of oternal order, mounts the shining car of rita, has a how the string of which is rita, punishes and avenges guilt', is the upholder of great rita, consumes (tap) enemies, the brishman hater and rakṣasas, manifests wrath and remits debt (or guilt) according to his own will (raisa'). Here brithman, the mysterious power of 'prayer' or 'spell' is represented as an expression or instrument of eternal order, serving it by both the punishment and the remission of guilt.

To sum up, Agni and Brihaspati, as ritualistic gods, have many functions in common. Only in this general

¹ Cf V. 29, 3, Brahmano Marutah

² Rithspati is represented as rearner, bellowing and thundering (X. 67, 3, 6, 9; VII 97, 9), and as born of the great light in the highest heaven, IV, 50, 4 (a. e. the lichtning which is followed by thunder as its child)

^{*} Renacit, 16n 1ya II 23, 17.

^{11 23, 3, 15, 17;} II. 24, S, 13-14

sense however can Brihaspati be called a 'variety' or 'aspect' of Agni, for each is the apotheosis of a different cult object.

The great interest connected with Brihaspati is that 'the lord of brahman' is one of the links in the chain that led from the primitive cenception of brahman as a kind of 'mana' or 'Zauberlluidum', on to the supreme conception of it as the central reality of the universe. Three notions of fundamental importance in the Rv. romain impersonal, viz. rila 'order', brahman' 'word' and māya 'power'. Of these brahman alone became personalized in Brahmanaspati, whe as the divine brahman priest was the prototype of Brahma, the first person of the later Hindu triad'.

8. Vedic Nature Studies on the Subject of Fire.—
There remains a great mass of material portaining te Agal,
which while most interesting, can receive only the briefest
reference. It may be studied in detail in Macdonell's Vedic
Mythology. Agai dwelf in the homes of the Vedic Indians
as the hearth-fire and the altar-fire. Ho was mystorieus,
petent for both good and evil, at once friendly and terrible.
With his apetheosis as one of the great geds he became
the object of most careful study and the centre of the
earliest Vedic speculation. The result was that we have
in the Rv. a most elsberate series of nature studies on the
subject of fire*. We have already referred to the three

¹ Oldenberg remarks that not one of the powers that aspired to the place of Universal Being belonged to the sphere of physical nature. (Die älleren Lpanishaden, 45)

³ No reference has been made to Prol. Hillebrandt's view of Bithaspati as a lord of plants and a personification of the moon. The present writer finds bimself incapable of appreciating the arguments which have led the learned author to the conclusions be adonts.

Once while at Gureis, Kashmir, I sought to test the accuracy of the Ligredie descriptions of the behaviour of time when gives a poured on it. The three alturs were dug under the direction of a Sriangur pandit, the round Gurhaputya westward, the square Abarintya eastward, and southward the Bakuwāgwi in the form of a ball-moon. Each tire-pit was dug about aix inches deep. Fuel was heaped in the Gurhaputya reply, and when the darkness came on the pite was lichted and give.

forms of Agni, the earliest Indian triad. Very often also Agni is called dvijanman having two births', one in heaven and the other on earth. Then there was the fact of the indefinite multiplicity of fires. What was the relation between fires and Fire? It was the first emergence in Indian thought of the problem of the one and the many, a problem destined to receive such a radical solution in the Vedanta philosophy. Sometimes Agni is invoked with the aguis' as Indra with the Maruts. At other times it was observed that Agni is 'of like appearance in many places' (VIII, 11, 8), and so the conclusion was drawn that there is 'only one Agni though many times kindled' (VIII. 58, 2). Already multiplicity had begun to give way before unity. Then there is the distinction between the latent and the manifested, so important in the later philosophy of India. For example, Agni is latent in the heavenly waters' until he is born in the form of lightning, and also in the plants until through the twirling of the fire-sticks he is brought to birth. Because of the strong friction necessary to produce fire, Agni is called 'son of strength'. The mystery of fire is the ground of many Vedic paradoxes. Agni is at once young and old, heavenly and earthly, latent and manifested. As soon as born he devours his parents.

was poured on, accompanied with the recitation of Velos irre-mantras. I was exceedingly impressed with the vividness and accoracy of the language used in describing the rushing flames A Hundu servant some years after referred to it as our pid?

¹ VII. 3, 1; VIII. 18, 9, etc.

Oldenberg, EV, 43-45.

³ Hence called apam napat, 'son of the waters'.

CHAPTER VII.

INDRA THE WARRIOR GOD.

INTRADUCTORY .- Indra is celebrated in not less than 250 hymns of the Rv. and in approximately 50 mere he is praised conjointly with other deities. Judging then from the fact that he is celebrated in nearly one-fourth of tha total number of hymns, we must canclude that he was a favaurite deity in the Vedic age. The name 'Indra' is of uncertain derivation' and meaning, being mare 'opaque' than that of any ather divine name in the Rv. Tha result is that there is some uncertainty as to his ariginal physical basis. For most scholars Indra is a storm god, wha sends thundar and lightning, but far Hillebrandt ha is an ancient sun-gad. In the Boghez-köi list Indra is mentioned in the farm 'In-dar' alang with Mitra, Varuna and Nasatya (1400 B. C.). Hence he must have been recagnised at that time as a great gad. In the Avesta ha is mentioned twice? in the variant ferm Indra or Andra. The name occurs in the list of demans; hence it is clear that Indra like the other pra Zoreastrian daevas was reduced at the great refarm to the status of an ovil spirit'. Indra is perhaps the mest completely anthropamorphised of all the Vedic deities. While the anthropomorphism of Varuna's persenality is mere fully developed on the moral than the physical side (Macdonell, VM, 23), the opposite helds true of Indra. As might be expected, then, Indra represents -

Derivations which have been suggested are the following: indu 'drop'; idh
'kindle'; in 'stir' 'urge'; isa 'strong', hence perhaps Ind(lax; aner, an(d)ros
'man', hence An(d)ra, ind(lax, insalay', est 'giant' in Anglo Saxon, etc.

⁷ Vend X, O, XIX. 43, the second passage not being found in all manuscripts. While the Vello Vistraham is a regular epithet of Indra, its Avestan equivalent Verediverplant is quite separate from the Avestan demon Indra or Añdra, and is regarded as a parada, the Technica of victory', created by Ahura and clothed with the likel to overviewsty. Vend. XIX. 27. d. filipteyl. AV. 191-198.

the apotheosis of naked might, the embodiment of the martial and imperialistic tendencies of the Vedic Indians. No phenomenon of nature is so suggestive of ruthless might as the lightning stroke. Indra is Agni's twin brother (VI. 59, 2), a way of expressing the close relation between the lightning-fire and the altar-fire.

INDRA THE SLAYER OF VRITEA.—Indra's most notable exploit is set forth with great vividness and energy in the following hymn:

To Indra, I, 32'.

- Let me tell out the manly deeds of Indra.
 Which he accomplished first of all, both-weaponed:
 He slew the serpent, opened up the waters,
 And eleft in twain the belly of the mountains.
- He slew the scrpent lying on the mountain; Traylar for him the heavenly * both had fashloned; Like lowing cattle downward sped the waters In rapid flow descending to the ocean.
- With hull-like eagerness he sought the soma;
 Out of three vats he drank the pressed out liquor;
 Maghavan took in hand his bolt, the missile,
 And smote therewith the first-born of the serpents.
- When, Indra, thou didst smite the serpent's first-born, When thou didst spoil the wiles of the enchanters, Anon the sun and sky and dawn disclosing; Thou didst not then a single foe discover.
- 5. The Vritra Vyanisa worst of Vritras, Indra Smote with his bott, smote with his mighty weapon; Then just like trunks of trees laid low by axes, The serpent lies stretched out along earth's surface.
 - 6. For, like a drunken weakling, Vritra challenged
 The mighty hero, the impetuous warrior:

f Indebtedness is acknowledged to Oldenberg's translation of this hymn (RV. 136-138) and to his Rv. Noten 31-33

Scarma 'gleaming', Ladwig; 'rosting' Celdner and Oldenberg; 'whitzing' Nacionell,

He did not meet the clash of Indra's weapons, Broken' and crushed he lay, whose foe was Indra.

- Footless and handless battled he with Indra, Who on the back of Vritra hurled his missile; With scattered limbs lay the dismembered Vritra, Emasculate, who tried the Bull to equal.
- On this wise, as he key like ox* dismembered, Over him ruthlessly dld sweep the waters, Which Vritra by his greatness had surrounded; Down at their feet low lieth now the serpent.
- The strength of her whose son was Vritra withered; Indra his weapon brought to bear against her, The mother lay above, the son was under, Dānu lay like a cow her calf alongside.
- 10. There lay her body midst the watercourses, That never cease, that never rest from flowing; Through Vritar's secret place the waters speed them: In lasting gloom sank he whose foe was Indra.
- 11. Dasa controlled and guarded by the serpent, The waters stood like cows confined by Papis, The orifice of the waters which was fastened, That opened Indra, having slaughtered Vritra.
 - 12. A horse-tail* didst thou then become, O Indra, What time the foe, as if sole god, assailed thee, Didst win the cows, didst win the Soma, hero, And didst set free to flow the seven rivers.
 - Lightning and thunder profited him nothing, Nor mist nor hallstorm which he spread around him; When Indra and the screent fought their battle, Maghavan won the victory for ever.

· of stanza twelve is only tentative.

120

¹ Budjanih, eliher cerrest to rujānah broken' (Oblenberg, IV. 130) or divide into ruja +anāḥ (Oblenberg, Noten 32) "Darch Zerehmetterung ist der Munilee (Nacelosel) zermalmet worden". Note that 'rasseless' gors well with 'foollee and 'handlew'. Accordingly it may be translated. Crashed was the noveless finite-foe when smitten.

³ Or: 'like broken reed'—Mardonell, HR. 48
³ Agnl's flame (I 27, I) is compared to a hone with a tail. Indra became a 'horse tail' apparentle, when he appeared as the lightning flash. The translation

- 14. Whom didst thou see to avenge the serpent, Indra, When terror filled thy heart that thou hadst slain him, When like a frightened eagle through the mid-air Thou didst cross over nine and ninety rivers?
- 15. Indra is king of that which moves and moves not, Of tame and hornéd creatures, too, bolt-weaponed; Over the tribes of men he rules as monarch; As felly spokes, so holds he them together.

A description of the great battle between Indra and Vritra, which resulted in the slaying of Vritra and the release of the imprisoned waters. The following points may be noted:—

a) Since Vritrahan 'slayer of Vritra' is Indra's most characteristic epithet, the exploit referred to constitutes Indra's mythological essence. Three questions arise. What is Vritra, a demon of drought or a demon of cold? What is Indra, lightning or sun? And what are the waters, atmospheric or earthly? An answer to thesa questions is complicated by the fact that Indra is confessedly a prehistoric god belonging to the Indo-Iranian and possibly even to the Indo-European period'. Hence with the change of environment and climatic conditions his own nature and attributes may have suffered a change, since he was the reflection largely of natural phenomena, The great majority of Vedic scholars regard the slaving of Vritra and the release of the waters as referring to the atmospheric drama of the thunderstorm in which the domon of drought is pierced by the lightning and made to surrender the pent-up waters, which fall to the earth in the form of rain.) The two chief German authorities on Vedic Mythology, Oldenberg and Hillebrandt, would, however, introduce important modifications into the traditional explanation, Oldenberg follows the traditional view in holding that the original pro-Vedic conception was the freeing of the waters from the prison of the cloud-mountain, but thinks that this conception in the Rigyedic environment was trans-

¹ Oldenberg, EV. 31, (n. 1), 134

formed into the freeing of the earthly waters from the carthly mountains. This transition was favoured by the identity of the heavenly and the earthly waters, which made it natural to think that the freeing of the earthly waters must be the work of the same god who freed the heavenly waters'. The changes which Hillebrandt would introduce into the traditional view are much more radical. For him Vritra 'the encompasser' was originally a personification of cold and ice, a 'winter-giant'. Only the sun could be the antagonist of such a demon. Hence Indra must have been originally a sun-god. Indra and Vritra then represent the antithesis between summer sun and winter cold, as was natural in a northern environment. With the change from such a climate to that of the Punjab where drought, not cold, was the great enemy. Indra was transformed from a sun-god into a storm-god or simple rain-god. Indra's original task was to free the waters from the clutch of the ice-demon. His later development as a rain-god was doubtless helped by his early connection with water'. Thus according to Hillebrandt both Indra and Vritra owe their pre-Vedic character as god of summer warmth and demon of winter cold to pre-Vedic climatic conditions. The theory is brilliantly stated, but In its totality is not convincing. It will be profitable to compare Indra with Varuua in their capacity as water-gods. Varuna as a sky-god s, sends rain from heaven and wets the earth (V. 85, 3-4). But not only is he a rain-god, but also a river-god (id. v. 6). By analogy Varuna's function was extended from rain-giving to river-digging. Assuming with Oldenberg that Indra's original function was that of a storm-god wielding the thunderbolt and slaying the

¹ Oldenberg, BV. 51, n 1.

² Hillebrandt, VM. 111. 195-197.

³ Whether he was originally the 'encompassing sky' or the 'moon' makes no difference in this connection

^{*}Cf. X. 75, 2, Varuna dug (rad) the bed for thy course, O Sindha So Indra dug out (rad) the Vipai and Sotudri (III. 33, 6)

rain-withholding demon, one can easily see how by analogy his domain in the Punjab would be enlarged so as to cover rivers, quite as in the parallel case of Varuna. Especially would this be natural and inevitable, if the standing metaphors of the Indra-Vritra myth had a pre-Vedic origin. The cloud-montains and the cloud-waters of the myth would fit in well with the literal mountains and mountain streams of the northern Punjab. At any rate, it seems clear that Indra like Varuna was a regent of both heavenly and earthly waters. Vritra may be interpreted, then, as anything which obstructs the waters, whether drought-demon in the case of the heavenly abrires or snow in the case of the carthly

[|] Monntains (= clouds) and waters (= rain or nvers)

³ The deep cut through the mountains by which the Jhelum river flows from Kashmir down to the Ponjab must have impressed the Vedic Indians There are traditions of a large body of water someonly held back in the mountains - a tradition amply attested by geology. The Humalayas are the scene of violent thunderstorms. In view of the language of the original myth, what more natural than to think of the deep cleft of the Jhelum 'in the belly of the mountains' as hollowed out by Indra? To this day the people of Kashmir refer many changes to the action of lightning. A "smager Pandit asserted that the mountains were once full of the caves of asceties. On being asked where the caves were, he replied that the lightning had destroyed them. About the 20th June 1911, while our boats were tied up in the Tsunth Kat, Seanger, a terrific storm of thunder and lightning came on at night. Not very much rain fell at Sringer, but a good deal must have fallen on the mountains. The next morning the water had risen so much that we were compelled to move our boats to another place. It was a warm rain which melted much snow. The evening of the thunder storm was marked by a marrellous desplay of lightning. On the far-off horizon the lightning would dart down apparently from beaven to earth. The phenomenon might very well have been interpreted by primitive man as a sky-delty smiting with his weapon some atmospheric or earth demon rechning on the mountains. It may be that the Indra Vritra myth was extended by analogy to cover such eases as this, and to this extent Hillchrandt's theory may be true. As seen from a long distance a white cloud and a snow-capped mountain are practically indistinguishable. A cloud looks like a mountain. As a matter of fact, the cloud mountains and the snowy mountains of eastern Bactus must have made possible from the beginning a double application of the Indra Vritra myth, namely to the cloud waters obstructed by the drought demon and the mountain waters obstructed by the anow demon

waters. Indra must be regarded throughout as the wielder of the lightning.

b) Vritra, the chief enemy of Indra, seems to be the name of these cloud or atmospheric appearances which promise much in the matter of rain, but perform little or nothing, an abortive rain-storm, as it were.

Vritra manipulates lightning, thunder, mist', darkness' and hail (v. 13; I. 80, 12). Ho is clothed in the habiliments of Indra, 'Satan transformed', as it wore, 'into an angel of light'. His 'snorting' is sovoral times referred to (V. 29, 4; VIII. 85, 7), and ho is called a muttering or bellowing snake (navantam ahim VI. 17, 10). His mother is Dānu 'drip', a name of the rain-cloud which sprinkles only a few drops. 'Sho of the drip' is the mother of a demon-brood', of which Vritra is the first-born. As thus interpreted Vritra means a false thunderstorm with little or no rain, while Indra means a thunderstorm followed by abundance of rain. \(\frac{\text{Yritra}}{2}\) is also called Ahi 'serpent', the same opithet being applied to the chief atmospherie demon in the Rv, as is applied to Satan in the Bible. Agni is once called 'a raging

^{&#}x27;Susan 'bisser' or 'scorcher', one of the demon-brood is called mithonopul, 'son of mist', V 32, 4.

² Vritra as 'son of mist' moves in darkness and waxes in sunless gloom (V. 32, 4, 6). Is there any reference here to the phenomena of dust-atorms, so characteristic of the Punjab before the rams?

⁴ Biv X. 120, 6 mentions seven Dians (Dianvas), sour of the 'Cw Dian. As drought-demons they probably cover different sepects of the sky in the dry secon, ε_θ Vilius 'the obstructive' of the heavenly waters being the eatirs dry weather sky (cf. Varuas from the same root), and associated with him probably Savas 'the sorocher' viba spoils the twirrest, personalization of the intense per-amonous heat, Aurganibha 'son of the wool-weaver, possibly referring to the woolly look of the dry-weather sky or to the whithis doss-hare which hange over the Pumph in the very dry season. As soon as Vitra is amitten and the rains fall, all the other drought demons take themselves off. Hence Vitra as the noot important drought-demon is called 'the first-born of the dragons' (f. 32, 3). In May and June 1921 both on the plains and on the hills at Misseorie the drought and heat were intense. Vitra had withhold the waters, phase had applied the whiter crops in the hills, and ever all the mountains a thick, whitish dust and anoke-hare was spread, possibly Aurantalbha works.

serpent like a rushing wind' (L. 79, 1), and the Maruts, or storm winds and lightning flashes', bear the epithet ahibhanavah 'shining like ahi' (I. 172, 1). The name 'serpent' may refer to the subtle deceptive nature af Vritra, to his appearance as lightning, or ta the wide-spread tradition that serpents guard treasures, especially water springs. So the word nag 'serpent' is applied generally as a name for 'spring' in Kashmir. We may draw an instructive comparison between Ahi Vritra and Ahi Budhnya. Both have their habitat in the atmospheric ocean It looks as if both were very much the same, the only difference being that Ahi Budhaya 'the serpent of the deep' is a parallel form of Indra and hence a deva, while Ahi Vritra 'the serpent obstructor' is a demon'. As is fitting for a snake, Ahi Vrltra is represented as footless, handless and perhaps noseless (I. 32, 6.7; III. 30, 8). Being nrmed with thunder, lightning and magic devices (māuā). Vritra is no mean antagonist.

c) Indra's equipment for the fight with Vritra. The gods constituted him for this purpose (III. 49, 1) and made him their champion (VI. 17, 8). To this end he was strengthened with food, drink and aong.\(^1\) Indra is represented as a mighty eater and drinker.\(^1\) He eats the flesh of hulls' and buffaloes, and drinks enormous quantities of Soma.

¹ Macdonell, VM, 72 73.

[?] Since agui 'fire' could be hierally increased (ridh) by pouring in give, the same general kits of strengthening was carried over by analogy to Indra (rf. II 11, 1-2) and the other gods 1 t may be that the growth of the storm from 'a little cloud like a man's hand' was viewed as the growth of Indra.

^{*}The authorogenerable representation of the gold in India is Iroquently symboloud. Large sciency and beneviced one we obtain questions and seed, or as in the case of India and India gold and the case of India and India Common and the contract of the Contract of India and India Common the persists among the Verification and doubtless the preparation for big doing Se by analogy among the persist aske to say that the Greek with has aratter restraint and sense of from world not have used such a metaphor as "the like an occur has made room in his helly (for Soma)' 1. 30, 20.

[&]quot;They dress for thee bulls", paceants to vrisabhan, N. 28, 3. Thus Indra the bull ests bull meat

As friend for friend Agni made ready quickly Three hundred buffaloes, to meet his longing; Indra at once three lakes of pressed-out Soma, As Manus ordered, drank for Vṛitra's slaughter.

"When thou three hundred buffaloes' flesh hadst eaten, And drunk, as Maghavan, three lakes of Soma, All the gods raised as twere a shout of triumph.

To Indra praise because he slew the Dragon."

V. 29, 7-8 (Griffith's translation of v. 8).

Indra's weapon par excellence is the vajra or 'holt', 'belearly a mythological name for the lightning stroke. It is described as golden, heavenly, hundred-edged, thousand-pointed, rearing, shattering, etc.' Synonyms' are 'heavenly stone', 'burning dart' and 'moving weapon'. It is the weapon exclusively appropriete to Indra', though assigned a few times to Rudra, the Maruts and Manyu. Through it Indra shakes all things:

Even the beavens and earth bow down before him, And at his vehemence the mountains tremble'. II. 12, 12. Indra then settles the things shaken and fixes the unsteady:

He who the quivering earth hath firm established. And set at rest the agitated mountains. II. 12, 2.

What Indra shakes and agitates by his thunderbolt, he also calms and settles. What are the facts of the thunderstorm? First, the heavy peals of thunder shake the world. Then after the storm has passed a great calm succeeds. As the Vedic Aryan interpreted it, Indra first shakes all things and then makes fast the quivering and the agitated.

Indra and Vritra are both furnished with maya. This

I. 57, 2; 61, 6; II 11, 9-10; VI. 17 10

^{*} I. 176, 3; III. 30, 17; 32, 6.

⁴ Cf Judges V. 4-5; Ps XVIII. 7; XXIX. 4, 8.

of. Psalm XXIX for both aspects of a thunder storm.

³ Earthquake tremors are very common in the Punjab It is possible that these are included in the agitation mentioned. The great Kangra earthquake of 1905 synchronized with dust storms and other meteoric phenomena.

Nerry pregnant word occurs in about thirty Indra hymns! In these there are about twenty references to the māyā of Vritra, Śuṣṇa, etc. and ahout ten to the māyā of Indra. The word māya signifies occult, incomprehensihle, superhuman power!, and so easily passes into the meanings, trick, magic, illusion!, etc. We have already noticed that the atmosphere is the scene of the māyah or magic transformations of Varuṇa! So it is with Indra. He frustrates the tricks of the tricky (I. 32, 4) With his māyā he blew away the tricky ones, that is to say, he dispersed Vritra and his company! Indra through his māyā can assume all forms:

"Maghavan weareth every shape at pleasure, ' Effecting magic changes in his body"; and "Indra moves multiform by his lilusions".

II. 53, 8 and VI, 47, 18 (Griffith's translation).

It is craft played off against craft. Indra is equipped with thunder, lightning, mist, wind, etc, which constitute the armoury of his māya, while Vritra and his company, like the magicians of Egypt, do "in like manner with their enchantments" (Exodus VII. 11). But all in vain. Vritra cannot meet the clash of Indra's weapons. So strong is Indra that fighting on his part is 'appearance', not reality.

That is thy magic power which men call battles,

Never foc hast thou found, to-day or erstwhile. X. 54, 2.

d) Closely connected with the slaying of Vritra and the liberation of the waters is the winning of light. The lightning flash 'makes light where no light was', cf. VI. 24, 5. Indra generated the lightnings of the sky (II. 13, 7), and

Prabhu Datt Sastri, The Boetrine of Maya. London, 1911, pp. 7-8.

³ We may compare the later meaning of maya as the cosmic illusion ⁴ V. 63 and 85, pp. 140, 136.

¹I. 51, 5. of. Indra blew the great make out of the mid-sir, VIII. 3, 20, and Indra blew the Duyus from the sky with has weepon, X, 55, 8.

⁶ Veiled in mist (mish) Indra rushed upon his fee (II, 20, 3), and east forth mists (mishah) and darkness (X, 73, 5).

also the sun, the sky and the dawn (I. 32, 4; VI. 30, 5). What is the Vedie point of view? Indra's supreme manifestation is the lightning flash with the accompanying 'bolt' (vajra). The wonder of the lightning is that light allilluminating (cf. Matthaw XXIV. 27) suddenly appears, where all was darkness before. But the light of morning also appears, where all was darkness before. The Vedic eoneeption seems to be that the same power that produces the lightning flash produces also the light of the dawn and sun which reveals the whole 'heaven'. Indra in both exploits appears in his characteristic guise as a warrior. slaying the drought demon Vritra and also the darknessdomon of the night; and thereby releasing the cloud-cows and the dawn-cows. It is to be noted that the point of departure is the lightning flash. With this as his charactoristic theophanic appearance Indra embraces all phonomona of light and fire.

3. INDRA AND THE EARTHLY WATERS. — Indra, like Varuna, had to do with both the heavenly and the earthly waters. His relation to the latter is well brought out in Visymitra's conversation with the rivers: —

To Indra. III, 33.

- 1. (Viśvāmitra)
 - Forth from the bosom of the mountains, eager, Like two mares racing side by side, loose-coupled, Like two bright mother cows that lick each other', Yinas and Sutudri pour down their waters.
- Sent forth by Indra, begging him to speed you, Ye twain move seaward, as it were on chariots; Running together, swelling with your billows, Yo lucid streams, to each draws night the other.
- Now have I reached the most maternal river.
 We have approached Vipas, the broad, the blessed;
 They are like mother cows that lick their offspring,
 Flowing on toward their common home together.

Or: 'As cows a calf lick, lapping earth, the fair streams'. Hopkins, ION, 48.

4. (Rivers)

Swelling with floods of water we move forward Unto our place of meeting, god-appointed; Not to be halted is our stream, full-flooded, What would the seer have, calling to the rivers?

5. (Višvāmitra)

Halt for a moment at my potent saying, Ye streams law-loving, on your ocean journey; To you ward is addressed my purpose lofty. I. Kuùika's son, call on you, succour needing.

6, (Rivers)

Indra the bolt-armed hollowed out our channels, Drove Vritra off, obstructor of the rivers; God Savitar has led us, the fair-handed; In his propulsion we go forth wide-ranging.

7. (Višvamitra)

For ever memorable is that deed of Indra, The valiant deed, that he dismembered Ahi; Broke open with his holt the strong enclosures, Forth flowed the waters, for their courso desirous.

8. (Rivers)

Never forget this utterance, O singer, Which later generations shall re-echo; O hard, in these thy hymns he toward us friendly; Humhle us not 'mongst men; to thee obeisance.

9 (Vièvāmitra)

Give ear, O sisters, to the bard; he cometh To you from far away with eart and chariot. Bow down yourselves, please give an easy passage; Floods, with your waves remain heneath our axles.

10. (Rivers)

We will give heed unto thy words, O singer, Thou comest from afar with cart and chariot; Low like a nursing mother will I bend me, Will yield myself like maiden to her husband.

11. (Višvāmitra)

Now when the Bharatas have crossed thee safely, Indra-impelled, a hords in search of booty, Then may your stream full-flooded flow as ever; Of you the worshipful I beseech the favour.

The booty-seeking Bharatas crossed over;
 The sage enjoyed the favour of the rivers.

Rush forward, swelling, speeding, pouring riches, .Fill full your channels, hasten swiftly onward.

13. Your wave the yoke-pegs merely touch, Ye waters, spare the charlot-thongs; And never may the bullocks twain, Faithful and steady, come to grief!

This notable hymn celebrates the crossing of the Beas end the Sutlei by a cettle-raiding bend of the Bharetas accompanied by the sage Visvamitra, the reputed outhor of the third Mandala. The rivers were in flood, but Visvamitra by his prayer coused the waters to subside'. so that the Bharatas pessed over safely. Already reference has been made to the militery significance of the rivers of the Puniab'. The god who could so control their waters as to cause them to rise or subside at will' was in very truth a war-god. While the Beas and Sutlej are represented as deified streams, the personification is only of the slightest. The hymn is addressed to Indra. It is he who dug the channels of these two rivers and sent forth their waters from the mountains to the sea (vv. 1-2, 6). Since the Bons end Sutley as well as the war-hand of the Bharatas were all alike under the control of Indra (vv. 2, 11), it was a simple thing for Indre et the request of his devotes Viávamitra to send the Bharatas agrees the streams 'on dry ground' as it were. We may compare the crossing of the Red Sea end of the Jordan in Hebrew story. Yahweli, like Indra, is 'a man of wer' (Ex. XV. 3), and the crossing of the Red Sea, as well as the crossing of the

¹ Indebtedness is acknowledged to Hillebrandt, LR 137-1-19 and Hopkins, ION, 48.50.

^{*} Cf. Vedle Index, II. 310-311.

² pp. 31-32.

⁴ There are other references to a similar control of the rivers. Thus 'even the way of the control of the rivers. Thus 'even the way of the control of the rivers. (VII. 18, 5). The great III. (Viivanitra) stayed the bilayy river' (III. 52, 9, a reference to the crowing of the Deta and Suile); and Indra arrested the steams for Turvill and Varya to crow (II. 13, 12, 27, also II. 15, 2, and I. 10, 13.

^{*} Exodus XIV-XV; Joshua III-IV.

Beās and Sutlej is celebrated by a hymn. It is probable that no great chronological difference separated the Yedie and Hebrew events. The Yedie hymn is in the form of a dramatic dialogue between Višvāmitra and the rivers, an interesting anticipation of the later Indian drama. The whole hymn may have been used in later times as a charm against accidents in crossing swollen streams. Especially was the last stanza, which looks like a later addition, thus used as a magic spell.

It is to be observed that the mountains, channels and rivers of this hymn all belong to the earth. The Beas and Sutlei flow from the mountains, and Indra hollowed out their channels. In connection with this there is mentioned Indra's supreme exploit, the slaying of Ahi-Vritra (vv. 6-7). Indra dismembered Ahi and broko open with his holt the obstructing enclosures, so that the waters flowed freely. Whether this refers to the obstruction of heavenly or of earthly waters is uncertain. Probably to both, for the release of the heavenly waters is the fundamental condition of the flooding of the earthly rivers, even more fundamental than the melting of snow. Since Indra is certainly connected with the lightning and the thunder, why not think of the whole process of the release of the waters as beginning with the sky and including the melting of snow on the mountains, the plercing of the springs' of the rivers, the hollowing out of channels', the swelling of

¹The writer has had experiences in crossing the Krisna at Sangli and an arm of the Gauges near Kangall, when an effective spell () would have been most welcome

² Hillebrandt, LR. 138, n J; Oldenberg, Rv. Noten 245.

These are clearly literal rivers, but they are assimilated to the sky scheme, for Indra hurled away Vpira, obstructor of the waters (v. 6). Such a process of assimilation by analogy is common in the Ry.

⁴ Ct. He plerved with his heli the footbins of the revers', H. 15, 3. Springs he kalmint are called neight, ht 'make's, a memorial of the time when avery footbin was thought of as goarded by a scale. It reminds one of the hearten's footbin was thought of as goarded as you clouded by the heavesty anake, Vitra Thoulet and lightlaining or with he kind of radiatal! that days channels (cf. "Thoulet and lightlaining or with he kind of radiatal! that days channels (cf.).

Habakkok iii 9) and produces floods (Hab. III 10; Nahoya I. 8; Judges V. 21)

the waters, and their advance in flood to the Samudra? Wherever the streams are flooded, there is seen the work of Indra, the releaser of the waters, whatever the immediate occasion of their release may be.

4. INDRA THE WAR-GOD OF THE VEDIO ARYANS. AS Indra first released the henvenly waters, and then was brought down to earth, as it wore, to release and guide the earthly waters, so he began his martial career in the atmospheric fight with Vritra, oxtending it so to speak to become the war-god of the Vedic Indians in their struggle with the aborigines. The parallel development of Yahweh is so striking and significant that some reference must be made to it. In the earliest poetry of the Old Testament Yahweh is represented as a kind of Hehrew Indra, a stormgod wielding the weapons of thunder, lightning, and wind, hailstones and flood, earthquake and (possibly) volcanic fire. Yahweh is also, like Indra, a national war-god, 'thote' lord of hosts and god of battles'. Quite as in the case of Indra, Yahweh employs the artillery of the sky against the onemies of his people, thundering from heaven against them (I Sam. VII. 10) and smiting thom with hailstones (Joshua X. 11). On earth Yahwoh so manipulated the waters of sea, river and flood as to save his people and drown their enemics'. It is the military, rather than the economic aspects of water that are emphasized in the great Hebrew war-songs,-the Song of Moses (or Miriam) In Ex. XV, and the Song of Deborah (Judges V). So is it also in such Vedic war-songs as III, 33, the crossing of the

Thus Hillebrand's theory, while contributing an important element, is too narrow and exclusive. Moreover it is based upon jost as indirect evidence as is the traditional theory. If clouds and rain are not as a rule mentioned in connection with the release of the waters, no more are snow and ice

The tetragrammaton glack, is possibly to be connected with Arabic harea, 'to fall', that is, 'He who causes lightning or rain to fall'. So Wellhausen and Robertson Smith See Hebrew Levicon, Brown, Driver and Briggs, 1906, under Values.

Fr. XIV-XV; Joshua III-IV; Judges V.

Beäs and Sutlej, and VIL 18 the battle of the Ten Kings. Thus both Yahweh of Palestine and Indra of the Punjab were storm-gods and war-gods. In each case the god who presided over 'the war of the elements' naturally hecame the leader of his people in the wars against their earthly focs.

The hymn now to be translated contains interesting reference to the military side of Indra's activity.

To Indra. II. 121.

- He who as soon as born keen-thoughted, foremost, Surpassed the gods, himself a god, in power; Betore whose vehemence the two worlds trembled Through his great valour; he, O men, is Indra.
- He who the quivering earth hath firm established, And set at rest the agitated mountains;
 Who measured out the mid-air far-extending, And sky supported: he, O men, is Indra.
- 3 Who slew the snake and freed the seven rivers, Drove out the cattle by unclosing Vala; Who fire between two rocks hath generated, In battles victor: be, O men, is Indra.
- 4. Who hath made all things in this world unstable, The Dasa colour humbled or destroyed it; Who takes the foe's possessions, as a gambler Stakes of his rival; he, O men, is Indra.
- 5. The terrible one, of whom they ask, 'where is be?' Concerning whom they also say, 'he is not'; Like player's stake the foe's wealth he reduces, Have faith in him; for he, O men, is Indra.
- He who of rich and poor alike is helper, And of the supplicating Brahman singer; Who fair-lipped³ alds the one who presses Soms, Making the stones work; he, O men, is Indra.

 $^{^1\,}G$ the translations of Hillebrandt, LR, 40-41, and Macdonell, VRS, 45-56 and HV, 49-50.

⁹ Subpra is probably to be rendered 'fair-lappeal' in the sense of 'well-lappeal'.
On may recall the problement laps of the Transirif figures in the Elephants Caree (Farqubar, Fill. 199) or in the black Mr. Jeedies Ransale's status at Bombay. Cf. Macdoult, VES, 50. Note also the plarase proprietly disper III. 32, 1 'having puffe out his tipe'.

- 7. He under whose control are steeds and rattle, Clan-villages and every kind of charlot: Who bath begotten sun and dawn of morning. Gulde of the waters; he, O men, is Indra.
- 8. Whom rival hosts appeal to, joined in battle, On both sides foes, the farther and the nearer; On self-same chariot mounted two invoke him. Each for his own self; he. O men. is Indra.
- 9. Apart from whom men never are victorious, Whom they when fighting call on for assistance: Who is for every one a match, who moveth The things immovable: he. O men. is Indra.
- 10. Who with his arrow slays the perpetrators Of grievous sin, when such fate not expecting; Who pardons not the arrogant man his arrogance', Who slays the Dasyu; he, O men, is Indra.
- 11. He, who discovered in the fortieth autumn Sambara dwelling on the lofty mountains; Who slew the serpent as he lay defiant, The son of Danu; he, O men, Is Indra.
- 12. Who as the mighty seven-rayed bull releases The seven streams so that they flow in torrents; Who, bolt in arm, spurned Rauhina the demon As he scaled heaven: he, O men, is Indra-
- 13. Even the heavens and earth bow down before him. And at his vehemence the mountains tremble. Who, bolt in aim, is known as Soma-drinker, With hands bolt-wielding, be, O men, is Indra.
- 14. Who with his aid belps him that presses Some, Him that bakes food, sings praise, does sacrifices; For whom prayer is a means of strength, and Soma, And this our offering; he, O men, is Indra to. Faithful and true art thou, the fierce, exacting
- Largess for Soma-presser and food-baker; We being evermore of thee beloved. Would, Indra, with strong sons thy worship utter

It will be necessary to add only a few comments, since Vedic warfare has been sufficiently treated in the sections

Or: 'Who yields not to the borsting for In buldness'. Macdonell, HR 50. Or : 'address the synod', Mactionell, HR. 50: Hillebrandt, LR. 41.

of Chapter III on 'Aryans', 'Dasyus' and 'Conquest of the Land'. As the gods chose Indra to be their champion against Vritra and the other atmospheric Dasyns (vv. 11-12) so the Aryans chose him to be their champion against the earthly Dasyus (vv. 4, 10). Indra is a match for every one, whether demon or man (v. 9). The resources of language are exhausted in describing his irresistible might: He is a bull, mightier than the mighty, the lord of strength, the might-lord of might, having a hundred powers2, etc. If forty or more epithets celebrate his matchless strength. about the same number glorify, him as a victorious warrior. Indra made a broad place for the afflicted sky (or for Dyaus, VI, 18, 14) by slaying Vritra, that is to say, by sending a thunderstorm and elearing the atmosphere of dust and mist. He filled the spacious mid-air, and by battle gave enlargement and freedom to the gods (VII. 98, 3; III. 34, 7). Such enlargement and victory he gives also to his friends and worshippers among men (IV. 24, 2, 6; X. 43, 11), that is, to those who press some for him (II, 12, 6, 14-15). For the 'Strong Soma' makes Indra strong (v. 14) and everything connected with Indra is also strong.

> The vessel of the strong flows forth, the flood of meath, Unto the strong who feeds upon the strong, for drink; Strong are the two Adharyus, strong are both the stones, They press the Soma that is strong for him the strong; Strong is thy thunderboit, yea, and thy car is strong; Strong are thy bay steeds and thy weapons too are strong, Strong ladra, thou art lord of the strong gladdening drink, With the strong Soma, Index, satisfy thyself.

⁽II. 16, 5-6, Griffith's translation with slight changes.)

The word Dasys or Dasa is ambiguous, referring as it does to both human

fees and demon focs. Both are Dasyan, Rends, farth Cf. Encorrell, NW. I. 110.

"Appalling by their entl, their fenelity, their femiloit, rentric, they the
Algorithm) seemed to the whate settlers derict and not more." Or postupe it was
this way. As the Darsa were conscient after the integer of the Kentriyas, so the

at the Arrans.

³ V. 40, 1, 4; VI 20, 3, X, 22, 3; H, 16, 8

Thus it is 'in the exhibitation' of Some that Indra performs his martial as well as his cosmic exploits. No one can overcome him in battle when he has drunk of it (VI. 47, 1). The epithet Somapa, 'Soma-drinker' (v. 13) is characteristic of him. It is well known that men offer to the gods in sacrifice the food and drink which are regarded by them as the best. The offering of Soma to Indra presupposes, then, the use of strong drink as a beverage by the Vedic Aryans. Indra after the analogy of a Vedic warrior is heartened for the fray by Soma. We may reason from the effects ascribed to Indra's drinking of Soma back to the results in the way of victory, winning of plunder, etc, which the Ksatriva warrior doubtless ascribed to the use of strong drink as a producer of valour in battle. It is from this point of view that Soma is called a 'victor, unconquered in fight' (I. 91, 21)' Indra as the war-god of the Vedic Indians humbled the Dasa foes and gave their possessions to his worshippers (vv. 4-5). He dispersed 50,000 of the black race and rent their forts (IV. 16, 13). Rival Indra-worshipping focs' appeal to him for assistance. without which men never are victorious (II, 12, 8-9). Through Indra's help the Aryan wins cattle (VI, 26, 2) and corn-land (urvara, VI, 20, 1; 25, 4). The following are samples of Vedic prayers to Indra for help in battle.

Indra, bestow on us the power heroic, Skilled and exceeding strong, that wins the booty, Wherewith, by thy assistance, we may conquer Our foes in battle, be they kin or stranger. VI. 19, 8 (Griffith's translation).

The cup whence Indra drinks the draught is present; . The Amrit dear to Indra hath been dranken, That it may cheer the god to gracious favour, And keen for from us hatred and affliction.

^{. &#}x27;When 'Pussylout' Johnson was 'ragged' in the streets of London by the Medical students, they carried banners inscribed with the words, What won the war? Rum!" New York Times, November 14, 1919.

²We are reminded of the Great War, in which Protestants and Catholics, Muhammadans and Jews fought on both sides

Therewith enraptured, hero, slay our foemen, Th' unfriendly, Magharan, be they kin or strangers: Those who still aim their hostile darts to smite us, Turn them to flight, O Indra, crush and kill them.

V. 14. 16-17 (Griffith's translation).

These passages reveal at least so much of history as to make it clear that the Vedic Indians were often et war among themselves. The references to historical events are confined largely to the military exploits of trihes and individuals, just what we would expect in hymns composed almost entirely for sacrifices instituted and financed by Kṣatriyas. Indra, the war-god of the Vedic peoples was naturally also the patron and guide of the Aryans in their micrations castward.

5. HEROIC DEEDS WROUGHT BY INDRA,-

In the O. T. the 136th Psalm is n hymn of praise to Yahweh for his wondorful worke in creation and redemption, each stanza ending with the refrain 'hie loving kindness endureth for ever'. In the cosmic sphere Yahweh made the heavens, spread out the earth, end made great lights, the sun to rule by day and the moon to rule by night. In the sphere of deliverance and redemption Yehweh smote Egypt in their first-born, brought out Israel from among them, divided the Red Sea and made Israel pass through the midst of it, overthrew Pharoah and his host in the Red Sea, led his people through the wilderness, smote great kings, Sihon King of the Amorites and Og King of Bashan, and gave their land to his people for a heritage. Similar exploits and works of deliverance are ascribed to Indra . In the cosmic sphere as we have seen Indra generated the matchless lightnings of the sky, slew Vritra and released the waters, pierced the cattle stall, found heaven and earth which were hidden, made the earth visible to heaven and the sun visible to earth, separated

¹ Oldenberg, RV, 167-168.

⁹ See especially L 32; H. 12; HL 33 translated entire, pp. 178 ff, 192 ff, 187 ff; also H 15 and V 49

and supported heaven and earth, spreading out the earth and fixing the sky, when he was born for the Vritra fight'. In this way Indra generated the snu, the sky and the dawn (I. 32, 4). In the human sphere Indra, the warrior god, wrought deliverance for many Aryan chieftains. arrested the floods so that Turviti and Vayya could cross over (II. 13, 12); on behalf of Dabhtti he overcame Cumuri and Dhuni with sleep, and bound the Dasyus without cords (II. 15, 9; II, 13, 9); for the sake of Divodasa he demolished Sambara's nine and ninety forts (II, 19, 6); he broke down the forts of Pipru and helped Rijisvan at the slaughter of the Dasyus (I. 51, 5); he through the prayer of the Vasisthas helped Sudas in the battle of the ten kings (VII. 33, 3) and drowned his foes in the Parusai (VII, 18, 9), etc., etc. Such deliverances of ancient Aryan heroes on the part of Indre remind us of the similar exploits of Yahweh on behelf of Moses and Joshna, Samson, Deborah and Barek. Gideon, etc.

It is on the basis of he exploits that Indra is declared, to be unique and meomparable. The word eka 'one' 'dione' is often applied to Indra to express his uniqueness'. He is unique in sheking what is unshaken and in slaying Vritra (III. 30, 4-5), in filling earth and heaven with food and treasure (III. 30, 11), in becoming master of the kine (III 31, 4) and in being the king of all the world (III. 46, 2); also in being the one strong champion of the golds in the Vritra-fight (VI. 7, 8), in conquering men (VI. 18, 2), in subduing people to the Aryan (VI. 18, 3), in bestowing treasure (VI. 30, 1), in being lord of wealth (VI. 31, 1), etc. 'Indra is incomparable. He has no match among

¹ 15, 13, 5, 7; 1, 32, 1, 5, M, 17, 1, 3; Viff 85, 10; V, 29, 4, VIII, 78, 7; 2 Very Velle deity as a "special god" is unique in his own department, but the uniqueness of Indra is emphasized.

³ The prosages in which the uniqueness of Intra is emphasized are chiefly found in books III, and VI, the hymn books of the Kevika and Bhamilylis claus. In the passages quoted from Manada III, food and Irecause are linked up with the shapther of Vitra and the wisning of the (heavenly) kine; in those quoted from Mancda VI, wealth is connected expectedly with fundar's explors as a war ged.

those born or to be born (IV. 18, 4). Even the two boundless worlds are but a handful to him, when he seizes them (III. 36, 5). With his greatness he has filled earth and heaven, and even beyond this his greatness extends (IV. 16, 5). Heaven trembles at the birth of his blinding splendour (IV. 17, 2). Indra makes the non-existent existent (VI. 24, 3). The unique and incomparable character of Indra is without doubt grounded ultimately upon the uniqueness of the thunderstorm with its accompaniments of lightning, wind and downpour of rain.

6. CHARACTER OF INDRA.a) Indra's relation to Varuus. In nine hymns Indra and Varuua are addressed conjointly as a dual divinity, While they seem to have originated in different circles, Varuna perhaps among the Vasisthas and Indra among the Kusikas and Bharadvaias, yet on the basis of common attributes and functions they are, as it were, amalgamated. The uniting bonds are their similar cosmic qualities. If Varuna as the 'encompassing sky' includes day-sky, nightsky and rainy sky, Indra through the lightning flash, whether by day or night, lights up the whole heaven; and by finding the light at sunrise does the same thing, while with the release of the heavenly waters there is little difference between the two gods as regards 'rainy' character In most matters referred to in the nine hymns Varuna is assimilated to Indra, that is to say, Indra-Varnua functioning as a unity drink Soma, overcome Vritra, hollow out the channels of the waters, set the sun in motion in the sky, aid in battle, grant victory, bestow wealth and prosperity, cast their mighty bolt against the wicked, and bind with bonds not made of rope'. But there is revealed at the same time a consciousness that

J. C. 62 86 15.

 $^{^2}$ Other things may have contributed to this union as e.g. political alliances between tribes or the development of the ritual

^{*} Ur VI 68, 2, 10-11; VII 82, 3, IV. 41, 4, 7, 11; 1-17, 7-8, VII 84, 2,

however closely allied Indra and Varuna may be in cosmic matters, yet in the most fundamental things they will not fuse. Varuna as a sky-god can easily be made to wield the thunderbolt and slay Vritra, but Indra is ethically too far removed from Varuna to be easily assimilated to him'. Hence in the Indra-Varuna hymns there are drawn no less than six contrasts between Varuna and Indra, Varma is king, possessor of the most-exalted Asurahood, whose will' the gods follow; whereas Indra loves battle and stirs the dust of conflict (IV, 42, 2, 5). Indra with this bolt slays Vritra, while Varuna as a sage (r/pra) keeps to the settlements (VI. 68, 3). Varuna is a god of peace and quiet (ksema), whereas Indra associated with the Maruts is a warrior seeking glory (VII, 82, 5-6). Indra in tha conflicts slavs the Vritras, whereas Varuna evermore guards his ordinances (vrata VII. 83, 9). Prayer is made that the wrath of Varuua may pass us by, while Indra is hasought to make wide room (VII. 84, 2). Varuua uphelds the torrified' people, while Indra smites resistless formen (VII. 85, 31. In these significant antitheses Varuna is represented as watching over his ordinances, as one whose will the gods follow, as a sage who in peace and quiet abides in the settlements, and as one whose anger punishes the avil-doer. On the other hand, Indra loves battla, smites Vritra and makes wide room for gods and men. The difference is manifest. In connection with the Zoroastrian reformation, as we have seen. Indra was reduced to the status of a demon, while Varuna -the Ahara of the Avestawas exalted to the supreme position. In India, however, the fortunes of these two chief gods of the Vedic pantheonrivals, as it were, for supreme honour-were the reverse of what they were in Iran. The influence of the soma-

Some indications of an attempt at assimilation are found in the seventh and tenth books

t kratu

³ Pravikta from rif 'to slink away frightened' (Oldenberg Rv. Noten). Geldner (BiV. Glosar) derives it from rie 'to separate' heurs 'chosen' people.

cult and of both Brahman and Keatriya sentiment told in favour of Indra. Varuna was too remote and inflexible, too august and holy, to be popular. Hence the popularity of Indra gradually increased at the expense of Varuna. For in the Brahmana period Indra became chief of the Indian heaven, while Varuna was reduced to the lordship of lakes and pools.

b) Indra's relation to Rita. In general it may be said that each Vedic deity, while respecting the 'order' of the other departmental gods, especially represents and protects the order within his own department. Neither gods nor mortals infringe the ordinances (trafa) and statutes (dhāma) of Indra, (III. 32, 8; VI. 21, 3); and on the other hand. Indra as a deva does not infringe the statutes of the devss, he they Adityas, Vasus or Rudriyas (X. 48, 11). Within his own sphere Indra is strong and active through law (dharman X. 44, 1). He distributes through law the plants and the streams (IL 13, 7): and the rivers follow his ordinance (I. 101, 3). Through rifa he lighted up the many dawns (VI. 39, 4). The Siinadevāh are not to spproach Indra's rita (VII. 21, 5). Thus the emphasis is on the cosmic and ritualistic. There is little reference to rita in the ethical sense. It is to be remarked, however, that three stanzas in praise of rife (vv. 8-10 of IV. 23) occur in the middle of an Indra hymn, containing the notable lines:

The thought of Bita stayeth crookednesses (v. 8); and Of Bita sure and firm-set are the bases (v. 9).

The first line contains, or at least we would like to read into it, tho thought of the supremacy in conscience of the moral law, and the function of the moral law in making sin known and so checking it. Neither line, however, is closely linked up with Indra. As consciousness has the three aspects of knowing, feeling, and willing, so pita has

¹ Oldenberg, EV. 94 97; Macdonell, VM, 65-66.

Cr. "By the law is the knowledge of sin". From 111 20.

three strands of meaning, cosmic, ritualistic and ethical. Varuna is the Lord of ethical law, Agni of ritualistic law and Indra of cosmie law as displayed in the flash of the lightning, the roar, of the thunder, and the downpour of the waters. Varuna is depicted as a king scated on his heavenly throne, while Indra is sketched as a warrior hurling the bolt at Vritra or leading the Arvans in their struggle with the aborigines. The one is characterised by 'passive sway'; the other, by 'energetic action'. Being primarily a storm-god, Indra manifests a shifty and arhltrary temper as compared with Varuna. Thus Indra is represented as having shattered the wain of Usas with his bolt (II, 15, 6), quarrelled with the Maruts (I, 170, 2) and fallen out with Surya over the heavenly chariet race, Doubtless cosmic myths underlie these episodes. If one thinks of Indra's stormy nature, his love of the intoxicating Soma, his military braggadocio and his uxoriousnessqualities doubtless all found in the Vedic 'Yunkers' - one is not surprised that he does not cut a better ethical figure than he does. But even so Indra is the apotheosis of heroic action rather than of meditative calm. The 'strenuous life' in the person of Indra receives the praise in the largest number of hymns addressed to any god in the liv. It is striking that the national god of the Vedic peoples oxemplifies this quality - a quality which the Indian Aryans lost more or less through the influence of the climate and of fusion with the aborigines. That the majestic and reposeful Varuna shows up better than the active, Somadrinking, fighting Indra simply illustrates the fact that a negative character who does nothing bad appears often to much better advantage than a man of action who does great deeds, but commits many faults in the doing of them.

^{&#}x27;Macdonell, VM 64.

Not a very gallant procedure on the part of Indra to strike the haly Dawn? Mythologically, either the obscuration of the dawn by a thunderstorm, or the rathertion of ther light after the riving of the sun. Oldenberg, R.V., 169; Macdonell, YM, 63; 6tffitth, Enr. Trans. 2nd Ethico, Vol. I. 1895, p. 492, footnote 8.

- c) Indra's relation to the wicked. Indra smites the earthly foes of the Aryans as well as the atmospheric Vritras and Asuras. With his arrow he slays the perpetrators of great sin, and pardons not the arrogant (II. 12, 10). He is often called 'guiltless' (III. 32, 9, etc.). In the earlier hooks of the Rv. there is little more than this. In the seventh book, however, Indra is once represented as a 'saviour even from great sin' (VII. 20, 1); there is a reference to the sinless Varuna as the beholder of sin (VII. 28, 4); and we read that both the crooked (vrijina) and the deceiver lie in the net' of Indra (VII. 104, 13). It would seem that in the Vasistha book, which so exalts Varuna, Indra also gets, at least by assimilation to Varuna, a considerable degree of ethical character. For he (like Varuna) observes sin, punishes the sinner, and saves from even great sin. The most notable passage, however, is found in X. 89, 8-9, probably a late hymn:
 - Indra thou art a clever debt-exactor;
 As sword a joint, so cleavest thou the wlcked*,
 Who break the law of Varupa and Mitra,
 Even as people wrong a friend and ally.
 - Those men of evil ways who break agreements, And injure Varuna, Aryaman and Mitra,— Against such enemics, puissant Indra, Sharpen thy heavy, strong and ruddy weapon.

On the whole, then, Indra in his ethleal function is represented as little more than an executioner who punishes those who break the laws of the Adityas. With him the chical is not primary as with Varuua, but secondary. It is something, however, that he serves Varuua, and the Adityas at least in the capacity of executioner.

 Indra and the Maruts. — Thirty-three hymns are devoted to the Maruts, besides several in which they are addressed conjointly with other gods, especially with Indra.

¹ prassif. cf. the plin, 'norse' of Varuna, tripse ht 'crooked'.

Eleven in 1 . eleven in 1, and eleven in all the other books,

They constitute a band or troop', the sons of Rudra and of the cow Prisni'. Their close connection with Indra as his helpers in the fight with Vritra throws light upon the nature of Indra, on the principle that 'a man is known by the company he keeps'. The following hymn sets forth their activity:

To the Manuls, I. 85.

- As wondrous sons of Rudra, racers of the sky
 Who on their course, like women, beautify themselves,
 The Marnts have indeed made heaven and earth increase;
 Th' impetuous men rejoice in rites of sacrilice.
- Having waxed strong, they unto greatness have attained.
 In heaven the Rudras have established their abode;
 Singing their song and generating Indra-might,
 Glory have they put on, the Prish-mothered ones.
- 3. When they, con-mothered, deck themselves with ornaments' With brilliant weapons arm themselves, the shining ones, Then every adversary and foe they drive away, And fatness flows abundantly along their paths.
- Who as great warrors shine resplendent with their spears' Shaking with might even the things unshakable, When ye, O Maruis, swift as thought have to your cars The spotted mares yoked, ye whose hosts are powerful,
- When ye have soked the spotted mares to chariots, Speeding the stone, ye Maruts, in the conflict, Streams of the riddy steet of heaven discharge they', And as with water-skin carth's surface invisten.
- 6. Let your swift-gliding racers bring you bitherward, Advance swift-flying with your mighty arms outstretched; Be scated on the straw, the wide scat made for you; Delight yourselves, ye Maruts, in the honied juice.
- Strong in themselves, they have mereased through mightiness, Have climbed the sty, and made themselves an ample seat. When Vispu helped the Soma-drunken bull of heaven, Like birds on the dear sacrificial grass they sat.

¹ gana and kardhas.

^{3 (}hange of second to third person

- 8. Like heroes bold, like warriors speeding in the fray, Like glory-seekers, they in fights array themselves; All creatures are afraid of the fierce Marut-band, Like kings of aspect fierce and terrible are the men.
- When Tvastar, skilful workman, turned the thunder-bolt, Well-wrought, with thousand edges, and of gold compact, Then Indra took it to perform his manly deeds, Slew demon Vittra and forced out the water-flood.
- 10. Up have they pushed the bottom of the well with might, Even the firm cloud-mountain have they cleft in twain; Elowing their pipes the Marut heroes bountiful In Soma's rapture have accomplished glorious deeds.
- 11. Prone have they laid the heavenly well so as to flow, For thirsty Gotzma ponred they out the water-spring. Of brilliant splendour they approach the sage with help, By mighty deeds may they his wishes grafify,
- 12. The shelters which you have to give the zealous Extend them thresfold, Maruts, to the pious; Extend them to us also, O ye Maruts, Grant wealth to us with hero sons, ye mighty.

From this and other Rigvedic material the Maruts may be described as follows: They are born of the laughter of lightning (I. 23, 12); are 'sons' 'heroes' and 'males' of the sky (X. 77, 2; I. 122, 1; III, 54, 13);, are brothers who have grown together, all equal in age and of one mind (V. 60, 5; V. 56, 5; I. 165, 1; VIII. 20, 1); are closely associated with the lady Rodast'; shine like tongues of fire and have the brilliancy of serpents (X. 78, 3; I. 172, 1); hold lightnings in their fists and are 'lightningspeared' (V. 54, 11; 52, 13); wear golden ornaments such as armlets or anklets (Khadi), with which they shine like the sky with stars (II. 34, 2); have chariots of lightning drawn by spotted steeds, and yoke the winds as horses to their pole (III. 54, 13; II. 34, 4; V. 58, 7); are playful like calves, and also terrible like wild beasts (VIL 56, 16; II, 34, 1); with thunder and blasts of wind cause the mountains to quake (L 23, 11; VIII, 7, 4); sow the mist, milk the

^{&#}x27;Perhaps a personification of the lightning, since the is described as 'self-luminous' and 'like light', VI. 66, 6.

udders of the sky, cover the eye of the sun with showers, make darkness with the cloud when they wet the earth, and milk the thundering well (*VIII. 7, 4; I 54, 5, 6; V. 59, 5; I. 38, 9); are singers of the sky, who generate Indramight while singing their song, and cleave the mountain while blowing their pipe (V. 57, 5; I. 85, 2, 10); co-operate with Indra in slaying Ahi and Sanbara end in performing all his celestiel exploits (III. 47, 3-4; I. 100, etc.). To sum up the picture of these confederates of Indra and warriors of the sky, they have spears on their shoulders, enklets on their feet, golden ornaments on their breasts, splendours on their chariot, lightnings in their fists, golden helmets on their heads (V. 54, 11).

It is clear from all this that the Maruts are conceived y' as storn-gods, their nature being defined in terms of lightning, thunder, wind and rain. In a thunderstorm there are numerous lightning flashes and peals of thunder, the 'winds' blow, and 'showers' of rain fall. For such a description it is natural to use the plurel. As conceived by the Vedic poets a thunderstorm is a theophany of Indra, who goes forth at the head of his army the Meruts to smite Vritra end release the waters'. We are surprised that Indra had to go outside of his own circle, as it were, and find his helpers in the circle of Rudra. For the Maruts' es the sons of Rudra ere called Rudras or Rudriyas. It may be that the distinction between Agril and Agnis, Rudra and Rudras, U-as and Usasas, Soma and Somas, Vayu and Viyus, etc.' belongs in its very nature to

See Mardonell, VM. 77-81

Index at the head of the heavenly host of the Merate lighting against Vitra and the other atmospheric demons is the Ligredic analogue and anticipation of the later streetly between the Dexas and Awara.

^{&#}x27;That is, collective Fire and individual fires, collective Lightning (in its destructive aspect) and individual lightning flashes, collective norms and individual some-drops, collective Wind and individual blacks of wind. There are no loctess

transparent names and not to an archaic and opaque name like Indra. At any rate Indra had no family of sturdy sons to help him in toil and fight, and so had perforce to adopt as it were, the numerous1 sons of Rudra as his children 2 and co-workers. The Maruts are frankly storm-gods 'racers of the sky', whatever else they may be' whereas Indra is described predominantly as cleaving the mountains and digging the channels of rivers. On the other hand, Indra's characteristic weapon is the bolt (vaira) which is only once placed in the hands of the Maruts (VIL 7, 32). The different terminology employed in describing the exploits of Indra and the Maruts respectively probably indicates that they originated at different times and in different circles. The fact that Indra uses as his soldiers the Marut band of 'storm-gods' is sufficient proof that he too is essentially a storm-god?. We may reasonably expect

or indriges as there are Rudras and Rudriges. There is a Valuna but no Varinga-Possibly it is the unsqueness and evaluation of Varuna and Indea that has precluded any lesser indres or Varunas. To this extent like Allth they are freshout.

Thrice seven or three staty 1 133, 6; VIII. 55, 8 Strone with the Rudras as with sons, I, 100, 5,

[&]quot; Hillebrandt thinks that the name "Rudrus" combines two meanings, "stormwinds' and 'the spirits which cause horm and allness' (VM, III, 201).

[&]quot;If the loves and phenomens of the sky are, under the influence of human analogies, poetically conceived sometimes as animals (Prical 'Cloud-cow' Dans. water-cow, 461 'serpent', ch) and sometimes as men (\arma, Mitra, Indra, Moruts, etc.), it is not at all strange that under the same working of analogy the louds should be postically depicted as mountains and their showers of rain as rivers Cf. Pealm LAV. " "The river of god (clearly from the context the atmospheric river) is full of water". It requires no very vivid imagination to see mountains and loris in the sky, the cloud shapes are so suggestive of such interpretation

[&]quot;4 On the general subject of Index and the Maruts as storm gods the following vivid description of a thunderstorm may be quoted "An auful storm overtool, us. The night settled in. The black clouds echosed the light of every star The effence became as still as the famous half hour of allence in heaven..... Then came the rushing of mighly winds It are med as if all the apirits demoniac as well as celestral (cf. Hillebrandt's theory) were awreging just me and 'meeting in mighty conflict. Then the whole heavens became sheets of luv. North, east, south and west, everywhere the heavens were ablare After the thunders had

Indra bestow on us the best of riches,
Discernment of the practical, good fortune;
Increase of substance, welfare of our bodies,
Sweetness of speech, and wearantness of weather. (II. 21.6)

And to illustrate the enthusiasm and confidence with

which men called upon Indra:

Hurrah, let us invoke large-hearted Indra, Most manly in the fight for gain of booty; Mighty, a very present help in battle, Slayer of Vritras, winner he of riches. (HI. 34, 11.)

CHAPTER VIII.

SOMA THE DEIFTED SACRIFICIAL DRINK

INTRODUCTORY .- Of the three ritualistic gods Agni,

Brihaspati and Soma, the last is, in one respect at least, the most important, since the Soma sacrifice furnished the centre and framework' for the whole Rievedic ritual. As the importance of Agni is suggested by the fact that his hymns occupy the first place in the family books, so that of Sema is indicated by the equally significant fact that one whole book, the ninth, is devoted entirely to his praise. About 120 hymns are addressed to Soma, so that he ranks third in importance in the Rv., if judged by statistical standards. Liko Agni, Soma is a thoroughly transparent deity. His physical nature as the Sema plant and juice was se obvious as to prevent that completeness of the anthrepemorphic process which is seen in the more opaquo gods, Indra and Varuna. The fact that Soma-Haema was prominent in both the Indian and the Iranian ritual proves sufficiently that the divine drink was known to the undivided Indo-Iranian tribes. There are only two references to Haema in the Gathas of Zeroaster, one mentioning Duraosa' 'the averter of death', the standing epithet of Haoma in the later Avesta, and the other alluding to 'the filthiness of this intoxicant's. These allusions are sufficient to prove that the intoxicating Haoma was under the ban of the great refermer'. But in the later Avesta Haoma, like so many others of the old daevas, came back

⁴The Soma sacrifice is the soul (atmit yaphasya IX 2, 10; 6, 8) of the Vedic ritual

Yasna, XXXII. 14

³ Yasna, XLVIII. 10

⁴ Moulton, F.Z. 71-72. Even if the force of these allusions be challenged, the result remains the same. Haoma was certainly pre-Zorosatrian, and the name constantly appears in the Younger Aresta, This means simply that Haoma was banned by Zorosater. See Jukson, Grundries (Irusian) II 643.

again, and according to Yasna IX-X was in almost every respect the same as the Vedic Soma. The details of the following hymn will be compared with the corresponding Avestan account:

To Soma, VIII. 48.

- Of the sweet food I have partaken wisely, That stirs good thoughts, best banisher of trouble, On which to feast, all gods as well as mortals, Naming the sweet food 'honey', come together.
- Hast thou within gained entrance, thou becomest
 Aditi, appeaser of the gods hot anger.
 May'st thou, O Indu, Indra's friendship choosing,
- To riches speed us as a mare the car pole.

 3. We have drunk Soma, have become immortal,
 Gone to the light have we, the gods discovered.
 What can hostility now do against us?
- What, O Immortal, mortal man's fell purpose † †
 4. Joy to our heart be thou, when drunk, O Indu,
 Like father to a son, most kind, O Soma;
 Thoughtful like friend to friend. O thou of wide fame.
- Prolong our years that we may live, O Soma.

 5. These glorious freedom-giving drops by me imbibed Have knit my joints together as straps a chariot;
 - From broken legs may Soma drops protect me, May they from every illness keep me far removed. 6. Like friction-kindled fire inflame me, Soma, Make us more opulent and us illumine:
 - For in thy rapture, Soma, I regard me As wealthy. For prosperity, then, enter.

 7. Of thee pressed out with mind devoted, Soma, Wan and particle are of manual violed.
 - We would partake as of paternal riches. Years of our life do thou prolong, King Soma, Even as the sun prolongs the days of springtime. 8. Be gracious unto us for good, King Soma:
- We are thy devotees; of that be certain
 When might and wrath display themselves, O Indu,
 Do not abandon us, as wished by formen.

I. c. When thou hast been imbabed.

^{2 &}quot;And what, immortal god, the spite of mortals". Macdonell, HR. 80.

- Protector of our body art thou, Soma, In every limb hast settled man-beholding: If we infringe thine ordinances, be gracious As our good friend, O god, for higher welfare.
- 10. May I with that kind friend be close united Who, Lord of bays, when qualfed shall harm me never. As for the juleo deposited within us, India, prolong our years for its enjoyment.
- Allments have field away, diseases vanished, The powers of durkness have become affrighted. With might hath Soma mounted up within us; The dawn we've reached, where men renew existence.'.
- 12. The drop imbilied within our hearts, O Fathers, The immortal drop in mortals hath found entrance: That Soma we would worship with obtation, Rest in his loving kindness and fair favour.
- 13. Uniting with the Fathers hast thou, Sonsa, Thyself extended over earth and heaven. Thee, Indu, would we worship with oldation, And we ourselves become the lovel of riches.
- 14. Ye gods, protectors, speak for us defending; Let neither sleep nor prattle overpower us. May we beloved evermore of Soma With hero sous attended after worship.
- 15 Soma, thou art our strengthener on all sides, Light-finder art thou, enter us, man-techokier Do thou, O Indu, with thine able accordant, Grant us protection both in front and rearward?.

This hynn written by a member of the priestly family of the Kanna describes the effects of Soma when quaffed by mortals. It protects the body, pre-erves from accident, removes illness, banishes trouble, gives joy and comfort, prolongs life, speeds to riches, scares away the powers of darkness, averts hostility, preserves from the wrath and malice of enemies, gives exhibitation, inflames and illumines, gives good thoughts, makes one think one is rich), appeared

So through the drinking of Soma the singer thinks himself to be a Rishi,

the anger of the gods, and makes immortal. In the Avesta likewise Haoma is best for drinking and most nutricious for the soul, heals illness, gives health of body and long life, furnishes prosperity, overcomes enemies, warns off thief, murderer and wolf, is a cause of good exhilaration. and drives away death'. It should be observed that, according to the Vedic hymn just translated, the wonderful effects of Soma in the individual are bound up with and conditioned by, the actual drinking of Soma 2. Soma mounts up with might, and settles in overy limb (vv. 9, 11). With it one is 'filled'. Peoples and mortals in general, and wealthy Kşatriya patrons, besides priests, are referred to as drinkers of Soma, but the evidence is insufficient to show that it was a popular drink'. The Soma-juice as freshly prepared three times a day could hardly have been intoxicating, except when allowed to stand for n sufficient time in which to ferment, as when pressed two days before using

(Hymn X, 119 is clearly a monologue, in which some one, when exhilarated with Soma, boests of his prowess, It is usual to think of Indra as the one 5, but Oldenberg'

Thee I pray for might and conquest,

Thee for health and Thee for healing,

Thre for progress and for increase, Thee for strength of all my body.

Carnoy, Itanian Mythology in volume VI. of The Mythology of Atl Nations, p 282.

^{*} vv. 1, 2, 3, 4, 5, 6, 7, 9, 10, 12, 15.

³ Sarayah IX, 99, 3; Krstaya : III. 49, 1, martyasah VIII. 48, 1.

See Vedic Index under Soms and Sura. It may be that the difference between surd, the evil effects of which were frankly reregnised (VII, 86, 6) and Some was this, that Some was used chiefly for religious purposes and was freshly and hourgically prepared, whereas such was a "commercialised" article of trade. Possibly it was the mode of preparation, sacramental in the one case, secular in the other, that helped to make the difference. At any rate surd was a popular and Soma a hieratic drink.

⁵ So Moir, OST. V. 20 91; Geldner and Karsi, SL 81-83, Macdonell, VM. 65. 6 R.v. Noten, II. 339

following Bergaigne prefers to think of the poet himself as describing his feelings after drinking Soma. Both interpretations are possible and it makes little difference whether the hymn is placed in the mouth of Indra or in the mouth of a priestly devotee who through participation in Indra's drink' became mystically identified with Indra'. Each stanza has the same refrain; 'Have I not drunk of Soma juice?' Leaving out the refrain, the hymn reads as follows:—

Thus even thus my purpose is to win a eow, to win a horse.

Like violent winds, the draughts I drink have lifted and transported me.

As the swift horses move the car, so have the draughts
excited me.
To me has come the hymn of praise, like lowing cow to darling

As carpenter a chariot-seat, so with my heart I frame the hymn.

Not ov'n as more within the eye do the 'five tribes' appear to me.

The heavens and earth themselves are not the equal of even
half of me.

In greatness I surpass the sky, surpass also this spacious earth. Hurrah! let me deposit earth, and set it either here or there. In one brief moment will I smite this broad earth either here or there.

One half of me is in the sky; the other half I cause to trail. I am superlatively great, have been exalted to the skies.

Such a monologue, as the above, shows clearly that Soma, when imbibed, did produce a certain exhibitantion or intoxication, call it what you will. A distinctive characteristic of the experience was a feeling of strength and greatness. The poor man thought himself rich (VIII. 48, 6). Psychologically, Soma would never have been thought of as stimulating the strength of Indica. If it had not been known in

¹ Soma is called in IX, 85, 3 the 'soul (abso) of Indra', and even 'the generator of Indra', IX, 98, 5.

² In fact, the ascription of the hymn to Lata Austra, 'Indica at Lara' or 'Indica at

experience to stimulate the strength of men. In Vedic battle doubtless each side was fearful of the other, and atraid to make a desperste onset. Whatever, then, like Soma (or surê, would help to banish 'collateral trains of thought' ennected with caution, personal safety, etc. and furnish a teeting of strength nutil the rush of battle was accomplished, would ordinarily bring about victory. Soma in IX. 77, 1 is called 'the bolt (taira') of Indra'. The rush of warriors in battle was due to Soma, just as the rush of the lightning.

The mysterious qualities of the Soma juice as seen in its exhilterating the warrior and helping him to perform valiant deeds were also seen in the inspiration which it gave to the priestly singer and in the healing it furnished to the sick. Soma himself was n singer, and as such was a source of inspiration to singers. He is called 'generator of hymns..... leader of poets, Rishi of sages' (IX. 86, 5-6). He is 'Rishi-mided' and a 'Rishi-maker'. Soma, like Brhaspati, was a 'specialist' in the work of inspiring hymns. Thus in X. 119, 2 the poet sings:

'Like violent winds the draughts I drink have lifted me and borne me on ".

Somn was also the sick man's medicine (VIII. 61, 17). Thus, as shown above, god Soma was the guardian of men's bodies, occupying their every limb, knitting together their

J. I. 82, 5 suggests that Some stimulates the sexual instanct. For the similar effect of wine compare Ora. XLX. 30.56; 2 Sam. XI. 13. Once while in camp in India, a low-casts (Chambe) servant got intoxicated. When expostulated with he replied: "If one does not use strong drink, how can one beget buildren!"

⁴ Similar spiritness sources of the divine afflatus are not unknown in modern times.

^{*} This venimis out of 2 Price 1.21. "Men space from god, being mored (\$250,000), int 'borne slong') by the Holy Spirit's and also of Eph. V. 18.19, "De filled with the spirit; speaking one to another in pastons and bymns and critical source".

joints, proteeting from broken legs, causing ailments and diseases to vanish, and so bestowing long life¹ (VIII. 48, 5, 7, 9, 10, 11). Not only did Some bestow health of body, but also health of mind, giving good thoughts, a sense of peace with the gods, joy, rapture, illumination, forgiveness. Soma is a very wise sage (IX. 12, 4). As such he bestows 'a happy mind, practical skill and mental ability' (X. 25, 1). Here the nature and effects of Soma are idealized, very much as wine is idealized in the lines of a certain Christian hymn'. Victory over enemies, composition of hymns, and recovery from disease, as manifestations of the grace of Soma, are well illustrated in X. 25, 9-11.

2. THE ORIGIN AND HABITAT OF SOMA .-

(a) Soma's heavenly origin.—Like Agni Soma came from heaven'. The celestial origin of the two is mentioned once together:

Matarisvan fetched one of you from heaven;

The eagle twirled the other from the cloud-rock. I. 93, 6

There is reason for holding that Matarisvan and the eagle, although bolonging to different myths, are yet 'mythological synonyms', both referring to the lightning form of Agni. There is no doubt in the case of Matarisvan. Bloomfield makes it highly probable for the eagle also 's. There is no difficulty in understanding the eagle as the lightning, since Agni is often called a bird, and is once termed 'the eagle of the sky''. The Maruts, whose lightning-nature is so manifest, are also called 'eagles of the sky' (X. 92, 6). Soma is represented as a 'child of the sky', whom, though heavenly in origin, earth received.\

¹ The writer recalls meeting with an Indian civilian in 1890 who declared that if it had not been for whiskey he would have deed long ago

VIII. 48, 1, 2, 1, 6, 9.

[&]quot;He brings a poor vile sinner

Into his 'house of coine'".

The Legend of Soma and the Engls, JAOS, 16, (1890), pp. 1-24. Bloom-field's interpretation is favoured by Mardonell, VM 111-112, and Keith, IM. 47.

^{*} Dirah syenah VII. 15, 4.

High is the birth of thee, the plant: Thee being in heaven the earth received. IX. 61, 10.

The eagle brought Soma from afar, from heaven,

flying swift as thought 1. That is to say, the lightning as the eagle of the sky darts down from the cloud, hringing with it the nectar of the skies, in other words 'the water of the cloud'. In one hymn especially the myth of the rape of Soma is summarized:

IV. 27. To the Eagle.

(Agni the lightning)

1. While yet within the womb I was acquainted

With all the generations of the devas; A hundred metal forts kept me well guarded, Then with all speed I flew forth as an eagle.

(Soma)

2. Not easily did he effect my capture,

Yet in heroic strength was he triumphant; As bountiful he far outstripped the niggards,

O'ertook the winds and passed them, he the mighty, (Poet)

3. And so when from the sky down rushed the eagle.

Or when from there (the gods) brought him, the bounteous; Then furious in his mind Krisanus, th' archer,

An arrow aimed at him and loosed the how-string. 4. From heaven's zenith swift the eagle bore him.

As from afar the Asvin pair bore Bhujyu4: Then downward fell meantime the flying feather Of that bird hasting forward on his journey.

The myth of the heavenly origin of a divine beverage

¹ IX. 68, 5; 77, 2; 11H, 89, 8.

^{21.} e the cloud-womb, in which the lightning form of Agni was shut up by a hundred metal forts, as it were,

Probably a Gandharva, a guardian of the celestral Soma. Krisanu is possibly to be identified with the demon Kares int mentioned once in the Avesta (Yasna IX. 24). Krishu may be compared with Vritra.

The translation of this line gives only the general sense as gathered from other passages. For the various attempts to interpret or sweed indratatan see Ludwig, l'ebersefrung II, 593, V. 468; Pischel, VS I. 206 210; Bloomfield, JAOS. 16 (1896), 13-24; Hillebrandt, LR 29; and Oldenberg, Re Noten, L 292-293

conceived as a kind of honey-mead, may be Indo-European. At any rate there is the myth of the nectar-bringing eagle of Zous and the metamorphosis of Odin as an eagle to carry off the mead, both myths agreeing in general with that of the Soma-bringing eagle of Indra? These three myths clearly refer alike to the downward swoop of the lightning-bird bringing therewith the rain as the madhu or amrita of the sky.

b) Soma's carthly habitat.—In several passages Soma is called 'mountain-dwelling', and once 'mountain-grown'. His origin is closely connected with 'rock'. While the same ambiguity may beset some of these texts as adheres to the special vocabulary of Indra ('mountains' and 'rivers' as ofther heavenly or carthly), yet it is clear from both the Rv. and the Avesta' that Soma-Haoma was a mountain-grown plant. It is connected with the mountain Haratti in the Avesta, and with Majavant in the Rv.

As draught of Maujavata* Soma, so doth, Th' enlivening Vibhidaka delight me. X. 34, 1.

1 Skt madhu, Gr. 11600, Anglo-Sexon Mede, Log Mead.

Oldenberg, RV 176, Macdonell VM 114, Kuhn, HFG 153, 177.

⁴ Mathu because of its wonderful mioneating effects, was conceived as the above of the gods. It must naturally then have been a barreity drink, which was brought down to earth, this being the function of the notest-bronding eagle in the three mythologies. The connection between rain-water and multi-was mifflening explained by the fact that water is a constituent of the honey-med. And the close connection between waters and plants provided a sufficient nears between the rain and the some-ninat.

* giristha 111. 48, 2, V. 43, 4, 13, 18, 1 62 4.

*pariativridh, IX 46 1. *adri \ 85, 2, 1, 93, 6.

According to Yasna X 4, 10-12, 17, Haoma is represented as placed on the high monthain Haratti by a skilled god, whence boly binds carried it everywhere to the heights, where it grew both on the lotty tablelands and in the mountain vallers.

⁶The mountain Maywant (if at was a mountain and not simply the name of a people, cf. (ullebrant), VM. I. 65), being closely connected with the Gundhirist (AV. V. 22, 5, 7, 8, 14) must have been altered somewhere between Bactria and the Punjab. In the Tart, Joans, I. St., 2 and the AV. passages referred to above the Polyvania are taken as a type of distant falk, to which Rodra with his fever-bearing low is enteracted to deeper I. In fact Mayarant is as far of and mysterious as the river Ravii. Possibly both subbody dim reminiscences of the undivided imbolymagnatic control of the problem of the control of the c

3. THE IDENTIFICATION OF THE SOMA PLANT.

Not much need be said under this head. When the Indo-Iranian tribes left the original IE, home, they experienced along with the change in their habitat a change also in their drink. The IE. madhu 'honey-mead' was replaced by the Indo-Iranian Soma. Soma-Haoma means literally 'extract' or 'juice', from su=hu 'to press'1. In the Rv. Soma and madhu are often used interchangeably and each in the form of an adjective may qualify the other'. Soma 'juice' and madhu 'sweet' are too general in meaning to be confined necessarily to any one drink. It is true the Avestan account in Yasna X would seem to indicate that the Haoma juice was produced from a particular plant which grow in a particular place. The preparation of Soma-Ilaoma, as we have seen, belonged to the undivided Indo-Iranian period. With their 'trek' into India tho Vedic Aryans probably had to give up largely the use of the Iranian Soma plant and find substitutes nearer their new home. This was not difficult. Besides the various Sarcostemmas' there was the Afghan grape, the possibility of a preparation from hops as suggested by Max Müller. or from sugar-cane; or, as recently suggested by E. B. Havell', from ragi, the common millet', from which an intoxicating drink is still made in the Eastern Himelavas.

In both Veda and Avesta the Soma plant is described as

¹ Maibu seldom occurs in the Avesta and then only in the sense of honey, never in that of Soma See Hillebrandt, VM I. 238; Oldenberg, P.V. 268.

² Soma is waddamaān 'honied' (IX. 96, 13), and madhu is sompa 'Soma-like' (III. 53, 10)

having hanging branches', and a yallew celeur'. Meuntaingrewth, yellew celeur and hanging branches (?) are the two or three points in which Veda and Avesta agree in the description of the Soma-stalk.) It is most prebable that this is a true description of the plant used fer Soma during the undivided Indo-Iranian pariod. The technical expressions 'stalk', 'yellew', 'meuntain-grown', etc. were so firmly imbedded in the Soma-Haoma ritual as te reappear in both the Rv. and the Yeunger Avesta. While in Persia there was less prebability of a break in the tradition, in India, as shewn above, substitutes most likely had to be found for the ancient Soma plant. Substitutes of such a nature ' would naturally be chosen as would best conform to the traditional description of the Some plant and juice, and in any case the technical terms of the ritual would be retained. even If there was a lack of perfect correspondence'. Since the Sema sacrifice was the 'seul' of the Vedic ritual and the three dally pressings constituted the framework in which practically all of the gods were worshipped, it is clear that large quantities of the plant used for the sacred liquor must have been necessary. It is difficult to think of such quantities being brought from a distance, unless perhaps the plants could be cleansed and stored for future use, as is the custom of the modern Parsees". But, as said before,

¹ Natchiatha fiv. 111. 53, 14 according to Hillebrandt (VM I 14), a name of the Sona plant as baring branches that bend down, and numpiana (nam to bend) with bending sprouts, Mill's translation of Yarov IX 16. Unfortunately foll certainty attaches to the interpretation of neither word.

ertuinty attaches to the interpretation of neither word.
³ Hart 'vellow' (Rv. IX. 92, 1), and zātri 'golden hued' (Yasna IX. 16, 30).

Vedic amáu. Avestan sau

In this respect the Soma secrament may be compared with the use of wine in the Holy Commusion of the Christian Church. The liquor used is grape-june fermented, or another the use of the second of the Christian Church the grape juice. Here the colour is the escential thing, for it must be red like blood.

³ Jivanji Jamsholji Medi, Art. Haowa ERR. VI. 506-510, says that twigs of the Sona plant, a species of Ephelra, are brought from Perfa to India, where they are washed and purified and then laid aside for thiries months and thriten days. If properly cleaned and stored they can be used several years alterstants

it is probable that some Indian plant or sbrub growing not too far away from the Vedic settlements was used for the preparation of the sacred drink' perhaps as a substitute' for the original Iranian plant. Whatever it was, it flourished during the rainy season, swelling with milk (II. 13, 1). generated and strengthened by Parianya, the deified raincloud (IX, 82, 3; 113, 33). It had a stalk (amisu) which was ruddy (VII. 98, 1), and the whole plant was called andhas'. According to the later ritual the Soma shoots had to be purchased from a Sudra. This transaction was made the subject of a dramatic representation, one of the earliest anticipations of the later drama, The Sadra was not merely a trader in Soma shoots but also an impersonation. as Hillebrandt thinks, of the Gandharva (e. g. Krišanu) who held back the celestial Soma 5. This would seem to indicate that the Soma shoots came from a non-Arvan tribe, such a tribe as the Kikajas, who apparently are mentioned in connection with the Soma plant.

³ To distants the possibility of there being nove than one plant fit to produce stom, reference may be made to the "row tree! of Brazil which yields a quantity of milk especially at sonzie, the milk after being drawn growing yellow; the Masserauchba, a milk-tree also of Brazil, concerning which an observer writers. We cut several nother in the bark of some long of this tree that halis on the ground for a month, and in a muste the rich milk was coping out far great quantities, none of which we collected in a base, Alisted is with surface, statest is, and used if for supper and breakfard* (W. A. Cook, B., Horse, Cance and Float through the Widersers of Brazil, p. 274); "the Carnolba Palm, which yields a white liquid lake economic milk* (sp. est p. 375); and ceptain berranges used by the Crede indians, concerning which Boosetch worde, "They had a wool drike made from howy and water, besides nucher unds from fermeted corn, which basted much 'the elder,.... also the Illack Drick, a bitter beverage breved from the carched leaves of a small sharsh* (WW I S. 4.8).

According to Saukhayana III. 20, 9 11, in case the recognical Soma plant was not artifole, it was permitted to take as a substitute the plant most recembling the one recognised by erdinary mage, but the words of the ritual were not to be changed. Quoted by Hillerbrandt, JM I. 23.

² Cf Yasua X. 3 I praise the cloud and the waters that made thy body to grow upon the mountains. See Hillerhrandt, VM. I 56 57.

⁴ Liymologically the same as the Gr. 2002; 'Rower'

[&]quot; Hillebrandt, VM I 81; Fedic Index, II 475.

Mid Kikatas what de thy kine, O Indra?
That tribe nor mixture' pours nor heats oblation;
Bear thou to us the wealth of Pramaganda,

Give up, O Maghavan, to us the 'low-branched'. III. 53, 14.

4. THE SAGNAMENTAL PREPARATION OF THE SOMA JUICE.
Of the Soma hymns translated above, IV. 27 describes
the bringing down of the heavenly Soma by an eagle,
while VIII. 48 and X. 119 depict the effects which spring
from the drinking of the divine intoxicant.) The hymns
to Soma in Book IX are addressed to Soma Pavamäna, that
is, to Soma while in the process of passing through the
filter. Two of these hymns are herewith reproduced on
the basis of Criffith's translation with certain changes:—

To Soma Pavamāna, IX. 1.

- By most exhibitanting stream
 And sweetest, Soma, filter thee,
 Pressed out for Indra as his drink.
- Fiend-slayer, present everywhere,
 He through the wooden trough has reached
 His seat, his metal-wrought abode.
- Be thou best Vritra-slayer, best Granter of bliss, most liberal, Our noble patrons' wealth increase
- Flow onward with the juice unto The banquet of the mighty gods.
 Flow unto victory and fame.
- O Indu, we draw nigh to thee, This is our object, day by day, To thee our wishes are addressed.
 - By means of the unfailing fleece
 The daughter of the sun doth cleanse
 Thy Soma that is streaming forth.
 - Him seize and hold fast in the fight Ten slender maidens, sisters all, In the decisive day of war.

^{&#}x27;The word dair rendered 'mixture' means 'the milk that serves for mixing with Soma'.

- 8 Him send they forth, the virgin band, They blow the bagpipe musical; Threefold protection is the jute.
- Milch-kine inviolable anoint
 The infant Soma with their milk,
 Soma for Indra as his drink.
- In the wild raptures of this draught, Indra slays all his enemies;
 The mighty one bestoweth wealth.

To Soma Paramana, IX. 28.

- Sent forth hy men, this mighty steed, Lord of the mind, who knoweth all, Runs to the woollen straining-cloth.
- Within the filter hath he flowed.
 This Some for the gods effused, A. Eintering all their carbons worlds.
- Resplendent is this deity, Immortal in his dwelling place, , Foe-slayer, feaster best of gods.
- Directed by the sisters ten, Bellowing on his way this buil Runs onward to the wooden vats.
- This Pavamāna made the sun To shine and all his various worlds, Omniscient, present everywhere.
- 6. This Some filtering himself, Flows mighty and infallible, Slayer of sinners, fearting gods.

The preparation of Soma was the supreme ritualistic performance of the Rigredic religion. There were three distinct stages in the operation, the pressing, the filtering and the mixing, of the sacred liquor. The teremonial was elaborate and costly. It is difficult to get a clear picture of all the details, but happily this is not necessary for the purpose in hand.

¹ The Soms stalk is probably meant, which seems to have given forth a sound when struck So Hillebrandt, LR. 32, n. 3.

a) The Pressing of the Sonia.—Probably the most archivale, if not the most usual, method was by means of the morter and postle, for this is the Iraman way, both ancient and modern, of extracting the Sonia. In only one hymn of the Iv. and that prohably n late one, is there a clear reference to the morter.

To the Mortar, etc. 1. 28.

- There where the broad-based pressing-stone' Stands upright to crush out the fuice:
- 2. Where dual parts to erush the stalk
- Are like the parts of man and wife';
 - The backward and the forward move:

utenell in which the twigs of the known plant are pounded "

4. Where as it were with reins to guide
They bind with cords the twirling-stick.

! Elukhala, 'mortar' 1, 24, 1, 5 uinkhata-musala, 'mortar and pedie', AV.

IX 6, 151 Satapatha Bráh, J. 1, 4, 6.
¹ Yama XXIV 7; XXV 2; For the modern dasge see J. J. Modi, ERE.
11, (1914), article Haume, according to whom Adrona (by 'to creath) is "the

⁴ The broad based preasan (small) resolven't pression ? In clearly the mortar In Av. III 10,5 there is memorion of champapty a produced. For street tree pressing atomics, i.e. the wooden mortar and pestles, the Sat Bith I 4, 7, 10, according to which the wooden mortar and the wholen peetle are called gradpan's pressiones. Of Illiberard VM. I. Dettal?, In Astabute a similar wooden mortar and peedle are seed for removing the flasts from circle, and women do the pounding alternatify drawing book the sittle and Jerizel to flow (f. x²). The mortar is made of the trunk of a tree saved off late a block and hollowed out so as to have a large boushaped epends.

The mechanism of pestic and mortar, as of the two lire-sticks, suggests sexual analogies. In vr. 2.3 there is double entender. This is furthered by the fact that the roots at and see, originally one root mean 'to press' and 'to generate', respectively. Q. Hallebrandt, VM. 1. 162.

The mention of manifal 'twiding stalk' does not fit in well with the picture of the mortar. Two explanations have been suggested. One that of Oldenberg (Rv. Noten, I. 44, note 2), who suggests that has yeller lost production of fire as an integral part of the Soma fittal, w. 3.4 belonging together. The other is that of Illifebrands (VM. I. 101), who thinks the twirling stick went with the mortar both together forming "a kind of hand still" for the crushing of Soma. A

Each stanza has the following refrain:

O Indra, drink thou eagerly

Of Soma liquor mortar-pressed.

Two more stanzas of the same hymn may be quoted:

- 5 Whenever thou from house to house! Art harnessed, mortar, for thy task, Then utter here thy clearest sound. Loud as the drum of conquerors.
- 6. Lord of the forest, once the wind Blew all about thy summit high; Mortar, for Indra press thou forth The Soma ruice that he may drink.

A reference to the same method of pressing Soma may possibly be found in X. 101, 10-11 (confessedly obscure stanzas):

- 10 Into the wood's lap pour thy tawny (object), With stony cutters make the product ready: Embrace and compass them with girdles tenfold, And to both chariot poles attach the car-horse.
- 11. Between the car's two shafts the car-horse bulky Goes to his place as goes the doubly wedded; Place on the wood the sovereign of the forest. And sink a well, although ye do not dig it.

If this interpretation is correct, the pestle is represented by the 'stony cutters', the car-horse and l'anaspati 'the

further suggestion may be made. May it not be that first the Soma shoots were pounded and crushed in the mortar, and then after water was added to obtain the inice, the whole was churned by the regular Indian twirling apparatus, the better to secure the price? In the ritual of Soma pressing as followed by Indian Parsecs the priest after pounding the some twigs in the havens and adding water "gives a little push to the pestle which is within the mortar and causes it to turn in a circle", "This part of the ritual", explains J. J. Modi (ERE, art Hooms in a foot-note) "is a relic of the old practice, when, after being pounded, the haoma twigs were regularly rubbed in the mortar with the peeble to extract the juice further". This may possibly throw light on the Yedie reference,

¹ The reference to the mortar in every house (v. 5) as a means of pressing Some suggests that Some was a popular drink in the early Pigredic dars, or at least in the area where this hymn was produced,

sovereign of the forest', while 'the wood' and 'the wood's lap' indicate the mortar!

There was a second Rigvedic method of pressing Soma, namely by means of the gravanah or 'press-stones', the stones resting on the 'ox-hide' and, according to the later ritual, being manipulated in connection with two boards. Three hymns are addressed to the deified press-stones. X, 76, 94 and 175, from which the following quotations are made:

This very excellent oblation press ye out;

Like steed hand-quided is the Some-pressing stone, X 76, 2,

These speak a hundredfold, yea speak a thousandfold. They cry aloud to us with tawny-coloured mouths:

The plous press-stones basied with the pious work

Get, even before the Hotar, taste of th' offered food, X. 94, 2

These speak aloud, for they have found the heried juice,

Over the ripe flesh of the stalk they hum a song. As they devour the branch of the red-coloured tree,

Bellow aloud the bulls that gnaw the Soma shoots 1, X, 94, 3,

The skilful ones dance with the sisters linked with them.

Making the earth revelo with the noise they make. X, 91, 4,

The winged ones lift up their voice unto the sky.

The dusky nimble ones dance in the akharas

Down, downward to the nether stone's place go they all.

Much juice receive they from the sun-bright Soma stalk. X.94,5

With one accord the pressing stones Over the nether ones play the lord,

Giving the bull his bull-like strength. X. 175, 3.

From these passages we get the following details: The press-stones, like steeds, are held by the hand. They gnaw the branch of the ruddy Sema tree, and so with ruddy mouths cry aloud. Like priests they busy themselves with the pious work, speaking a thousandfold, and getting a taste

So Hillebrandt, VM, f. 16d Oldenberg, (Ev. Noten H. 317) rejects this. Macdonell and Keith (Vedic Index II. 476 n 31) admit its possibility. 2 Tentative translation of the very chilicalt word subharva, following Hille-

brandt, VM, I. 18 n. 2. Rejected by Oldenberg, Rt. Noten H. 301 Difficult word, Perhaps 'bole', 'excity', 'lair' (Lanman, AV. VI. 49, 3).

of the Soma even before the Hotar. They as skilful and nimble ones dance with the sisters (the ten fingers). As eagles they lift their voices to the sky and as bulls they crunch the Soma shoots. Among the press-stones are those called the 'nether' stones (úparāḥ) and over these the 'nupper' stones lord it. There is nothing in this description which would not be appropriate for mortar and pestle except the multiplicity of press-stones. But as shown above, the mortar and pestle are called 'press-stones' in Sat. Brah. I. 4, 7, 10; and in the AV. Li. 8, 15 they are metanhorically identified with the press-stones.

Two words, came and ahiyana, apparently mean 'bowl', for they are both used in the dual, of heaven and earth, as the two great bowls which close upon each other at the horizon. Thus:

He made the two great bowls, that face each other, Both of them being packed full with his treasure

The same expression is used of dhisane (dual)

He props spart the bowls that face each other. X. 44, 8.

The wondrons friend has propped as under the two worlds, lle has the two bowls tolled as under like two skins. VI.8.3.

And, O ye heavens and earth, grant wide dominion, To us, ye blistful world-halves, lofty shelter; Give ample room and freedom for our dwelling, Ye hemispheres, that it may be unfundered. VI, 50, 3,

Hillebrandt (VM. L 169, n. 4) cites five passages in which cann stands next to said apparently in the sense of 'pressed in the bowl' or mortar'. While another interpretation is possible as shown by Oldenberg', yet Macdonell

and Keith admit the possibility of Hillebrandt's view.

Dhisanā is a difficult word. In the passages quoted above it is certainly used in synonymous parallelism with

¹ Nowle, came, in dust rame .

^{*} Hemopheres, 1 e. two bowls dhisane

² V. 51, 41 VIII 4, 41 76, 107 IV. 46, 21 V. 24, 1

⁴ ZDKG 62 (1908), 459 470

'heaven ànd earth', and 'the two world-balves'. It seems to mean much the same as cama', i.e. 'bowl' or 'hollow', referring primarily to the mortar or similar cavity in which Soma is pressed and then to the two world-bowls, heaven and earth. Dhisana, like bathis, the fire-sticks, the pressing-stones, etc. has received apotheosis, as a great deity'. Thus,

In Dhigana's lap are the pair of press-stones. I. 100, 3. What drop of thine spurts out, what shoot of Soma, Arm-unoved, from lap of Dhisana'd down falleth, Or what from the Adhvaryu's cleaning filter, That offer I to thee with ery of quart. X. 17, 12.

In these passages Dhisana clearly means a hollow of some ort in which the press-stones work and from which Soma drops may spout forth, or Sona twigs escape. This might either be the bowl-like mortar or the ox-hide placed in the Vedi or in a hollow specially prepared on the sacrificial ground, so that it would have a bowl-like shape and be able to hold the unfiltered Sona julce.

The ox-hide is frequently mentioned in connection with the Some ritual:

The press-stones they and crunch thee on the ox s hide; Into the waters sages milk thee with their hunds. IX, 79, 4.

This Soma on the skin of cour

Is sporting with the pressing stones. 1X, 66, 29,

Effused by means of pressing-stones,

Upon the or-hide visible. IX. 101, 11 (Griffith's trans.).

These passages indicate clearly that the Soma shoots were crushed by the press-stones on the skin of an ox (or

¹ Ct. PW mider came.

The colders Dittsuna the Soma presseth

Escerly for your delight, O Indro, Agni. I. 109, 4

The mighty Ohisana has fired thee boundlessly,
And so then slayest Vitters, breaker-down of forts 1, 102, 7.

And with reference to the exhibitration of the singer or warrion: Ready am I, when this came has quickened;

fire the decisive day will I prabe India.

cow)1. According to the later ritual the hide rested on two pressing boards', which were themselves laid across a sounding hole dug beneath. There is no mention of the pressing-boards in the Rv. but we may possibly infer the presence of a shallow bowl-like pit to which the skin was fitted as a receptacle to eatch the Soma juices. This is suggested by the sounding-hole of the later ritual, as well as by the statement that the press-stones were in the lap of Dhisana (I. 109, 3), which has been shown above to be probably bowl-like in shape, and by the further statement

that the 'talking press-stone is set down upon' the altar's. The Soma shoots during the pressing seem to have been moistened with water doubtless to aid in extracting the juice or to increase the yield.

b) The Straining of the Soma, - This was done by pouring or pressing the juice through a sleve made of wool. Numerous synonyms were used for the strainer. self-purifications of the sacred juice as it passed through the sieve was the supreme moment in the preparation of Soma. To Pavamina 'the self-purifying' are addressed the hymns of a whole book of the Rv. References to the filtering of Soma may be seen in vv. 1 and 6 of IX. 1 and vv. 1, 2, 6 of IX, 28, hymns translated above. As further illustrations the following translations are given:

To eatch the Some drops as the shoots were pressed, the skin of the semisacred cow was regarded as appropriate

adbisarane phalake Hillebrandt, VM. I 148

⁴ ara bhr6 V. 31, 12

The most notable comment on the meaning of dhisana is that of Oldenberg, SBE. 46, 120 123 He concludes that "at was a sort of support on which the pressure stones rested" (p. 122) But would not the natural support of the earth, hollowed out in the form of a shallow bowl or altar answer all difficulties" Macdonell and Keith (Index B. 476) following Billebrandt (VM. 1, 179-181) hold that dhisand in some possages denotes the tree 'altar', as la 1 100, 3.

a Cf. the corresponding procedure in the Zeroastrian ritual, both ancient and modern: Yasna III. 3 'Anoma-water', and Art. FRE. on Hasma 'Zasihra water'.

Which may be seen in Vette lader 1 508, n. 4, and Hillebrandt, VM 1, 203. "parate 'be eleanes himself'; paritra 'niere'.

Indu, as Indra's friend, for us Flow pure with stream of sweetness like Parianna, master of the rain. IX. 2.9.

This one by ancient birth pressed out For all the gods, himself a god, Flows tawny to the straining cloth. IX. 3. 9.

Bellowing flow the Indu-drops,
Like cattle lowing to their young,
Forth have they run from both the hands'. IX, 13, 7,

Ye purifiers, purify
Soma for Indra, as his drink;
And so make us more opulent IX, 4, 4,

Soma, while filtering himself, Flows thousand-streamed across the wool, To Indra's and to Väyu's tryst. IX. 13, 1.

These rapid Soma drops have stirred
Themselves to motion like strong steeds,
Like ears, like armies lurried forth, IX, 22, 1 (Griffith).

Like steed urged on to battle, finder of the light, Do thou rush to the sky-cask mothered by the stones Strong Soma on the summit of the woolly sleve

Doth purify himself for Indra's nourishment. 1X. 86, 3. e aspects of Soma Pavamana are here distinguished

Three aspects of Soma Pavamāna are here distinguished: colour, movement and sound In colour Soma is taway. Its flow through the strainer is mentioned in every hymn of Bk. IX. Not less than a dozen synonyms are employed

¹The word translated 'from both the hands' (gabhattyoh) is in the locative dual, it. 'in the two hands'. The meaning seems to be that 'portlied in the hands' (gabhattaphita II 14, 8), the piker runs forth, that is to say 'from the two bands'. Commerce

The hand-cleansed liquor bear ye to the famous, Ye pious ones, to Indra offer Soma II 14, 8; and Stone pressed it parities itself in both the hands. IX: 71, 3.

Whether this process was the same as that at the later throat is vaccetain. G. Geldier, V.S. L. 121 n. 1; Illifebrandt, V.M. L. 202-203; Vedlo Index, II. 477. But note the following detail of the modern Parser ribust: "If any particles of the wigs stilt remain unpounded, they are removed from the mortar and placed in the strainer, where they are rubbed worth the hand to make all the extract pass into the cure below". Art Hanna, Ellips.

to describe and emphasize the wondrous movement of the sacred juice. The drops of the 'thousand-streamed' Soma, as they fall from the strainer into the reservoir below, are likened to race-horses, racing cars, and armies charging forward in battle. The noise of Soma is by hyperbole compared with the bellowing of cattle and the thunder of the sky.

A heavenly bird, then lookest down, O Soma, Swelling the streams with toil' at the gods' banquet; Enter the Soma-holding vessel, Indu,

Go thundering forward to the ray of Sarya. IX. 97, 33.

The dripping of the 'thousand-streamed' Soma from the woolly sieve into the reservoir below is a microcomine picture of the fall of rain from the cloud-sieve. In fact, as the kindling of Agni before the dawn is a piece of sympathetic magic to secure the rising of the sun, so the filtering of the Soma drops through the strainer serves as a similar magic device to secure the fall of rain'. As Agni, 'the altar-fire' is clothed upon with the attributes of the sun and lightning, in the same way, the flow of Soma through the microcosmic sieve is described in terms of such macrocosmic transactions as thunder, lightning and rain. Lastly, as Agni's theophanic' moment is when the ghee-fed altar-flame bires up, so the theophanic moment of Soma is when the round drops fall from the sieve into the wooden yet below

(c) The Mixing of the Soma.—The Rigveda distinguishes between the numixed and the mixed Soma juice. Väyu, Indra-Väyu and often Indra take their Soma clear as belits their impetuous nature. The other gods partake of a mixed drink thinned, as it were, by combining the Soma juice

^{&#}x27; Karman 'work' means here as usually in the By sacrificial work. It is the same word as later denotes 'enclic recompense', the principle of retribution

² Oldenberg EV. 419.

³ Theophany is technically a manifestation of a god in terms of time and space.

that is lo say, in nature.

* Sukra 4uci, 'clear'

with milk', eard or grain. These are the three celebrated 'mixed-drinks'! of Soma, the cow-mixture, curd-mixture and grain-mixture. Some seems to have been mixed with honey in the libation for the Asyins. Judging, then, from the comprehensive nature of the rite (having to do, as it did, with all the gods), the number of priests who took part, and the ceremonial complexity of it all, one is justified in asserting that the sacre mental preparation of the Somi juice was the supreme ritualistic performance of Rigvedie religion. Nothing approached it in these respects except, perhaps, the preduction of Agail by means of the two fire-stelse. The celebration of the Lord's Supper among Christians presents some points of contact with the Vedic rito-points of contact which belong to the category of 'dovelopmental coincidences'.)

5. SOMA AS AN OFFERING TO THE GODS.

There were three dally pressings of Soma, morning, noon and night. All the Rigredic gods had a share in the Soma offering, some of them as Indra and Vayu a greater and more regular share, while others as Pūṣan only occasionally participated. Agni is monitoned especially in connection with the morning pressing, and the Ribhus in connection with that of evening. To Indra accompanied by the Maruts belongs the midday libration. The other gods lind their respective places, morping or evening. The librations to the 'all-gods' provide against any one being everlooked. Some gods as e.g. the Aświns were apparently not originally Soma-drinkers. Indra received the lion's share, being according to the hymns the Somadrinker par excellence. He participated in all three pressings and had sole right to the midday one.

Since the custom of mixing Soma with milk was Iranian as well as Indian (Yama X. 33), it doubtless goes lack to the undivided Indo-Iranian period

² Leugierah.

² Only two prowings are mentioned in the Avesta, Yasna X. 2.

^{*} Except perhaps Budra, of Oldenberg, RV, 452

Lord of bay steeds, at dawn the juice thou drankest; Thine, only thine, is the noon-day libation; Now drink thou with the wealth-bestowing Ribbus, Whom for their skill thou madest friends, O Indra. IV. 35, 7 (Gifffith's translation).

Already in the Rv. there are traces of an order of precedence which the gods follow in receiving the offerings, the order being: Vayu, Indra-Vayu, Mitra-Varuua, Aśvins, Indra, Višve devāh, Sarasvati. Vāyu ever has the precedence as the first-drinker (agrepa), although Indra is the chief drinker. The combination of special gods with special priests as formally stated in the later ritual, is not unknown to the Rv. For example:

II. 36. To Various Gods.

- In cows² and waters is he clad, while sent to thee,
 The men have milked him with the filters and the stones;
 Drink, Indra, from the Hotar's eup—first right is thine—
 The hallowed Soma poured with wasat and with \$7.7.
- With sacrifices linked, with dappled steeds and spears, Gleaming upon your way with ornaments, O friends, Seated upon the litter, sons of Bharata,
- Drink Soma from the Potar's eup, ye men of heaven.

 3. To us come near, ye ready heavers: as at home
- Upon the sacred straw sit down, enjoy yourselves; And, Tvastar, gladdened, in the juice delight thyself, Associated with the gods and goddesses.
 - Bring the gods hither, sage, and sacrifice to them, O willing Hotar, seat thee in the three abodes; Accept for thy delight the proffered Soma meath, Drink from the Agnidh's cup, delight thee in thy share.
 This Soma is the increaser of thy body's might.
- 3. In Soma is the increaser of thy body's might, is placed within thine arms as strength and victory; For thee is pressed, O Maghavan, for thee brought nigh; Drink of it from the Bráhman's cup, drink thou thy fill.

PRv. 1 2, 3, If 41, etc. of. Hallebrandt, VM I 269

² See F.v. I. 15, 2, 3, 5; H. 36-37.

³ Referring to the parasir, or addition of mill to Soma

^{&#}x27; invitation to the guas, 'divine wives'.

6. Accept the sacrifice, ye two, and mark my call; The Hotar priest is seated, following ancient use. To both kings goeth forth the homage that attracts, From the Pravistar's cup drink ye the Some meath.

This is a highly ritualistic hymn, full of priestly and sacrificial technique. No less than six priests are either mentioned or implied, the Holar connected preferentially with Indra, the Polar with the Maruts, the Neptar with Tvaşlar and the divine wives, the Agnidh with Agni, the Brahmán' with Indra, and the Prašāstar with Mitra-Varuna'.

The Soma effering was not a fixed, but rather a freewill offering, in which the rich and noble displayed unusual. liberality toward both gods and priests. Gods and priests alono partook of the Soma. Hence the ceremeny was bieratic in character?

6. SOMA AND THE MOON.

In the post-Vedic literature Soma is identified with the moon. For example, in Chānd, Up. V. 10, 4 the meen is called 'king Soma, the food of the gods'. The same expression occurs still earlier in the Sat. Brth. I. 6, 4, 5, etc., In the Kauf. Brth. VII. 10 the mystical identification of Soma and the meon is explained as follows: 'The visible moon is king Soma. He enters into this (plant) when bought'. So when one buys king Soma, it is with the

¹ Or Brahmanacchamein

² Hillebrandt regards this linking together of special priests with special gods as a remaint of the line when tribal and family peculiarities of worship were more pronounced than we find them in the cult of the lity, which cult in his opinion, was produced by the feedon of the gods and precis of different times and of different times. See VM. 1 200-253.

^{*} For this whole section on the Soma offering, see Oldenberg, BV, 451 461.

^{&#}x27;The conception of the moon as something edible is common in folklore. In iterman folklore it is a 'Imap of batter' and in English there is the earing, 'The moon is made of green cheese'.

A Somo rājā derānām annam.

It is only when the some plant is purchased from the hands of strangers, probably non-Aryans, that it becomes a holy thing, the earthly representative and embeddment of the heavenly Soma, the moon.

thought: 'The visible moon is king Soma, may be be pressed'.

Prof. Hillebrandt, who is inclined to look at most things Vedic sub specie lunae! maintains that the post-Vedic identification of Soma and the Moon holds for the Rv. also. His statement is: Soma has in the whole Rv., in its earliest as well as its latest parts, only the meaning: Soma-plant, i.e. Soma-juice and Moon! Taking his cue from such post-Vedic passages as that in the Kaus. Brah. quoted above, he holds that the moon is a receptacle of Soma or amrila and that when the worshipper presses the Soma plant, it with the belief that the extract is the verifable lunar ambrosia, king Soma of the sky. Confessedly the most important Bigreedic passage suggesting this identification is X. 88, 1-5, 19, which reads as follows:

- 1 Through truth the earth beneath is propped, And through the sun the heavens above; Through Pita stand the Adityas fast, And Soma in the sky is set.
- Through Soma are the Adityas strong, Through Soma spacious is the earth; And hence on high is Soma placed Within the constellations! Inp.
 - Some they think they have imbited, When they have cruched the Some plant; The Some that the Brishmans know, Of that no one doth ever taste.
 - 4.O Soma, guarded well,
 Hearing the press-stones standest thou,
 None tastes of thee that lives on earth.
 - What time, O god, they drink thee up, Thou fifest out thyself again; Vayu is Soma's guardian, The moon distributor of the years.

See for this while discussion Hillebrandt, VM 1. 267.450

³ He identifies Varuns Apim Napil. Bribuspati, Varus, and Some with the moon

^{*} VM. L 274

19 New and still new he being born becometh, The signal of the days precedes the mornings; Coming he giveth to each god his portion, The moon prolongs the years of our existence.

According to these stanzas Sema is set in the sky, in the lap of the stars, under the guardianship of Vavu. Unlike the juice of the earthly Soma plant, no one ever tastes of the heavenly Soma which the Brahmans know, When the ambrosia of the sky is drunk up, it swells out again. By being born it becomes new again and again. The moon is definitely mentioned as distributing for shaping) the years and prolonging the lives of men. This testimony, although indirect, is sufficient evidence that in this hymn at least a difference is drawn between the heavenly and the earthly Soma and that the heavenly Soma = Moon. But, be it noted, in this most cogent of all Rigyedic nassages the evidence is still indirect. As Oldenberg, followed by Macdenell, correctly says: There is in the whole of the Ry, no clear identification of Soma with the moon, no clear reference to the conception that the moon is the food of the gods'. The difference between the heavenly and the earthly Soma is still further indieated in the following couplet

May heavenly drink exhibitate thee, Indea, And also what is pressed in earthly places. X, 116, 3.

Passages like the following, while they may refer to the heavens and the moon, may be equally well related to the microcosmic heaven of the straining sieve and the sun-like Soma drop falling from it into the reservoir below:

> In aspect he is like the sun, He runneth forward to the lakes, The seven heights and lofty sky.

¹ v. 10 = AV VII. 81, 2. AV. VII. 81, 3-4 contains fairly clear, though indirect, references to the mean as Some. In AV. XI. 6, 7 there is direct identification. Let god Some free me, whom they call the mean?.

² Oldenberg RT. 610; Macdonell, VM. 11%.

This Indu filtering himself Stands over all the worlds aloft, Soma the sun-like deity. IX. 54, 2-3.

There are, of course, references to the moon in various

Rigvedic hymns, for example:—

Amid the waters runs the moon,

The well-winged (eagle) in the sky; Ye lightnings with your golden tires, No one doth reach and find your place. O never may that light, ye gods, Flunge downward from the lotty sky;

And never may we lack the juice
Of the health-giving Soma plant. I. 105, 1, 3.

Here the 'well-winged' may refer to the sun quite as well as to the moon, making in v. 1s-c the series, moon sun and lightning. In v. 3s the 'light' in the sky may also be the sun. The mention of the moon in v. 2s and of Soma in v. 3s does not necessarily mean their identification.

So also with the following:

The Soma seen within the bowls

As in the flood the moon is seen.—

Drink thou of it, for 'is thy right. VIII. 71, 8.

The incontrovertible data bearing upon the problem are, accordingly, the following: (1) The heavenly origin of Soma as postulated in the earliest hymns of the Rv. (2) The early conception of Soma as the draught of immortality'. (3) The difference between the heavenly and the carthly Soma as indicated in late Rigredic hymns. (4) The mystical identification of Soma with the moon, implicit' in

¹ Note that (1) and (2) are not merely early Vedic, but also Indo-Iranian and probably even Indo-1 uropean.

³ The reference in X. b5. 7 to a Sona known only to lithbranes suggests that he later view of Sona as the entity counterpart of the moon was a Veilo 'unvitory' or secret do-tries, of Mesdonell, V.M. 112:113. If Illiblicand bound prove to be right in his view that book IX, is dominated throughout by the switchest of Soma and moon, it would mean that the connection between the two superposely vields as a source mystery known only to be protext. Mesdonell commits that 'it is proble that small the chaotic details of the imagery of the moon't (VII 13).

some of the latest hymns of the Rv., and explicit in the post-Vedic literature. The force of the above mentioned data is increased by the mystical nature of the Soma sacrament and the microcosmic character of the strainer. so suggestive of heavenly phenomena, such as cloud, thunder, lightning and rain. Then, too, the parallel between Agni and Sama is suggestive. Both gods, while dwelling on earth, are heaven-born. Agni, the deified Altar-Fire, is the earthly counterpart of the sun, the heavenly altar-fire. While dwolling on earth, Agni is still in heaven! It was natural, then, to seek a heavenly form also for Soma, the delfied Sacrificial Drink. There was certainly belief in a heavenly Soma before the earthly Soma was definitely? identified with the moon. The nector of the sky was priniably without a local habitation, except perhaps the clouds, until it was localised in the moon. The round voliow drop, as it fell shining from the strainer, would naturally be compared with the moon, as the big Drop of the sky; or the thought of the moon as a bowl full of yellow Some would be suggested by the bowls of the sacrod drink set out for the gods. And since the sun had been appropriated by Agni as his heavenly counterpart, there remained the moon for Soma. The sayings of folklore, which among various peoples represent the moun as something edible doubtless contributed also to the final synthesis of Soma and moon.

It seems, then, to the present writer that the general consensus of Vedic scholarship is right in its opposition to Hillebrandt's main contention that Soma in the Ry, everywhere means the moon. At the same time it must not be overlooked that no Vedic scholar has done so much as Hillebrandt, and only in a less degree Bergaigno to make

In books I and N.

In books I and ...

2 Cf. John III. 11 "He that descended out of heaven, even the bon of manwho is in heaven".

² Or at least publicly identified

⁴ See especially Oldenberg BV. Prugg.

clear the cosmic and mystical significance of Soma. The following stanzas which are addressed to Soma, although taken from the heart of an Indra hymn (VI, 44, 22-24). illustrate what is meant:

- 22. This god, by might, with Indra as his ally '. On being born brought Pani to a standstill; This Indu stole away the warlike weapons. The magic arts of his ungracious father?.
 - 23. This Indu made the glorious Dawns fair-mated . Within the sun the light of day established: He found in heaven, within the third light-regions, The threefold drink of gods, the Amrit hidden
- 24 The heaven and earth he propped and held asunder The chariot with the sevenfold reins he harnessed: Within the cows Some with strength maintaineth The ripe spring worked by mechanism tenfold.

We have here the reciprocal service of two Vedic gods. Soma and Indra, who as allies, each help the other. Soma strengthens Indra for his exploits, and so what Indra accomplishes when filled with Soma and working in the power of the sacred stimulant, is virtually Soma's work, It is because Soma is heavenly and divine that he is able to exhibarate Indra. He is the soul and strength of Indra. without whom Indra could do nothing. From this point of view Soma is as great as Indra or greater. Hillebrandt does amule justice to the cosmic and mystical aspects of these and similar stanzas, but his treatment is to some extent vitiated by his premature identification of Soma with the moon.

SONA AND IMMORTALITY,

In a hymn already translated Soma is described as himself immortal and the giver of immortality. In the

in IV. 25, 1 Indra has Some for an ally (305). The close relation between Indra and Soma is further indicated by texts which say that Soma is 'India's beloved incode (IX, 100, 1) and obears the name of Indeas (IX, 100, 14).

It Traster the father of Some?

That is to say, gave to Dawn the sun as husband. Cr. VII 75, 5

VIII. 48, 3, 12-13 p. 210 ff.

heavenly world Soma is 'united with the Fathers' (the blessed dead) as the ground of their immortality (VIII. 48, 13). Soma is called 'the father of the gods', which seems to mean that as the life-giving drink, Soma is creative of the real abiding existence even of the gods.

Three things have already been distinguished: Soma the plant, Soma the driak, and Soma a heavenly nector, of which the earthly Soma is a symbol and embodiment.)

The immortal is usually connected with the ethical. Has Soma anything to do with the right? Where the word rita occurs in connection with Soma, its meaning in most cases, it is true, is rirualistic rather than ethical, 'tite' rather than 'right'. There are many allusions to 'the home of the rite', clearly a reference to the altar or Soma-receptuacio; and to 'the stream of the rite', reterring plainly to the flow of Soma through the strainer. Soma is also described as a 'lotty rite', an expression probably covering the whole liturgical procedure. An ethical element, however, is manifested in the following couplet:

Cleansing thyself resolve the knot that 's knotted, Discrimin itr 'twist straight and crooked conduct. IX 97, ix. In the following stanzas of VII, 104 Soma is represented as an ally of Truth, smitting sta and punishing the sinner:

- Those who the good man's speech delight to slander, And those whose habit is to harm the righteons. May Some hand them over to the serpent, Or to the lap of Nirriti consign them
- 12. Good wit is his who has descrimination, Real and unreal, both words oppose each other. Of these twain what is true and what is upright. That indeed Soma belps, untruth he smitch.

⁴ Refarya dhara, IN 67, 14, 21, eb-

² Intone bribat, IX 36, 1.

13. Never aids Soma him whose ways are crooked, Or him who falsely claims the Kşatriya title; He smites the Rakşas, smites the falsehood-speaker, Both lie entangled in the net of Indra.

The last line indicates that Indra acts as executioner on behalf of Sonn, being strengthened for his penal tasks by the sacred drink. The stanzas IX. 67, 22-27 contain prayers to Sonna, Agni and Savitar for cleansing. The

prayers to Soma, Agni and Savitar for cleansing. The translation is on the basis of Griffith, with certain changes.

22 This day may Payamana cleanse
23 This day may Payamana cleanse
24 This day by prefixing sleep.

Us with his purifying sieve, The Potar present everywhere 23. O Agai with the cleaning sieve.

Which in the flame is manifest,— With that do thou our prayer refine.

24. Thy clean-ing sleve is bright with flame With that, O Agni, purity, Yea, cleanse us with the flow of prayer?.

25. God Savitar by both of these, By cleaning sieve and flow of prayer Purify me on every side.

26. Cleanse us God Savitar with three, O Soma, with sublimest forms, Agal, with forms of power and might.

27. May the god's company make me clean And Vasus make me pure by song; Purify me, ye general gode, O Jata edas, make me pure.

O that we could be certain that these noble verses meant as much as we would know they meant, if they only stood in a Varuna hymn. At any rate, whether the meaning is much or little, the form is excellent. It is a cry for cleansing, whether ritualistic, or moral, or both, and the language is adapted to the liturgy of the Soma sacrifice. After the analogy of Soma, Agni also lad a

^{&#}x27;Note the terminology: pu to purify: Puramann 'the sell purifying'; parifical', 'strainer', putar 'purifying' prest.

² Or Brahman site (Lu lwig)

strainer of glowing fire. That Soma, then, has a distinct ethical quality is unmistakable. The ethical climax is reached, when Soma is assimilated to Varuna and the Adityas:

Thine are King Varupa's eternal statutes, Lofty and deep, O Soma, is thy nature; All-pure art thou, like Mitra the beloved,

Adorable, like Aryaman, O Soma. I. 91, 3 (after Griffith).

The Rigyedic conception of the state of the departed dead is set forth in the following prayer:

IX, 113, 7-11. To Soma Pavámūna.

Where radiance inexhaustible
 Dwells, and the light of heaven is set,
 Place no, clear-flowing one, in that
 Imperishable and deathless world.
 (O Indu, flow for Indra's sake).

8. Make me immertal in the place
Where dwells the king Valvasvata',
Where stands the immest shrine of heaven,
And where the little saters are.

 Make me immortal in that realm, Wherein is movement glad and free, In the third sky, third heaven of heavens, Where are the tuckly works of light.

[&]quot;The Volic word, parties, is the same word that is and in modern Hindi in the expression Parties Airai, Mark Sprint. The word Hunas occus about 20 times in the Erris the scase of 'breath', well, 'self,' 'explaint,' set O' A II. Eving, Hindu Conception of the Functions of Breath, II 10 18 Later on Stman formed one element in the great equations Bishman Aiman. This great word symologically as suitable as a symony for the 0 T T Fe⁵⁰ and the N T TWIPLE, 'Sprint' has always been connected with metaphysical specialistics rather than with ethical colleavour. The Indian Christian Christian through has attempted to fill the word kinns with an eithber contents and so much it the explainted of TWIPLE.

^{*}With the close connection between Some the secred diink and Agni the sacred fire compare Stett. III. 11: "He shall haptise you with the Holy Spirit and with lire". Note that the Orrek 25p *free' is etymologically connected with pit to purify and Purific "means of purifying," sieve."

² Yama, the son of Virasyant

^{*}Cf. 2. Cor. Xtl. 2 "Such a one caught up even to the third heaven" (-Paradisc).

- 10. Make me immortal in the place Where loves and longings are fulfilled, The region of the ruddy (sphere), Where food and satisfaction reign.
- Make me immortal in the place Wherein felicity and joy, Pleasure and bliss together dwell, And all desire is satisfied.

Four times repeated is the prayer 'Make me immortal' addressed to Soma, the giver of immortality. Grassmann is probably right in regarding the refrain, 'O Indu, flow for Indra's sake' as a purely mechanical addition. Hence it is omitted. There is a gravity and solemnity about these stanzas, which remind one of a similar description of Paradise in Rev. VII. 14-17.

Other passages which indicate the nature of the activities of the blessed dead are the following:

The gracious Soma with his light has helped us,
Wherewith our ancient Fathers, footstep tracing,
Light finding, robbed the mountain of the cattle. IX. 97, 39.

For thou, O Soma, art the Fathers in the sky.

Who are set forth as heads of heaven and strengtheners. IX. 69, 8.

Like a dark steed adorned with pearls, the Fathers Have decorated heaven with constellations. X. 68, 11 (Griffith).

It would soom that the blessed dead are closely associated with the gods in their cosmic activities. Stanzas IX. 69, 8 and X. 68, 11 might be interpreted as meaning that the Fathers on joining the gods in heaven become 'constituations' and 'heads of heaven', i.e. stars'. Soma is described as equivalent to the Fathers, doubtless in the sense that the continuous existence of the blessed dead was due entirely to Soma as the principle of immortality.

Hatt XIII. 43, "Then shall the righteons shine forth as the sun in the Kingdom of their Father".

^{&#}x27; stadha, 'spirit-food' through the sraddha, or offering to the dead

So Hilfebrandi, VM. I 397-398. We are reminded of Daniel XII. 3, "They
that turn many to rightcourness shall shine as the stars for ever and ever"; and

On the whole, then, as suggested above, the doctrine of Soma bears much the same relation to the religion of the Rv. as that of the Holy Spirit does to the religion of the Hible.

CHAPTER IX.

ușas and the asvins.

(1, USAS.-As the personification of one of the most radiant phenomena of nature, Usas is very appropriately represented as a woman, the lady Dawn. Macdonell is right in calling Usas 'the most graceful creation of Vedic poctry'. As Indra is characterized by strength, Agni by priestly knowledge, and Varuna by righteous order, so Usas is characterized by feminino charm. Amid the throng of masculine deities of the morning-Surya, Savitar, Paran, Visnu, Agni and the Asvins-Usas appears in the cast in delicate feminine beauty. She has many lovers-Agni. Sarva, Paşan and the Asvins. Usas 'dawn' is as transparent as Agni 'fire' or Surya 'sun', and so the personification remains rudimentary. The Vedic poet is always conscious of the physical fact of dawn, and this helps somewhat to remove the scandal of the lady Dawn's too promiseuous love affairs. Usas is celebrated in 21 hymns, 14 of which are found in the family books. She is the only goddess of importance.

To Usas, IV. 51'.

- This light appearing ever here to eastward With clearness has arisen from out the darkness; Now may the daughters of the sky, far-shining, The glorious Dawns, for mankind make a pathway.
- The Dawns resplendent have arisen eastward, Like sacred posts set up at sacrifices; Bright, gleaming, purifying, have they opened The double portals to the pen of darkness.
- 3 To-day may the far-shining Dawns, the bounteons, Inspire the hberal man to noble giving; Amid obscurity let the niggards slumber, All-unawakened in the midst of darkness

VM. 46.

⁵ For the translation compare Hillebrandt LR, 3-4, and Macdonell VRS, 93-99.
⁵ Cf. I 48, 15, "the twin doors of heaven".

dire to the twen down of Dealest.

- Ye Dawns, ye goddesses, is this your pathway, To-day a recent one or is it ancient, Whereby ye, rich, richly shone on Navagva, Angira and Dasagva and Saptasya?
- For ye, O goddesses, with steeds yoked duly, Traverse the worlds within a day, awakening The sleeping world two-footed and four-footed, The world of high recentives. Pages 2 pages.
- The world of fiving creatures, Dawns, to motion.

 6. Where was that ancient Dawn and which one was it.
- At which the gods assigned tasks to the Ribhus?
 When the bright Dawns their bright way go, unaging,
 All have the same look, there is no distinction.
- Auspicious have these bright Dawns been aforetime, Splendidly helpful, true as born of rita;
 At which with hymns the zealous sacrificer Praising and chanting has obtained wealth quickly.
- 8. In self-same manner come they forth from eastward, From one place spreading out in self-same fashion; The goddess Dawns from Rita's seat awaking Disport themselves like troops of loosened cattle
- 9 These Dawns now as of old the same in nature Come ever into view, of unchanged colour, Concealing night's black monster with their brilliant Forms.—they the bright, the gleamung, the resplendent.
- Riches, ye daughters of the sky, far-shining, Bestow on us, ye goddesses, with offspring. From pleasant couch to you ward we awaking Would be possessors of a host of strong sons.
- 11. This, daughters of the sky and Dawns far shining, Of you implore I, I whose sign is worship. We would among the tribes of men be famous; Let Dyaus and goddess Prithivî bestow that.

The following points may be noted:

a) The plural usasah refers in some cases to successive dawns¹, in others probably to the dawngleams of the same morning¹.

^{11 123, 2, 8, 9, 12; 124, 2; 113, 8, 15;} VII. 76, 3; 80, 3.

^{*}IV. 51, 1.3, 10; VI 64, 1.2; VII. 75, 3; 78, 1, 3; 78, 2. These passages as belonging to the fumily books are, on the whole, exilier than those in which the reference is to successive damps. With the distinction between massas and line compare the analogous distinction between against and Agai, somes and Some

- b) The dawns are the various aspects or successive appearances of the one goddess, the Lady Dawn, who is young, good-looking, well-dressed and nobly-born (heing the sister of Bhaga and the kinswoman of Varuna)1. She smiles (I. 123, 10; 124, 7), sings* (I. 92, 3; 123, 5), dances (L 92, 4) and displays her charms (I, 92, 4; 123, 11; 124, 3-4, 6). If Indra is the very picture of a Ksatriya lord, Usas may be taken as the 'counterfeit presentment' of a Ksatriya lady",
 - c) Usas, negatively removes the black robe of night, drives away bad dreams, and wards off evil spirits and the hated darkness. Positively she opens the gates of heaven, illumines the ends of the sky, and discloses the treasures concealed by darkness, distributing them bountifully*.
 - d) Accordingly Usas is the goddess 'Bounty's, When she begins to appear in the morning, the prayer is offered: 'Up let there spring bounteousnesses (sunvitah), up pienteousnesses' (puramdhib I. 123. 6). She is a veritable Lady Bountiful, since she spontaneously displays her charms to all, morning by morning, and distributes (bhajate) treasures 1, assigning to every man his fortune (bhaga I, 123, 3), quite after the manner of Bhaga. Thus Usas is a kind of female Bhaga, in fact his sister or other self. Hence when it is

^{1 92, 4, 123, 2, 3, 5, 10-11.}

² Cf. 'The morning stars sang together"-Iob. XXXVIII. 7.

Puschel's view (VS. 1. 30, 196; III. 200) that the description of Usas is drawn from that of a Tedio demissionadaine is based upon her behaviour like that of a brotheriess maid (1 124, 7), her too ready duplay of her bosom (VI. 64, 2; I. 123, 10; 124, 4) and her numerous love offsirs

⁴L 113, 14; VIII 47, 14, 16; VII. 75, 1.

^{*1. 113, 4,} cf. I 92, 4 and IV. 51, 2; I 92, 11; 123, 4, 6

Sunrica I 123, 5; 124, 10 Other epithrts of the same sort are datains 'honorarum' 1. 123, 1; 11. 64, 1; disrate 'generous' 1. 48, 1; maghani 'liberal' I 45, 8; citramagha 'of splendid gilts' 1 48, 10; and Viscarara 'all bountrous! I. 113, 19.

The treasures of light rescued from the demon Darkness, or, metaphorically stated, the 'dawn-rows'.

said that the broad ear of Daksina has been yoked, the reference of course is to the expected priestly honorarium, but with a side glance at her who is the very embodiment of bounty, the bountiful Usas (I. 123, 1). Through her example as Lady Bountiful Usas stimulates the wealthy sto thoughts of liberal giving to the priests (I. 48, 4; IV. 51, 3; VII. 81, 6) and stimulates every god to bountifulness (VII. 79, 5).

e) The ruddy gleams of Usas are thought of as cattle, 'the dawn-cows'. From this point of view Usas is called 'the mother of cows'. Or to change the imagery, the multitudinous patches of colour' splashed against the morning sky may be each regarded as a carriage and span, and from this point of view Usas is a 'driver of ears' (I. 48, 3), as many as a lundred being mentioned (I. 48, 7). The ear of Usas is well-decorated', and her steeds consist of ruddy horses' or oven.'

1) Like Savitar, Usas wakes up man, beast and hird*. Leader of graciousnesses, shining brightly Is seen the one that hath unclosed the portals. She stirring up the world, bath looked on riches.

Dawn hath awakened every living creature. 1. 113, 4

Both Indra and Ugas are characteristically 'bountful' (Maghatan and Maghani), Indra as winning the cloud-cows and Ugus as winning the dawn-cows.
Ugas Maghani is declared to be 'most like to Indra' (VII. 79, 3)

² Cf. Mott. V. 44-45.

³1, 92, 1-2; IV. 51, 8; 52, 5 ⁴IV. 52, 2-3; VII 77, 2

³ The gleams of Usas are also likened to sacrificial posts (1. 92, 5; IV 51, 2) which then as now were doubtless daubed with red other, or yellow gives (cf. III. S. 1).

^{*}Like the Greek charlot in the Metropolitan Museum, New York City.

7111, 61, 2; IV. 51, 5, etc.

⁸ J. 124, 11; V. 80, 3, etc. As contrasted with the thought-wift steeds of indra and Surya, the alow-moving dawn-gleams of Uşva are very appropriately represented by wagons drawn by bullocks.

^{*}I. 48, 5 6; 49, 3; 93, 9; 113, 4 6, 8 9, 14; 124, 1, 4, 10, 12; 1V. 51, 5; VL 64, 6; 65, 1; VII. 77, 1; 79, 1.

Usas assigns to all their various tasks, such as lordship and glory, worship of the gods, acquisition of wealth, and toil (L 113, 5-6, 9). She even allotted to the Ribbus their work (IV. 51, 6). As 'waking with Usas' the gods are often described as Uşarbudh. Uşas the bountiful awakens bountiful givers, but leaves niggards unawakened (I. 124,: 10; IV. 51, 3). The bountiful goddess1 loves bountiful people,

g) Usas is the sister of Ratri, 'Night'.

The sisters' pathway is the same, unending; God-taught, by that alternately they travel. Fair-formed, of different hues, and yet of one mind, Night and Dawn clash not, neither do they tarry. The one departeth and the other cometh, Unlike in hue day's halves march on together, The same in form to-day, the same to-morrow, They follow Varuna's eternal statute.

L 113, 3: 123, 7-8 (Griffith with some changes).

In the Apri hymns Night and Dawn are forms of Agni. They constitute a dual divinity, both being daughters of Heaven (X. 70. 6) and mothers of rita (I, 142, 7). There is only one hymn addressed to Rairi' 'Night', X. 127.

- 1. Night drawing near has looked abroad, In many places with her eyes;
- All clories has she now assumed.
- 2. Pervaded has the immortal one The depths, the heights, the ample space: With light she drives away the gloom.
- 3. The goddess Night, approaching nigh. Her sister Dawn has ousted quite: The darkness too will disappear.

In our modern religious life the offertory is made an occasion for special prayer It is thus introduced into the ritual and made a part of worship. In Vedic days the same general idea was expressed by saying that Daksing contribation ", "offectory", honorarium ' is a goodless (sometimes identified with Uras)

Indebtedness is acknowledged to the translations of Hillebrandt (I.R. 149) and Macdonell (VRS. 203 207, and HR. 40-41)

[&]quot; As night covers the dark half of the day, so Dawn is here made to include the light half Compute chent (1. 123, 7), lit, 'tha two days', i e the two dayhalves, and dyare (1 113, 2) 'the two skies', f. e. the day-aly and the night-sky.

- To us this day thou hast appeared, At whose approach we seek our homes?
 As birds their nests upon the tree.
- Home too have gone the villagers,
 Home those possessing feet and wings,
 Home even the greedy hawks have gone,
- G. Ward off the she-wolf and the wolf, Ward off the thief, O brooding Night. And so be easy to traverse
- The darkness has drawn night o me, Black, obvious, painting mystic scenes, O Dawn, disperse it like a debt.
- My hymn like kine I've brought to thee, Take it, Night, daughter of the sky, Like song of praise to conqueror.

Rütri, as Macdonell says', is not conceived as the dark, but as the bright night, the stars being apparently thought of as her eyes. Night thus lighted up (vv. 1.2) stands in opposition to the 'blind darkness' (X. 80. 15)'.

hy Unas, like Varuna, Panan and other deities of the light, is a pathmaker. Knowing the way, she does not miss the directions (1. 124, 3; V. 80, 4), in other words, she knows her own path. Accordingly she has opened up and left a path for Sarya to travel (I. 113, 16). And by her shining she reveals the paths of men and makes them easy to traverse (VII. 79, 1; IV. 51, 1; V. 80, 2).

 Usas is called immortal in a context where her unvarying appearance at dawn is emphasized.

From days eternal hath Dawn shone, the goddess, . And shows to-day this justre, sho the wealthy;

With verses 4-5 may be compared II. 38, 4-8

^{*} VM - 124 -

^{*} Hillebrandt, LR. 149.

^{*} Puthyā Reratī, 'she of the wealthy path' (V. 51, 14) is invoked as a godden of journeying mercies and well-being. The concrete Usas and the abstract Pathyā Revatī are both path-goddesees, heavenly 'Gurl Galdes', as it were.

So shall she shine in days to come; immortal

She moves on, self-determined, undecaying 1. I. 113, 13

(Griffith with a few changes).

Here the immortality of Usas is definitely connected with the fact that she has flushed continuously aforetime, and will flush throughout the days to come. The 'everlasting power' of Usas is inferred from the observation of her invariable procedure. We say: Dawn is invariable, Nature is uniform. The Vedic Indians said: Usas is immortal, What the origin of the concept of immortality was as applied to the gods is thus clear. It was due to the observation of the regular recurrence of the phenomena of nature. Men are declared to be mortal on the basis of experience, but there is no known beginning or end of the Sun's rising, the appearance of dawn, the play of the lightning, etc., etc.

"Men may come and men may go But we go on for ever":

as Tempson makes the waters of the "Brook" to say. By this road of observation and experience the Vedic Aryans arrived at one valid distinction between God and man. God is immortal, man is mortal. The ground of the lumoratility of the gods may be conceived as due to the drinking of Soma (IX. 106, 8) or to the vital stimulation of Savitar (IV. 54, 2), but the fact of their immortality doubtless was inferred as stated show.

j) Usas is clearly connected with the duration and measurement of time, that is, with the notion of past, present and future.

She, first of endless morns to come hereafter,
Follows the path of morns that have departed
*Last of the countless mornings that have vanished,
First of bright morns to come hath dawn arisen,
L 113, 8b, 15c 4 (Griffith's translation),

Mardonell, HR, 39.

Or: "The golders Dawn has flushed in former aces.

And here to-day the bounteous maiden flowles; So also may she flowh in days hereafter. With powers her own she fares immortal, accless."

The thought of the Dawns that have departed gives rise to a pensive note:

Gone are the men who in the days before us
Looked on the flushing of the earlier morning. I.113, it
(Griffith's translation with slight change).

It reminds one of Tennyson's song in the Princess:

Tears, Idle tears, I know not what they mean, Tears from the depth of some divine despair, Rise from the heart and gather to the eyes, In looking on the happy autumn fields And thinking of the days that are no more.

The dividing line between past and future is, according to the Vedie peet, net sunset but dawn. It is Dawn that wastes away the days of the life of a man, as a skilful gambler reduces the stakes of his opponent (I. 92, 10). It was at dawn that to the Vedic poot came the 'selemn thought' that he was one day nearer the end of his earthly lifo. Thus Dawn was called 'leader of days' (VII. 77, 2), since she brings up the days one by one. And each Dawn, as ahe appears, seems to yearn eagerly to join the company of departed dawns (L. 113, 10). As regards further dawns they are thought of as simply the continuous repetition of past dawns. The analogies of nature suggest no certain progress', (a concept due to historical experience), but only repetition. There is (at least in the later hymns to Usas) no joyful anticipation of the future, but only pensivo contemplation of the past, and of future days as destined soon to join the company of past days. This attitude points in the direction of the later Pessimism.

k) Adumbration of the idea of Transmigration through the repeated birth of Usas'. There is in the

¹ Is the later doctrine of the endless repetition of the cycle of the four yugas due to the influence of such analogies?

² Compare Ecclesiastes I. 2-11.

¹ Punah punarjayamina 'bom again (and) again' (I. 92, 10) auggets the later punarjayam' redirative; and punarbhū 're born' (I. 123, 2) reminds one of the Brithman term punarmilys' redeath'.

Also of Acril Surva and Soms.

Rv. no clear indication of belief in Transmigration. No passage may be quoted with certitude1, and the whole conception of a future life with the Fathers is against it. Still certain analogies may be cited as likely to point in the direction of the later doctrine. The devas 'gods' rose out of nature. They were in general deified natural phenomena. Or, to put it in another way, they are the product of the religious instinct working on the raw material of natural phenomena. Usas is immortal, Surya is immortal, etc. (But the immortality of Usas is made up of the twin processes of dying (implied) and of being born egain at dawn. This is a most potent and pregnant analogy, sure to have had its effect in furthering the later doctrine of rebirth. For according to that doctrine man too is immortal (in a lower sense) until he attains release. Death and rebirth follow each other in endless succession, even as the sunrise follows the sunset.

1) Uşas es regulerly appearing in the east is an expression of rita in the senso of 'cosmic order'. She is 'born in rita' and so is a 'protectress of rita' (L. 113, 12). She does not infringe the ordinances of rita and of the gods', the proof being that she comes day by day to the place appointed. Being obedient to the rein of rita, sho goes straight along the path thereof, never missing her way (L 123, 13; 124, 3). The liturgical day begins with the appearance of Usas in the east, when she causes all

¹ Swami Dayanand Sarastatt (Rigurdadibhayyabhamikii, 211 ff.) finds in A. 59, 6-7 a proof text for transmigration in the Rigredic period. A reference to the context, however, (vv. 4-5) shows that this is extremely improbable.

Compire the well known lines of Milton's Lycidas --

[&]quot;Weep no more, world shepherds, weep no more, For Lycidss your sorrow is not dead, Sunk though he be beneath the watery floor; So sinks the day-star in the occan bed. And yet anon repairs his drooping head, And tricks his beams, and with new spangled ore Flames in the forehead of the morning aky".

^{1 92, 12; 123, 9; 124, 2;} VII, 76, 5,

worshippers to awake and the sacrificial fires to be kindled (I. 113, 9). Thus she is an expression also of 'ritualistic order'. As preceding the gods of light, Agni, Surya, Savitar, etc., Usas is called 'the mother of the gods' (I. 113, 19)1. She is bescught to bring all the gods to drink the Soma (I. 48, 12); and for this reason, perhaps, the gods are often described as 'waking with Usas. Usas and Agui are each called 'banner of sacrilice', since the light of each gleams at the time of the merning Somapressing (I, 113, 19; 96, 6). The freshness of an Indian morning (even in the hot season), the exhibitation due to the night's rest, the splendour of the dawn, and the solemnity of the time of the morning sacrifice, all combined to produce a certain exaltation of spirit. Such a mental state, since it was experienced in the early morning, would naturally be attributed to the grace of the morning gods, Usas and Sayltar 1.

on) Usas is closely connected with the sun. Sha generated Surya and was produced for the production of Savitar. Thus as preceding the rising of the sun, Usas is thought of as his mother. But Strya follows Usas as a young man a maiden (I. 115, 2), and from this point of view Usas (-Surya) is conceived as the wife or mistress of Surya. The soul of the dead man goes to the sun and to Usas (X. 58, 8).

.n) Comparisons.—The knowledge possessed by Uşaz is not stressed. She has wit enough to do her own proper work and not to lose her way when she comes through the dark. She is chiefly export in displaying her beauty

¹ From this point of view also she is said to have 'generated Sun, marrifice and Agni' (VII 78, 3).

With the prayer to Usas, 'Place in us excellent mental force (krain I 123, 12), compare the Gayatri, 'May he atimulate our thoughts' (III, 63, 10).

^{*} VII. 78, 3; 1, 113, 1; cf. Macdonell, VM, 48

^{*} Cf. Macdonell, VM. 48.

Saritar and Pasan as sun-gods are represented as conductors of the dead to the place of the Fathers

and in wianlag admiration. If we compare together Agni, Indra and Usas, we find that Agni, the priestly god, is par excellence the wise god bearing the epithet jatavedas 'knowing all generations'. Indra is the strong god exhilarated with Soma and slaying the demons, and Usas the Maiden Dawn is the fair goddess. Indra is manifested in the lightniag and thunderbolt. The theophany of Usas is the ruddy flush spread over the east at dawn.

She is as distinctly delicate and feminine as Indra is rough and masculine. As there are masculine 1 hymns and feminine' hymns, so there are masculine phenomena of nature and feminine phenomena of nature. Had lightning been conceived as feminine and dawn as masculine, the whole nature and poetry of things would have been reversed. Since the strength and rude impetuosity of Indra are bound up with the drinking of Soma, it is altogether fitting that Soma is not an offering to Usss', Agni is a Vedic priest; Indra, a Vedic warrior; and Usas a Vedic lady. For a warrior not knowledge but strength is the requisite. (From the description of Usas we may . infer that Vedic ladies were not careless in the matter of personal adornment, and were expert in feminine arts and wiles. Usas is a woman, Grace and attractiveness belong . to her. Kaowledge belongs to Agni and power to Indra, Yet each as a deva shares to a greater or less degree in the divine attributes of wisdom and power. Indirectly then through a study of the gods who were made after their likeness, one may get light upon the ways and aptitudes of the priests, warriors and women of the Vedic age.

^{2.} Asvins .-- These twin deities are celebrated in about

¹ E g. "When I survey the wondrous Cross" and "Onward Christian soldier", etc. E.g "Let me come closer to thee, Jesus" This distinction between masculine and ferminine hymns may be further illustrated by the difference between Saira portry and the relatively more soil and sensuous Vaisnara poetry

³ Oldenberg (RV, 354) refers to the tendency to offer to each individual god the kind of food or drink corresponding to his special nature.

54 entire hymns, over half of which are found in books I and VIII. Judged by the statistical standard the Asvins rank in popularity next to Indra, Agni and Soma. The twin Nasatya(u)1 are among the most 'opaque' of oll the Rigyedic gods, in this respect being like Indra and Varuna, The result is that in the endeavour to determine their original physical basis there are wide differences of opinion among scholars . For example, the twin horsemen have been identified with heaven and earth', day and night', sun and moon', two royal succouring saints', morning and evening star", the twin stars in the constellation Gemini', the twin lights before dawn, half dork, half light, morning ond evening, fire of heoven ond fire of the altar 10, roin-giving and dow-giving", end morning and evening wind 18. One reason for this uncertainty doubtless is that the Asvins are pro-historic gods, and so in the course of their development have suffered so mony transformations that their original physical significance hos been almost or quite lost sight of.

a) The Pro-Vedic Asvins. - In the Boghez-Köi tablets (1400 B. C.) the name Nāsatya" occurs together with Mitra, Voruna and Indra. The form of the word Nasatvo

Nasatya(u) of uncertain meaning, possibly 'not untrue' 2 Hillsbrandt, VM, III, 379-396, subjects the principal theories to a searching

eriticism. 3 Yaska, Nir XII, 1, 1 Yaska simply quotes the varying opinions known

to him. 4 Yayka, op. cii. and Ludwig, RV. III. 231 Regarded by Hillebrandt as the

least objectionable of all the theories

shows that the consonantal shift from s to h had not yet taken place: therefore the period represented must be Indo-Iranian, or early Iranien . In the Younger Avesta we meet with the demon Naonhaithya, clearly the degraded representative of the earlier Nasatya. The Nusatya(u) belong almost certainly, then, to the early Indo-Iranian or proto-Iranian deities. May they be traced back still further to the Indo-European period? There are distinct points of contact between the Indian Asvins, on the one hand, and the Greek sons of Zeus* and the Lettic god-sons, on the other. They are all horsemen, and each pair of deities has either a sister or a common sweetheart, the daughter of the sun. The resemblances are so striking that such scholars as Oldenberg, Macdonell, Hillebrandt and Bloomfield all agree in postulating some sort of connection'. Since a common name is lacking, it is possible that the myth existed only in germ before the Indo-European clans separated, the observation of the same physical phenomenon in each case leading to 'developmental coincidences' in the course of time. The similar nature and functions ascribed to the Indian Asvins, the Greek Dioscuri, and the Lettic god-sons. are very significant even though their names differ.

b) The identification of the Aşvins. — Of all the guesses concerning the original physical nature of the Aşvins, as set forth above, 'the twilight and the morning star theories seem the most probablo'. The twilight*

⁴ Macdonell, VM. 54.

^{*}The very term 'twilight', 4. s facialight, indicates the analysis into two separate lights, of the gray light preceding the dawn. Twilight, then, may be

consists of twin-lights half-dark and half-light. These two lights fure together and so correspond well with the description of the Asvins as inseparable twins! The twilight is a true harbinger of the day, preceding, as it does, the appearance of both the dawn and the sun. If it be objected that the twin-lights of the morning twilight are intrily conspleuous enough to stand alongside of Agni, Usas and Sürya as delities of the morning, it may be answered that the Aivina(a), as 'dual divinities', practically fuse into one'. The morning twilight, though gray', is almost as distinct an object of perception as the dawn or the rising of the sun; and the fact that it is the harbinger of dawn gives it e very definite significance for the sacrificial day.

If we consider the concomitants of the morning twilight, we notice that in the midst of it there often oppears the morning star or the wening moon, or both; end further that the inorning twilight is confronted by the ovening twilight. It is possible, then that the original duality of the twin-lights of morning may have been replaced, here and there, by the duality of morning and evening twilight or of morning and evening star. Such e shifting among closely associated phenomena is entirely comprehensible.

Illustrations of these possible developments may now be noted. The morning star appears at the same time with Agni, Usas and Sürya. It suits all the conditions

interpreted as eather one light made from the fusion of two separate lights, or two lights which have coalesced into one. The twilight has a distinct character of its own, separate from that of night, day, dawn or sources.

In H. 39 the union of the Asims is compared with that of two eyes, two hands, two feel, two lips, two breasts, two nostrils, two worlds, etc.

^{*}So Mitra and Varuus, interpreted as the light that fills the sky and the sky that is filled with light, fuse into one inseparable unity in the compound Mitra-

² Compare the well known bars from Milton's Lycidas:

(So some the uncomb awdin to the oaks and rills,

While the still morn went out with sandals gray'.

At Landour, Mussourie, during the summer of 1921 the author made a careful study of the phenomena of the early morning sky

except the duality of the Asvins. Analogy, however, may help us here. Usas, the morning flush followed by the day is preceded by the evening flush followed by the night, hence Usasa, 'the two Dawns' (L 188, 6; V. 1, 4). Ahan 'day' is preceded by an equal length of time, hence ahant, 'the two days', i. e. night and day (1, 123, 7). Rodasi 'world' (earthly or heavenly) is confronted by its opposite, hence Rodasi 'the two worlds', beaven and earth. In like manner Nasatva1 (once in sing. IV. 3, 6), interpreted as the morning star, is confronted by an evening star, therefore, Nasatva, Aivina 'the two horsemen's, the morning and evening stars. The dual in each case links together two things which, while akin, are hy no means the same or even closely associated. If the morning glow and the evening glow, though differing in the time of their appearance, are called Usasa 'the two Dawns', why may not Aivina 'the two horsemen' be, in like manner, a name for the morning star and evening star, or if preferred, a name for morning twilight and evening twilight? Or possibly each includes the other, the morning twilight and morning star going together, and the evening twilight and evening star.

There are, indeed, a few Rigredic texts which seem to indicate the connection of the Advins with hoth morning and evening, since they are referred to as 'born separately' (V. 73, 4), 'born here and there' (I. 181, 4), as having ruddy

¹ The Younger Avesta demon Naonhaithya (=earlier Nasatya) is in the singular.

The connection with the horses, as suggested by the name Airins Thorsemen' (sign 'horse') contes out also in the conception of the Greek Dioseurs and the Latin Castor and Polius as mounted horsemen. Q', the reverse of the Escratides canas. So Bloomfeld RV, 118.

The 'two-star' theory of the Aivins is supported by the Lettic myth of the gol sons who are called respectively the morning and the evening star, and by the Greek myth that the Binocuri were rewarded by being placed in the sky as two stars. Bloomfield, RV. 116.

paths' at evening and morning (VIII. 22, 14), and as invoked on both occasions (X. 39, 1; 40, 4). It is probable, however, that even when the Aévin hymns were written, there was no very clear consclousness of their original physical basis, for hy tha time of Yâska (fifth century n. c.), as shown above, most diverse opinions were held. Indo-European comparative mythology lends some support to the identification of the Aévins with the morning and ovening stars. The Diesenri were placed as twin stars in the heavens, and in Lettic mythology the morning star peers at Saule', the daughter of the sun,

c) The Asvins are closely associated with Ilsus, the Dawn, for the three appear in the merning about the same time. It is clearly the twilight hour, for the appearance of Agni, Usas and Sarva is represented as roughly synchronizing with that of the Asvins (L 157, 1). The daughter of the sun mounts the three-seated' car of the Asvins (I. 34, 5, etc.), a way of expressing the similarity of function and simultaneity of appearance that holds between the merning dawn and the merning twilight (or the merning star). Such contiguity between Usas (=Saryā) and the Asvin brothers led also to a romance. The Lady Dawn chese the two Hersemen to be her husbands, a bit of mythological pelyandry (IV, 43, 6; I, 119, 5). The situation is complicated by the fact that the Sun Maiden is represented also as the sister of the Asvins (I, 180, 2). as well as their wife. Another 'affair' of the Lady Surva

^{&#}x27;Rudratariani 'ruddy-pathed' is an exclusive epithet of the Asvins An alternative epithet is hiranyaeariani, 'golden pathed'

² Saute — Surya 'sun-maiden'. Bloomfield (RV. 114-115) and Hillebrandt (VM. II. 41. ff; 111. 386) have made it practically certain that Surya is to be identified with Usas.

² Three-scated, either to provide scats for Usas and the two Afrins (Yedle index, Yandhum), or to bring the parts of the chariot into correspondence with the three daily sacrifices (Macdonell, VM. 50). Note the continuous play on the word three in I. 34.

As the two Asvins have a sister Surya (Upas), so the two Diocent bare a sister Helena. And as the two Asvins wed the one Surya, so the two Lettle god sons

is related in X. 85 9, where Soma (the Moon)' is the wooer and the two Asvin brothers are groomsmen'.

The steeds of the Asvins are not only horses, but are also frequently described as hirds and their car as honey-bearing. They have a honey-whip' with which they besprinkle their worshippers. They are ruddy (rudra), their bird-steeds are red, and their path is red or golden. We are reminded of Savitar, whose golden arms are probably the morning and evening glow. It is accordingly natural to think of the Asvins, their bird-steeds, and their paths, as sharing in the ruddiness of the ruddy dawn.

- d) As an illustration of the Asvin hymns there is here reproduced VII. 71°:—
 - Away from Dawn her sister Night departeth, The black one feaves the ruddy god a pathway. We would invoke you rich in kine and horses; By day and night from us ward off the arrow.
 - Unto the mortal worshipper approach ye, Upon your chariot bringing wealth, O Asvins.

wed the one daughter of the sun. These embarracing connections represent the mythological rendering of the phenomena of the morning sky in terms of haman relationships.

Compare the Lithuanian folk-ong (Woonfield RV, 114), according to which the Moon 'wedded the Madden Sun' and afterward 'wandered by himself afar, and concetted with the morning state'. The wanter moon is often seen in conjunction with the morning stat

This seems to reflect the connection of the new moon with the evening Bush or of the old moon with the noming Rush As Surya (Usas) has a double "affair" with both the test hirths and the Moon, so has the Lettle Doubleton of the San (Usas, the Dawn, appears as the early lady small the throug of mascelline delities of the morning A refer memerous lower staffact with Agril, Pajara, Airins, Stryá and Sona (Moon) the reflection of similar experiences for Veille lift, when the brother less malden was in dwager, and too close proximity between the access was apt to had to lattinger.

 $^{b}\,At$ any rate, the time of the appearance of the Aivins is the time of the singing of birds

"The 'honey-whip' (f 157, 4) is regarded by Oldenberg (RV. 200) as the morning dew; by Griffith as the stimulating and hie-giving hreeze' of the early dawn.

Compare Hillebrandt, LR 7-5; Macdonell, VES, 130 ff, and HE 42-43.

Ward off from us unhealthiness and nilment; Lovers of honey, day and night protect us.

- At this the latest daybreak may your stallions, The kindly ones, whirl hitherward your chariot; Bring it wealth-laden, thong-drawn, O ye Asvins, Hither with horses yoked by sacred order.
- The car, twin lords of men, by which ye travel, Three-seated, filled with riches, matution!;
 With that to us come hither, ye Nāsatyas, On your behalf may it approach, food-laden
- 5. Ye heroes twain from old age freed Cyavana, Brought a swift horse for Pedu, serpent-killing', Delivered Atri from distress and darkness, And placed the son of Jahusa in freedom.
- This is my thought, O Asvins, this my praise-song, Gladly accept this well-wrought hymn, yo mighty; These prayers addressed to you have been sent forward, Do ye protect us evermore with blessings.

Lef Whatever may have been the original physical basis of the Asvins, it is clear that as early morning deitles of light they were regarded as heralds of the dawn end harbingers of day. As such they may well have been conceived as 'finding and restoring or rescuing the vanished light of the sun's. As a further development of the same point of view, the Asvins are regarded in the Rv. as typieally succouring and miracle-working gods. The heavenly myth has been translated into the terms of human life, The Advins are 'a very present help in time of trouble'. They are divine physicians, who cure whatever is diseased, restore sight, and heal the maimed'. They ward off the arrow' of 'unhealthiness and ailment' (VII. 71, 1-2). They are 'rich in kine and horses', and their car is wealthbringing and food-laden. Four instances of the succouring power of the Asvins are referred to in VII, 71, 5. They

³ This epithet of Pedu's swift horse is derived from other cognate passages

Mardonell, VM. 51.

^{*} VIII, 18, 8, 22, 10; I 116, 16; X, 39, 3.

^{&#}x27;It may be the 'arrow' of Rudra. In later Hindu mythology the Aivini Kumaras are medical gods

restored youthful vigour to the aged sage Cyavana, prolonged his life, and made him the husband of maidens. They gave a swift, white, dragon-slaying horse to Pedu. They delivered Atri from a hurning pit. They rescued Jahusa at night and bore him away to freedom. It is uncertain how many of these stories are to be interpreted mythically as referring to the release of the sun from darkness, and how many are to ha regarded as the experiences of actual persons, whose remarkable deliverances from peril or disease would easily he attributed to the Asyins in view of their character as divine deliverers and healers.

The genealogy of the Asvins is variously expressed. They are several times called children of Dyaus (or the sky)'. Once they are said to have the ocean as their mother'. They are also once called the twin sons of Vivasvant 'the luminous' and Tvastar's daughter Saranya. 'the swift''. These various ways of putting the matter probably reduce to much the same thing.

(g) The Asvins are closely connected with love, courtship, marriage, virility and offspring. They acted as groomsmen or 'hest men' at the marriage of Soma (Moon) and Sarys (X. 85, 8-9). They received Sarys upon their chariot, hence they are besought to conduct the bride home in the same way (X. 85, 26). They are invoked to bestow fertility (X. 184, 2). Among their wonder-working deeds of grace may be mentioned the restoration of youth and virility to the aged sage Cyavana, so that he became the husband of maidens, the making a barren cow to yield

^{1. 182, 1; 184, 1;} X. 61, 4

^{*} I. 45, 2, sindhumataru. The studhu is doubtless the heavenly ocean, hence 'ocean-mothered' probably means the same us 'sons of the sky',

Vivasvant and Saranya may possibly be interpreted as the luminous day-aky and the dark night-sky, the 'twitight' theory of the Airms being time supported. See Myrianthens, Die Artins oder Aranthen Dioskuren (1876) p 57, and Ragonin, Vedic India, 252 256.

milk and the giving of a child to the wife of a cunuch'. They also gave a husband to the old maid Ghogā'.

h) The Asvins may be compared with Indra. Both the Asvins and Indra are represented as great helpers and deliverers. With this difference, however, that the deliverances wrought by the Asyins are a peaceful manifestation of divine grace, not as in the case of Indra, a deliverance from foes in battle. Again, both the Asvins and Indra are connected with the waters, but with a difference. The Asvins conduct across the eccan (sindhu), but Indra conducts across the rivers as e. q. the Vipas and Sutudri (III. 33). For the woy in which the Asvins deliver from the perils of the ocean, see especially the story of Bhujyu, son of Tugra, which Hillebrandt regords as the only saga of the Rv. that refers to the literal and earthly ocean'. If the account is to be taken literally, it looks as if Bhujyu had suffered shipwreck in the samudra, that is to say, either the Indus after the junction of its tributaries, or the oceen beyond. It is even possible to interpret tha whole adventure of Bhujyu mythologically, os is dona by Myrianthous and Bergaigne. On the whole, however, it is better to follow the hint furnished by IE, comparetive mythology, and take the narrative literally. For os Hillebrandt suggestively remarks'. The connection of the Asvins with Surva, that of the Dioscuri with Helena, and the relation of both the Asvins and the Dioscuri to the sea, points to a common background. Here, as in the case of Indra, myths that had their original home in the sky, have been brought down to earth. It may be that the Asvins' deliverance of the sun, who seemed likely to perish in the

¹ VII. 71, 5, I. 112, 3; 116, 13.

⁹ I. 117, 7; X. 40, 5. Note that hymns X. 39, 40 are ascribed to the lady Ghosal, as a female Risk.

⁵ VM, III. 18. More or less fully in agreement with Hillebrandt are Oldenberg, RV, 214, n. 2; Pischel und Geldner, VM. XXIII; and Vedic Index, II, 432, Art somudra.

⁴ VM, III, 18; ef. Oldenberg, BV. 214.

Sūrya's theophanic moment is when he rises above the horizon. He reveals the glory! of the gods, being called the face! of the gods in general (I. 115, 1) and especially that of Agni (X. 7, 3); also the eye! of the gods (VII. 77, 3), and especially the oye! of Mitra and Varuna! (VI. 51, 1; VII. 61, 1; 63, 1, etc.) as well as that of Agni (I. 115, 1). Since the sun is the oye of Mitra and Varuna, the rising of the sun is the oye of Mitra and Varuna, the rising of the sun is the theophanic mement of the two great Adityas also, when they are especially to be worshipped (VII. 63, 6-6).

The affinity between the eye and the sun is recegnised, each, as it were, being made for the other. In the funeral hymn, X. 16, 3, the eye of the dead man is conceived as going te Sarya: 'Thine eye go sun-ward and thy spirit wind-ward'. So in the great cosmogonic hymn X. 90, 13, the sun is thought of as born from the eye of the world-right Pursa:

The moon was gendered from his mind, And from his eye the sun was born.

1 Cf. Milton's Paradise Lost IV. 32-35

"O than that with surpassing glory erouned Look'st from thy sole dominion like the god Of this new world; at whose sight all the stars little their dominished heath."

Cf. for the same imagery Rv 1 50, 2 (after tenthth with changes).
The constellations slack away.

file thiever, together with the night,

Before the all-beholding sun

2 Cf. Rev. I. 16: "His countenance was as the sun shineth in his strength"

2 Cf. Ber. I 14: 'His eyes were as a flame of fire'.

4 Maidroell (VM, 23) pertinently remarks that the fact that the son as the eye of Mitra and Varuna is always mentioned in the first vene of a bytan augusti that it is one of the first bless that accur when these box goes are thought of. It is doubtless as 'the eye of Mitra and Varupa' that Strya In a few passeges is called an Ashay (f. 50, 32) 149, 6, VIII. 90, 1, VIII. 90, 1.

* Cf. I. 50, 6:

With that same eye wherewith thou seest,

O purifying Varuna,

The unquiet one among mankind.

In what is probably one of the latest hynnus to Sūrya in the Ry. (X. 158, 3-5) there is a prayer for sight¹:

- May Savitar the god, and may Parvata also give us sight;
 May the creator give us sight.
- 4. Give sight unto our eye, give thou Our bodies sight that they may see; May we surver, discern this world.
- Thus, Surya, may we look on thee,
 On thre most lovely to behold,
 See clearly with the eves of men (Griffith's translation)

The sun is naturally described as far-seeing and all-beholding (VII. 63, 1, 4). He is the epy (spai) of the whole world (IV. 13, 3). Especially is he a witness of the good and evil deeds' of men (VI. 51, 2; VII. 60, 2). As such he is besought, when rising, to declare men sinless to the Adityas and Armi (VII. 62, 2: There are also the prayers:

This day, ye gods, while Surya mounteth upward, Deliver us from trouble and dishonour. I. 115, 6.

- 4 O Surya, with the light whereby thou scatterest gloom, And with thy ray impellest every moving thing, Keep far from us all feeble, worthless sacrifice, And drive away disease and every evil dream.
- Cheerful in spirst, evermore, and keen of sight, With store of children, free from sickness and from guilt, Long-lying, may we look, O Surya, upon thee Unrising day by day, as great a Mitra thou.
 - 9 Thou by whose justre all the world of ble comes forth, And at the evening turns again unto its test, O Surps with the 4 flow har, rise up for us Day after day, still bringing purer innocence. X. 37, 4, 7, 9

(Grillith, with some changes).

According to the earlier hymn (VIL 62, 2) the function of Surya is to declare men guiltless, but here he seems to be

As the Vedic Aryana penetrated faither and farther into India, blindness must have become more and more common among them, even as to-day. This last gives the prayer a pathetic interest.

There is here suggested the affinity of the sun with purity and truth, and his beaulity to the opposite. Q. John III. 19-21.

He is once called 'the divine priest of the gods', and the epithet visvakarman 'all-creating' is once applied to him (X. 170, 4). Sarya's pathway was prepared for him by the immortals in general (VIL 63, 5), more especially by Varuna (I. 24, 8; VIL 87, 1) and the Adityas (VII. 60, 4). Tho question is raised, why the snn does not fall from the sky:

How is it that without being beld or fastened,

He does not fall, although directed downward ?

By what power does he move? Who has discerned that? Erect as prop of heaven he guards the zenith. IV. 13, 5; 14, 5.

The answer is that Surya protects the law of the universe'. His uniform' wheel follows a uniform, unchanging, universal law. In his obedience to law Surya is like Savitar. So central is the sun in the economy of things that he is once called the soul (atma) of all that moves or is stationary.

2. SAVITAR. - Reference has already been made to the view of Usener, followed by Schrader', that the primitive IE, world was characterised by the formation of 'special gods'. It has also been pointed out that the different Vedle sun-gods, Sarya, Savitar, Vispu, Pasan, Vlvasvant, and perhaps Mitra, illustrate such formations, since each god represents a special aspect of the sun. An alternativo vlew would be that each special sun god was, in origin, the creation of a different Vedic tribe, all of these being finally brought together within the Rigyedic pantheon as 'parallel forms' of the sun-god. Savitar, like Sūrya, is mentioned in ten or twelve hymns, at least eight of these belonging to the 'family books'. The following is a specimen hymn 1;

asuryah purchilah, VIII. 90, 12.

² tierasya tratam, X. 37, 5.

² Samana, VII. 63, 2-3.

From si 'to stimulate' (in Re. only of Savitar); akin to su 'to press (from which comes Some and su 'to generate', from which is derived suru 'son'. The close mutual relations of these three mots or meanings may have helped the development of both bavitar and Soma,

^{*} p. b2.

^{*}p 53.

Indebtedness is acknowledged to the translations of Macdonell, VRS 10 ff; Hillebrandt, LR. 40 ff.; and Hopkins, RI, 48 ff.

To Savitar, I. 35.

- I call on Agni first of all for health and weal, I call on Mitra-Varupa to aid me here; I call on Night that brings the busy world to rest, I call on Savitar the god for needed help.
- Rolling along the way through space of darkness, Laying to rest th' immortal and the mortal, God Savitar on golden chariot seated Comes hither all existent things beholding.
- The god goes by a downward, by an upward path, Adorable he goes with two bright horses.
 From the far distance cometh Savitar, the god, Driving off overy kind of pain and hardship.
- His chariot omniform, pearl-decked and lofty, With yoke pins golden, Savitar hath mounted,— He the adorable and brightly beaming Who clothes himself with might and spaces darksome.
- Drawing his car with golden pole, the dusky White-footed coursers have surveyed the peoples. For ever do the settlers and all creatures Rest in the lap of Savitar the godlike.
- 6. God Savitar's laps form two of the three heavens, One is the world of Yama, man-restraining. As on an axie-end, all things intmortal On him repose: let him who knoweth tell this.
- 7. The sky-bird hath surveyed the realms of mid-air, The Asura, of wisdom deep, well-guiding. Where is the sun now found? Who understands it? To which of all slies bath his ray extended?
- He hath surveyed the earth's eight summits lofty, The three waste lands, the leagues, the seven rivers. Savitar god has come, whose eyes are golden, Choice gifts upon the worshipper bestowing.
- The golden-handed Savitar, the active god, Between the heavens and earth proceedeth on his way. He drives diseases far away, impels the sun, And reaches through the darksome space the light of heaven.
- Let th' Asura, well-guiding, golden-handed,
 Go forward, aiding well, whose thoughts are kindly;

I The pearls are most probably stars as in X, 68, 11.

Chasing off sorcerers and evil spirits, The god at eventide arises lauded.

11. Thine ancient paths, O Savitar, are dustless, Thy paths well fashioned in the middle region; By those paths easy to traverse protect us, This day on our behalf be intercessor.

The following aspects of Savitar may be noted:-

a) Savitar is connected with both evening and morning! He goes by a downward and an upward path (v. 3). He goes around the night on both sides, i.e. at evening and morning (V. 31, 4). He regularly precedes the 'two days' i.e. night and day (V. 32, 8). Savitar has 'two laps', apparently the lap of mid-air whence he seems to sink at ovening, and the lap of the horizon from which he seems to rise at dawn (I. 35, 6). It would seem then that Savitar's theophanic moment is found at evening and dwn, at the time of the setting and the rising of the sun.

b) Savitar seems to have charge of the sun during the interval between evening and morning! He clothes timeself with the dark space, rolling along through it, impelling the sun', and finally reaching the light of heaven (vv. 2, 4, 9). It is apparently with reference to this period of mystery between sunset and sunrise that the singer asks:

Compare Hopkins, Rf 46, Macdonell, VM. 23-34.

a 11 looks at if Savitar in I. 35 where consisted as the power which impels and guides the sun from the place of his setting back to the place of his rinner, the and guides the sun from the place of his submer back and returning overhead in a reverse direction during the night. In v. 1 the night work is dustributed between Ratit and Savitar, Bittly not me to deep, while saving gives them all needed belp during the hours of databases, bunshing datatess, during wavy the demonst of the might, and, as he costots Sirrys through the databases have been in his place of rating, incidentally surveying all creatures (vr. 2, 5, 7, 8). This view is supported by the similar conception found with the Astergas Britanna III, 44. C. F. Bergaigne, RV. III. 56, Macdouell, VM. 10, Walks, CR. 115 II. According to Styans Savitar in the ann before rings.

³ Savitar, the motive power of the sun, is identified in V. 81, 3 with Etass, the steed who draws the car of the san. Cr. VII. 63, 2. So Bergague, RV. II. 333. It is from the poat of view, doubtless, that Savitar is represented as conducting the departed to where the rightness dwell X. 17. 17.

Where is the sun now found? Who understands it? To which of all skies hath his ray extended !? (v. 7.)

c) Savitar has two arms, which he raises up². A characteristic trait found in the family books, hence early, His hands and hie fingers are mentioned. His two arms are probably the ovening and morning glow².

d) Savitar is pre-eminently a golden deity. He has golden arms (VI. 71, 1, 5; VII. 45, 2) and a golden car with golden voke-pins and golden pole (I, 35, 2, 4, 5). Ho is golden-handed (I. 35, 9-10), golden-eyed (I, 35, 8) and golden-tengued (VI, 71, 3). Lustre or 'mighty splendour' famátil is characteristic of Savitar, and gelden lustre la ascribed to him alone (III, 38, 8; VII, 38, 1). His gelden arms are beautiful (VI. 71, 5) and he is 'fair-fingered' (svanguri). This last epithet reminds us of the Homeric posocaxulo: 'rosy-fingered' as applied to 'lle: 'Dawn'. Savitar's two gelden arms seem to mean the same thing as his golden lustre'. In view of all the facts the inference seems justified that Savitar's theophanic mements were the evening and morning glow, the ruddy flush which often covers the evening sky and the morning sky at sunset and sunrise. Se far as the dawn is concerned, Savitar is a 'mythelogical synonym' of Usas.

(e) With the evening flush Savitar impels all creatures to 'turn in' and go to sloop, and with the morning flush stirs them to awake and go to work '\(^1\)_ The goddess Night (\(\beta \tilde{at} tr)\) also 'brings the busy world to rest' (I 35, 1); and

¹ A similar question is asked in I. 24, 10 with reference to the stars.

² II, 38, 2; IV, 53, 4; VI, 71, 5, 5; VII, 45, 2.

¹ So Barth, Rl. 20. "Saviet, the quickener, who, as he raises his long arms of gold, rouses all henge from their slumber in the morning and buries them in aleep again in the evening". Also Grassmann, Urber settling, I No. 229.

⁴ The epithet ayohanu 'metal-jawed' or 'golden jawed' (bayapa), VI 71, 4, doubtless refers to the same golden glow at evening and morning, hence to be rendered 'prouze-jawed' rather than 'iron jawed'.

^{*}IV. 53, 3; VI 71, 2; VII 45, 1. Note the stereotyped expression nurringan prantian In IV. 53, 3 both processes—the putting to sleep and the awakening—src accomplished obtaining c by Sayitar's hearing, the evening and the morning flush.

impelled by Sürya the impeller (prasarilar) men awake in the morning to pursue their ends and do their work (VII, 63, 2-4). Thus there is an overlapping of function hetween Savitar and Rätri in the evening, and between Savitar and Sürya in the morning. As a specimen of an evening hymn to Savitar the following stanzas are given from II. 38:

- 4. The one who weaveth folds her work together, The artizan lays down his task half finished; Savitar mounteth up, the time dividing, Ile has approached in likeness of Devotion.
- Through various dwellings, through entire existence, Spreads manifold the household flame of Agni; The mother gives her son the choicest portion, Quite as he wished, by Savitar excited.
- 6. Now he returns who had gone forth for profit, All who have fared abroad years for their fire-side; And each, his task half-finished, homeward journeys, According to god Savitar's commandment.
- 7. The fishes find their portion in the waters, The wild heasts spread abroad through desert places; The woods are given to the birds. These statutes Of Savitar the god no one infringeth.
- Even the restless Varupa at sunset
 Seeks, as he may, a refuge in the waters;
 Ilis nest the egg-horn seeks, their stall the cattle,
 Each in his place god Savitar appoints them.

These stanzas present a delightful picture of the Vedic home-coming at the close of the day, when not only man hut also fish, heast and hird seek, each, their place of rest. Half-finished tasks are laid down, and the genial hearthfire is seen glowing far and wide. The evening meal is prepared, and a mother gives a choice hit to her hungry son. Certain lines remind one of Gray's Elecv. The

^{&#}x27;Twice a day Saritar comes and arines, or lifts up bit arms at evening and at morning. The glow at the time of the evening sacrifice is the very picture of Aramati 'Decotion'. The evening glow daysdes between day and night.

[&]quot;It is doubtless with reference to the home-coming at evening that Agni's epathet dambuas, "domestic", is applied to Savitar. (I. 123, 3, VI 71, 4)

following is a morning litany in which Savitar along with other dawn deities is invoked:

> Agni, the gracious, has upon the breaking Of radiant mornings looked, on wealth's bestowal. Come, Asvins, to the dwelling of the pious. Surve, the god, is rising with his aplendant. God Savitar hath spread on high his lustre. Waving his flag like a spoil-seeking hero. Varuna-Mitra fellow stablished order. What time they make the sun ascend the heaven.

IV. 13, 1-2 (after Griffith with some changes). f) Savitar is the lord of 'stimulation' (prasava V.

81, 5). As such he assumes all forms'. The different forms of life, fish, beast, and fowl, together with their abodes and forms of sustenance, are due to the ordinance of Savitar (II, 38, 7). He is once called prajapati 'lord of offspring' (IV. 53, 2). He bestows on men length of life or 'life succeeding life' (IV. 64, 2)'. Upon the gods in general and the Ribhus in particular, he bestowed immortality (IV. 54, 2: I, 110, 3), in this respect resembling Soma.

The word savitar 'stimulator', 'vivifier' is twice used as an epithet of Tvastar :-

> Tyastar the god, omniferm, vivilier', Offspring begets and feeds in various fashion. 111.55, 19

Visid supani V 81, 2 Sarriar's car is once called tiscarupa 'omniform'

L 35. 4. I Presenti is here an epithet of Savitar, 'the supporter of heaven and projugati of the world. In IX. 5, 9 prajapati is mentioned in connection with Soma and

Tranşar, being identified with Soma. From these uses as an epithet Prajapati finally attained an independent resultion as the supreme god, according to X. 121, 10 Fither long life for the individual or for the race, probably the latter, 'racial

immortality' for men, to correspond with personal immortality for the gods. The conception of Savitar as a 'quickener', who bestows immortality, may

be compared with the similar conception of 'the last Adam' who was made a 'quickening' or life-giving Spirit (Evenue Countrolly) I Cor. XV. 45. * Thestri 'fashioner', 'creator', from traks (= common root take 'to fashion',

Avestan thwaks. 4 Both couplets contain the words desan Transa natifactivarapab. Victorapa

is used by a pregnant sense 'shapang all forms', as well as 'possessing all forms'. In both couplets 'the generative or creative faculty of the desty is referred to' Macdonell, VM. 117

Even in the womb god Tvastar, generator, Omniform, vivifier, made us consorts. X. 10, 5

This would seem to indicate that Tyastar is the more ancient deity, and that Savitar has fallen heir to some of the functions of Tvastar. Tvastar, the craftsman deity and the artificer of the gods, seems to have been the apotheosis of the creative activity manifest in nature. Perhaps he may be regarded as a 'mythological synonym' of Dyaus: for, as paternity is the leading characteristic of Dyaus, so the adorning of all things with form, the shaping of the focus in the womb, is the work of Tvastar'. The conception of heaven as creative must have been quite natural in view also of the multitudinous transformations' that take place in the sky . As the creator of all living forms, both human and animal, Tvaştar is the energy manifested in generation and birth (I, 188, 9; IIL 4, 9). Thus he is a universal father. He is the ancestor of the human race, in so far as his daughter Saranyu was the mother of Yama, the first man (X, 17, 1). Vayu is his son-in-law (VIII, 26, 21); Agni (I. 95, 2) and (by inference) Indra, (VI. 59, 2; IL 17, 6) his sons. The 'omniform' Tvastar has also a son called Visvarana 'Omniform'.

It would seem probable, then, that Savitar was first a descriptive epithet of Tvastar and afterwards attained to

^{&#}x27;If a 'mythological syconym', then Traster may have been originally an epithet of Dykus, just as in two passages Sauder is an epithet of Traster.

³ X. 110, 9; L 168, 9; X. 184, 1; HL 4, 9, etc.

^{*}As the theater of ever-changing colours and forms (respine), cloud and sunshine, might and day, the sky might very well be called asversigns. In fact the epiths tritorypa 'omniform' is once applied to the nightest of Savitar which is adorted with pearls, i.e stars. I 35, 4.

⁴Thus Tvajtar forged the thunderhold of Indrs, sharpened the axe of Brahmansprid, and fishoned a weaderful bord, the chalice of the gods—a kind, of Veda; 1100, ferul.—which the glabbus made into four, this last being probably, as Ilithibronit thinks, the moon and its four phases. 1, 32, 2; X, 53, 9; 1, 20 0: 101, 5.

definite personification as a 'special god' in charge of the general work of 'stimulation', the most marked example of Savitar's energy of impulsion being that of the sun. Savitar conducts the sun through the darkness from west to east', and has to do especially with the evening and morning glow. During the day he is united with the rays of the sun (V. 81, 4), the epithet suryaraimi 'sun-rayed' heing applied in the Rv. to him alone (X. 139, 1). While Savitar is sometimes identified with Alitra, Pegan and Blaga, light-deities of the day, yet his most characteristic domain is probably that of the night, the time of 'the sun before rising' (V. 81, 4-5; 82, 1, 3)'. Savitar impels the car of the Aśvins before dawn (I. 34, 10). In his own department Savitar is supreme. Here not oven Indra, Rudra or the Adilyas can violate his independence (II. 38, 7, 9; V. 82, 2).

g) The 'golden text' of the whole Rv. is the famous Savitri or Gayatri' stanza, the most sacred of all Vedic stanza.

> That lenged-for glow of Savitar, The heavenly one, may we obtain;

So may he stimulate our thoughts. III, 62, 10.

Or as Macdonell (HR, 33) translates:

May we attain that excellent Glory of Savitar the god.

That he may stimulate our thoughts.

llere Savitar's power of stimulation is transferred to the spiritual world, and he becomes the inspirer and

 $^{^{4}}$ In like manner Savitar is becought to convey the \dot{w} parted spirit to where the righteous dwill (N. 17, 4).

Bhargo decasya dhimaki, Dhiyo yo nah prneodayah

quickener of thought. As Savitar awakens the world to do its work, so he awakens the spirit of man. The morning glow is an emblem of the inward illumination which the earnest worshipper or student desires for himself at the beginning of the day, or in the post-Yedie period at the beginning of Vedie study. As Soma exhilarates to holy thought and prayer, so Savitar stimulates.

 h) Finally, Savitar through his quickening and inner illumination makes men sinless;

If we have done aught 'gainst the gods through thoughtless-

Weakness of will, or insolence, men as we are, Whether wo've sinned against the gods or mortal men, Make' thou us free from sin and guilt'. O Savitar. IV. 54, 3.

And so he is able to declare them sinless to the sun and

Aditi (I. 123, 3; V. 82, 6).
Savitar with his morning glow drives away the serrows

of the night and ali bad dreams (V. 82, 4-5).

3. PUSAN.—A unique figuro in the Vedio pantheon, his car being drawn by goats, his hairbroided, his weapon a goad, and his food must. He seems to have been a pasteral' deity originating perhaps in a single Vedic tribe. Accordingly he is represented in the following hymn as a shepherd or herdsman god:

¹ Suralist, from all, to 'constitute' amiless through the process of inward querkening and illumination (Asta V. 82, 6). There is here the suggestion possibly of a dynamic working in the human spirit, something akin to the thought of Pr. Li., 'Craste in me a clean beart'.

² anagasah, 'guiltless'.

The derivation from pas 'to theire' would seem to indicate that Pajan was a Volic 'Sonderpoit', the personlineation of the idea of 'thrift' or 'prosperity', the 'prosperer'.

⁴ Since of the ten hymns addressed to Papan either singly or conjointly with Indea or Soma, six belong to the aixth book, it is a plausible conjecture that the worship of Papan originated in the Bharadvaja clau.

To Pasan, VI. 51'.

- Pūṣan, provide us with a guide, Who shall at once direct us right, And who shall say: 'It is just here'.
- With Püşan we would join ourselves, Who shall us to the houses guide, And say to us; 'it is just these'.
- The wheel of Paşan is not hurt, Never falls down his chariot-hox, Nor does his Ielly quake and creak,
- Who with oblation worships him, Him Pusan never overlooks; That man is first to find blm wealth.
- After our cows let Pëşan go;
 May ho protect and guard our steeds;
 May Püsan for us booty win.
- 6. O Pūṣan for us booty win.
 6. O Pūṣan, follow thou the kine
 Of Soma-pressing worshipper,
 - And of ourselves who laud thee well.

 7. Let none be lost, let none be hurt,
 Nor suffer fracture in a pit;
- Come back with all the cows unharmed.

 8. The watchful Pagan, him who hears,
 Whose property is never lost,
 The lord of wealth, we supplicate.
- O Pūṣan, in thy service may We never suffer injury, We laud and praise thee in this place.
- From far away may Püşan place His right hand round us to protect;
 May he drive back to us the lost.

The following characteristics of Pusan may be noted:

a) He shepherds domestic animals. Presperity for a pasteral tribe means good pasture (? 42, 6) for cantle and their careful shepherding, so that none may fall into a pit, break a limb, be seized by thieves, be devoured by

¹ For the translation compare Hillebrandt, Lit. 71 II. and Macdonell, VRS.

wild heasts or stray away and become lost '(VI. 54, 5-10; I. 42, 2-3). In the hymn translated above 'Pūṣan is represented as a divine herdsman', a 'good shepherd',' who guards and guides his own and ever seeks and finds the 'lost'. By analogy the activity of Pūṣan is extended, so that he makes all hidden treasures manifest and easy to find (VI. 48, 16), such as the hidden Agni and the hidden Soma (X. 5, 5; I. 23, 13). His exclusive epithets anasianau 'losing no eattle', and anasiancas 'losing no goods', emphasize this trait of his character.

b) Pūṣan is a 'path-lord (pathaspati VI. 53, 1). As such he guards every-path, delivers from the dangers of the road, such as the wolf and highwayman, grants auspicious paths, and makes them lead to booty. His goad is paiusedhant, that is, it directs cattle straight, in the morning on the road to pasture and in the evening on the road home (VI. 53, 9). As path-lord Pūṣan also escorts the hride on the way to her new home (X. 65, 37), and along with Agni and Saviar conducts the dead on the far path to the gods and the fathers (X. 17, 3-5). The pertinent stanzas from the great funeral hymn are worth quoting in this connection:—

3. May Pūşan bear thee hence, for he hath knowledge, Guard of the world, whose cattle ne'er are injured; May he consign thee to these Fathers' keeping, And to the gracious gods let Agni give thee.

¹ Compare the following Biblion parages: Gen, XXXI 39; 1 Sam. XVII. 34-36; John X. 3, 12; Matt. XII 11; Luke XV. 3-7.

⁷passps, 'cattle-protector', is referred directly only to Puskn (V1 58, 2).

² Cf. Ps. XXIII, 1; John X, 11, 14.

^{*}VI. 47. 8; I. 42, L-3; X-59, 7; VL 53, 4.

Present goad is a bocolic weepon and no function to keep rattle in the straight path is apparently the lank of connection between Papen's work as cattle-protection and that of path bod. Papen's record weepon, the san't, it described as 'prayer's unjuring, '(arahance-of-one VI 53, 8). The gravious light and impoless of the morning son constitute as and by which Papen produces a devotoom ignation the close-friend and so brough them to the remajor must of the presently singer.

Physic's goat serves the same purpose in conducting the sacrificial horse to the world of the cods (1 162, 2.4)

- May Ayu, giver of all life, protect thee;
 May Pu;an guard thee on thy pathway forward;
 Thither let hawar the good transport thee,
 Where dwelf the pions who have passed before thee.
 - 5. Payan knows all these realms; may be conduct us ify ways that are most free from fear and danger; Giver of blessings, glowing, all heroic, May be the wise and watchful go before as.
 - d. Pigan was form to move on distant pathways, On the lar path of earth, far path of heaven, To both most wonted places of assembly He travels and returns with perfect knowledge. X. 17, 34, (Griffith with some changes)
- c) Pusan's birth, habitat and connections are in the heavens. He was born on the far path of earth and sky, and so knows all the routes. He moves back and forth between heaven and earth, and his car never breaks down, Autrini 'glowing' is his exclusive epithet. He is the heavenly herdsman (gopeti', or, to change the figure, he sallahis golden ships through the nerial ocean, acting as the messenger of Sarya (VI 58, Jk. These descriptions point clearly to the sun. The personlication of Pagan as the sun was so faint that apparently the moral sense of the Vedie age was not scandulized by his being called the paramour of his sister (the Dawn) and the wood of his mother (the Night)' The whole caythical transaction was thoroughly transparent. Pasan and Savitar are closely related. Pasan moves in the energy (prasure X, 139, 1) of Savitar, and both conduct the dead to the place of the 'fathers'. Savitar is the sun as 'the great stimulator of life and motion', making the world to awake in the morning and sending it to rest in the evening; while Pujan is the

¹ X. 17. 3. 134, 1.

VI. 15, 15. The increasons larg afters action to F-ian may be the succipal of an earlier conception of him as a part god.

^{*}Passa is also called the bother of indra (VI. .5, .), and the spither Narisannas *peaced of men', otherwise exclosurely limited to Agai, is twoproposal to him [1, 11 of 4; X- 63, 3].

sun as the heavenly herdsmau, pathmaker¹, and traveller, who moves through the sky from sunrise to sunset².

The question arises as to which was primary and which secondary in Pusan, his earthly function as a bucolic god or his heavenly function as the sun. Macdonell thinks that the beneficent power of the sun manifested chiefly as a pastoral deity' underlies the character of Pusan (VM. 37), while Oldenberg takes Paşan's character as a path god to be primary (RV, 230 ff.). Where such great authorities disagree the solution is difficult. If, however, Pusan is really derived from pus 'to thrive's, then he most probably was in origin an abstract Sondergott, 'he of thrift', 'prosperer'. Concrete content would be secured by a very carly identification of Pasan with the sun as the best realizer of the notion of a herdsman god, since the sun shepherds the literel cows of earth as well as the cloud-kine end light-kine of the skies'. Thus in all probability 'Pūşan was originelly the countryman's deity, somewhat as were Pan and Faunus's. As Agal and Some were Brahman gods and Indra a Kastriya god, so Pûşan was probably a Vaisya god.

/ 4. Visnu.—A god of minor significance in the Rv., but of primary importance in the later history of India in view of his inclusion in the great triad, Brahmā, Visnu

¹ Cr. Ps. X1X. 5 6.

^{*} Peans's team of mountain-climbing goats his in well with his climb up the steep of heaven to the senith and then down to the place of samet. It is even possible that Papa himself was originally a goat-god, his goat-term being the survival of an earlier theritomorphic stage. Cf. Oldenberg, RV, 74-75.

Demed by Pischel and Geldner, VS. I. 193.

⁴ We may compare the local Bankers of Palestine, concerning whom Morris Jastrow write, "For the Canassities the old Semitic detailes became protectors of the skil, presiding over vegetation. In general these protectors were viewed as personifications of the sum".—Hebrew and Babylonian Tradition, 1914, p. 28.

Drisler, Notes on the Veduc Deity Pasan in Classical Studies in honour of Henry Drisler, 1894, p. 242.

Of the five or an Rayvela hymns addressed to Visua three belong to Book I, and the rest stand late in Books VI. and VII. Hopkins may, therefore, be correct in regarding the Visua hymns as late.

and Šiva. The following hymn (I. 154) i illustrates Viṣṇu's chief activity:—

- Let me tell forth the mighty deeds of Vişuu, He who has measured out the earthly regions; And has the upper gathering-place established, Having strode out, the wide-paced one, with three strides.
- Through his heroic deed is View lauded, He who like wild beast haunts the lofty mountains, Wandering at will, in whose three ample footsteps All worlds abide, all creatures have their dwelling.
- All worlds abide, all creatures have their dwelling.

 3. Let my inspiring hymn go forth to Visqu,
 The bull, the mountain-dweller, the wide-pacing,
 He who slove has measured out with three steps.
- The bull, the mountain-dweller, the wide-pacing, He who alone has measured out with three steps This long and far-extended place of gathering.
- Whose three steps filled with honey-mead, unfailing in heavenly joys, delight themselves in amrit; He who in threefold manner earth and heaven Alone supports, even all the world of being.
- 5. I would attain to that dear realm of Vienu, Where men devoted to the gods delight them; For dear and most akin to the wide-strider Is in his highest step the well of honey.
 - To your realms would we go, O Indra-Vişşu, Where are the many-horned and nimble cattle, There shincth brightly down the highest footstep, The footstep of the hull, the widely pacing.

The 'three steps' of Vinu constitute his chief characteristic. These are either the three stations, sunrise, zenith and sunset, or the three levels, sunrise, mid-air and zenith, most probably the latter. For the highest step¹ of Visuu is described in language which clearly identifies it with the position of the sun in the zenith.

^{&#}x27; For the translation of Griffith, HR. L 207; Hallebrandt, LR, 89; Macdonell VRS, 30 ff, and HR, 35.

³ So Macdonell, VM. 38, and Bloomfield, RV. 169. Agai's characteristic epithet trisadhastha 'three-scaled', i.e. found in earth, mid air and sky, is once applied to Vison, i. 159, 5.

^{*} Paramam padam, I. 154, 5-6.

^{&#}x27;The highest step of Visua is in X. I, 3 identified with the highest, i. e. the third place of Agni Yaska calls the senith Visuapada 'the step of Vison'.

The highest step of Vişuu is connected with the ideas of the Vişuu-worshippers of that time concerning life after death. There the pieus are happy in the dear abode of Vişuu (I. 154, 5). There is the well of honey, and there are found the many-horned and nimble cattle (I. 154, 6). The situation of Vişuu's highest step' is not easily described. It is beyond the flight of birds. It is seen by the liberal like an eye fixed in heaven (I. 22, 20). It shines down brightly (I. 154, 6). The note of yearning for the heavenly home, the elysium of Vişuu (I. 154, 6-0) is elearly sounded.

Vispu's highest step is represented as his distinctive abode (I. 154, 5). Hence his thosphanic moment is after be has taken his three steps and elimbed the mountain 'of the sky, in other words, when the sun is in the zonith. Vispu's epithet 'mountain-dweiling' and 'mountain-abiding' (I. 154, 2-3) are probably connected with the same order of ideas unless Vispu was originally a mountain-god in the literal sense.

Vispu took his three steps for a gracious purpose, namely to deliver man from distress (VI. 49, 13) and to provide him with the earth's as a dwelling*. In all this Vispu acted as a protector or preserver, an interesting anticipation of his later function as Preserver. In one passage (VII. 100, 6) there is a reference to different forms

A bucolse heaven 'flowing with milk and honey'.

^{*} I. 155, 5 cf. I 24, 6 of Varua.

⁵ With 'the sna-home of souls' in the Rr compare the sun-clad glory of the redeemed in the Bible: "They that are was shall shone or the brightness of the furmament; and they that form many to rephrocurates as the state for erc and erc". Dan XII. 37 and "Then shall the rightness ablice forth or the sun in the kingloon of their Father". Mail. XIII, 43.

⁴ Compare the representation of the Semitae Shamash (sun) on very early Babyloman sesis as a mountain climber.

^a Vison (VII. 99, 3) made fast the earth round about with pegs. The vault of the sky is conceived as a tent, which is fastened down at the horizon on all sades with tent-pegs, as it were

^{*} VI 69, 5 6, VII- 100, 4.

^{*} Traffe I 155, 4.

of Vişnu: 'Do not conceal from us this form, since thou didst assume another form in battle'. The various avataras of Vişnu depend upon this power of changing his form.

Vispu and Indra are closely associated, forming in one hymn (VI. 69) the dual divinity Indra-Vispu. Here there is mutual assimilation, Indra, becoming a wide-strider and Vispu a Soma-drinker and fighter. Both do 'heroic deeds' which are praised in almost identical language in their characteristic hymns (I. 32, 1; 154, 1).

The name Viquu is not transparent like Agni and Uşas, its derivation being uncertain. Oldenberg (RV. 229) thinks that Viquu was originally an abstract deity —'he of wide space', having nothing concrete corresponding to his three steps'. According to Macdonell, however, Viquu is the sun conceived as 'the personfiled swittly moving luminary' which with vast strides traverses the whole universe (VM. 39). It is possible that Viquu began as an abstract 'Sondergott' and later found concrete content in the sun.

B. Atmospheric Gods.

The Maruts have been described in connection with Indra their chief and Parianya in connection with Mitra-Varuna. Hence there remain only Väyu-Väta, Rudra, Trita Āptya, Apām Napāt, Mātarišvan, Aja Ekapād and Āpah.

Is this because their natural bases was similar—sam and hightning—, Indra as the lightning slaying Vittra and Visiou as the san striding through the worlds? Or was there conceivably a historical ground in the union of the Visiou worshippers and the India-worshippers, as suggested by Hillebrandt (VM. III. 348)?

² ciryani.

[•] Via to be active', hence 'the active one' (Maolonell VM. 39; storm (some summit') force the summit', hence 'he who climbs over the summit' (Bloomfield RV. 168); preposition st with ending sam 'the wide-striving' (Oldenberg RV. 292, n. 1).

^{&#}x27;The three steps correspond in Ister Hindu mythology to the three worlds, heaven, earth and hell.

p. 202 ff.

^{*} p. 141 ff.

- 1. VAYU-VATA'.—Each of these names for wind expresses both the physical element and its divine personification, but Vâyu more commonly refers to the god and Vâta to the element of wind'. Thero is only one complete hyan to Vâyu (L 134) and two to Vâta (X. 168, 186), those hymns belonging to the latest portions of the Rv. The following stanzas of L 134 in the unusual Atyaşti metre are reproduced after Griffith with some changes:
 - Two bay steeds Vayu yokes, Vayu two ruddy steeds, Swift-footed to the chariot, to the pole to draw,

Best coursers, to the pole to draw.

Awaken Bounteousness, as when A lover wakes his sleeping love.

Illumine heaven and earth, make thou the dawns to shine;

- For glory make the dawns to shine.
 4. For thee the radiant Dawns in the far-distant sky
- Stretch out bright garments wondrously in heams of light, Bright-coloured in their newest heams. For thee the nectar-yielding cow
 - Pours all rich treasures forth as milk.

 The Marut-host hast thou engendered from the womb,

 The Maruts from the womb of heaven.

Also the hymn to Vata. X. 168:-

- Of Väta's car I now will tell the greatness: Shattering, thundering, its roar advances; It moves sky-touching, lurid hues producing, Fares too along the earth, the dust up-whirling.
 The hosts of Vata follow close thereafter.
- And haste to him as women to their trysting.
 With them united, on the self-same chariot,
 The god, the King of all this world, speeds onward.
- Proceeding on the pathways through the mid-air, Never on any day halts he his chariot.

^{&#}x27; From cā 'to blow', possibly connected with Lai. Ventus and Teut. Woden.
Vâyu is referred to in the Avesta (Farg. XIX. 13) as 'the powerful wind made
by Mazda'.

² Macdonell, VM. 81.

² G. the translations of Griffith, HR: H. 600; and Macdonell, VRS 216 ff and HR, 62.

The first-born, friend of waters, order-loving ,-Where was he born and whence obtained he being?

 As breath of gods and germ of all ereation, Wanders this god according to his pleasure.
 His sound is heard, but no one sees his likeness.
 That Vata let us worship with obtation.

The following comments may be made:-

- a) Of all the forces of nature wind is the most restless. It nover halts (X. 168, 3). The constant movement of the air is more palpable than that of any other element, Hence nigutest 'drawn by a team' is a charact ristle epithet of Vayu, for he is always travelling about, of course, with carriage and span, llesides the centle breeze, there are found to-day three types of wind in the Vedic area, wind accompanying dust-storms, wind that blows up the monsoon, and wind that accompanies the rain-storm. It may be that all are referred to in the hymn to Vata. There is mention of the wind that whirls up the dust, and Vata as "the orderloving friend of waters' may be, as suggested by Hopkins, the wind that "brings the monsoon-clouds in due season". The wind whose sound is thunder, which touches the sky and produces the lurid lightning bues, is clearly the wind that accompanies thunder and lightning. Vayu, as the gentle morning zephyr, breathes upon Usas, the Lady Bountiful, and awakens her, as 'a lover wakes his sleeping love?
- h) To wake up Usas is to make the dawns to shine and illumine heaven and earth. Close connection between the morning breeze and the morning dawn; and hence for Yedle thought a causal relation between the two. The morning breeze, as starting up first, is naturally conceived as the cause of the dawn. Since then Yayu wakes up Usas, it is for him, i. c. on his behalf, that the radiant dawns in

I places, cf. placeatt land of pile, VIII. 26, 21.

In \$11. 37, 2 This is called the breath (alman) of baruna.

^{*} ION 47.

blosts which form the host of Vayu', or to the natural concomitants of wind such as the waters', etc. or to hoth.

f) The wind presents itself as a mysterious element. It wanders where it listeth. Its sound is heard, but no one sees its form. That is to say, its theophany is in terms of sound, not in terms of sight. Its origin is uncertain. Once it is called the child of heaven and earth (VII. 90, 3), and again it is said to have sprung from the breath (prana) of the world-giant (X. 90, 13). Hence in the late bymn (X. 168, 3) the question is raised: 'Where was he born, and whence obtained he being?'

g) The hygienic and vital aspects of wind were well known to the Vodio Indians. They know, that oir is the condition of life and oir in motion the condition of health. If there were terrible activities of Väta, in which he 'gonorated the Moruts from the wombs of heaven', that is, sent forth his brood of winds to accompany the thunderstorm, shattering trees and whirling up dust, there were also gracious' and remedial activities. Vata wafts healing and prolongs life, for in his house is the treasure of immertality (X. 186). It is from this point of view that Vata is called the source of the world and the father of men, yea the very 'breath' of the gods. If then the Greek:

^{&#}x27;So Mulr, OST 'gusts' (f); Hopkins, ION, 47 'forms of Vata'; Bloomfield, RV, 155, 'blasts of Vata'

² So Hillschrandt, LR. 61, 'Vatas Scharen'; and Macdonell, VRS. 217, 'bosts of Vata'.

³ Cf. John III. 8; "The wmd blowth where it will, and thou hearest the voce thereof, but knowes not whence it cometh, and whither it goth: so is every one that is born of the Spirit". Note that both 'wind' and 'Spirit' translate the same Greek word 7x:5µZ.

[•] Cf I 164, 41. 'The pull (or drug, dividit) of Vaya is perceived, not his form'.

^{*}In VIII. 26, 23 Vaya has the epithet Stea: cf. VIII. 18, 9.

⁴ Macdonell, VM. 82.

² atman X. 186, 4. Yayu-Vāta would seem, accordingly, to be connected with the Hindu doctrine of the Prayas or 'Vital Breatha?

word for wind furnishes in the New Testament a name for the Hely Spirit, we need not wender that the Vedic Indians also found in Vayu-Vata the symbol of a transcendent reality.

- Avan.—The Waters are praised in four entire hymna!.
 Their personification is very slight, not more than that of Prithit' Earth'. The following is Professor Macdonell's metrical translation of VII. 49::—
 - With ocean for their chief they flow unresting;
 From the aerial flood they hasten cleansing;
 For whom the mighty Indra's bolt cut channels,
 Here may those Waters, goddesses, preserve me.
 - Waters that come from heaven or run in channels Dug out, or flow spontaneously by nature, That, clear and pure, have as their goal the ocean: flere may those Waters, goddesses, preservo me.
 - In midst of whom King Varupa is moving, And, looking down, surveys men's truth and falsehood; Who clear and purifying, drip with sweetness; Here may those Waters, goddesses, preserve me.
 - In whom King Varuna, in whom, too, Soma, In whom the All-gods drink exalted vigour; Into whom Agni, friend of all, has entered; Here may those Waters, goddesses, preserve me.

The following comments may be made:--

a) It is the heavenly waters that are celebrated in this hymn, but not perhaps to the exclusion of the earthly? Their place is beside the sun. King Varupa moves in their midst. Indra with his bolt dug out their channels', and Apaim Napat, 'Child of the Waters', the lightning form

¹ V11, 47, 49; X. 9, 30.

^{*} HR. 63, cf. Hillebrandt, LP. 70

⁴The distinction between the waters 'above the firmationnt' and the waters 'under the firmament' is not very clearly drawn, so that in the Naighantala (V. 3) the waters are reckoned as terrestrial denses only.

The reference in VII. 47, 4 and 49, 1 to Indra's digging with his bolt the channels of the waters may be best interpreted as allothing to the hearenly waters It is an extension by analogy, when Indra is represented as bollowing out the channels of the Vipits and Satuski (III. 33, 6).

of Agni, 'without fuel shines among them' . At the same time the waters are represented as flowing in channels, natural or artificial, and as having the ocean for their goal 2.

b) The waters are naturally conceived as femining's. They are mothers, young women (or wives), and goddesses. As mothers they generate Agni in his lightning form as the 'Child of Waters' (X. 91, 6) as well as in his earthly form. They have most auspicious fluid, which they are besought as loving mothers to give. They are most motherly, the sources of everything both fixed and moving. In their union with the Soma juice, in order to provide the Indra-drink', the waters are compared with young women:

> Those in whom Soma joys and is delighted. As a young man with fair and pleasant damsels.

So maidens bow before the youthful gallant, Who comes with love to them who yearn to meet him'. X. 30, 5-6 (Griffith's translation).

c) The waters are wealthy, that is, in a pregnant sense, woulth-giving. They are mistresses of boons, and come bringing chee, milk and honey (X, 9, 5; 30, 13). The waters may be called wealth-giving either as fertilizing the earth and causing abundant harvests, or, more probably, as a constituent of the Soma drink, delighting Indra and the other gods and so inciting them to give boons. It is not the waters as such, but the waters as mixed with Soma that are praised in VII, 49, 4 and X, 30.

^{1 1. 23, 17,} VII 49, 1, 3, 4, X, 30, 4.

² Even here the reference may be to the heavenly waters as other dug out by the bolt of Indra, or falling spontaneously without the accompaniment of thunder and lightning.

With Apah 'Waters' we may compare beasah, the successive Dawns or simultaneous dawn gleans

⁴ Indra-pāna VII. 47, 1; X. 30, 9.

Note the fordness for sexual analogies in the Rveretati X, 30, 8, 12, 11 This epathet is also applied to Utas, as the bounti-

ful goddess of the Dawn. 19*

d) The waters are nourishing, strengthening, life-giving. Theirs is the 'wave of nourishment' (VII. 47, 1). They furnish drink to men and are a constituent of the drink of Indra (X. 9, 4; VII. 47, 1). It is only an extension of the same idea, when the waters are called medicinal, and are conceived as the source of healing and immortality.

Ampit' is in the waters, in them medicine. I. 23, 19. The floods are all-medicinal. I. 23, 20.

Ye waters, teem with medicine.

To keep my body safe from harm,

So that I long may see the sun. 1. 23, 21.

Ye waters are most motherly physicians. VL 50, 7.

e) The waters cleanse and purify:—

Hundredloid-cleansing, in their nature joyful,
To paths of gods the goddesses move forward;
Never infringe they Indra's ordinances. VIL 47, 3.
Let the floods motherly, the waters, cleanse us,
Furife us with oil, the oil-refiners:

For they bear off all stain, the goddess waters.

Up from them come I purified and brightened. X. 17, 10.

It is the extension by analogy from physical cleansing to moral cleansing that explains the following proper:—

Whatever evil is in me,

If I 'gainst any have done wrong,

Or told a lie and sworn to it.

Ye waters, bear it far from me. I. 23, 22 = X. 9, 8.

The waters are associated with Varuna who distinguishes between truth and falsehood (VII. 49, 3). Hence they bear away not only the defilement of the flesh (X. 17, 10), but also such spirit-defiling sins as violence and lying.

^{&#}x27;With the Amist that has its house in the waters compare the 'hying water' and 'the water of life' of John IV. 10 and Revelation XXII 17.

² Doubless the starting point in all these conceptions was the experience of the vital need of water and of its well-known hygicans value.

² The custom of millions the whole body with oil for remedial, cleansing and sacramental purposes is common in India to this day

293

3. Rudha.—Distinctly a subordinate god, being celebrated in only three entire hymns', but important as being the Vedic anticipation of Siva, the third person of the Hindu Trimūrti. As the later Siva with his phallie symbol is more like a Dravidian demon than an Aryan deva, so the Rigredic Rudra' is the most demonic of all the early gods. He may have absorbed aboriginal elements from the very beginning. With Pūṣan alone he wears his hair braided', possibly a sign of Dāsa or Sūdra influence. Men so dreaded the fearsome Rudra that the adjective Siva' 'auspicious' was attached to him as a cuphemistic epithet,'

To Rudra, II. 33°.

- Let thy goodwill, sire of the Maruts, reach us; From the sun's sight remove us not, O Rudra. In mercy may the hero spare our horses; May we with offspring, Rudra, be prolific.
- 2. Through those most wholesome remedies by thee given, Rudra, I would attain a hundred winters.

 Drive far away from us distress and hatred,
 Discases drive away in all directions.
 - Of what is born thou art the best in glory, Boit-wielding Rudra, mightiest of the mighty. Across distresses ferry us in safety, Revel thou from us all attacks of mischief.
 - May we not anger thee, O mighty Rudra, With worship poor, ill-praise, joint-invocation. By remedies do thou raise up our heroes,
 - I hear thou art the best of all physicians.

 5. Rudra invoked with gifts and invocations
 - I would propitiate with hymns and praises.

' II. 3J: VII. 4G: L. 114.

¹ Derived cutter from rud 'to cry', hence 'Howler' (Sayana), or according to Pischel (VS J. 57) from the hypothetical root rud 'to be ruddy'. Both meanings are suitable

^{*} Kapardin I. 114, 1, 5; VI. 55, 2. IX. 67, 11. Gr Vedic Index I. 135.

Cf. the similar Dravatian root se, sev. sign 'red, 'ruddy' See A. C. Clayton,
The Rinteda and Vedte Religion, 1913, pp. 76-78.

Acknowledgment is made of special indebtedness to the translations of Hillebrandt, LR. 95-97, and Macdonell, VRS. 56-87 and HII 55-58.

Gracious, fair-lipped, accessible, and ruddy, May he subject us not to his fierce anger.

- 6. Me begging succour has the hult made happy, By his puissant strength, he girt with Maruts. Shade in the heat, as 'twere, I would attain to, Would fain, uninjured, win the grace of Rudra-
- Where is that gracious hand of thine, O Rudra, Which is for us medicinal and cooling? Bearer away of harm by gods inflicted, Be thou, O Rull, compassionate to nie ward.
- I for the buil, the ruddy-brown and whitish, Mightly voice a mighty panegyric.
 Adore the radiant one with lowly worship,
 We praise the name, the terrible name of Rudra.
- With firm limbs, multiform, the strong, the ruddy, Has decked himself with jee ets bright and golden. From Rudra, this great universe's ruler, Let not divine dominion ever vanish.
- Worthy art thou that hearest bow and arrows, And thine adorable all-coloured necklace.
 Worthy art thou that wieldest all this terror;
 There's nothing mightier than thou. O Rudra.
- 11. Praiso him the famous, youthful, and car-scated, Like dread heast pouncing on his prey, the mighty-Bo kind, when fauded, to the singer, Rudra; Than us some other may thy missiles lay low.
- 12. Even as a son bows down in reverence lowly What time his sire draws nigh with kindly greeting, So praise I the true lord, who giveth richly; To us thou grantest remedies when lauded.
- 13. Your remedies, O Maruts, that are cleansing, That are most wholesome, mighty ones, and helpful, Those that our father Nanu hath selected, Those I desire, yea Rudra's balm and healing.
- May Rudra's missile turn aside and pass us, May the vast ill-will of the facece one spare us; Relax thy bow-string for our liberal patrons, O bounteous oue, he kind to our descendants.
 So, built, that here are raidly-brows and far-fathed,
- Sinco thou, O god, art neither wroth nor slayest, To this our invocation be attentive. We would with strong sons speak aloud at worship.

Comments: --

- a) Rudra is the father of the group of gods known variously as Rudras, Rudriyas and Maruts. The Maruts in the Rv. ore clearly storm-gods, compounded of storm-winds, lightning-flashes and showers of rain. As such they are closely associated with Indra!. There is a family resemblance between Rudra and the Maruts in that both father and sons wear ornaments of gold (the lightning flashes?), are armed with weapons especially with bow and arrow, are besought to avert their cow- and man-slaying stroke', and are rich in healing remedies. The original conception of Rudra would, then, seem to have covered "not the storm pure and simple, but rather its baieful side in the destructive ogency of lightning".
- b) Rudra is not described in the same terms as Indra. He is never represented as slaying Vritra, nor is the cheracteristic epithet of Indra, rajrabahu, 'bolt-armed' applied to Rudra more than onco.' There ore in fact three kinds of lightning mentioned in the Rv. as judged by its effects. Indra with his bolt slays the cloud-demon Vritra and releases the woters. So whenever peals of thunder and Hashes of lightning are followed by a downpour of rain, it is Indra's work. Secondly, whenever there is lightning, thunder, hallstorm or mist, without rain or with only a few drops of rain, then it is the work of Vritra', for Vritra clothes himself in the habiliments of Indra, and would appear as 'an angel of light'. Thirdly,

¹ See p 202 ff.

¹ J. 114, 10; VII. 56, 17.

³ II. 33, 14. The remedies appear to be the waters, for the Maruta 'rain down waters..... medicine' (V. 53, 14).

⁴ Macdonell, VM. 77.

^{*} H. 33, 3

^{*} As so often occurs in connection with dust storms in the Punjab from March to June.

⁷ Cf. 1. 32, 13.

whenever the lightning strikes man or beast, it is the work of Rudra. Indra's bolt is beneficent, since he smites only the foes, demonic or human of his worshippers, but the arrow of Rudra is maleficent. Rudra thus partakes of the nature of both Indra and Vritra, being both divine and demonic.

- c) While 'the destructive agency of lightning' is to be regarded as Rudra's original sphere and function, there is no ground for limiting it to this. There probably was a very early extension by analogy. If Rudra was at first the one who hurls the destructive lightning-dart, later, as the Arvans advanced further into the Punjab, he may have been thought of as hurling the dart of sunstroke' - that very real perll in India - or as burling the darts of illness and disease in general?. Such nn extension of function would be congruous with Rudrn's original activity, and in the light of Rudra's character as depicted in the literature of the Ynjurveda period must have taken place sooner or later. The numerous references in II, 33 to diseases and remedies would seem to indicate that such an oxtension of Rudra's functions may have occurred well within the Rigyedic period.
 - d) Some one has said that the gods are the first philosophy. It is equally true that they are the first and earliest science. For the mythical conceptions which early mankind formed concerning them "represent the conjectural science of a primitive mental condition". The Vedic Indians knew from experience that certain things in nature

 $^{^{\}rm h}$ Near the author's home in the U S. A. both men and cattle have been killed by lightning

E Soggested, perhaps, by the use of shreet in 11. 33, 6 and VI. 16, 38.

Both Olderberg (RV. 216-224) and Millebrandt (VM. II. 192 ft.) emphasize bodyrs's connection with disease, Olderberg regarding thin as a gol of mountain and forcut, where the slatte of discuss states, manifold, and blitchrandt making him responsible for the sixtly season numeritarily following the rains, when almost very one is straken down with ferrer.

⁴ Macdonell, VM. 1.

were wholesome, vitalizing, remedial, e.g. water, wind and storm. A storm accompanied by lightning, wind and rain clears the murky dust-laden air of the Punjab and gives a new sense of freshness and vitality. So the Vedic singer said: 'Vata watts healing'; 'the Maruts have pure, wholesome, vitalizing remedies'; Rudra, the father of the Maruts, is 'the greatest physician of physicians'; Soma, the drink of immortality, is 'medicine for a sick man'; Soma-Rudra together 'divo away illness'; the Aświns (so mysterious to us) are 'physicians with remedies'; and Varuna, the august Deity, has 'a hundred, a thousand medicines'.

In the long list of Vedie gods of healing, namely Rudra, the Maruts, Vata, Waters, Soma, Soma-Rudra, Asvins and Varuna, it is probable that in nearly every case we have to do with water. It is an ingredient of the Soma-liquor, and the honey of the Asylns may have been the morning dow. It is possible, however, that the remedies that are contained in the waters refer in part at least to the plants and herbs which own their existence to the waters; and which are used for either medicines, or charms or for both 1. The gods of healing are 'departmental gods', and yet in the matter of healing ministry there is overlapping of function. Each of sevon or eight Vedic gods is a healer. In this way were expressed the hygienic experience and judgments of the time. Thus natural phenomena of hygienic value transligured and personalized as gods are conceived after the manner of human physicians with their remedies. Indirectly, then, we may learn through these pictures of divine physicians something about human physicians in the Vedic age.

It may be that Rudra, who is fairly 'opaque', represents the coalescence of more than one god? In fact, when the

¹ We may compare the great symbol in Revelation of "a river of water of life", on both sides of which grew the "tree of life," the leaves of which were "for the bealing of the nations" (Rev. XXII. 1-2)

² So Hopkins (ION, 116) who regards five as "the combination of a Vedic storm god and a local aboriginal discusse god".

pantheon was in such unstable equilibrium as it was in the Vedic age, there were constantly functioning the contrasted processes of separation and combination. A god (like Agni) might cast off an epithot (like rudra'), which would become a separate god. But the cpithet in order to find a 'local habitation' may be thought of as attaching itself to another god or godling. Hence it is altogether possible that diverse elements have been brought under the name of Rudra. This is suggested by the differing views as to his nature that are held by such scholars as Weber, Schræder, Oldenberg, Hillebrandt and Macdonell

e) Notwithstanding Rudra's maleficent character, be is appealed to as a god of grace. As 'the boarer away of harm by gods inflicted' (II. 33, 7) he is besought to avert the anger of the gods (I. 114, 4)'. This is the Rigvedio analogue of the grace of Siva as expressed in the famous lines of the Trurasacant.

"Thou mad'st me thine; didst fiery poison eat, pitying poor souls,
That I might thine ambrosia taste. — I. meanest one".

4. APĀM NAPĀT, TRITA ĀPĪYA, MĀTARIŠYAN, AHINUDHNYA and AJA EKAPĀD may be dismissed with few words. They are in general to be regarded as 'mytbological synonyme' of Indra and Rudra, interpreted as the lightning'. Apā'n Napāt and Trita Āpṭya go back to the Indo-Iranian period. These two with Matarisvan are sometimes identified with Agai, especially in his acrial form. All are invoked only incidentally in scattered verses, except Apām Napāt who is celebrated in one whole hymn, of which a few stanzas are here reproduced:—

¹ Budra occurs as an attribute of both Agni and the Aivins.

Doubtless through the bealing of diseases inflicted by the gods

³ Macnicol, 1T. 175

⁴ Cf. Macdonell, VM. 67-74.

To Apum Napāt', II. 35.

- 4. Him the young man the youthful maiden waters Unsmilling circle round, make bright and shining. He with clear flames shines bountifully upon us, Ghee mantled, without fuel, in the waters.
- Who in the waters with his heavenly splendeur Shines widely forth, eternal, order-loving;
 The plants and other beings as his branches
 Do propagate themselves with all their offspring.
- Son of the waters, he the lap hath mounted Of (waters) prone, erect he, elad in lightning.
 Bearing his lofty and transcendent greatness
 The golder hued and swift streams flow around hlm.
- 10. He is of golden form, of golden aspect; The golden-hued is he, the son of waters; To him bern from a golden womb, when scaled, The givers of gold-gitts present oblation.
- 13. In them the bull a germ has generated; He as a child sucks them, in turn they kiss him. He sen of waters of unfading colour, Works here on earth as with another's body.
- 14. Him stationed in this highest place and shining For aye with undimmed rays, the waters bringing Ghee to their son as food,—the nimble waters Themselves with all their garments fly around him.

Here the cloud-born lightning is represented as surrounded by the lady waters, very much as the youth Soma sports with the maiden waters. We are reminded also that the Maruts are born of *Prisni*, the mottled stormcloud, and that Parjanya is the personification of the raincloud.

C. Terrestrial Gods.

Prithivi, Agni, Brihaspati and Soma have already been considered. There remains only the treatment of Sarasvati

¹ Compare the translations of Macdonell, VRS. 68-78 and HR. 64-66.

³ This reminds us of Sri Kiina and the Gopia. Is it possible that these early representations influenced the course of the Kiina legend?

and the Rivers with some reference to delified mountains, forests, trees and plants.

- 1. Sarasyati and the Rivers. The heavenly and the earthly waters are not shut off from each other in watertight compartments: each class involves the other. The heavenly waters fall in the form of rain, and run in the rivers to the sea, while the earthly waters owe their origin to the heavenly. In the famous 'Xadistuti' hymn (X. 75) there is the following interesting catalogue of the rivers:
 - Favour ye thia my laud, O Gangā, Yamunā, Sarasvatī and Sutudri and Paruşpi; Marudvridhā with Asikoi and Vitastā, O Ārjikiyā with Suşoma hear my ery.
 - First with Tristama thou, united to flow forth, With Rasa and Susartu and with Svetya here, O Sindhu, with Kubha and with Mehatnu joined, Thou seekest in thy course Krumu and Gomati.

The list begins with the Gangā on the east and ends with the Sindhu and its tributaries on the west. In viow of this order it would be most natural to think of the composition of the hymn as having taken place at the eastern end of the Rigvedic world? perhaps on the Sarasvatt or even in the region lying between the Gangā and the Yamunā, the present Sahāranpur District. The Sarasvati is clearly distinguished from the Sindhu, and its situation between the Yamunā and the Sutudri clientifies it beyond question with the modern Sarsūti near Thānesar. The Sindhu as the chief of the great river system of the Punjah is singled out for special praises as follows:

 To heaven ascends her roar on high above the earth, With shimmer she displays her endless vehemence:

¹ Cf. Sir A. Stein, Some River Names in the Repreda, JRAS. Jan. 1917: "The analysis of the river names given in our Rigyeda verse has proved that learning asade the still uncertain ärjikiyå, they follow each other in strict order from tast to west."

² Cr. Vedto Index under betasia: "The rareness of the name in the ligreda points to the Punjab not having been the seat of the activity of the greater part of the Vedic Indiana"

- As showers of rain that break forth thundering from a cloud, So¹ Sindhu rushes onward bellowing like a bull.
- Like mothers to their calves, like milch-kine with their milk, So, Sindhu, unto thee the roaring rivers run. Ev'n as a warrior monarch leads his army's wings, So leadest thou the rivers, moving at their head.
- 7-8. Most active of the active, Sindhu, undeceived,
 Like a mare splendid, like a woman fair to see.
 Good steeds has Sindhu, goodly cars and goodly robes,
 Golden is she, well-fashioned, rich in ample wealth?

These stanzas furnish a commentary on the sixth stanza, which describes the relation which exists betwoon Siodhu and her tributary streams. There is the description of a mighty river which is fed by hranches on both sides, the Sindhu contrelling them, just as a warrier king commends the two wings of his army.

To be compared with 'the hymn in praise of the Rivers' (X. 75) is 'Visyamitra's conversation with the Rivers', Vipās and Śutudri (III. 33)?. As Varupa dug the bed of the Sindhu, the chief of the rivers, so Indro dug the beds of the sister streams Vipās and Sutudri. In both hymns the rivers are compared with racing mares and mether cows. The personlification of the delifed rivers is slight, being held in check by their obvious physical character.

Sarasvati is invoked in three entire hymns of the Rv. She is regarded as the most worshipful of all the rivers, being described as 'most mother-like, most river-like, most goddess-like's and as the asurya or divine one among the streams (VII, 96, 1). She is depicted in grandilequent terms as a rushing, powerful flood, that surpasses all other waters in greatness, with her mighty waves tearing away the heights of the mountains as she moves rearing

¹ Lat. when.

Griffith's translation with changes

p. 187 ff.

⁴ VI. 61; VII. 05, 96.

⁴ Or 'Best of mothers, of rivers, of goddosses', H. 41, 15 (Macdonell, VM. 86).

along'. In view of the fact that the eastern Sarasvati (modern Sarsūti) must always have been one of the minor rivers of the Puniab, some scholars hold that the Sarasvati in most passages is to be identified with the Sindhu (Indus). But this, as already shown, is not probable. The hasin of the Sarasyati was the last halting place of the Vedic Indians before they left the land of the seven rivers and entered the Jumna Ganges area. There is evidence that the Arvan tribes were held back for a considerable time by the dense aboriginal population which occupied the banks of the Jumna. As in this protracted struggle the broad waters of the Jumna must bave been a bulwark for the ahorigines against the Aryans', so must the Sarasvati have been for the Aryans against the ahorigines. Sarasvatt is described as a 'metal fort' protecting the Arvan tribes and chicftains that dwell upon her banks, smiter of foes, slaving the Paravatas*, and besought by her worshippers not to let them go into captivity to strange and distant fields". The Sarasvatt, as the region where the 'five tribes' tarried longest, was doubtless the centre of gravity of the Rievedic world. Its hanks would be hallowed by the composition of hymns and the performance of sacrificial rites. In fact, the river Sarasvati and its area were in sacredness the Vedio analogue of the later Gangl and Madbyadesa. The religious significance of that sacred stream is indicated by the fact that on its banks two 'special' goddesses apparently had their origin, Sarasvatl 'she of the Sarasvatt river', and Bharatt, the personified

¹ VI. 61, 2, 8; VII. 95, 1

In VII 95, 1 Sargerate Sendles must mean either the water abounding Sindhu or the stream Sarasvati, most probably the later.

Probably Sarasveti, Lutudri, Vipai, Parusui, Asikni, Vitasta and Sindhu. 4 Chap 11. p. 45 ff,

See By. VII 18, 19 for the victory of Sudls and the Tritius over their foes on the Yamuna.

^{*} Probably a people on the Yamuna. See Vedic Index, Paracata.

⁷ Vt. 61, 2, 7, 12, 14; VIL 1, 2; VIII 21, 15.

offering of the Bharatas. These two goddesses appear in conjunction in the Apri hymns! Since the area of the Sarosvatt river was se important in connection with the composition of hymns, the goddess Sarasvatt, as the apotheosis of that river, came to be regarded as the inspirer of fair hymns and as the stimulator of good thoughts. The transition te the pest-Vedic meaning of Sarasvatt as goddess of elequence and wisdem presents no difficulty!

In relation to the other rivers of the Punjab Sarasvati is called 'sevon-sistored', 'soven-feld', and 'ene of seven's These terms link her up so closely to the whole river system of the Punjab, that while sho is the genius of the Sarasvati river, she is so in ne exclusive sense. She might almost be called the one river-gonius as manifested in each of the seven rivers. This explains the peradex erected by the insignificance of the river Sarosyati as set over ogainst the grandeur of her description. As the Greek ortist in oreating the ideal human figure levied upon the physical excellences of oil mankind, so Sarosvati is elethed upon with everything that is grocleus, striking and terrible in any of the Punjab rivers. This tendency to idealization wos doubtless helped by the fact that Sarasvati was a namo that had come down from the Aryan past freighted with angient memorios 5.

Sarasvati, while an earthly stream, has a heavenly origin. She flows from the mountains, the (celestial) ocean. She has the celestial *Sindhu* for her mother. She is called

Oldenberg, RV, 243

² I. 188, 8; 11, 3, 8; 11I, 4, 8, etc.

² codavitri I. 3, 10. ('t. pracodopat in the Gayatri formula

Vedic wisdom flourished within the river system of the Panjab, just as I'gyptian wisdom was nourished by the Nile and Babyloman wisdom by the Emphrates and Tigris.

VI. 61, 10, 12; VII. 36, 6.

The earliest Sarasvati was the Iranian Haragatil (the modern Helmand) beyond Kabul. Possibly, as some scholars think, Sarasvati was also applied as a seared name to the Smithau. It so, there were three Sarasvatis, as AV. VI. 100 mitch be interpreted to mean.

pāviravi, prohably 'daughter of lightning', and is besought to descend to the sacrifico from the great mountain of the sky'. The celestial origin of Sarasvati is an anticipation of the later doctrine of the celestial origin of Gaiga.

Finally, Sarasvati grants progeny and assists in procreation. Divodāsa was ber gift to Vadhryasva. Is this a reference to the fact that man's seed is wadery in nature, or does the function assigned to Sarasvati reveal the consciousness of the need of n larger population on the part of the Aryan tribes settled on the Sarasvati, in order to meet in battle the vast multitudes of the aborigines who wers blocking their way to the fertile territory between the Junna and the Ganges ?

2. Mountains.— As rivers are conceived as divinely animate, so are the mountains. In various passages the mountains are mentioned along with other delified natural objects, such as waters, plants, trees, etc., and also with gods like Savitar, Ahibudhnya and others. Once they are described as manly, firm-set and rejoicing in food (III. 51, 20). Parvata, 'the of the mountain', is thrice confoined with Indra to form the dual divinity, Indra-Parvata', who are invoked as 'van-lighters', who smite with their bolt, drivs on a great ear, and bring pleasant food. Parvata sometimes means 'cloud-mountain' as in II. 11, 78:—

- Indra, thy bay steeds showing forth their vigour Have sent a loud cry out that droppeth fatness.
 At once the broad earth spread herself to take it;
 Even the cloudy moving mountain rested.
- 8. Down, never ceasing, has the mountain settled:
 Bellowing has it wandered with the mothers?

¹ The descent of water as well as of fire and some is connected with the lightning.

² VII. 30, 6, 95, 2; VI. 49, 7; V. 43, 11.

^{*} I. 122, J, 132, 6, III, 53, 1.

⁷ The celestral waters

Swelling the roar in the far-distant regions. They liavo spread wide the blast sent forth by Indra. (Griffith's translation with changes.)

Here the meving, bellowing mountain refers clearly to the cloud-mountain of the sky. In view of this ambiguity, Parvata in the compound Indra-Parvata may refer both to terrestrial and to celestial mountains. Each meaning might be an extension by analogy of the other. The Himalayas being visible from so large a part of the Rigvedic habitat of the Aryans must cortainly be covered by the term Parvala. If the cloud-mountain and the lightning are joined tegether in the drama of the thunderstorm, hardly less is it true of the Himalayas and the lightning. The menseen storms often begin in the Himalayns and work backward to the plains. While all waters have their ultimate source in the celestial mountains, the rivers of the Punjah spring immediately from the Himglayas. Thus according to either interpretation Parvata' alone or Indra-Parvata are very properly described as 'refeleing in feed". It is quite in harmony with the Rigyedle conception of the mountains as divine that according to later Hindu thought the high peaks of the Himplayas are regarded. like Singi and Olympus, as the seat of the geds.

3. Fonests, Plants and Thees. - Aranyani 'she of the wild-weed', a jungle goddess, is celebrated in X. 146':-

> 1. O Jungle maid, O Jungle maid, Mcthinks that thou hast lost thy way. Dost not ask for the village? Why Alarm has seized thee, has it not?

2. When to the Frigarava's call The ciccika' makes answering cry With cymbals dancing, as it were, Then does the wildwood malden thrill.

¹ Maruta

In the plural partatasah, III. 54, 20

^{*} Cf. Oldenberg, RV. 255. Cf. the translations of Hillebrandt, LR: 150-151, and Macdonell, HR- 81-82.

Not identified Possibly owl and parret-

- Youder, the tattle graze, methinks, And what seems like a house appears; And then at eve the Jungle maid Seemeth to start the creaking wains.
- 4. Here some one calls his cow to him,

 Another there has felled a tree;
- At eve the dweller in the wood
 Thinks to himself, some one has screamed.
- The Jungle maiden never harms, Unless another is too bold;
 So after caling of sweet fruit
 A man at will may safely rest.
- Sweet-scented, redolent of balm, Apart from tillage, full of food, Of all wild beasts the mother, too', Her have I praised, the Jungle maid.

The personification of Aranyāui is very slight, for in v. 4 the same word means simply 'jungle'. The Jungle maid as the spirit of forest solitude is addressed in a chaffing bantering manner as one who is shy and fearful, having lost her way in the mazes of the lorest. She is harmless, unless one becomes too intimate with her gloomy recesses or encounters her children the wild heasts. The thousand and one ceric sounds that are beard at night in a forest are vividity described. Our thoughts go forward to the Aranyakas or 'Forest treatises' of a later time, when the forests were the home of hernits.

Plants (osadki), as divine, are invoked in one whole hymn (X. 97), where they are described as mothers and goddesses, with Soma as their King. It is uncertain how far the healing virtues of plants are celebrated in this hymn, and how far their uses in connection with magic. The hymn itself looks like a charm for the purpose of exorcising a disease-demon. Of course, the medicinal use of plants receives due recognition.

⁽arts often travel by night in Imits, to aveid the heat of the day.

The point of view from which Aranyans 'forest' is called the mother of the beasts is obvious.

¹ Oldenberg, RV, 256, n. 3

He who liath store of herbs at hand, Like kings amid a crowd of men,— Physician is that sage's name, Flend-slayer, chaser of disease. (Griffith's translation.)

Large trees were sometimes invoked as geds especially in connection with the deified Mountains and Waters'. Such were the Asvattha and the Parna, from which sacrificial vessels were made. The wood work of a chariet is frequently called vanaspati'; so also is yapa, the 'pest' to which the sacrificial victim is tied. In the Apri hymns Vanaspati is regularly invoked in the verse next to the last, and in the same verse Samitar 'divine butcher' is mentioned". In III, 8, 1, 3, 6, 11 the Yupa is expressly referred to under the name of vanaspati, 'tree'?. In this hymn Vanaspati is described as bewn out with an axe (vv. 6, 11), erected (1-3, 6), purified (5), anointed (1), end well-rebed with a cord or garland (4). The deified sacrificiel Pest represents the anotheesis of an accessory of the divine. As Agni, the sacrificial fire, received anotheesis because of his connection with the worship of the gods, so is it with Vanaspati, the sacrificial post. Hence Vanaspati as divine is implered in the same hymn to grant wealth (1, 6) with children (2, 6), to drive away poverty (2), and te give splendeur (3) and good fortune (2, 11)

Vanasvats 'forest-lord's

We may compute the N. T. use of 'tree' (Gal 111 13; 1 Peter II. 24) for Cross.

In the same way the Cross of Christ is sometimes referred to as if it had received a kind of cemi-apotheous

[&]quot;In the Cross of Christ I glory, Tow'ring u'er the wreeks of time, All the light of ancient story Guhers round its head sublime".

CHAPTER XI.

THE ESCHATOLOGY OF THE RIGVEDA

- As an introduction to the subject there is here presented a translation of the great Funeral Hymn ¹ X, 14, addressed to Yama;
 - Him who has passed away along the mighty steeps, And has spied out the path for many mortals, Vivasvant's son, convener of the peoples, Yama the King, present thou with obtainor.
 - 2. Yama was first to find for us the pathway, A way that from us never can be taken?, Whereon have gone away our former fathers. Along their several paths—they who were born here.
 - Upon this stream grass, Yama, pray be seated, Joining thyself with Angirasas, Fathers.
 Let spells seer-uttered bring thes to us hither, Do thou. O King, rejoice in this obtation.
 - 5. Come hither with th' adorable Angirasas, there with Virapa's sons delight thee, Yama. Thy sire Virasvant call I; (may he revei), When seated on the litter at this worship.
 - 6. As for Angirasas, our Sires, Navagyas, Athaivans, Bhijgus, lovers of the Soma, We would continue in the loving-kindness Of them the worshipful, and in their favour.

To the dead:-

- 7. Go forth, go forth upon those ancient pathways, By which our former fathers have departed. Thou shalt behold god Varupa, and Yama, Both kings, in funeral offerings rejoicing.
- Unite thou with the Fathers and with Yama,
 With istaphista in the highest heaven.

^{*}Indebtedness is acknowledged especially to Hillebrandt, LR 118-119, and Macdonell, VRS, 164-175 and HE. 55 56.

Or: From us this pasture perer can be taken So Hullebrandt, LR. 118, and Maddonell, VRA, 165.

Leaving behind all blemish homeward hie thee, And all-resplendent' join thee with a body,

To the demens:--

9. Begone, disperse, slink off from here, ye demons; For him the Fathers have prenared this dwelling. To him a resting place King Yama giveth, By days distinguished, and by nights and waters.

To the dead :--

10. Past the two sons of Sarama, the two dogs, Four-eyed and brindled, hasten thou by pathway straight; Draw near thou to the Fathers rich in bounty. Who at a common feast with Yama revel.

To Yama:-11. Thy two dogs, Yama, guardians are and four-eyed. Mankind-beholding, watchers of the pathway: Commit him to the care of these, King Yama,

Welfare on him bestow and health abiding. To the living:-

12. Ilroad-nosed, brown-coloured (2) and hunters of living men The two as Yama's envoys wander 'mongst the tribes. May these give back to us a life auspicious. That we may here and now behold the sunlight.

To the priests:-

13. For Yama press the Soma-mice, Th' oblation pour, the sacrifice Being well prepared to Yama goe-With Agui as its messenger

14. Sten forward and to Yama King Pour the oblation rich in ghee. May he direct us to the gods,

That we may live a life prolonged. 15. To Yama King th' oblation pour

Most rich in bonied sweetness. This Our hymn of praise is for the Risis, ancient-born, The ancient makers of the path.

2. In the Rigredic period the dead were disposed of by both burial and cremation. Burial is probably referred

surarcas translated by Hillebrandt 'in voller kraft' (LE- 118) and by Macdonell 'full of vigour' (VRS. 170).

² Cf. Br. A. 15, 14 'Those cremated and those not semated'. Both methods are practised in modern India at the present time.

to in the expression 'house of clay' (VII, 89, 1), and also in X. 18, 10-11 as translated by Macdonell': —

- 10. Approach the bosom of the earth, the mother, This earth, the far-extending, most propitions; Young, soft as wool to bounteous givers, may she Preserve thee from the lap of dissolution.
 - 11. Wide open, Earth, O press not heavily on him; Be easy of approach to bim, a refuge safe; As with a robe a mother Indes Her son, so shroud this man, O earth?

It is probable, as Oldenberg holds, that burial was the older method being connected with the conception of the dead as going down into the underworld. But cremation was clearly the usual way. As the fire-sacrifice went up in smoke and flame to the heavenly world of the gods, so also did the dead man when burned upon the funeral pyre. Thus cremation was closely bound up with the Rigyredic ideas of the future life. Rv. X. 16 is a cremation hymn, of which the following stanzas are reproduced (after Griffith with some chances):

 Consume him not, nor injure him by burming; Agni, cast not away his skin and body.
 O Jätavedas, when thou hast refined him, Then send him on his way unto the Fathers.

2 ≪, 4 ≪ When he attains unto the world of prints,

Then may he win the delties' high favour.

With thine auspicious forms, O Jatavedas,

Bear this man to the region of the nious.

¹ HR. 58.

² It is barely possible that these verses may refer to the disposition of the bones and sales after cremation, as Oldenberg, (RV, 571) and Hillebrandt (LV 122) seem to think. But see Felix Index L. 8

^{*} BV. 543-548

Compare the dying utilerance of a modern murity in Tibet "I thank you for throwing me into this fire, for the flames of this fire lift ine up high so that I may reach heaven soon" Streeker and Appasaini, The Sodhik 80

Lit. 'cooked' him.

Assault lit. *spirit guidance?, i c. Agai's guadance of the souls of the dead from this to the other world. Cf. Oldenberg, EV. 528

- What wound soe'er the dark bird hath inflicted, The ant, wild animal, or deadly serpent, May Agni heal it, ho the all-devouring, And Soma who has passed into the Brahmans.
 - 9. Far hence sond I the raw-flesh-cating' Agnl, Stain-bearing may he go to Yama's subjects; But may the other Jätavedas carry Oblation to the gods, for he is skilful.

It looks as if only the gross material body were consumed in the flames, the immaterial or spiritual part being carried heavenward when refined or 'cooked' in the fire. It is true, verses 1 and 6 read as if the whole body with its members intact were translated to the skies, but doubtless this way of putting things may be accounted for on the hypothesis of a bolief in a body so refined and purified by fire os to be free from all imperfections', something like the 'subtile' body of later Indian thought, It will be noticed that, as Agnl is invoked at cremation not to injure or dearroy the dead, that is, the immortal port that survives death, so methor Earth is besought at burlol not to press toe heavily upon the deported, but to preserve bim from the lap of dissolution'.

It is practically certain, as already pointed out', that in the IE. period gifts to the dead were buried or burned with the corpso—gifts of such things os food, weapons, clothes and domestic animals, and sometimes slaves or even wife'. It is to the credit of Rigvedic morality that the primeval IE. custom of Sath was not continued, the only reference to it being in the form of a ritualistic substitute therefor, as described in X. 18, 8-9:—

Arise, come to the world of life, O woman;
 Thou liest here by one whose breath has left him.

¹ Kravyad, an epithet also of the demon Kimidan, VII, 104, 2.

² Cf. X. 14, 8; 16, 6 ² X. 16, 1; 18, 10-11.

⁴ Chap. I., p. 11.

Oldenberg, RV. 587; Hillebrandt, VM. 11. 8.

Come: thou hast entered now upon the wifehood Of this thy lord who takes thy hand and woos thee'.

 From the dead hand I take the bow he wielded, To win for us dominion, might and glory.
 Thou there, we here, rich in heroic offspring, Will ranguish all assaults of every forman?

Here we have the ritualistic surrival of what is called in AV. XVIII. 3, 1 'the ancient custom' of burning with the dead man his widow', as well as his weapons.

The following stanzas of X, 16 refer to the hurning of a he-goat, and perhaps also of the flesh of a cow along with that of the corpse:

- 4 at The he-goat is the part; with fire consume him; Let thy fierce flame, thy glowing heat devour him.
 - Shield thee with cows' against the flames of Agri, Be wholly covered with their fat and richness;
 so may the bold one eager to attack thee
 With fierce glow, fail to girdle and consume thee!

It looks as if we had here the idea of substitution, the fire doing its worst upon the enveloping cover of goat's

Who took thy hand and woord thee as a lover'.

1 Macdonell's translation, HR. 87.

³ The custom of *saff, or widow berning, was retured in later days, but portugs, as Olderbeep remarks (Rv. 561), it may never here altograther ceased, in space of the authority of the Rv., post as now-alpys there is an occasional case of *saf by India maptic of the sutherity of Government. Compare the following account as expected in the Calcular Seferation of 10 pt 19, 1921—

A case of sail has been exposed in village Sampiur near Katai on July 3. The hubband, and 35, was a carpenter in the employ of the Katai Camari Pletory, and deel of lever. This poung wills, who was rishly adorned and derovel, remained at boost when the body was taken to the cremation ground, and when the people returned, she went out valued to great to them. Some of her french went is search of her Jates, and our returning to the cremation ground found both books busining together.

¹ Possibly v. 8cd refers to the dead husband, as interpreted by Gulfith: "Wifehood with this thy husband was thy portion,

That is, the product (ghee) or the flesh of core

[,] Cirifith's translation with changes.

Oldenberg, RV 5a7-58b,

flesh and cew's flesh (or ghee), and so (in theory at least) sparing the dead man thus enveloped.

As has already been pointed out in Chap. I, it is practically certain that the service and worship of the dead was practised during the IE. period. The effering to the Manes of feed and drink undoubtedly existed during the Rigvedic period, but the detailed account of the Śraddha ecremonies is found only in the later literature! The service of the dead is of immemerial antiquity, and bears witness to the belief in a future life.

3. The most important technical terms of Rigvedic psychology are asu, 'spirit', 'breatly', expressive of physical vitality, and manas 'soul', the seat of thought and emotion, Upon the presence of asu and manas life depends. For example, gatāsu in X. 18, 8 means 'he whose breath has gone', hence dead: and reference has already been made to asuniti, Agni's leading of the spirit of a deed man from this world to the next (X. 16, 2). The Rigvedle conception of manas 'soul' as imperishable is probably based upon the early belief that the soul is capable of seperation from the body during the dream-state or even during uncensciousness. For example, in Rv. X, 58 the manas or 'soul' of e man who is lying unconscious and apparently dead is thought of as having gone away to Yama, or to heaven and earth, the feur quarters, the ocean, the metes in the sunbeams, waters and plants, sun and dawn, the lofty mountains, etc. and is besought to return from the distant place wherever he may be This is doubtless a spell to bring back a sick man to life and health. In the following two passages there may perbaps be found the germ of the later doctrine of metempsychosis, since the soul (manas) is thought of as going to the waters or the plants :-

[.] Oldenberg, RV 518-553. The Śrāddha mantras are at the present time mostly Vedic, although they may contain later additions

¹ Cf. gatamanas 'he whose soul is gene forth'. Tallt Samh. VI 6, 7, 2.

Macdonell, VM. 166.

The sun receive thine eye, the wind thy spirit¹, Go, as thy nature is, unto the sky and earth. Or to the wafers go thou, if it be thy lot; Go make thy home in plants with all thy members ¹ (X. 16, 3).

Thy spirit's, that went far away,
Unto the waters and the plants,

We cause that to return again,

That thou mayst live and sojourn here'. X. 58, 7.

As already indicated, the body has a part in the future life. The asu and means remain united there as here, which is a guarantee that all the functions of the mental life remain intact. Thus the full personality of the departed, consisting of body (saring), soul (asu) and spirit (manax), is preserved. Having a body, the departed drink Soma', eat the funcal offerings or 'spirit-food' (IX. 113, 10) and hear the sound of the flute and of song (X. 135, 71).

4. The Rigvedic Paradise is variously described as situated in the midst of the sky (X. 15, 14), in the highest heaven (X. 14, 8), in the third heaven, the inmost recess of the sky (IX. 113, 8-9), in the lap of the ruddy (dawns) (X. 15, 7), and in the highest step of Visuu (I. 154, 5; X. 16, 3), that is the place of the sun at the zenith. We may note in passing the bright sunny character of the Rigvedic paradise, so different from the (probably earlier) conception of a dark 'underworld' as the abode of the dead.

i alman

² Graffith's translation with some chappes.

² manas

Gniith's translation with some changes,

^{*}X. 14, 6; 16, 5.

^{*} The Fathers are often called Somyasah 'lovers of Soma', N. 14, 6, etc.

According to AV, 1V, 34, 2 the departed have abundance of sexual gratification. It is only fair to say that the detail in the po of the blessed dead is not found in the IV. The providing of the great gods with wives furnished a starting point for the notion of this kind of blus. We are remaided of the Housin of the Qurint.

^{*} Cf. 3 Cor XII. 2.

² Oldenberg, RV, 54c, thinks that the transition from the idea of an underground Hades to that of a heavenly Paradise was mediated by the fact that both

The blessed dead are furnished with bodies suitable to the new environment, as the following passages indicate:

Leaving behind all blemish homeward hie thee, And all-resplendent join thee with a body. (X. 14, 8.) They that, consumed or not consumed by Agni, Amid the sky in spirit-food do revel,— Along with these prepare, O sovereign ruler, A passage to the skies, a heavenfy body. (X. 15, 14.) Back to the Fathers, Agni, do thou send him, Who, to thee offered?, goes with spirit-viands. Endued with life may he attain to offspring; May he rejoin a body, Jitavedas. (X. 16, 5.) Here is one light for thee, another younder; Enter the third and be therewith united. Uniting with a body be thou welcome, Dear to the gods in their sublimest birtiplace,

(X. 56, 1 Griffith's translation.)

As there is an earthly and a heavenly life, so there is an earthly and a heavenly body. The earthly body at doath either suffers dissolution in the earth or is consumed on the funeral pyre. When thus 'cocked' or refined by Agni, the dead man ascends by the 'ancient paths' to the realm of Yama, Agni conducting his soul to the sun-home of the Fathers, where he is united with another body. The new body is congrueus with the new environment, and so is a luminous or glorified body (X. 14, 8, 56, 1). When the soul of the dead man returns hither, he is said

2 Note how the corpse when cremated is represented here as an offering to Agni,

the heavenly Gods and the earthly Fathers received similar worship. It was logical, then to think of the Fathers as associated with the Gods in the highest place of bliss.

¹More hierally: Along with these prepare according to by power as sovereign ruler this spirit guidance (to heaven) and a body. (n. X. ²), -5. 6 Assmit in apparently ¹be of spirit-guidance¹. The prayer addressed to Annulli is clearly for either restoration of health in this life or for restoration of the body and faculties in the heavenly would. To find trummagration here: (24-ini Daystand Seravari, Rigardathkaryabbannaka, 211-212) is to real later views into the text, and is not in humons with Rigardachardasys.

Cf. Oldenberg, EV. 585, n. 2.

to go back home'—te his 'true home', as it were. Naturally, then, in putting on a heavenly body the dead man puts off all the imperfections of earth (X. 14, 8); or, as the AV. has it, 'sickness is left behind and limbs are not lame or crooked'. Old age is overcome (X. 27, 21). On reaching the realms of light, the sainted dead are welcomed by the gods and are beloved of them (X. 55, 1). This fair picture is rendered even fairer by certain details contributed by the AV, according to which the blessed dead see father, mother and sons, and unite with wives and children (AV. VI. 120, 3; XII, 3, 171, 5).

We may now describe mere particularly the felicity of the blessed dead. They see Varuna and Yama (X. 14, 7), revel with Yama in the heavenly paradise, partake of the funeral offerings (ecadhā), and share in the feasts of the gods (X. 14, 10; 15, 14). The most detailed account is found in IX. 113, 7-112, According to this striking passage, the Rigredic Heaven is a place of radiance inexhaustible and of living waters, of spirit-food and complete satisfaction, of movement glad and free,—a place where King Yama has his seat, where felicity and joy, pleasure and biliss abound, and where loves and longings are fulfilled and all desires are satisfied. The grave and solemn tone of this Rigyedic hymn of Paradiso reminds one of the similar utterance in Rev. YII. 16-17:

. They shall hunger no more, neither thirst any more; Neither shall the sun smite them any more, nor any heat: For the Lamb that is in the midst of the throne shall be their

shepherd And shall guide them unto the fountains of the waters of life; And God shall wipe away all tears from their eyes.

¹punah 'back' 'agam' (N. 16, 5), and astem 'bome' (N. 14, 8) So Bloomfield, RV. 251 "returning to their true home".

¹ III. 28, 5.

Translated in Chap. VIII. pp 241-242.

⁴ Charles, The Revelation of M. John, New York, 1920, L. 216-217, II. 406.

We are reminded also of the following lines in Tonnyson's Passing of Arthur, concerning which Taino' remarks that "nothing ealmer and more imposing has been seen since Goetho":

...... the island-valley of Avilion,
Where falls not hail, or rain, or any snow,
Nor ever wind blows loudly; but it lies
Deep-neadowed, happy, fair with orchard lawns
And bowery hollows crowd with summer sen. (377-381.)

All three passages describe the future life and environment in terms of the present life. This is inevitable. Each passage is capable of either a material or a spiritual interpretation. In view of the Atharva-Voda emphasis' on completeness of body and limbs, streams flowing with milk, hency and wine, the presence of many-coloured cows that yield all desires, and abundance of sexual gratification, as distinctive marks of the heaven of the blest, one is naturally inclined to read ky, kx. 113, 7-11 in the same light. But if the AV, and the Brahmapas had been marked by progress toward the spiritual rather than by reaction toward the material and carnal, it would have been equally natural to have interpreted IX. 113, 7-11 in the light of their spirituality.

The blossed dead are represented as having fellowship with the gods and Yama in the realms of light. When they arrive, they are dear and welcome to the gods (X. 56, 1). They behold both Yama and Varnua (X. 14, 7). Here we have the conception of heaven as a fellowship of the immertal heavenly gods with those sainted souls that bave come from the earth.

Heavon is depicted as a roward for those that risk their lives in battle, bostow liberal sacrificial fees, practise rigorous austerity (lapas') and lay up merit for themselves

¹ History of English Literature. ² AV, IV, 6, 1; 34, 2, 5, 6, 8,

So Oldenberg, RV. 531-532. Cf. Macdonell, VM 168.

⁴ X. 154, 2-5,

through their offerings and pious gifts (X. 14, 8). Thus the departed are represented as united in paradise not only with the Fathers and with Yama, with the rays of the sun (I. 109, 7), and with glorified bodies, but also with what they have sacrificed and given (eigenvata) while on earth. Such 'treasure' liaid up in beaven will be theirs on their arrival. We have here possibly the garm of the later doctrine of Karma, a word which means in the Rv. 'work' in general, or specifically 'sacrificial work'. Such works constitute the merit which wise the bliss of beaven for the departed soul. It is only necessary to universalize the notion of 'work', making it apply to everything in the universe, both animate and inanimate, in order to get the full-fleeleed doctrine of Karma, as held in later times'.

The most important references to the future life as shown above are found in the later portions of the Rv., in the tenth and first books. Just as eschatology received emphasis among the Hehrews only in the crilic and postexille periods (a. c. 586 and onward), so it looks as if Migredie eschatology belonged in the main to the later period of the Rigreda hymns, say about B. c. 1000-800. Rigredie ideas concerning the Inture life are connected especially with Vispu (L 154, 5-6), Soma (IX. 113, 7-11) and Yama. Soma grants the draught of immortality; Yama discovered the path by which the blessed dead travel from earth to beaven; and in the highest step of Vispu there is a well of honey. It may be that each group of ideas was elaborated originally in a particular tribal or priestly circle.

 It the rightcousness of the rightcous' seemed to the Rigredic seers to require a heavenly abode as a place of reward, then naturally and logically the wickedness of the

[&]quot;bullitah 'well thorrs' (X. 16, 1). derayarah, derayantah, 'god devoted' 'bul serring' 1, 154, 5.

wicked would demand a separate abodo as a prison or place of punishment. The passages are confessedly few which may be quoted from the Rv. in support of a doctrine of hell'; hut, though few, their evidence is elear enough. Consider the following:-

Roaming about, like brotherless young women, Of evil ways, like dames that trick their husbands, As such being full of sin, untrue, unfaithful !-They for themselves this deep place have created. IV, 5, 5. O Indra-Soma, dash the evil-doors? down

Into the pit, the gloom profound and bottomless,

So that not one of them may ever thence emerge;

Such be your wrathful might to overpower them. VII. 104, 3. In these two passages the emphasis is upon the easting of the wicked into a 'deep place' (padam gabhiram') or 'pit' (vavra). Similarly the wish is expressed that the thief and robber may lie undor the three earths, and that the demoness in the form of an ewl may plunge down into the endless (i.e. hottomless) pits (VII. 104, 11, 17). These references show that the prison-house of the wicked was conceived as a deep or bottomless pit of darkness,

'As far removed from God and light of heaven As from the centre thrice to the utmost nole's.

When one has been cast into this pit, no exit is possible. Every sinner creates for himself 'this deep place' through the evil deeds which he has committed (IV. 5, 5) '.

In general, then, we may say that the conception of hell seems to have been forced upon the Rigvedic seers by the facts of the moral life.

6. Two hymns of the Ry, are devoted to the praise of the Pitris or Fathers". Certain stanzas of X. 15 are hore reproduced: -

Oldenberg 1:V. 536 542; Macdonell, VM. 164.

Note the word for wicked: duskinian 'evil doern', papusah 'sinners', anritah 'untrue', analysh 'upfaithful'.

¹ Narakasthanam 'hell'-Siyana Paradise Lost, I, lines 73-74.

Cf. Acts 1, 25, "Juda- fell away, that he might go to his own place".

⁸ X. 15 and 56.

- Let them rise up, the lower, up the higher, Yea up the midmost Soma-loving Fathers. May they who have attained to life eternal, Kind, order-knowing, aid us when we call them.
- To-day be this our homage to the Fathers, Who passed beyond, the earlier and the later; Those who are seated in the space terrestrial; Or now solourn amid the class fair-settled.
- Fathers, come lither with your aid, grass-scated;
 These offerings have we made to you: enjoy them.
 So come to us with your most wholesome succour,
 And grant us health and welfare without blemish.
- Invited are the Soma-loving Fathers
 Unto the dear deposits on the litter
 Of sacred grass; may they draw nigh and hearken,'
 Yea intercede for us and grant us succour.
- G. Southward being seated and the knee inclining, Welcome unitedly this our oblation.
 O Fathers, hurt os not for any trespuss
 That we through human frailty have committed,
- Vasisthas, our forefathers, Soma-loving, Who are considered meet for Soma-drinking,— Sharing in gifts with these let Yama eager With eager ones at will eat our oblations.
- Come, Agni, with the thousand god-adoring Forefathers seated at the heating-vessel, All eaters, drinkers of oblations, truthful.
 - . Who journey with the delties and Indra.
- 11. Ye Agni-tasted Fathers, come ye nigh to us, Sit each upon his seat, ye that good guidance give. Eat the oblations that are proferred on the grass, And then grant wealth to us and hosts of hero sons.
- 12. Of Fathers who are here and who are absent, Of Fathers whom we know and whom we know not, Thou, Jatavedas, knowest well the number; With spirit-food prepared accept our offering'.

We are here introduced to Rigredic ancestor-worship?. The Fathers thus adored have passed through death and

¹ Indebtedness is acknowledged to Mandonell, VRS, 176-186, Hillsbrandt I.B., 119-1205 and Griffoth.

² Cf. Chap 1, pp. 11-12.

attained to life', the implication being that it is life immortal', since the Fathers are associated with the Dovas in their activities and in the worship they receive. This conception of the sainted dead seems logically to shut out transmigration. The Soma-loving Fathers are invited to the earthly sacrifices, where they sit along with the Dovas on the barhis or litter of sacred grass. They come in thousands and take their proper places on the sacrificial ground, being seated to the south, the region of the dead. Here they receive their portion of the libations' for which they yearn.

The Fathers receive adoration, and are invoked to hear, intereeds for and protect their descendants, granting unto them perfect health and welfare. They are also besought not to injure their descendants for any sin which they may have committed against thom. They are also represented as givers of wealth and offspring?

Cosmic activities are sometimes ascribed to the Fathers, such as addraing the sky with stars, placing darkness in the night and light in the day, finding the hidden light, and generating the dawn. Being assimilated to the gods and leading the same kind of life, the Fathers receive almost divine heneurs, and in one passage (X. 56, 4) are apparently called gods. They constitute a special group of deities or at least of domi-gods.

The Fathers are distinguished as earlier and later, as

As a 'spirit', 'life' (X 15, 1), the context showing that it refers to the heavenly life, conceived of course after the analogy of the earthly as a 'breath'.

The Fathers are actually called immortal in AV. VI 41, 3.

⁹ As the Devas are nourabed and strengthened by offerings, so are the Fathers. Sradha mean 'leherent power', and in X 14, 3, 15, 14; IX 113, 10, it seems to mean the 'apint-lood' or drink which confers that power Oblemberg, BIV, 541 n. 2; SBIZ, XLVI, 102.

⁴ X. 15, 2, 4, 5. Note the practice of 'prayers to the dead'.

X. 15, 6, 11; 16, 5; 18, 9.

X. 68, 11; VII 76, 1.

Macdonell, VM. 170.

lower, higher and middle', and as known or unknown, evea those who are unknown to their descendants being known to Agni'. In general the term pitjis refers to the early forefathers, who travelled from earth to heaven by the ancient paths which Yama discovered. These paths they, the ancient-born, helped to make for their descendants, the recent dead, who go to join them (X. 14, 2, 7, 15). Certain ancient clams are mentioned as represented by the Fathers, especially the Angirasas, Navagvaa, Atharvans, Vairūpas, Bhrigus and Vasigthas (X. 14, 46; 15, 8). These ancient buther are called in one place Rishis (X. 14, 15).

7. Yama, the chief of the blessed dead, is never explicitly called a god, but only a King. Still it is everywhere implied that he is a god, for he is closely associated with Varuna, Brilaspati, Agmi and Matarisvan, and is menticated in the lists of the gods. Yama is celebrated, in only three whole hymns's besides the one containing the famous dialogue between Yama and his sister Yami (X. 10). Most of the references to Yama are found in the teath and first hooks.

c) The ancestry and relationships of Yama are uncertain and perplexing. According to one account (X. 17, 12) Yama and (by implication) his twin sister Yama are the children of Vivasvant and Saragyu, the daughter of Tvaştar. Vivasvant 'the lumiaous' is clearly a deity of light. Whether he he interpreted as the rising sua', the luminous sky', or simply the sun' makes very little difference,

As belonging to earth, sky and mid-air.

³ X. 15, 1, 2, 13.

⁵ We are reminded of the distinction drawn in RV. I. 1, 2 between ancient and recent lique.

^{*}Hillebrandt, VM. L 488; Hepkins, El. 128, 130; Bloomfield, Rv. 141,

since each involves the other. Saranyu 'the swift' may be taken as a synonym of Süryā or Usas the Dawn', or perhaps better with Myrianthens 2 as the night which, of course, ends with the dawn. Vivasvant and Saranyu were responsible for two pairs of twins, Yama and Yami and the two Asvins, If the Asvins are taken to be the twin-lights of the morning twilight, half-dark and half-light, then Vivasyant and Saranyu, interpreted as the day-sky and the night-sky, would furnish a very suitable parentage for them, for the twilight shares in the colour of both parents. In like manner Yama and Yami may perhaps be interpreted as moon and Dawn, both sharing in the qualities of day and night, and represented as having a love-affair which ended in a wedding (X. 85, 8-9). The physical basis of the heavenly romanco may then be seen when the waning Moon draws near to, and finally fuses with, the Dawn, otherwise called Surya, the Sun-maiden.

Compare the following stanza of a Lithuanian folk-song

"The Moon did wed the Maiden Sun, In an early day of spring tide, The Maiden Sun arose betimes, The Moon just then did slink away".

-Hillebrandt thinks that the two wives of Vivasvant (X. 17, 2) are Night and Dawn, Night vanishing and Dawn taking Night's place in the aftections of the Sun. But these references are so occasional and fugitive that, as Hillebrandt says, they explain nothing, but stand in need of explanation themselves.

themselves. From an entirely different circle of mythical ideas comes the statement that Yama and Yami are children of

So Bloomfield JAOS, 15, 172-188, and Mardouell, VM. 125.
 AAD, 57. So Hillebrandt, VM. I. 503, n. 1.

³ Unices, as some think, Yami is a later creation, like Indran and Varuaini, so Hillebrandt, VM. I. 495. But perhaps Yama and Yami may be taken as Heaven and Earth, the primeral parents of all things

(7. X-10, 9.)

^{*} Quoted by Bloomfield (RV. 114) from Prof. Chase's version, with alterations

⁵ VM. 1 503.

the Gandharva in the waters and of the water nymph i, although these two are possibly to be identified with Vivasvant and Saranyu'.

Yama, the son of Vivasvant, clearly belongs to the Indo-Iranian period, because identical with Yima, the son of Vivanhvant. The twins Ymna and Yami correspond with Yima and Yimeh, Yami belonging to a late Rv. hymn (X. 10) and Yimeh to the Bundahis, a part of the younger Avesta. Yama Vaivasvata (X. 14, 1) has an interesting doublet in the person of Manu Vivasvant (Val. 4, 1) called later also Manu Vaivasvata (AV, VIII, 10, 24). Doubtless the two originated in different mythical circles. They introduce us to the problem of the origin and the future life of mankind.

to Rigyedie conception, a first man, either Manus the first sacrificer (X. 63, 7), or Yama the first to discover the pathway from earth to heaven (X, 14, 1-2), because the first to die. Manu is definitely called 'our father' (L 80. 16: IL 33, 13) as also is Yama (X, 135, 1). The twins Yama and Yami may be taken as the progenitors of the human race, as it were the Indian Adam and Evc. The motive of the strange dialogue (X, 10) between the twin brother and sister turns upon the othics of such a relationship. Yami presses for it on the ground that Yama is the 'only mortal' (v. 3) and that progeny is necessary in order to people the world (vv. 1, 3). Yama on the other hand draws attention to the fact that

b) At the head of the human race stands, according

Great is the law of Varuna and Mitra (v. 6). The hero sons of Asura the mighty, Upholders of the sky, look round them widely (1. 2). They stand not still, nor ever close their eyelids, Spies of the gods, that here about us wander (v. 8).

¹ appa yosa X. 10, 4. 2 So Siyana and Max Muller.

Manu (or Manus) 'mun' from man 'to think'. Cf. the Bebrew idom *man *.

The ethical difficulty of the origin of the human race from the union of a primeval brother and sister reminds one of the similar trouble one finds in discovering where Cain and Abel got their wives (if not from among their own sisters). It looks as if Yama and Yami were originally anthropomorphised natural phenomena, such as Moon and Dawn, or lleaven and Earth? The name Yama 'twin' seems to indicate that there was such a pair of natural phenomena. When Yama became anthropomorphised, the name Manu (Manus) 'man' was altogether suitable. To say that Yama and Manu ard doublets is to say that they are practically identical?

Boyond tho first man the roots of humanity run back into the world of the gods', to Vivasvant (the Sun)', the father of Manu's and the father of Yanna and Yami, the last two being identical, probably, with Heaven and Earth, the parents of all that is.

Sacrifico is carried back to primeval man. Manu prosented the first offering to the gods (X. 63, 7), and honce Manu's original sacrifice is a prototype of the Rigyedle sacrifice. For the Rigyedle priest is often said to perform the ritual of sacrifice Manuyvat, 'as Manus did' (I. 44, 11, etc.). The priest also thinks of himself as functioning in the 'home of Manu' or the 'seat of Vivasvant', expressions to be explained as the place of sacrifice. The Iranian

Of course in both mutanees we are dealing with the realin of conceptions.

⁹ Hearen and earth as natural twine might very well be called Yama and Yarol. They are also the parcets of all that is As Virassant and Sarany, Day and Night, are the parents of the Assim, conceived as the twight, so might they well be the parents for investers) of Yama and Yami conceived as Hearen and Earth.

Their practical identity is symbolized by their both being made sons of Vivasyant.

Oldenberg, RV. 276. Cf Luke III. 38, "Which was the son of Adam, which was the son of God".

^{&#}x27;The sun-source of the soul becomes finally, as we have seen, the 'sun home' of the soul,

⁶ Manu seems to be Indo-European, because it corresponds with Mannus (Tacitus, Germania Cap. II), Germ. Mann. and English man.

Vivanhvant was the first to prepare the Ilaoma, and the Rigredic Vivasvant performed similar functions (Vāl. IV. 1). Thus Manu-Yama was the first man, the first sacrificer, the first ruler, the first one to see death, the first to blaze a pathway from earth to heaven, and the first to hecome the king of the blessed dead in the realms of light.

c) The Riggedic Heaven as the ahodo of the Fathers has already been described. Yama is the king thereof. His dwelling is in the 'remote recess' of the sky. There he gathers the people together, gives the dead man a resting place, prepares an abode for him, and under the well-leaved tree of Paradise drinker the draught of immortality with the gods, while at the same time, as their clan-lord and father, he attends lovingly to the ancient ones'. The seat of Yama, which is the abode of the gods'. le a place of music and song. Yama as the first and 'sole mortal' (X. 10, 3) on earth is represented as choosing death and abandoning his body on behalf of gode and men, in order to open up for them a path between earth and heaven (X. 13, 4; 14, 1). If this is the correct interpretation 4, then there is ascribed to Yama a love for the human race which bore fruit in sacrifice.

Yema's regular messengers are two dogs, 'hounds of heaven' as it were, the sons of Saramā. They are described in X. 14, 10-12 as four-eyed, broad-nosed, and brindled or brown'. The two dogs of Yama are clearly as closely associated together as are the Asvin pair or the twins Yama and Yami to taken as Heaven and Earth, then it would seem natural, with Bloomfield to

¹ Cf. Mark MIV. 25; Luke XXII, 18.

^{*} IX. 113, 8; X. 14, 1, 7, 9; 18, 13; 135, 1.

^{*} devamāna X. 135, 7.

Interpretation uncertain Cl Oldenberg, Rv. Noten II. 210-211, and Macdonell, VM, 172.

In the AV. VIII. 1, 9 the two dogs are distinguished as "builded! Sabalas"

⁽possibly to be identified with the Gr. Kep2spoz. Bloomfield BV, 106) and Syama 'dark', an interpretation of the difficult word adumbala 'brown' (!).

think of the two heavenly dogs as originally the sun and moon. But this is very uncertain. In view of the fact that in both the Greek and the Iranian mythology of the dead only one dog plays a part, it is possible that the Indian love of correspondence and symmetry has led to the creation of two dogs. But whatever these dogs originally represented, their business is described as guarding.

Cerherus-like, the way from earth to heaven', as selecting the candidates for death, and as entrusted with their eare as they journey heavenward (X. 14, 10-12).

in modern stories these dogs guard the doors tending to heaven and hell,

PART C.

THE SIGNIFICANCE AND VALUE OF THE RIGVEDA

CHAPTER XII.

THE RIGVEDA AND LATER HINDU DEVELOPMENTS.

(The Rigveda is the fountain-head' of Hindu religion, philosophy, law, art and social institutions.) It is no more possible to understand later Hinduism without a knowledge of the Rv. than it would be to understand the New Testament or the Quran without a knowledge of the Old Testament. [The Rv. has fulfilled itself in the thought, institutions and history of India.] To show how this is so, is to write at once the last chapter on the religious contents of the liv. and the first chapter on the significance and value thereof.

1. THE RIGVEDA AND HINDU ART.

a) Poctry.—The contents of the Rv. are entirely metrical, which agrees with the fact that the beginnings of literature are, as a rule, in the form of poetry. There are about fifteen metres, of which ten are represented by the translations made in this book. The verse-line forms the metrical unit, and generally has eight, eleven or twelve syllables. Stanzas consist usually of four lines, but also of three, five and seven. Some hymns are composed of strophes either of three stanzas (trica) in the same simple metre, or of two stanzas in different mixed metres (pragatha). The (Tristubh) stanza consists of four eleven-syllable lines. It is the most 'common metre' in the Rv. For example:

^{1 &}quot;The Velus farnish the only sare foundation on which a knowledge of ancient and modern India can be built up".

Whitney, JAOS, V. 291.

With mine own self I meditate this question, When shall I have with Varuna communion? What gilt of mine will he enjoy unangered? When shall I happy-hearted see his merce? VII. 86, 2.

The Gayatri stanza has three eight-syllable lines, and is illustrated by the famous Gayatri text, as translated by Macdenell (HR, 33):

May we obtain that excellent Glory of Savitar the god, That he may stimulate our thoughts. III. 62, 10.

The Jagati has four twelve-syllable lines:

Whatsoever wrong against the heavenly race we do, heing but men, O Varuga, whatever law, Of thine we may have broken through thoughtlessuess, For that transgression do not injure us, O God. VII. 89, 5.

As the Tristubh ends in a trochaic rhythm (- - - -), so the Jagath ends in on lambic rhythm (- - - -). The Innstubh centoins four eight-syllable lines, as in the hymn to Aranyāni, X. 146:—

O Jungle maid, O Jungle maid, Methinks that thou hast lost thy way, Dost not ask for the village? why? Alarm has seized thee, has it not?

The Vedic Anuştubh developed later into the Śloka of classical Sanskrit. About 180 Higwodie passages have been ktranslated in this book, ranging from a single line to a complete hymn. Of these the number of passages in the four principal metres are as follows': Tristubh 100, Gayatri 36, Jagati 29, and Anuştubh 13. Only ten passages are in the unusual metres. Among these are the following: Pankti, with five eight-syllable lines, as in IX. 113, 7,

Where radiance inexhaustible Dwells, and the light of heaven is set,

Max Muller, following Saunaka, divides the 10,409 Rigerelle stanzas among the different metres as follows: Trielubh, 4,253; Giyatri, 2,451; Jagati, 1,348; Anutubh 855, etc. (Ancient Santirit Literature, p. 22).

Place me, clear flowing one, in that Imperishable and deathless world. O Indu, flow for Indra's sake.

Prastarapankti, with four lines, a Tristubh, a Jagati and two Gayatri, as in X. 18, 11 (Macdonell's translation),

Wide open, earth, O press not heavily on him; Be easy of approach to him, a refuge safe; As with a robe a mother hides

Her son, so shroud this man, O carth.

Britials, with four lines, first, second and fourth Glyatri, and the third Jagatt.

To Yams king th' oblation pour

Most rich in honied sweetness. This
Our hymn of praise is for the Richis, ancient born,
The ancient makers of the path. N. 14, 15.

Purastadbrikati, with a Tristubh and three GJyatri lines, as follows:

Against us is the ritcless, shameless Dasyu,

Inhuman, keeping alien laws; Do thou, O slaver of the foe.

This Dasy u's weapon circum ent. X. 22, 8.

Dvipada, two lines, Jagatt and Gayatri:

Another brandisheth a bolt placed in his hand; With that he smites and hills his foes. VIII, 29, 4,

ilyasii, a complicated stanza of seven lines, three Jagatt and four Gayatri as follows:

Two bay steeds Vayu yokes, Vayu two ruddy steeds, Swift-footed to the chariot, to the pole to draw.

Best coursers, to the pole to draw. Awaken Bounteousness, as when

A lover wakes his sleeping love.

Illumine heaven and earth, make thou the dawns to shine, For glory make the dawns to shine. I. 134, 3.

Thus it will be seen that while the stanzas of the more common metres are made up of lines of the same type, the rarer stanzas are formed by combining lines of different length. The rhythm of only the last four or five syllables is rigidly determined. Thus the metres of the Rv. stand

THE RIGVEDA AND LATER HINDU DEVELOPMENTS 331

midway between the archaic metres of the Ayesta, which are governed only by the number of syllables, and the more polished measures of Classical Sanskrit in which, as a rule, the quantity of every single syllable is fixed. The Vedic metres are the foundation of all the classical Sanskrit metres except two.

The hymns of the Rw, are nearly all religious, only a few being semi-religious or didactic in quality, for example, the Gambler's lament in X. 34, of which certain stanzas are here reproduced from Professor Macdonell's excellent translation.

- She' wrangles not with me nor is she angry:
 To me and comrades she was ever kindly.
 For dice that only luckless throws effected
 I've driven away from home a wife devoted.
 - Her mother hates me, she herself rejects me. For one in such distress there is no pity.
 I find a gambling man is no more useful Than is an aged horse that's in the market.

 Others embrace the wife of him whose chattles The eager dice have striven hard to capture;

And father, mother, brothers say about him
"We know him not, lead him away a captive."

5. When to myself I think, "I'll not go with them
I'll start habital my found that the to capable."

 When to myself I think, "I'll not go with them I'll stay behind my friends that go to gamble;" And those brown auts, thrown down, have raised their voices, I go, like wench, straight to the place of meeting.

 To the assembly hall the gambler sallies, And asking, 'Shall I win?' he quakes and trembles. And then the dice run counter to his wishes, Giving the lucky throw to his opponent.

 Grieved is the gamhler's wife by him ahandoned, Grieved, too, his mother as he aimless wanders.
 Indebted, fearing, he desiring money,
 At night approaches other people's houses.

Macdonell, ERE, VII., article Hymns (Vedsc); VRS, XVII-XVIII, and IIR, 9-10.

^{*} HR. 88-90.

The wife of the gambler.

13. 'Play not with dice, but cultivate thy tillage, Enjoy thy riches deeming them abundant. There are thy cows, there is thy wife, O gambler': This counsel Savitar the noble gives me.

14. Make friends with us, we pray, to us be gracious, Do not bewitch us forcibly with marie: Let now your enmity, your anger slumber, Let others be in brownies' toils entangled.

There is here a distinct anticipation of the proverbial and sententious poetry of later days.

We have to distinguish between two types of religious neetry in the Ry., on the higher side, consisting 'in praises of the gods and generally accompanying the sacrifices offered to them', and on the lower side consisting 'in spells or charms directed against hostile powers, and accompanying some domestic practice of a magical character". There are about a dozen such hymns, which deal unmistakably with magic practices .

We may also trace in the Rv. the beginnings of Hindu lyric, dramatic and epic poetry. The whole Rigyedic collection is fundamentally lyric, special hymns, of course, having a lyric-dramatic or a lyric-cplc setting. The most poetical hymns in the Rv. are those addressed to Dawn, which Macdonell pronounces 'equal, if not superior, in beauty to the religious lyrics of any other literature! The dialogue between Visvamitra and the Rivers (III. 33) is essentially dramatic. Notable storm and battle lyrics are found among the hymns addressed to Indra, Parjanya and the Maruta

⁴ Macdonell, ERE, Art. Hymna (Vedac).

² Confined largely to the tenth book. E. p. compare the following stanza from an incantation in the form of a song of transph over rival wives as translated by Macdonell (in MS.1-

^{&#}x27;smouthed bare I these riral wires. l'asing superior to them all. That over this heroic man

And all his people I may rule. X. 159, 6.

VRS XXVIII, Cr. also Hopkins Early Lyrse Poetry of India in 10N, 36-66.

There are several colloquies in which the speakers are divine beings'; also two in which the agents may be human. viz. the dialogue between Yama and Yami (X. 10) and between Pururavas and Urvasi (X. 95). These hymns foreshadow the dramatic works of a later age! There is Enic material in the Battle of the Ten Kings (VII. 18), in which the great Sudas overcame his allied foes. Among the multitudes of personal names' found in the Rv., especially in the Danastuti hymns, many doubtless have enic significance, if we only knew the facts. On the whole, the average of literary merit in the Rigvedie hymns must be pronounced 'remarkably high's ospecially if one takes into consideration the early date at which they were composed. The noctio endowment revealed in the hymns of the Rv. has continued in India down to the present time, for India is a land of poetry and song,

b) Music. -- Certain musical instruments are mentioned-the drum, flute and lute-as used by the Vedic Indians. The Maruts and the Angirasas are represented as heavonly singers, after the analogy of the earthly. The hymns used in the Soma sacrifico wore certainly chanted by the priests'. Thus Indian musical theory undoubtedly had a religious origin. The love of the people of modern India for music" and song is clearly connected with the musical tastes and aptitudes of the earliest times. The fact that the whole Bigvedic collection is lyric is significant.

¹ IV. 26; X. 51, 52, 86, 108

Macdonell, VRS. XX1III.

[&]quot;These various pricers fall clearly into three divisions, according as their main business was the regulation of hymns to necompany the offering, or the actual manual acts of excribic, or the singing of songs" .- Kelth, Art. I's ist, I's testhood (Hindu), I'BE, X. 312. The Soma bymns are sall chanted to-day by Samaveda Brahmans, but without the accompaniment of sacrifice. See I'ox Strangways, Music of Hindusian-

⁴ See H. A Popley. The Music of India, Calcuita 1921.

c) Painting and Sculpture .- The representation of the human or animal form clearly began in the Buddhistic period, if not earlier . There are two artistic methods. One is to copy faithfully from nature, making only such changes as the ideal seems to require. Such is the Greck method, which kept close to nature. The other is to express symbolically certain ideas. Here in the interests of symholism there is often a wide departure from nature. Such in general is the Hindu method, especially in the later period. The Trimurti figure in the Elephanta Caves has a threefold head. Kall has four arms, Ganesa has the head of an elephant and the hody of a man. The artistic aim in all these instances is not to copy nature, but symbolically to express ideas'. So far as definitely known, there was no painting or sculpture in the Rigyedic period. But there were plenty of ideas scattered through the hymnsideas which challenged artistic expression. Thus Agni, the fire-god, is 'hundred-eyed' or 'thousand-eyed' (L 128, 3; 79, 12), the reference being clearly to his multitudinous points of flame. Purusa, the cosmio man, a pantheistic name for the totality of things, is represented (X. 90, 1) as having 'a thousand heads, a thousand eyes, a thousand feet. Indra. in order to keep up his strength for the Vritra-fight, eats three hundred buffaloes and drinks three lakes of Soma, the thought being that vast accomplishments presuppose vast eating and drinking. As the strong one par excellence Indra is called sahasramuşka, 'thousandtesticled'. Such symbolical numbers determine the character of Hindu art, which is not imitative but symbolical.

¹ "The existence of idols in Vedic trues has been asserted in the cases of a punted image of Rodra, of Narusa with a golden roat of mail, and in the distinction draws between the Marusa and their urasges",—W. Crooke, Junger and Idols (Iradua). FRE VII But that is very doubtful. A new of Istula symbols, probably not in the form of images, may however be admittiol. Cf. Oldenberg, IV. Sr. 5-9.9.

A similar kind of religious symbolism is found in the book of Berelation, e. g. 1, 20, V. 0, etc. as well as in Excitel.

for when the numbers are not too large, they may be expressed on canvas or in stone. A thousand heads cannot be so expressed, but the four heads of Brahma can. Thus the most characteristic quality of Hindu religious art is in deepest harmony with the symbolical representations of the Rv. 1

2. THE RIGVEDA AND HINDU SOCIETY AND HISTORY.

a) Historical names. - A considerable number of words are found in the Rv. which became later the names of historical or semi-historical personages in Hindu story. A few instances may be given: Sita' and Rāma', Rādhā' and Krisna ; and Arjuna . Also the words Sarman 'protection' (III, 15, 5, etc.) and Varman 'mail', casto designations of Brahman and Ksatriya respectively; and the word Suri 'wealthy patron', a caste surname among Jains. Of later divine names which already appear in the Rv. may be mentioned Vişnu, Siva ('gracious', an epithot of Rudra and other gods), Ganapati (an epithet of Brihaspati II. 23, 1), and Bhagavan, 'the blessed one', a later namo for god. Many other words of literary or historical interest might be mentioned as occurring in the Rv. such as vraja 'cow-stall' (origin of the regional name Brail. Mātarisvan, a later namo for 'wind', dāsa 'slave' varna 'colour', 'caste', Kast 'clenched fist' (name of Benaros). ete., etc.

b) Casle. — The sources of Hindu caste have already been traced. It was undoubtedly the sharp antithesis in

¹ Such representations often ravoive ugliness, but "4 should be remembered that all this ugliness is noted in the supermateral powers of the detry are intended to be expressed by these unusurant forms"—Moore, HE 1: 145. But see Macdonell, JJLAS. 1916, pp. 192 H, who finds the motive for the representation of Stra with Bott arms, in the necessity of his identification.

Chapter II. See also Ketkar's History of Caste in India, Ithaca, 1909.

colour, race and religion—especially colour'—between Aryan and Dasyn that led to the extreme rigidity of the Hindu caste system. In this way the Aryan sought to guard the purity of his blood. The movement in the direction of caste rigidity began during the Rigvedic period, for in one of the latest hymns (X. 90, 12) the four fundamental orders are mentioned. Caste forms the very warp and woof of Hindu society down to the present time, and more than anything else marks off Hindu social organization from that of other nations.

c) Pessimism'. - There are practically no traces of a pessimistic attitude toward life in the Ry. There is indeed a pensivo note sounded in the hymn to Usas (I, 113, 10-11) which, while in no sense abnormal, may perhaps be regarded as pointing in the direction of the later pessimism. It looks as if the roots of Hindu pessimism were to be found pertly in the trying climate of India and the gradual fusion of the Aryans with the aborigines, and partly in the doctrines of karma and transmigration, which, while lauded by some as the acmo of philosophie insight, tend to produce in others a spirit of hopelessness. The fact that pessimism is not found in the Ry, is proof enough that its hymnseven the latest of them - were composed prior to the rise of the Brahmana and Upanisad dectrines of Karma and Transmigration and before their outcome in a pessimistic view of life. Thus considered, the hymns of the Rv. are the purest expression on the soil of India of the Aryan spirit 3.

3. | THE RIOVEDA AND HINDU POPULAR RELIGION.

a) Ritual. — The ritual of the Brahmanas was clearly continuous with that of the Rv. The modern ritual of Hinduism is the result of the fusion of two streams, — the

¹ The name for caste is sarpa "colour"

² Oldenberg, RV. 2; Bloomfield, RV, 212, 263-265; Grisnold, LRE Art. Peasionem (Indian)

² Cf. Chapter II. 53, Parquhar, OEIJ, 82.

Aryan geing back to the Rv. and the Dravidian representing primitive indigenous custom. It is difficult to distinguish between the two, since they have become se completely fused. It looks, however, as if temple and imaged were Drevidian in erigin, since neither is definitely and unmistakably mentioned in the Rv. Rigyedie religion was essentially open-air religion—a thing of the grass-strown sward and of the sunken fire-pit. Its temple was the open sky. The theephany of its deities took place not through the appearance of images, but In connection with the blazing up of fire, the resy flush of dawn, the rising of the sun, and the flush and glitter of lightning. The Rigyedie ritual undoubtedly contributed its part to the formation of the complex medern ritual.

b) Mayic. - Religion and magic have always been more or less intermingled - religion that persuades the gods end magic that compels them. Magic is present te-day in every religion, the formula 'In a good day be it spoken', the injunction 'touch wood', and the thought of passing beneath a ladder as unlucky being twentleth century examples in the West. The whole galaxy of lucky and unlucky times, actions and objects is shot through with the view point of magic When the emphasis is upon the ritually exact rather than the ethically correct, then the tendency is enevitably toward a magical conception of religion Such was increasingly the tendency during the transition from the Rigveda to the Brahmanas. At last the sacrifice became greater than the gods, and the priests who manipulated the sacrifice greater than all, The large magical element in the pepular religion of India is derived undoubtedly from Aryan as well as from Dravidian sources. The tendency of recent scholarship has been to emphasize somewhat the place of magic in the Rv.

- c) Priesthood .- As pointed out above, the priesthood in the Brahmana period became the depository of the inherent powers of the gods and the sacrifice. Later on came the great philosophical and religious awakening of the Upanisads. The doctrine of Brahman-Atman added, indeed, a new element to the old, but did not supersede it, at least for the great mass of the people. The Brahman priest would officiate at the popular ceremonies, while heing not infrequently himself a devotee of the now doctrine of the Atman. The temple-priests of later Hinduism are probably not in all cases Brahmans. As temples and images are probably Dravidian in origin, so are at least many of the priests that minister in connection with them'. But the priesthood of modern India, whether Brahman or non-Brahman, may be regarded, so far as it ministers to an Aryan cult, as derived from the original Vedic priesthood
 - d) Austerity: -- This practice which has always played so large a part in Hindu religion has left distinct traces in the Rv., especially in X. 136 (after Griffith with some changes):

To the Munic.

- The hairy one supports the fire, The poison-fluid, and heaven and earth; He is all sky to look upon, The hairy one is called this light.
 - The Munis, girdled with the wind, Wear garments soiled, of yellow hue; After the wind's course follow they, When once the gods have entered them.
- 3. Transported with the ecstasy
 Of Munihood we mount the winds;
 Ye, mortal men, are able now
 To see our bodies and no more.

³ Temple-priests (pūjūrī) are usually illiterate, and are despised by learned Brahmans.

² Tapas, lit. "best".

² Perhaps from man 'to think', 'rave'. G. vipra, from vip to 'shake', 'quake'.

- 4. He flies through regions of the air. Beholding all the various forms,-The Muni, who was made a friend Of every god for ministry.
- 5. The steed of Vata, Vayu's friend, The Muni, by the gods impelled. In both the oceans hath his home. In eastern and in western seas
- 6. Treading the path of sylvan beasts, Gandharvas and Apsarasas, The hairy one knows every thought. Sweet and most stimulating friend.
- 7. Vayu has twirled for him; for him He breaketh things most hard to bend; When he, the hairy one, has drunk With Rudra from the poison-cup.

The Munis, who thus practiced austerity in Vedic days, are like the ascetics of modern times in having long heir, wearing yellow garments, drinking poison-liquids that preduce cestasy, and being taken possession of by the geds. The sun as the long-halred one, the yellow-clothed, the heavenly ascetic wandering through the sky, and the supreme performer of tapas, is the architype of the earthly escetle '.

- 4. THE RIGVEDA AND HINDU PHILOSOPHICAL AND RE-LIGIOUS THOUGHT.
- a) Philosophical Conceptions. The most fundamental of the philosophical concepts of India are brahman, atman, maya, karman and punarjanman. Brahman (nom. neut, brahma) occurs often in the Rv. in the sense of 'sacred formula', 'prayer', 'spell'. It was the inherent potency of the sacred formula, due to a magical' conception thereof, which led finally to the supreme conception of brakman as identical with atman', the 'soul' of the universo.

Yv. 1, 4-6. Cf. Oldenberg, RV. 401, 406; Hillebrandt, LR. 150.

¹ See Hilkbrandt, Brahman ERE, and Grawold, Brahman.

Atman occurs in the Rv. in the sense of breath, wind, soul.

'Brahman is the greatest word in the whole history of Indian philosophy", for 'there is contained in it the religious development of India during thirty centuries. Maya often occurs in the sense of 'mysterious power', the source of the magic transformations that take place in nature. The transition to the later philosophical meaning of 'magic power', 'illusion', 'non-reality', was easy. Karman (nom. neut, karma), as already pointed out, means in the Rv. simply 'work' in general, or more specifically 'liturgical work'. The development of the later meaning of 'fruit of work', 'recompense', was not difficult'. In fact, there is a distinct suggestion of this doctrino in the expression istapūrta (X. 14, 8), the gain which accrues in the life to come from the sacrifices and gifts made in this life. Punarjanman, 'transmigration' does not occur in the Rv. but the participles punal punarjayamana being born again, again, as applied to Usas (I. 92, 10), and navonavo javamanah 'being born anew, anew', as applied to the Moon (X, 85, 19) point in the direction of the later technical torm. In the thought too, of the manas or soul of a dead man as going to the waters or plants (X. 16, 3; 58, 7) there may perhaps be found the germ of the later destrine of metempsychosis". At any rate, 'ro-birth' is not postulated of living beings in the Rv., but only of the recurring phenomena of nature anthropomorphically conceived. (Thus the roots of the fundamental concepts of Hinduism together with the technical names thereof already appear in the Rv. As the most pregnant conceptions of the Rv. aro impersonal, rita 'order', karman 'work', brahman 'word' and maya 'power'; so is it later on in the period of the Vedanta, when the whole realm of being is pre empted by the two great impersonalities', brahman 'reality' and maya 'non-reality'.

Rarman occurs about 40 times in the Rt , but notice in the later sense of the fruit of work". 1 Chap. XI. p. 313.

⁴ Brahman may perhaps be better described as super-personal than as impersonal.

ob) Ethics.—The ethical conceptions of the Rv. are essentially tribal, as is natural in an early stage of society. It was Aryan versus Dasyu. And yet there are hints of a larger sense of duty. For example, the following prayer is addressed to Varuna:

Against a friend, companion, or a brother, A fellow-tribesman, or against a stranger, Whatever trespass we have perpetrated, Do thou, O Varuna, from that release us V. 85, 7.

The supreme ethical concept of the Rv. is that of rita 'orden'. Ethical antitheses are expressed by such contrasted terms as rita (or satya) and anrita 'true and false' sadhu and orijina 'straight and crooked'. The term rita, not withstanding its greatness as an othical concept, finally dropped out of uso—a commentary on the direction taken by ethical thinking—and its connotation was taken up in the later notions of karma and dhorma. This change was not for the better. Rita as embodied in the will of Yaruna was connected with a god of grace, who could pardon sin and restore the sinner to his fellowship. Karma, on the contrary, was the merely mechanical working of the principle of retribution

c) The Forgiveness of Sin. 4 He who is par excellence the ethical god of the Rv. is the one who is supremely concerned with the forgiveness of sin; for, as Macdonell says, 'there is no hymn to Varuna, in which the prayer for forgiveness of guilt does not occur'. Other gods also are represented as forgiving sin, but the references to forgiveness are only incidental and fugitive, whereas this function is contral with Varuna, and, as we have seen, practically every hymn composed in his honour is shot through with the thought of it. Later on Varuna, like all the other gods, was swallowed up in the conception of an impersonal and non-moral world-ground, just as rita was

³ Even up to the present time the world has hardly transcended the stage of tribal morality

^{*} VM. 27.

absorbed in the notion of Karma. From the point of view of the later orthodoxy, Brāhmanical and Vedantic, the forgiveness of sin is impossible. The Rigvedic belief in the forgiveness of sins' was conserved only in connection with the later heterodox and sectarian cults', and even then imperfectly, as a rule, since they have all been more or less influenced by the dominant orthodoxy, which found no place for forgiveness. The doctrine of Karma has ever stood in the way of a belief in the free exercise of the divine grace.

d) Polytheism.—The Rigroda is as frankly polytheistic as Homer's Riad or Virgil's Eneid. Animism, or polytheistic nature worship, lies at the foundation of all of the Indo-European mythologies, Indian and Tranian as well as Greck, Roman and Teutonie. [The hymns to the Allgods (Virce Devalt) present the clearest proof (if any further proof were needed) of the Rigredic polytheism.] For example, VIII. 29: —

 Brown is one, bountiful, of varied form, and young: He wears a golden ornament. (Soma)

Another has, resplendent, occupied his seat,
 The intelligent among the gods. (Agni)

3. Another beareth in his hand a metal axe,

The stremuous among the gods. (Tvastar)
4. Another brandisheth a bolt placed in his hand;

With that he smites and kills his foes. (Indra)
5. Bright, herce, with cooling remedies, another bears

Within his band a weapon sharp. (Rudra)
6. Another makes the paths to prosper; like a thief

He knows the place of hidden wealth. (Püşan)

7. Another, the wide-pacer, makes three mighty strides

To where the gods delight themselves. (Vi;pu)

8. Two fare with birds, together with a female friend, Like travellers they both go forth, (Asvins)

Such as the Valenava and Sasya socia and those founded by Kabir, Nanak, keehab Chandler ven, et. of

Acknowledgment of indebtedness to Hillebrandt Ltt. 98 "), and to Mardonell VES, 147-152.

- The twain on high have made themselves a seat in heaven, The severeign kings, whose drink is ghee. (Mitra-Varuna)
 Of a great chant some singers have bethought themselves;
- By they caused the sun to shine. (Angirasas)

This hymn is in the form of a series of riddles. Each god is described without being named, it being left to the cleverness of the reader correctly to identify each. There are described seven individual gods, two dual divinities, and one group of semi-divino beings. The Rigyedic pantlicon probably represents the gods of different Aryan tribes. Political federation was doubtless followed by religious federation, according to the usual custom in ancient times', Had the O. T. Psalter been constructed after the fashlon of the Ry., it would have contained hymns addressed to the gods of many Semitic tribes' te the various Baalim and to Ashtereth, Molech, Chemesh, Tammuz, et al., as well as to Yahweh. Polytheism and ldelatry, it is true, were not uncommon in ancient Israel down to the time of the Babylonian Exile, 586 B.C. But the authors of the O. T. books were prophets and prophetic historians, who were leval to the exclusive worship of Yahweh. In the chapter oo the Vedic World of Cods and Demons' it was pointed out how we can watch one god, say Prajapati, just rising above the horizon, another like Indra at the zenith, and still another at the sunset time, 'the twilight of the gods', e.g. Trita Aptya. The birth and death of gods has gone on from the Rigvedic period dewn to the present time. One can watch the process of apotheosis in India to-day. Polytheism inevitably means the waxing and waning of gods, a conception sb detrimental to the idea of an Eternal God. And this aspect of modern Hinduism goes back by unbroken sequence to the Rv.

Compare the procedure of Solomon, king of Israel, in introducing foreign gods along with foreign wires. 1 Kings XI, 1-8.

² Cf. Grawold, GVB, 32.

^{*} Cf. Jeremiah VII. 17-18, Erekiel VI & VIII.

⁴ p. 87 ff.

Another defect connected with polytheism is the opportunity it offers for the squahbling of the gods. There is, indeed, less of this among the Rigyedic gods than among the Olympic deities. Still it is present to some extent, especially in connection with Indra, who fell out with his own father, was at odds with Surya, and attacked the wain of Usas1. Such squahbling is inevitable in every promiscuous polytheism; and, as might be expected, the rods of Hinduism down to the present time are not free from it.

el Pantheism - During the latter part of the Rigyedic period there was a steady movement toward unity. This movement assumed two forms, one looking toward monotheism and the other toward pantheism. The clearest expression of the pantheistic point of view is found in the celebrated hymn to Purusa', X. 90, which in the words of Macdonell constitutes 'the starting point of the pantheistic philosophy of India".

1. A thousand heads has Purusa, A thousand eyes, a thousand feet: He holding earth enclosed about. Extends beyond, ten fingers length.

2. Whatever is, is Purusa, Both what has been and what shall be: He ruleth the immortal world, Which he transcends through sacred food. 3. As great as this Is Purusa,

Yet greater still his greatness is; All creatures are one-fourth of him. Three-fourths th' immortal in the heaven.

4. Three-fourths ascended up on high. One-fourth came into being here:

* VES 195

t This squabbling may be only the mythological rendering of natural happenings, such as the thunderstorm's darkening of the sky, blotting out of the sun, and spoiling of the dawn. But the language of primitive myth is sooner or later taken seriously and then the mischief is done, for through the myth is promulgated an unethical conception of God

² Indebtedness is due to the translations of Macdonell, Hillebrandt, Griffith, Scherman (PH, 11-23) and Deussen (AGP, 150-158).

Thence he developed into what Is animate and inanimate.

- From Puruşa was born Viraj, And from Viraj sprang Puruşa;
 When born he reached beyond the earth, Forward and backward everywhere.
- 6. When gods performed a sacrifice With Purusa as their offering, Spring was its oil and Summer-heat Its fuel, its oblation Fail.
- 7. As sacrifice upon the straw They sprinkled Purusa ancient-born; With him the Devas sacrificed, The Sadhwas and the Risis too.
- The Sadhyas and the Rigis too.

 8. From that completely-olfered rite
 Was gathered up the clotted oil;
- It formed the creatures of the air, And animals both wild and tame.

 9. From that completely-offered rite Biggs and Sama-chants were born.
- The metres too were born from that, And all the Yajus-formule. 10. From that were horses born and all
- The beasts that have two rows of teeth; Cattle were also born from that, And from that sprang the goats and sheep,
- 11. Then they dismembered Puruşa How many portions did they make? What was his mouth called, what his arms, What his two thighs, and what his feet?
 - 12. His mouth became the Brāhmaṇa, And his two arms the Kṣatriya, His thighs became the Vaišya-class, And from his feet the Śūdra sprang.
- 13. The Moon was gendered from his mind, And from his eye the Sun was born; Indra and Agni from his mouth, And Yayu from his breath was born.
- 14. Forth from his navel came the air, And from his head evolved the sky; Earth from his feet and from his ear The quarters: thus they framed the worlds.

- Seven sticks confined the altar-fire, Thrice-seven sticks as fuel served, When gods performing sacrifice Bound as their victim Purusa.
- 16. With sacrifice the gods made sacrifices, These sacred usages were thus prineval; These mighty powers attained unto the heavens, Where are the Deities, the ancient Sādhyas.

The Purusa-Sükla is one of the latest hymns of the Rv. It alone mentions the four orders or castes (v. 12) and the three Vedas, if not all four (v. 9). At the same time its fundamental conception, namely the genesis of the world through the sacrificial dismemberment of the world-giant Purusa, is very archaic'. Purusa, 'Men', is declared to be whatever is, has been, or shall be (v. 2), the clearest statement of pantheism in the Rv. The unity of the world, then, is found in the conception of a Cosmic Man, and its multiplicity is traced to the sacrificial dismemberment of the same. The gods performed the sacrifice (vv. 6-7, 15), although it looks as if they at the same time were regarded (rather inconsistently) as the result of the sacrifice (v. 13). The motif is the primeval custom of human sacrifice, while the central place of sacrifice in the cosmic order and the subordinate position assigned to the devas approximates to the point of view of the Brahmanas. Both monism and polytheism exist side by side, as in later Hinduism - the monism of the all-embracing Purusa and the polytheism of the devas. The key to the solution of the mystery of things is found in the conception of the whole of nature as a living organism, the hody of an original Purusa 'Man' or 'Spirit', involving therefore a spiritual interpretation of the universe. The line of thought found in this hymn is prophetic of the great monistic doctrine of Brahman-Atman, the central doctrine of the Upanisads and of the later Vedanta philosophy.

¹ Compare the similar myth of the world giant I mir in Scandinavian mythology.

f) Monotheism', - A true and consistent theism ever presents itself os an ethical monetheism. Varuna represented the nearest approach in Vedic India to the doctrine of monotheism, and Varuna was par excellence the ethical god of the liv. This is no accident but a principle that widely rules. For example, the Zeroastrian reform was at once monotheistic and ethical. The Gathas put no greater emphasis upon the uniqueness of Ahura Mazda than upon the supremacy of the moral law. The monotheism of the O. T. Prophets was set in a context of stern (thical teaching. And the distinct ethical advance of the New Testament accompanied the enrichment of the O. T. doctrine of God. Even the derivative' menothelsm of Muhammad was closely bound up with the fierce proclamation of such morality as he understood and appreciated. But while there can be no true theisin that is not ethical, there may, of course, be important ethical developments, which are more or less diverced from the thought of God'.

The development of on ethical monotheism presupposes ' the work of a prophet or prophets'. It was so la encient Israel as well as in encient fran: it also proved true in the rise of Muhammadanism. In each of these monotheisms the uniqueness of God is emphasized. Yahweh is the 'one' God of Israel . Ahura Mazda, the 'Wise Lord' of Zoroaster, is a unity, although his nature is explicated by the Amesha Spentas, his six or seven attributes or functions Aliah of Muhammad is la-sharlk 'without associate'. There were priests and hymn-writers in the Rigredic period, but ne moralists of the type of Zeroaster and Buddha. If we

¹ See Macalcol, Indian Theism.

² Cf. the Sermon on the Mount, Watt V-VIL

^{*} Executially Judan and Babbinhal

⁴ E. g. those connected with the names of Confucus, Buddha and his rates. This holds true also of certain theistic societies of modern India, such as the

Brahma Samaj founded by Keshab Chander Sen, and the Arya Samaj founded by Davanand barascati. A Deut VI. 4.

¹ See Moulton, TM. 21-35. v. Schreder, AR. 202.

say (as we must) that the penitential hymns addressed to Varupa are the work of men who had something of the spiritual insight of true prophets, we are also compelled to say that the prophetic succession soon ceased. Varupa from being almost a Rigwedie Yahweh and an ethical counterpart of Ahura Marda gradually dwindled into a godling of lakes and pools; and at the same time the sublime conception of Rilo, 'Moral Order', vanished or was swallowed up in the notion of Karma. The spiritual tragedy of the waning of Varupa and of the collapse of Vedie monotheism must not, however, blind us to the significance of the appearance in the Rigwedie age of the conception of a holy god. The Varupa hymns, so Hebraic and penitential in quality, bear witness to the theistic capacity of the Vedie Indians'.

We must distinguish between an ethical and a speculative monotheism. Varuya came very near being the god of an ethical monotheism. As an example of a speculative monotheism, one may cite the Hiranyagarbha-Prajapati Hymn.

To the Unknown God. X. 121.

- The Golden Germ arose in the beginning, Born the sole lord of everything existing; He fixed and holdeftl up this earth and heaven,— Who is the god to worship with obtation?²
- He who gives breath and strength, he whose commandment
 All beings follow, yea the gods acknowledge;
 Whose shadow immortality and death is,—
 Who is the god to worship with oblation?
- He who through greatness hath become sole monarch Of all the moving world that breathes and slumbers;

Macnicol, IT, 24,

³ For the translation compare Hillebrandt, LR, 132 133; Deussen, AGP, 128-134; Scherman, PH, 24-29, Griffith, HR, 566-567, and Griwold, Brahman 25-26, ³ Or, according to the later interpretation "An" (5. c. 'Who') is the god to

worship with oblation; ju other words, Let us worship with oblation the god 'Who', Let the unknown god

Who ruleth over quadrupeds and bipeds,— Who is the god to worship with oblation?

- The one to whom through might these snowy mountains Belong, the sea with Rasā, as men tell us; To whom belong these quarters and the two arms,— Who is the god to worship with oblation?
- 5. He through whom sky is firm and earth is steady, Through whom sun's light and heaven's vault are supported; Who in mid-air is measurer of the spaces,— Who is the god to worship with oblation?
- 6. He to whom look the rival hosts in battle, Sustained by his support and auxious-hearted, When over them the risen sun is shining,— Who is the god to worship with oblation?
- 7. What time the mighty waters came containing Everything germinal, producing Agni, Thence there arose of all the gods the one life,— Who is the god to worship with oblation?
- 8. He who in might surveyed the floods containing Creative force, the sacrifice producing, Who 'mid all gods has been and is alone god,— Who is the god to worship with obtation?
- 9. No'er may he harm us, he earth's generator, He who with order true begat the heaven,
- And gendered, too, the bright and mighty waters, Who is the god to worship with oblation?
- 10. Prajāpati, apart from thee no other Hath all these things embraced and comprehended, May that be ours which we desire when offring Worshly to thee; may we be lords of riches.

Hiranyagarbha means 'the golden germ'. It is described as having generated the waters which contain creative force and everything germinal and which produce fire and sacrifice (vv. 7-9). In vv. 6-7 Sürya and Agni are mentioned, and the whole hymn is rightly regarded as composed in initation of the Sajanasa hymn' to Indra (II. 12). Thus the reference is apparently to fire in its different forms as constituting the one life (asu v. 7) of the gods. There

So Deussen, AGP, 128; and Oldenberg, Rv. Noten II 341.

is emphasis upon the uniqueness1 of the one who alone is worthy of adoration. He is described as the one god above the gods, as the one life of the gods, and as the one creator and ruler of all that is; and finally he is identified with Prajapati', the personification of the creative activity of nature. In X. 121, 10 Prajapati, as Macdonell says' is clearly 'the name of the supreme god'. But Prajapati is simply the anotheosis of the notion of creative activity and seems to be identical with the generative Agni. His cosmic significance is set forth in noble terms, but in no passage of the Ry, is Prajapati connected with the ethical. Thus the othical monotheism of Varuna is succeeded by a speculative monism, which halts between monotheism and pantheism. Prajapati fits into a pantheistic scheme almost as well as Purusa; and with neither Purusa nor Prajapati is polythelem inconsistent. That is to say, in the Rv. polythoism, pantheism and monotheism exist side by side in unstable equilibrium, a condition of things which is reproduced through the whole history of Hinduism's.

Eta 'one', 'sole', vr. 1, 3, 7, 3, 10 We are remanded of the uniqueness of Indea as expressed so often by the same word cha

¹ Prajapati 'lord of creatures' appears twice in the Rv. as an epithei of Savitar (IV 53, 2) and of Sama (IX 5, 9); and in the tenth book, four times as a distinct deir, who became the chief god of the Rehimana negoci.

These, however, do not represent the demanant tendency of Hindu thinking, nor as it acreates that they will permanently resist the tremendom put of orthodox in the case that they will permanently resist the tremendom put of orthodox limitation. It is to be remembered that Hinduban satimitated indum. Building the light?

CHAPTER XIII.

THE FULFILMENT OF THE RELIGION OF THE RIGVEDA

1. Rigyedic religion, as we have seen, belongs most probably to the period B.C. 1500-500'. The proper comparison, then, is between Vedic religion and Hebrew religion as roughly contemporary. The erigins of both are similar. Vedic religion is rooted in the polytheistic nature-worship of the pre-historic IE, world, and Hebrew religion is likewise preceded by the pelytheistic customs and institutions of the pre-historie Semitie world! A truly ethical-which is also a truly spiritual-conception of God is difficult to ettain, and even when attained, is difficult to maintain. Semething of the struggle and ageny involved can be seen by reading the Gathas of Zoroaster, the prophets of the Old Testament, the Apostolic writings of the Now Testament, and the Quran of Muhammad. Ethical menotheism ever began as an unpalateble doctrine, and the prophets and teachers thereof have had to suffer. The tendency has been stubborn toward reaction. monotheism has not infrequently been made really polytheistic, for example in Zaroastrianism through the counterrefermation of the Younger Avesta which restored so many of the eld daevas, and in Roman Christianity as well as in Islam through the aderation of saints. The great catastrophe of the Babylonian Exile (B.C. 586) alone cured Israel of polytheism and idolatry; for only those returned from the exilo who were really loval to the prophetic doctrine of the one holy God.

 During the period of early Hebrew history (up to b.c. 586) the menotheism of the prophets was in unstable equilibrium. Its advocates were nearly always in the

Or reducing the time limit by 500, n. c. 1300 to 500. Macdonell, Hill 7.

² Gf. Robertson Smith's Fundamental Religious Institutions of the Semiles; also Gen. XXXI, 19, XXXV, 2, Joshua XXIV, 2.

with their water to be served at a some contract.

minority, fighting against heavy odds. Besides this, the early Hebrew theism itself was more henotheistic than monotheistic, in the sense that the reality of the gods of other peoples was apparently recognised. As already pointed out, an impartial collection of religious lyrics during the pro-exile period would doubtless have contained almost as miscellaneous and polytheistle a collection as is found in the Ry. Yahweb, like Varuna, might have stood in the midst of a multitude of other gods. These considerations help to place early Vedle religion more on an equality with early Hebrew religion. As the prophetic doctrine of Yahwell, the one holy god of Israel, was the othical and aptritual kernel of Hebrew religion, so the doctrine of Varuon beld the same place in Rigvedic religion. Some fundamental elements of true religion may, indeed, be taught by the coarsest polytheism, for example, the existence, power, manifestation and wonder-working of God; His grace and helpfulness and care for His own; His working in nature and in history; communion with Him in this life and in the life to come. There is much raw material on all there points, found throughout the Rv. In hymns to the most varied gods. The same thing holds true of the polytheism of the Semitic world. Every diffy even of the most chaotic polytheism is, as it were, an organization of the idea of God. But as already remarked (p. 87), only the god of an ethical and exclusive monotheism possesses personality in the fullest sense, that is a personality worthy of the infinite and eternal God.

We have in the Eigvedic pantheon a chaos of deities imperfectly personalized, shading into one another, indefinite in outline, and tending to fusion. If the process of fusion had been brought to a climax, all the gods would have been amalgamated together into one God. Against tills process was the fact that as soon as one god disappeared, another took his place. The waxing and waning of the gods ever went en, the processes counterbalancing each other, so that the pantheon was always full. It is

true, some of the chief gods such as Varuna and Indra greatly execl others in comploteness of personification: nevertholess, not oven these are fully personalized. For if we define perfect personality as an infinite and exclusive personality, in other words, such a personality as is to be found only on monotheistic premisses', then it is clear that not even Varuna can be pronounced completely personalized, since he is confronted with other gods.

Then, too, as stated above, the othical character even more than the exclusive character of a monetheism is what contributes supremely to the personality of deity. Of all the Rigyedic gods ethical quality belongs supremely to Varuna. There is a distinct lack of the ethical except in the Varuna hymns, not of course that it is altogether absent elsewhere but that no adequate place is given to it. It is not a central conception in the Rv. as a whole. The truth of this is supported by the testimony of Deussen, himself, an ardent admirer of things Indian, to the effect that the ethical cloment, in which the real worth of a religion lies, falls in the Rigveda surprisingly into the shade!

This contrast between Varuna and the other Rigvedie gods is highly significant. It means that in the carliest period of the Rv. there was present a worthy candidate for the honours of an ethical and oxclusive monotheism. Such a monotheism in ancient Israel was the result of a stern struggle on the part of the prophets against the Baalim and all the other gods of the kindred Semitie tribes. The Gathas of Zoroaster royeal the othical stress and strain which he passed through before the daevas were east out of heaven and Ahura Mazda exalted to the supreme place. Muhammad had semething of the same experience during . the Meeca period, when, with his back to the wall, he battled heroically against the adversaries of Allah most high. But

¹ See p 87. * AGP, 82.

a similarly streauous ethical temper seems to have been lacking during the Rigvedic period, or at least to have come to large fruition only in the circles that produced the Varuna hymns. Varuna' had nearly all the righteousness and the other deras had what was left. So Varuna ought to have heen exalted, and the other devas, as in Iran, ought to have heen dethroned.

3. In Chapter XII the Rigveda was brought into relation with later Hindu developments. It was there shown that there are many things in the Rv. - literary, artistic, social, philosophical and religious - that are fulfilled in the later history of Hinduism. The question arises: Is there anything in the Ry, in the way of ideal or aspiration that is not thus taken up in Hinduism (that is, adequately), hut rather still awaits satisfaction and fulfilment? To answer this question we must turn our attention again to the majestic figure of Varuna. Here we meet with a series of truly ethical ideas - the conception of the holy will of Varuna and of sia as a transgression of his law; the conception of morality as of the inmost nature of things' and of Varuna as the august witness of the deeds of men; the sense of sin gained through the pressure of disease and affliction, and the consciousness that fellowship with Varuna can be broken; confession of sin to Varuna and prayer for deliverance; and the experience of Varuna's mercy and grace as followed by 'slave-like devotion's on the part of the sinner. It is, of course, not easy, when interpreting these ancient records, to avoid falling into 'the psychologist's fallacy", for one is doubtless often tempted to press unduly

Including, of course, the Adityas, who simply explicated his many-sided personality.

^{1&}quot;Avestan Ahura Mazda and Veduc Varona are the guardians-in-chief of the rta, the cosmic and moral order of the universe and man".—Bloomfield, RV, 232-

G. Chapter V. Varuna the Dhical God

⁴ That is, "reading one's own mind into that of another man without making due allowance for differences of maste capacity and of acquired outlook". R. R. Marett, Psychology and Folliore, London, 1919, p. 228.

such resemblances in phraseology as seem to connect Rigvedic ponitential experiences with analogous Hebrow and Christian experiences. Nevertheless, the consensus of the hest modern scholarship definitely confirms the view that Varuna and the Adityas, whatever the reasons may he. stand in an ethical group by themselves. For example, the late Prof. Oldenberg was so impressed with the ethical tone of the hymns to Varuna and the Adityas that he, for this and other reasons, regarded them as a group of loangods derived from the Semitic world'. Macdonell' asserts that 'there is no hymn to Varuna (and the Adityas) in which the prayer for forgiveness of guilt does not occur'. And according to Bloomfield & Vedic Varuna in his ethical strength has a Hebraic flavour'. To realize the full justice of these statements it is necessary only to read the Varuna hymns translated in Chap, V above, and to compare them with such Psalms as XXXII and LI, and with such passages of the Now Testament as the incident of the Sinful Woman. and the parable of the Lost Son and of the Pharisee and Publican . From these comparisons we see how near Varuna camo to being a Rigvedic Yahweh, 'full of compassion and gracious, slow to anger and plenteous in morey's. It is not too much to say with Bloomfield that "by the side of even the loftiest figure and the loftiest traits of the Hellenio or Teutonic Pantheon 1 Varuna stands liko a Jewish prophet by the side of a priest of Dagon". "And yet," as Bloomfield asks, "what permanent moral strength have the Hindus dorived from Varuna"? Very little as yet, it must be admitted. The lofty conception of Varuna may have

² One might also add- and of the other Rigardie gods,

^{* #}Y. 232.

influenced the formation or development of the various local and shifting theisms1 of India; but, on the whole, it is true that Varuna "has left no really lasting impression on India's religions 2". He has been able neither to furnish the germ and starting point of a truly catholic Indian monotheism, nor even himself to survive in any worthwhile fashion. The pantheistic monism' of the later Rigvedic period continued to wax stronger and stronger, while the figure of Varuna went on waning, until there was nothing left of him, but a godling of lakes and pools, a kind of second-rate Neptune, de-ethleised and almost depersonalized. In the strugglo between the notion of a personal and holy God and that of an impersonal and non-moral world-ground, the victory lay decidedly with the latter. Brahma mounted up into the splendour, while Varuna sank into 'the twilight of the gods'. "If Varuna had provailed, India would have become monotheistic and theocratic, which it nover did". So much for past history, but what of the future? That in the past the impersonal and non-moral brahma has gained the pre-eminence over the personal and moral Varuna proves nothing certain for the future. The odds will doubtless finally be on the side of the truer conception, whichever that may be.

One may assume that the truer conception is represented by Varuna, for there is set forth in him a lofty monotheistic and ethical Ideal,-an ideal, too, which though sorely needed, has up to the present time never been adequately realized in India, but still awaits satisfaction and fulfilment. What if the conception of the Rigvedic Varuua, whose 'Hebraic flavour' is so generally recognised

As an instance of a "lot d and thifting" theism the Deta Samij may be mentioned. The founder began as a Bribms Samin tilest, continued in this attitude for some years after leaving the Brahma Samaj, and finally abandoned theum altogether. See l'arquhar, MRMJ 173 ff.

Panthersie for the literali polythristic for the multitude * Bloomfield, RV. 200.

by scholars, should finally be completed and fulfilled by that of 'the God of Abraham, Isaac and Jacob', 'the God and Father of the Lord Jesus Christ'?

Nor is this all of ancient ideal and aspiration that still challenges and awaits fulfilment. Bound up with the conception of Varuna is that of Rita, 'eternal order'. Over against the later speculative idea of the world as the result of karman and as essentially maya, there is here presented, at least occasionally, the notion of the 'course' and 'order' of things as the product of the will (vrata) of Varuna. Thus the Rigyedic conception of the holy will of Varuua points forward to, and stands ready to coalesce with, the New Testament conception of the hely will of God.

Still another ancient conception is profoundly significont, that of the group of Adityas and Amesha Spentes. As the (sevenfold) Amesha Spentas simply explicate the nature of Ahura Mazda, so do the (sevenfold) Adityas the neture of Varuna. This unity in sevenfold diversity 1 on the part of both Amesha Spentas and Adityes is suggestive of the difference between underlying essence and hypostetic division. Aditi, the mother of the Adityas, seems to express

the common nature of the Aditya-group.

Along with this must be mentioned the triad of Surya in heaven, Agui on earth, and Vayu or Indra in the midair, corresponding to the threefold Vedic division of the universe. According to this scheme the 33 or 33,000,000 gods all reduce to three. These three have a common fiery nature. Surva 'sun', Indra 'lightning' and Agni 'fire'. Agni is a 'descent' (avatara), having been brought from heaven to earth by the lightning and wind. Surya is the 'eye' or theophany of Varuna and Agni is his earthly counterpart and representative. If Varuna occupies ethically the highest place in Rigyedic religion, Agni

[&]quot;The seven Spints" before the thrope of God in Rev I. 4 seem, in like manner, simply to explicate the unity of the one Spirit after the analogy of Isa XI 2.

stands next to him. Agai, while heavenly in origin, is a dweller among men. He is represented as a messenger hetween earth and heaven, as a mediator between gods and men, as a great high priest, the divine and heavenly counterpart of the earthly priesthood, as the one who intercedes with Varuna on behalf of sinners-a thing rendered possible because of his close connection with Varuna, and as the one who himself forgives sin and makes men guiltless before Aditi!. We cannot but recall the New Testament description of the Lord Jesus Christ'. Thus the two most ethical gods of the Rv., Varuna in heaven and Agni his counterpart and in a sense his avalara on earth, are both represented not only as righteous? themselves, but also as making men righteous through the putting away of their sin and guilt. Other Riggedic gods. it is true, are represented as forgiving sin, but only incldentally and easually, whereas this is the essential function of Varuna and (to a lesser degree) of Agni. It is a striking fact that the most ethical gods of the Ry, are just the ones who are most concerned with the foreiveness of sin. When ultimate reality came to be conceived later as an impersonal and non-moral world-ground, then there was no place for forgiveness, but only for the mechanical working of the principle of retribution.

Soma represents another 'descent' from heaven, coming

² rulavas, 'orderly', 'order-loving'.

down in the form of rain, entering the Soma plant, and becoming the Soma juice, the drink of immortality. Thus, like Agni, Soma is heavenly in erigin, but earthly in habitat. Certain points of contact between the ritual of the Soma sacrifice and the Christian ritual of Holy Communion' might have been indicated. Both Agnl and Soma, the two Rigyedic 'descents' were originally the personification and apothoosis of the natural elements 'fire' and 'soma juico'. Before long they were conceived anthropomorphically as gods in the likeness of men. As such they were thought of as descending from heaven in order to dwell in the midst of humanity.

The triple character of Agni as celestial, terrestrial, and atmospheric, constitutes the earliest Indian triad. This is the basis of the post-Vedic resolution of all the gods into ferms of only three gods, which constitute a kind of spatial trinity, Sarya, the fire of the sky, Agni, the fire of earth, and Indra the fire of the mid-air. Vayu, 'Wlnd', is associated with Indra or even made alternative with him. Soma, the ampit of the skies, descends to earth in connection with the lightning and wind. Both Vayu and Soma have points of contact with the Christian dectrine of the Holy Spirlt, On the day of Pentecost (Acts II. 1-4) the descent of the ffely Spirit was marked by the rushing of a mighty wind, by flames of fire, and by a strange and supernatural exhilaration, in Rigyedio parlance by a manifestation of Vayu, Indra and Soma. The two early trlads*, the Rigvedic triad of the three forms of Agni, and the more explicit

post-Vedic triad of Sarya, Agni and Indra (or Vāyu), were anticipations of the later Hindu doctrine of the Trimarti, Brahma, Siva and Visuu. One is reminded of the Christian Trinity. In all of these triads alike the Hegelian law of the three stages seems to hold good-the law of thesis, antithesis and synthesis. Thus the two early triads consist of a heavenly fire as thesis, an earthly fire as antithesis, and the atmospheric fire of the lightning as the union or synthesis of the two. Brahma as creator is the thesis, Siva as destroyer is the antithesis, and Visnu as preserver (at once creating and destroying) is the synthesis. In like manner, as regards the Christian Trinity, God the Father is the thesis, the Son is the antithesis and the Holy Spirit belonging to and proceeding from both the Father and the Son is the synthesis. We may find a real anticipation of, and a preparation for, the Christian doctrine of the Trinity in the Rigyedic conception of Varuna, Agni and Soma, since Varuna, like God the Father, is heavenly, while Agni and Soma, like the Son and the Hely Spirit, are 'descents' from heaven to earth, Such points of contact must not be over-emphasized. Nevertheless the real fulfilment of the Rigyedic conception of the holy and sinpardoning Varuus, of the sacrificial and high priestly Agni and of Some the divine exhilaration and draught of immortality, is to be found in the Christian doctrine of the Father, Son and Holy Spirit, rather than in the later Hindu conception of Brahma, Siva and Visnu, But even the Trimurti may be made to yield something worth comparing with the Christian Trinity: Brahma, like God the Father, is conceived as Creator. Siva is the Sannvast and ascetic god. We are reminded of Him who "emptied Himself, taking the form of a servant", who "though he

¹ It looks as if the Trimurit simply gathered up the chief Hindu cult-objects, Brahma representing the earlier Vedic worship, and Vision and Siva the two 'great sectarian cults' of the later spe.

^{*} Phd H. 7.

was rich, yet for our sakes hecame poor"; and who "had not where to lay His head". Thus the fulness of creative activity and the emptiness of renunciation are expressed both by the Hindu Brahma and Siva and by the Christian Father and Son. The Vaisnava cult has ever expressed itself in joy and ecstasy, in dance and song. We are reminded that "the fruit of the Spirit is joy" and that those that are "filled with the Spirit" speak one to another "in psalms and hymns and spiritual songs,"

In the Tiruvusagam, even a vicarious activity is ascribed to Siva, as set forth in the well-known lines:

"Thou mad'st me thine; did'st fiery poison eat, pitying poor That I might thine ambrosia taste,-I, meanest one".

This is suggestive of the Cross and passion of the Lord Jesus Christ, who became poor that we through His poverty might become riche, who died that we through Ills death might be made alive for evermore. The question arises whether there is any conception in the Rv. of suffering for mankind on the part of delty. There is, indeed, the sacrifice of Purusa*, the cosmic man, from whom the whole creation is said to have sprung. Rev. K. M. Banerjea o makes much of this as having affinity with the Christian dectrine of the sacrifice of the Lord Jesus Christ, . But, while the Lord Jesus went to His sacrificial death with full consciousness and definite purpose. it is difficult to think of Purusa as more than a symbol of pantheistic unity without personal consciousness or power

^{1 2} Cor. VIII. 9

^{*} AW. 10.

of choice. Thus conscious self-sacrifice on behalf of another has a profoundly ethical quality' which can hardly be ascribed to the sacrifice of Purusa, unless that be regarded as a voluntary act of self-emptying for the sake of the universe. Purusa dving, as it were, in order that the whole world might come into being. While, then, the Puruşasukta might suggest the sacrifice of some one having the central cosmic significance of Purusa, there is nevertheless no adequate reason for taking Pnrusa to be more than a symbol covering all that is, and so essentially pantheistic. At most the term Purusa 'man' and the thought of an eternal sacrifice might be regarded as pointing dimly in the direction of "the Lamb slain from the foundation of the world"

In X. 13. 4 occurs a passage* which may possibly be translated as follows:

He, for Gods' sake chose death to be his portion: He chose not, for men's sake a life eternal,

Yama delivered up his own dear body.

(Gruffith after Ludwig and Grassmann.)

If this is a correct translation, the reference may be to a voluntary and sacrificial death on the part of Yama, in order to open up for gods and men a path to heaven. Yama might have had a life eternal upon earth, but he chose death and gave up his body for the sake of others. We are reminded of the Lord Jesus Christ, who laid down His life for His own', rose again from the dead', became 'the first fruits of them that are asleep's and thus 'opened the kingdom of heaven to all believers'.

Animal sacrifices were offered in connection with the

¹ Cor. XV. 3 8.

^{*1} Cor XV 20.

Rigvedic ritual. Besides the sacrifice of bulls, huffaloes and goats' there was the herse-sacrifice and possibly even human sacrifice. If in the Levitical legislation the blood of 'goats and bulls' (Heb. IX. 13) may be regarded as pointing forward to 'the blood of Christ' (id. v. 14), is it too much to take the bloody efferings of the Rigveda as having the same reference and fulfilment? Thus both Hebraic and Rigvedic sacrifices may he regarded as 'a shadow of the good things to come' (Heh. X. 1), as types and symbols of the sacrifice of 'the Lamb of Ged that taketh away the sin of the world' (John I. 29) 7.

In connection with the animal encrifices of the Rv. mention must be made of the yupa or vanaspati, the sacrificial 'post' or 'tree'. Thie is the post to which the animal designated for sacrifice was tied. The sacrifice communicated its sanctity to the post, which alse like fire-sticks, press-stones, and other accesseries of the divine, received a kind of anotheosis. With the praise of the Sacrificial Post to which the animal victim was bound, we may compare the praise of the Cross, often called 'the Tree':

> 'In the Cross of Christ I glory'. When I survey the wondrous Cross,

On which the Prince of glory died"

Again, as the sacrificial post carried with it (in the thought of the Vedic Indians) the gift of wealth, children, splendour. blessing, victory (Rv. III. 8), so the Cross of Christ (in the experience of the ages) has meant health, wealth, knowledge

efficiency, the freeing of the slave, the prohibition of the drink curse, etc., for these things are found wherever God in Christ is best known. And in addition to these temporal by-products of the sacrificial death of the Lord Jesus Christ, there is the supreme experience of 'the forgiveness of sin' and 'the peace of God which passeth all understanding'.

4. The most striking points of contact between Rigvedic doetrine and Hehrow and Christian doctrine are undoubtedly to be found in the field of eschatology 1. There is drawn in the Ry, the ethical distinction between the righteous and the wicked both in character and in destiny. The righteous at death go to the heaven of Yama, a place of blessedness unspeakable, while the wicked are cast into a dark and hottomless pit. So in the Bible Heaven is described as a place of 'fulness of joy' and of 'pleasures for evermore'; a place of 'glory', a state of 'eternal life', a 'kingdom prepared from the foundation of the world'; a place prepared for the redeemed in the 'many mansions' of the 'Father's house', where they will be received by Christ, and will enjoy HIs fellowship for ever !. Similarly Hell is described in the Bible as a condition of 'shame and everlasting contempt'; a state of punishment consisting of 'outer darkness', of 'the eternal fire prepared for the devil and his angels', and of 'the weeping and the gnashing of teeth', the state of those 'for whom the blackness of darkness hath been reserved for ever.3.

Both the Rigyreda and the Bible set forth the luminous nature and environment of the life of the hlessed dead. The Vedie paradise or 'sun-home of the soul' is situated in the lap of the ruddy dawns, or in the highest step of Viyau, the place of the sun at the zenith. There the blessed dead have bedies which are congruous with their

f pp. 314 ff. and 319 ff.

Pr. XVI. 11; LXXIII. 24; Dan. XII. 2; Matt. XXV. 34, 46; John MV.

environment. Likewise both in the O. T. and the N. T. the 'righteous' and 'they that turn many to righteousness' are described as 'shining forth as the sun in the Kingdom of their Father', 'shining as the brightness of the firmament', and 'as the stars for ever and ever'.

According to both the Rv. and the N. T. the blessed dead are furnished in the heavenly world with bodies suitable to their new environment. As the Vedic saint put on a heavonly body, by implication luminous and glorified, so he put off all the blemishes and imperfections of the earthly body'. According to the New Testament the transfigured Christ, His face shining like the sun and His garments being white as the light, was the pledge and pattern of the glorified state of the believer. The promises of Scripture all point to this, 'the hody of our humiliation' being destined to he 'conformed to the body of His glory'. It was the conviction of the Apostle Paul that 'as we have borne the image of the earthly, we shall also bear the image of the heavenly', and that 'if the earthly house of our tabernacle (i. c. our bodily frame) be dissolved, we have a building from God, a house not made with hands, eternal in the heavens'; and the normal Christian attitude was defined by him as 'waiting for our adoption, to wit, the' redemption of the body 12.

Finally, in both the Rigreda and the Bible there is set forth the blessedness of the Divine presence and fellowship. According to the Rv. the sainted dead behold Yama and Varuna and commune with the heavenly ones in the realms of light. The O.T. pictures the state of the blessed dead as one in which they shall behold God's face in righteousness and shall be satisfied, Ho being the strength of their

heart and their portion for ever1. The N.T. picture is essentially the same. The blessed dead are to be where Christ is, in the place which He has prepared for them. They shall see Him even as Ho is and be like Him. 2. A note of yearning is heard in Paul's desire 'to depart and be with Christ?

The points of contact between the Rigredic and the Biblical eschatology are thus very striking. We note in the Vedic doctrine of the future life a further 'Hebraic flavour' in addition to that of the penitential hymns, In proportion as the description of the Rigyedic paradise approximate to that of the Biblical picture of the future state of the redeemed, it is clear that it diverges from the doctrine of transmigration as held in the later Hindu eschatology.

5. As already remarked, the early religion of the Vedic Indians, like that of each of the other Indo-European peoples, Iranians, Greeks, Romans, Celts, Teutons and Slavs, was polytheistic. What hints or suggestions of truth did such a polytheism furnish? In the first place, the Rv. polytheism, so essentially animistic in character, emphasized one fundamental doctrine of true religion, 'namely the omnipresence and immanence of Deity. Nature, especially in its striking phenomena, such as heaven, sun, moon, lightning, wind, rain, etc., was regarded as an apocalypse of the Divine. We may compare Ps. XIX, 1:-

> The heavens declare the glory of God And the firmament showeth His handiwork.

Then too the fact has already been pointed out in connection with the description of each deity, that there is much raw material in the Rv. on such important topics as the following: the existence, manifestation, power, wonder-working, justice, grace and helpfulness of God (or

¹ Ps AVII. 15; LAXIII 26. John XIV. 3; 1 John HL 2.

⁵ Phil. 1 23. Cr the sumlar note in R. 1, 154, 5.

gods); God as the lord of naturo and of battles; the correlation of grace and faith; repentance, confession, and the forgiveness of sin; communion with God, God's caro for His own, and the future life. Thus even in connection with a polytheistic and not fully othicised conception of Deity, it is clear that the Vedic Indians had some light, the Eternal God not having left Hisself without witness among them. We may thankfully acknowledge every gleam of spiritual illumination which the hymns of the Rv. reveal, in particular the picture of the gracieus and sinpardoning Varuna.

The Rigredie polytheism, as we have seen, was in unstable equilibrium, with a tendency toward monotheism on the one side, toward Pantheism, on the other. Early Iranian polytheism through the influence of the Zoroastrian reform issued in something very similar to an ethical monotheism, while early Vedie polytheism, in tha absense of a prophetic personality like Zoroaster, issued finally in pantheism. The pantheism thus chosen did not altogether negate oither polytheism or monotheism, but suffered them te remain as unripe views suitable for those regarded as immature.

6. We may glance finally at a notable modern attempt to find a strict and consistent monotheism in the Rv. Swāmi Dayānand Sarasvati* (1824-1883) looked out on the religious life of India and saw two foreign monotheisms, both of Semitie origin, namely Christianity and Islam, which were growing relatively faster than Hinduism*. He noticed that each had a compact and definite creed, so

¹ Lajpat Rai, Arya Samof, 250 fl.; Griswold, Art. Arya Samaj, ERE. II.

³ This still continues. According to the Census of 1921 the increases in population in the Indian Empire during the decade 1911-1921 together with their percentages for Hindus, Muhammadans, Buddhusts and Christians respectively are as follows.—

different from the chaotic condition of things in Hinduism'. It was obviously only a question of time for these foreign creeds to win the day in India, unless the adverse tide were checked. In order to effect this, he saw clearly that an indigenous monotheism having the same virility and militant character as Islam and Christianity must either He felt that it must be a he discovered or created. distinctly Indian monotheism, not like the Brahma Samaj with its striving after an international platform and an all-embracing creed. The many gods of the Rv. were, accordingly, interpreted as different names for the one God and the unity of Hindu pantheism' was conceived monotheistically. He observed that both Islam and Christianity permit widow-remarriago and that as a result the ratio of their increase is superior to that of Hinduism. Without interfering with the Hindu prejudice against the romarriage of widows, he provided a plan against the loss of population thereby entailed, viz., the doctrine of nivoga, by which widows could be utilized apart from marriago for the propagation of offsprings. A brief ereed in the form of 'ten principles' was elaborated to serve for purposes of religious propaganda. An Indian theism was thus produced with a short and definito creed (or more exactly with a creed within a creed), to oppose the foreign theisms, Christianity and Islam. It left almost everything intact in Hindulsm except polytheism and idolatry. These things were not found in the foreign theisms, nor in tho

1/8 160 See also Deut, XAV, 5-10, Gen. XAXVIII. 8.

⁴ This creed top, cat, v, 101 tf.) is we collevate and general that almost any thest on the face of the earth neight soles rick is it, if he were allowed to put his corn interpretation on article 2. It looks as if this creed were promarily intended for the purpose of foreign propagately, the real working creed of the Arya Samiy resource of the difference technique of Davisands (c) etc. 51 (f).

Vedas as interpreted by Swāmt Dayānand, hence must not be found in the new-born Indian theism. Swāmt Dayānand guessed correctly that for a time at least the average educated Hindu would prefer to join such a theism as the Ārya Samāj rather than one or the other of the foreign theisms. In doctrine and polity Swāmt Dayānand kept so close to orthodox Hinduism that there was no violent break in passing over from the Sanātan Dharma to the Ārya Samāj. This all represents an extremely elever attempt on the part of Swāmt Dayānand.

It would have been possible for the founder of the Arya Samaj to have constructed a distinctively Indian theism on the basis of Varuua, the most ethical and theistic of all the Vedic gods, thus linking up Indian with Iranian theism' and providing a possible line of approach to the Parsee Community. But this would not have promised the immediate results which he desired, and besides would have required a type of scholarship and a critical neumen which he did not possess. There are so low references in the Rigredadibhasyabhamika to the Varung hymns that, in view of their lofty spiritual quality, one cannot but feel that Swann Dayanand did not find the 'Hebraic flavour' of these bymns quite to his taste'. To overlook the theistle and ethical significance of Varuna is as if one were to pass by the prophecy of Isaiah and concentrate one's attention upon Esther and Ecclesiastes.

Notwithstanding these and other defects which might be pointed out, Swami Dayānand succeeded in founding an indigenous Indian theism non-polytheistic and nonidolatrous, right in the very home of pantheism, polytheism and idolatry. This was certainly a notable achievement. If in reducing the multiplicity of Rigwedie gods to one God, he committed a sin against the critical conscience,

Varuna originally the same as Ahura Mazda

In the Vedic stances quoted by Lapest Rol (op. cit. 117 if) as furnishing a basis for a monotherem "of the highest, most exclusive and most exalted kind", there is not a single quotation from any hymn to Varuos and the Adityss.

this much may be said on his behalf that the logical goal of polytheism is monotheism1; and further that a modern political and religious reformer, while oven granting that for the consciousness of the Vedic Indians there were 'gods many and lords many', might yet be permitted for nationalistic purposes to hold that 'instead of issuing in pantheism3 Vcdism ought to have issued in a clear-cut and definite monotheism", and hence for all practical purposes did so issue. The Society founded by Swami Dayanand has drawn a large number of educated Hindus out from the influence of pantheism, polytheism and idolatry, has set before them the worship of one God, and has instilled into them a strenuous and optimistic spirit. respects the Arva Samui is akin to Christianity and Islum, and is to be reckoned among the important theisms of the world. One may cherish the hope that with the increasing knowledge of sound methods of research the Arya Samai may he led to make a more searching and critical examination of the foundations of its faith as laid in the ancient literature. It is reassuring to be told that 'the Arya Samāi does not claim infailibility" for the Vedic translations, commentaries and (hy implication) theology of its founder Swami Dayanand Sarasvati, This apparently leaves the way open for profound changes to he made in the future.

7. CONCLUSION .- To sum up in brief. While certain aspects and teachings of the Rigveda, such as its dominant polytheism, its incipient pantheism, and its increasing tendency toward an abstract and non-ethical intellectualism find their fulfilment in the later Hinduism, there are other aspects of Rigvedic teaching which point rather in the direction of Christianity, such as the monotheistic and ethical Varuna, the high-priestly and mediatory Agni, the

Pantheism for the literate, polythesses or at most an unstable monother m for the multitude.

³ p 110.

Lappat Bai, op. cut 97.

emphasis on the forgiveness of sin in connection with Varuna and the Adityas, and the doctrine of the last things-heavenly home, luminous body, beatific vision, etc., etc .- so different from the later doctrine of transmigration. In view of this latter group of conceptions and a-pirations, which have had no adequate fulfilment in Hinduism, but have such obvious points of contact with Biblical religion, Farquhar is justified in saying that "this early faith stands much nearer to Christianity than It does to Hinduism". and that "the religion of Christ is the spiritual crown of the religion of the Rioreda'. For the same reason K. M. Banerica' writes that "if the authors of the Vedas could by any possibility now return to the world, they would at once recognize the Indian Christians far more complacently as their own descendants than any other body of educated Indians"

It is a fundamental truth that God has never left Illuself without witness in any age or among any people, for the things that are seen attest the existence of the unseen God, the 'rains and fruitful seasons' bear witness to Ilis beneficence, and to some extent the operations of conscience reflect His will and make mainfest His law'. Thus there is a light that lighteth every man that cometh into the world', the light of intelligence and reason, the light of conscience, the light that springs from the fact that we are made for God and that our hearts are restless until they rest in Him' As by divers portions and in divers manners' God spake to the Hebrews through their prophets', so He spake, though less clearly, to the Vedic

⁴ John I. 9. a Angustine.

⁴ For the Christian attainde to the Old Testament see the following excellent statement by Dr. Farqubar, (H. 51 32. "Jenus acknowledged that the faith of luzel was from God, yet declared that He had been sent to transform it into a

Indians through their Risis and Munis, giving to both peoples more or less clear intimations of His nature and will, and making the very light which they received, however broken and partial, prophetic of a perfect illumination yet to come. For to both peoples alike, yea to all peoples, God's final revelation is in and through His Son the Light in whom all lesser lights are gathered up and made complete. Thus we of the twentieth century possess much more light than did the people of the earlier ages. We shall do well to take heed lest the very abundance of the light we enjoy be our condemnation, if we fail to use it as we ought, and lest the men of the Rigvedic days rise up in the judgment with this our generation and condemn it'; for the Vedio people had at most a vague conception of God, a sense that He is immanent in all tho

new religion. This was possible, because He knew that God's method of revelation is not the presentation, once for all, of a complete system of truth expressed in a book from all eternity, but a gradual and historical process. The semple beginnings of the faith of Israel are laid before us in the Book of Genesis; they grow before our eyes in the narratives of the other books of Moses; and they find still richer development in the Prophets and the Psalms. But even in them God's will is not completely revealed. Hence, to Jesus, the religion of largel was given by God, but not given in permanency. It was God's instrument for the training of Israel He came to crown it by transforming it into the religion for all men, and to crown its knowledge of God by revealing Him as the father of men

Thus the principle of living growth, of progress and development, is set before us in visible form in the Christian Scriptures The Old Testament is the bud; the New Testament is the flower. But, though the whole of the Jewish Scriptures are contained in the Christian Bible, they are not used by the Christian as they were used by the Jew. The whole of the Old Testament is retained, but it is read through Christ For the Jew the whole is binding; for the Christian it is building only in so far as it is in consonance with the Spirit of Christ. The Christian does not obey the Laws of Moses, though these are all contained in his sacred book. He does not offer united sacrifice, not abstract from the ancient toods of the law, nor cureumeuse ins male children. The institutions of the old law were necessary for the childhood of the world. They are pictures, symbols prophoses, but the reality is Christ." . Heb 1 1.2

¹ Loke XI 31-32; Matt. XI. 21-24

operations of nature and of life, but, dim as was the light they had, they invortheless sought after God, if haply they might fool after Him and find Him'; and behold a greater light' has shined upon us than ever illumined the sages of the Vedic ago, even the light of Him who is 'the light of the world'.

Like the gleaming of the Himalayan snows to the traveller on the plains is the morning beauty of the Rigyeda, more attractive, if possible, to our hearts than the dazzling splendour of the Hemeric peems. It is the whole of the picture—the people, the poetry and the faith reflected in it—that captivates our hearts,

But there is a tragedy in the Rigveda. Every student recognizes that the noblest element in the Rik is Varuna; creator, sovereign, all-knowing, all-seeing mind, source of order both cosmic and moral, from whose hely will spring the ordinances that govern all the powers of nature and also the moral and religious life of man, God of righteousness, mercy and grace, who punishes the stubborn sinner, releases the sinner who repents and seeks a nobler life, and holds happy and loving communion, in personal friendship, with the righteous man. There is nothing else in the Rigveda comparable with that. Yet, before the end of the Vedic period, Varuna had become a petty godling, lord of the waters; and all the priceless promise of that early faith had been completely lost to India. We need not ask what caused his fall. Every serious mind must recognize that we have here a religious tragedy of the utmost gloom and disaster.

But the tragedy is not the end of the story. A few centuries after the close of the Vedic age, there appeared in Palestine a religious leader worthy to be recognized at once as the Hoir and the Consummator of the heritage of

Acts. XVII. 27. .

a John III. 19 21.

John VIII- 12

Varuua. Born a Jew, he drank from his parents and from the Old Testament the nohlest elements of the religion of Israel. He learned to know God, the eternal One, creator and sovereign, all-seeing and all-knowing Lord, whose holy character and will form the source of Man's moral and spiritual nature. Too pure to tolerate iniquity, He punishes the rebellious, yet He calls the sinner to repentance, and welcomes the penitent to His grace, His love and His friendship. He had nourished and cherished the people of Israel with infinite patience and tenderness, and had trained them to he His witnesses and preachers among all the races of the world. Here is the teaching of Varuna carried a step further.

From His boyhood Jesus knew God in his own experience as his Father; and the foundation of all his teaching was this, that God is the loving Father of every human being. He went far beyond the Old Testament. His teaching is for all men, and is in such form as to suit men of every race and temperament and clime. He spoke of the love of God as infinitely faithful and tender to every child of the race; and in his own life and death he shewed forth all the active love, tenderness, invincible patience and willingness to suffer for others, which be know characterized his Father. The gospels, which bring us his life and teaching, reveal to us the holiest, tenderest, loftiest character ever seen on earth. His death on the Cross-a death which Jesus voluntarily accepted as being his Father's will -- exhibits, in one unforgettable scene, the holy one dying to wean men from sin to repentance and God, immeasurable love giving up all for the sake of those who in loving sin do not love God, the Son expressing, in his sufferings and death, the anguish of the Father over His erring children. Here the grace and forgiveness of Varuna find their clearest exposition and an immense and glorious extension. If the hymns to Varuna proclaim real truth, then the teaching and the death of Jesus exhibit to the whole world the full truth on those mighty themes. In THE FULFILMENT OF THE RELIGION OF THE RIGVEDA 375 the light of the Cross, in the most touching scene in the whole world's history, we may repair the disaster of the tragedy of Varuea.—Can India, then, afford to do without

the crucified Jesus?
